## MA335F — MAJOR HOUSEHOLD APPLIANCES (SHIPMENTS)

### DEFINITIONS AND SPECIAL INSTRUCTIONS

#### 1. Scope of survey

This survey covers manufacturers of major household appliances and selected parts in the United States.

#### 2. Figures to be reported

Companies with more than one establishment manufacturing the products covered by this survey are requested to complete a separate report form for each location. If you have not received a separate form for each of your establishments, please call the contact listed on the report form or write to the U.S. Census Bureau for additional forms.

##### a. Quantity and value of shipments

The figures on quantity and value of shipments should include the physical shipments of all products sold, transferred to other establishments within your company, or shipped on consignment, whether for domestic or export sale. The value represents the net sales price, f.o.b. plant, to the customer or branch to which the products are shipped, net of discounts, allowances, freight charges, and returns. Shipments to your own branches should be assigned the same value as comparable sales to unaffiliated customers, i.e., the value includes an appropriate allocation of company overhead and profit. Products bought and resold without further manufacture should not be included in shipments.

Include products shipped from your plant with private brand names as well as products shipped under your own company brand name.

Do not include the quantity and value of electric appliances received from other manufacturing establishments which are repackaged for resale by you.

Do not include any imports which are sold by your company whether the product is your brand or a private brand.

##### b. Columnar structure of report

When entering your figures on the original report, please be sure to report the information in the correct columns. These are:

Column 1 — Quantity  
 Column 2 — Value (report shipments in thousands of dollars. Example: \$1,000,000, report as \$1,000)

#### 3. Definitions

The product detail for this survey as shown in the Reference List, is defined according to standard nomenclature for this industry.

Household Laundry Machines — "Household" type machines are defined as having a dry linen capacity not exceeding 10 kg (22 lbs.). Machines with larger capacities are considered "commercial" and are classified in NAICS industry 333312, "Commercial Laundry Equipment."

#### Abbreviations and Metric Conversions

cm = centimeter	1 inch = 2.54 centimeters
L = liter	1 gallon = 3.785 liters
kg = kilogram	1 kilogram = 2.205 pounds
lbs = pounds	1 liter = 0.0353 cu. ft.
Cu.ft = cubic feet	cu. ft. = 28.316 liters
n.e.c. = not elsewhere classified	

#### 4. Comparability

Data reported in this survey should correspond to data reported in the Annual Survey of Manufactures form. The sum of values for item codes shown in column (a) should correspond to dollar values reported under product class codes indicated in column (b) below.
