Summary:

The following 328 reports are available for purchase through publication-on-demand in Denver. Each of these is a DVD video disc (that one would play on a television set). They were made by transferring to DVD the old tapes that were made of the ocean floor under President Reagan's Exclusive Economic Zone proclamation of 1983. These data cost millions of dollars to collect and it took Hank, Ivy, Hank's daughter Sarah, and Mike Diggles a couple years to get them transferred, copied, and labeled. There are now five copies of these 328 discs in existence: Menlo Park library, Denver Library, Reston Library, Denver Open-File Reports warehouse (masters from which to make copies for customers), and Hank's CMG team archives. I would estimate that we broke the tarabyte threshold on this one.
