**Subject:**

dear sirs, **i'm writing to you ,because of the new black lung rules you are**  
thinking of putting into effect. i feel that we woud be better served if you would make the dust standards less instead of more.  
i also feel that the direct dust moniter with continouis monitering would be good as you could tell what was happening at all  
times. thank you very much for your time. ron hamplernan
