Organization: fish and wildlife service

General Comment

I read that the Bush administration wants to make a policy change in regards to the Endangered Species Act that would effectively give government agencies the power to make decisions that by-pass the scientific considerations of the Fish and Wildlife Service. I am absolutely against this gutting of the ESA. It is another egregious example of the administration's anti-environment, and anti-science position that has already caused great damage to our country. Do not let this happen.
