Fisheries of the Exclusive Economic Zone Off Alaska; Improved Individual Fishing Quota Program

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues a final rule to amend regulations implementing the Individual Fishing Quota (IFQ) Program for the Pacific halibut and sablefish fixed gear fisheries in and off Alaska. NMFS has identified parts of the program that need further refinement or correction for effective management of the affected fixed gear fisheries. This action is intended to effect those refinements and is necessary to further the objectives of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) with respect to the IFQ fisheries.

DATES: Effective June 20, 2001, except for the gear type data element of §§ 679.5(l)(2)(vi) and 679.42 (j)(6), which are not effective until the Office of Management and Budget (OMB) approves the information collection requirements contained in those sections. NMFS will announce the effective date for those sections by publication in the **Federal Register**.

Comments on the information collections must be received by June 20, 2001.

ADDRESSES: Copies of the Regulatory Impact Review/Supplementary Final Regulatory Flexibility Analysis may be obtained from Sue Salvesson, Assistant Regional Administrator for Sustainable Fisheries, Alaska Region, NMFS, Room 453, 709 West 9th Street, Juneau, AK 99801, or P.O. Box 21668, Juneau, AK 99802, (Attn: Lori J. Gravel). Send comments on the information collections to NMFS and to OMB at the Office of Information and Regulatory Affairs, Office of Management and

Budget, Washington, DC 20503 (Attn: NOAA Desk Officer).

SUPPLEMENTARY INFORMATION:

Background

Regulations codified at 50 CFR part 679 implement the IFQ Program, a limited access system for management of the Pacific halibut (*Hippoglossus stenolepis*) and sablefish (*Anoplopoma fimbria*) fixed gear fisheries in and off Alaska, under the authority of the Halibut Act with respect to halibut and the Magnuson-Stevens Act with respect to sablefish. Further information on the rationale for and implementation of the IFQ Program is codified in the final rule published in the **Federal Register**, November 9, 1993 (58 FR 59375).

NMFS' continuing assessment of the IFQ Program's responsiveness to conservation and management goals for Pacific halibut and sablefish fisheries has produced two "omnibus" packages of IFQ regulatory reforms since the inception of the program (60 FR 22307, May 5, 1995; 61 FR 41523, August 9, 1996). This final rule, the third such "omnibus" package of regulatory changes to the IFQ Program, amends various portions of the program's implementing regulations. These changes are necessary to promote the ability of fishermen to conduct IFQ fishing operations more efficiently, to enhance NMFS' ability to administer the program, and to improve the clarity and consistency of IFQ Program regulations.

This final rule makes the following changes to the IFQ regulations: (1) In § 679.1 *Purpose and scope*, adds an explicit reference to the Halibut Act, under which regulations in this part regarding the Pacific halibut fishery were developed, and in § 679.1(d) revise "IFQ management plan" to read "IFQ management measures" to prevent any inference that the IFQ Program is itself a "fishery management plan" as that term is used in the Magnuson-Stevens Act; (2) amends the requirements for IFQ fishermen participating in open-access sablefish fisheries in Alaska State waters; (3) adds nomenclature to reflect organizational changes in NMFS' Restricted Access Management (RAM) program; (4) amends the definition of an IFQ landing to include vessels that are removed from the water and put on trailers; (5) removes the reference to an "accompanying statement" establishing IFQ balances; (6) adds an exemption for lingcod fishermen using dinglebar gear from the IFQ 6-hour prior notice of landing and 12-hour landing window requirements; (7) adds gear type to the

information required on a completed IFQ landing report; (8) amends the information required for a shipment report to clarify which registered buyer, in landings involving multiple registered buyers, is responsible for compliance with shipment report requirements; (9) makes minor corrections to errors arising from the consolidation of regulations; (10) amends the survivorship transfer provisions to allow the temporary transfer of a deceased QS holder's QS and IFQ to a designated beneficiary and revise a paragraph on an IFQ leasing provision that expired in 1998; (11) amends the limitations on the use of QS and IFQ to require annual updates on the status of corporations, partnerships, and other collective entities holding QS; (12) amends the submission of appeals to allow appeals to initial administrative decisions to be submitted by facsimile machine; and (13) amends reporting requirements for consistency with the Paperwork Reduction Act (PRA).

A detailed discussion of each of these changes may be found in the preamble to the proposed rule published December 14, 2000, at 65 FR 78126.

NMFS invited public comment on the changes contained in this action through January 16, 2001. No comments were received, and NMFS publishes this rule unchanged from the proposed rule.

This rule revises regulations pertaining to certain IFQ forms and reports to clarify further the data required of the public in these collections of information. Two of the collections of information contained in this final rule have not yet been authorized by OMB pursuant to the PRA. The pertinent collections of information are the addition of "gear type" to information required in a completed IFQ Landing Report at § 679.5 (l)(2) and the addition of a requirement that a corporation, partnership, and other collective entity holding QS submit annual updates on the status of the collective entity as such at § 679.42 (j)(5).

Classification

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act (PRA), unless that collection displays a currently valid OMB control number.

This final rule contains collection-of-information requirements subject to the PRA and which have been approved by OMB under OMB control number 0648-0272. These requirements and their

associated burden estimates per response are: Landing Report (12 minutes); request for QS Application (30 minutes for an individual, 1 hour for an existing corporation, 2 hours for a dissolved corporation, and 2 hours for a vessel); IFQ Vessel Clearance Report (12 minutes); IFQ Shipment Report (18 minutes); IFQ Transshipment Authorization Request (12 minutes); QS Designated Beneficiary Form (1 hour); QS/IFQ Transfer Application (2 hours); and Letter of Appeal (4 hours).

This rule also contains new collection-of-information requirements, which have been or will be submitted to OMB for approval, and which are not effective at this time (see the **DATES** section). These two requirements are the addition of a gear type data element to the landing report (not expected to alter the estimated 12 minutes response time for the report) and a new requirement for annual updates of identification of current shareholders or partners (30 minutes).

Comments are invited on (a) whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have a practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collections of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collections of information on respondents, including through use of automated collection techniques or other forms of information technology. Send comments on these or other aspects of the information collections to NMFS (see **ADDRESSES**) and to OMB at the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 (Attn: NOAA Desk Officer).

Other collections of information in this rule have been approved by the OMB under OMB control number 0648-0272. These new information requirements comprise the following additions and revisions to the IFQ recordkeeping and reporting requirements: Request for QS Application; IFQ Vessel Clearance Report; IFQ Shipment Report; IFQ Transshipment Authorization Request; QS Designated Beneficiary Form; QS/IFQ Transfer Application; and the Letter of Appeal.

NMFS prepared a final regulatory flexibility analysis to describe this final rule's potential economic effects on small entities. The reporting burden of this action is identified in this final rule. Seven changes were made to clarify the

regulations and improve regulatory language to avoid potential confusion for the affected small entities. Allowing QS holders to designate a beneficiary to receive temporary transfer privileges provides a benefit to the families of QS holders with a minimal burden of filling out an application form. Allowing administrative appeals to be submitted by facsimile machine will reduce the burden of submitting an appeal on the affected families. Requiring an annual update on the status of corporations, partnerships, or other non-individual entities is necessary to ensure that QS are not erroneously issued because of changes in these non-individual entities, which requires an increase in the burden to such entities because of annual submissions. Requiring the addition of gear type to landing reports is necessary for the management of the IFQ program, which is limited to certain gear types, makes a negligible increase to the burden of QS holders. Extending the exemption to the 6-hour prior notice of landing report and the 12-hour landing requirements to lingcod dinglebar gear troll fishermen will make it easier for them to land small incidental catches of halibut. Prohibiting the removal from the water of a vessel containing IFQ harvests enhance NMFS' monitoring IFQ landings to ensure accurate accounting of harvests against QS balances will cause inconvenience to some IFQ fishermen by requiring a 6-hour delay before offloading their harvest at the dock. The amendments to this final rule are expected to have minimal impact on the 1,677 unique persons holding halibut QS and the 897 unique persons holding sablefish QS, all of whom are assumed to be small entities.

This final rule has been determined to be not significant for purposes of Executive Order 12866.
