May 2008

### The U.S.-Panama Trade Promotion Agreement Provides Enhanced Market Access

The U.S.-Panama Trade Promotion Agreement (TPA) offers tremendous opportunities for West Virginia's exporters. Panama's strategic location as a major shipping route and the massive project underway to expand the capacity of the Panama Canal enhance the importance of the U.S.-Panama TPA for West Virginia's exporters.

When the Agreement enters into force, 88 percent of U.S. consumer and industrial exports to Panama, including nearly all information technology products; aircraft and related equipment; agriculture and construction equipment; medical and scientific equipment; environmental products; pharmaceuticals; fertilizers; and agro-chemicals will become duty-free immediately. The remaining tariffs phase out over 10 years. U.S. farmers and ranchers will also become much more competitive, benefiting from immediate duty-free treatment of more than 60 percent of current U.S. agriculture exports. Key U.S. agriculture exports such as high-quality beef, other meat and poultry products, soybeans, most fresh fruit and tree nuts, distilled spirits and wines, and many processed food products, will be duty-free upon entry into force of the Agreement. Tariffs on most remaining U.S. farm products will be phased out within 15 years.

### Opportunities for West Virginia's Businesses to Participate in the Panama Canal Expansion Project

The U.S.-Panama TPA will ensure that West Virginia's firms can participate on a competitive basis in the \$5.25 billion Panama Canal expansion project that will offer many opportunities for U.S. providers of goods and services. Ultimately, the Canal expansion will benefit West Virginia's exporters by increasing the Canal's capacity, which will reduce the costs of transporting goods while keeping up with the demands of a growing global economy.

### West Virginia Depends on World Markets

West Virginia's global export shipments of merchandise in 2007 totaled \$4.0 billion, a 67 percent increase since 2003.

### Exports Support Jobs for West Virginia's Workers

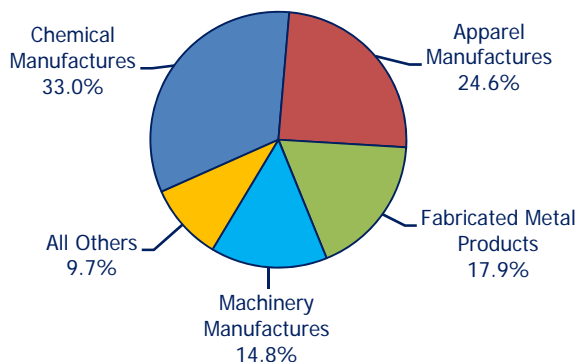

Export-supported jobs linked to manufacturing account for an estimated 3.7 percent of West Virginia's total private-sector employment. Over one-sixth (17.0 percent) of all manufacturing workers in West Virginia depend on exports for their jobs. (2006 data are the latest available.)

**Exports Sustain Hundreds of West Virginia's Businesses** – A total of 718 companies exported goods from West Virginia locations in 2006. Of those, 514 (72 percent) were small and medium-sized enterprises, with fewer than 500 employees.

### The U.S.-Panama TPA Expands U.S. Services Providers' Access to Panama's Services Market

The U.S.-Panama TPA expands U.S. services providers' access to Panama's primarily service-based economy. The Panama Canal and the Colon Free Zone provide much of the stimulus for Panama's services sector. Key services include banking and financial services, accounting, legal and insurance services, inter-modal transportation services, container ports, flagship registry, tourism, and medical and health services. Panama made substantial commitments to liberalize its services trade. For example, Panama committed to open its telecommunications and financial services sector to U.S. companies, to lift restrictions on investment in retail services trade and to provide new access to professional services that previously had been reserved exclusively to Panamanian citizens.

### West Virginia Exported \$265 Thousand in Goods to Panama in 2007

## The U.S.-Panama TPA Moves the Trade Relationship from One-Way Preferences to Reciprocity

In 2007, 91 percent of Panama's exports to the United States entered duty free either on a Normal Trade Relations basis or through unilateral U.S. trade preference programs such as the Caribbean Basin Initiative and Generalized System of Preferences. Because of high Panamanian tariffs, U.S. exporters do not have equivalent access to the Panamanian market. The U.S.-Panama TPA levels the playing field and enhances competition because it moves the U.S.-Panama commercial relations beyond one-way preferences to full partnership and reciprocal commitments.

## West Virginia's SMEs Will Benefit from U.S.-Panama TPA Provisions

SMEs generated 11 percent of West Virginia's exports of merchandise in 2006. SMEs particularly benefit from tariff-eliminating provisions of free trade agreements (FTAs) and should benefit from significant tariff cuts under the U.S.-Panama TPA. The transparency obligations, particularly those contained in the customs chapter, are also very important to SMEs, which may not have the resources to navigate customs and regulatory red tape.

## The U.S.-Panama TPA Opens New Markets for West Virginia's Exports

**Chemical Manufactures** – In 2007, West Virginia's global exports of chemical manufactures totaled \$1.5 billion, a 30 percent increase from 2003 to 2007. Exports of these products account for 37 percent of West Virginia's total manufactured exports. West Virginia's exporters of chemicals and related products, including pharmaceuticals, cosmetics, fertilizers, and agro-chemicals, will benefit from U.S.-Panama TPA tariff reductions. Eighty percent of U.S. chemical exports will receive duty-free treatment immediately upon entry into force of the Agreement, including fertilizer, resins, and soda ash. Remaining tariffs will phase out within ten years. Current Panamanian tariffs average 3.5 percent and can be as high as 15 percent.

**Transportation Equipment** – In 2007, West Virginia's global exports of transportation equipment totaled \$478 million, a 100 percent increase from 2003 to 2007. West Virginia's exporters of transportation equipment including aircraft, autos, and other transportation equipment, will benefit from U.S.-Panama TPA tariff reductions. One hundred percent of U.S. aircraft and related equipment exports will receive duty-free treatment immediately upon entry into force of the agreement. For motor vehicles, 55 percent of U.S. industrial exports will receive duty-free treatment immediately upon implementation of the agreement, including road tractors, trucks under five metric tons, SUVs, and shock absorbers. For other transportation equipment, certain U.S. industrial exports will receive duty-free treatment immediately upon entry into force of the Agreement, including high-value added products such as sea vessels, and trailers and semi-trailers, which currently face Panamanian tariffs averaging 13.9 percent.

**Machinery Manufactures** – West Virginia's companies exported \$407 million in machinery manufactures in 2007. Virginia's exporters of machinery will benefit from U.S.-Panama TPA tariff reductions. Certain U.S. exports of machinery manufactures will receive duty-free treatment immediately upon entry into force of the Agreement, including turbines, machine tools, sewing machines and office machines. Tariffs on all U.S. exports of agricultural and construction equipment, which are currently as high as 10 percent, will fall to zero immediately upon entry into force of the Agreement. These tariff reductions will improve U.S. equipment manufacturers' access to the Panamanian market, especially during the bidding processes for the Panama Canal expansion project

## The U.S.-Panama TPA Creates Opportunities for West Virginia's Agriculture

In 2006, agriculture exports from West Virginia to the world amounted to \$42 million (latest data available). Despite high tariffs and other barriers on agricultural products, including key West Virginia farm products such as beef, poultry, dairy, and fruits, U.S. exporters shipped \$304 million in U.S. farm products to Panama in 2007, up \$95 million from 2006. A primary U.S. objective was to change the "one-way street" of duty-free access currently enjoyed by most Panama exports into a "two-way street" that provides U.S. suppliers with access to Panama's market and levels the playing field with competitors. This objective was achieved. The U.S.-Panama TPA also includes far-reaching bilateral provisions concerning sanitary and phytosanitary (SPS) measures and technical standards that will help to eliminate long-standing regulatory barriers faced by a variety of U.S. products in the Panamanian market.

For more information on agriculture exports and U.S.-Panama TPA, see the fact sheets prepared by the U.S. Department of Agriculture at <http://www.fas.usda.gov/itp/us-panama.asp>

## Free Trade Works for West Virginia's Exporters

Since the North American Free Trade Agreement's (NAFTA) entry into force in 1994, West Virginia's combined exports to Canada and Mexico grew by 348 percent. In the last three years (2005-2007) the state's exports to the DR-CAFTA region have grown 57 percent.

All state export data in this report are based on an unrevised Origin of Movement (OM) series. This series allocates exports to state based on transportation origin, i.e., the state from which goods began their journey to the port (or other point) of exit from the United States. The transportation origin of exports is not always the same as the location where the goods were produced. Thus conclusions about "export production" in a state should not be made solely on the basis of the OM state export figures.
