VIIth International Pneumoconioses Conference

Organizers:

The National Institute for Occupational Safety and Health (NIOSH)
The Mine Safety and Health Administration (MSHA)
The Occupational Safety and Health Administration (OSHA)
The United States Bureau of Mines (BOM)

in cooperation with the:

International Labour Office (ILO), Geneva

Conference Staff:

<i>Chairman</i>	Edward L. Baker, M.D.
<i>Former Chairman</i>	Robert E. Glenn
<i>Vice-Chairman</i>	Georg Kliesch
<i>Executive Secretary-General</i>	Jack Berberich, Ph.D.
<i>Scientific Secretary-General</i>	Robert Reger, Ph.D.
<i>Assistant Chair — Scientific Papers</i>	Molly Pickett-Harner
<i>Assistant Chair — Logistics</i>	Robert Wheeler
<i>Assistant Chair — Finances</i>	Fred Ames
<i>Special Assistant to Chair</i>	Mitzie Martin
<i>Secretary to Executive Secretary-General</i>	Lunette Utter

PREFACE

It is truly an honor and privilege to provide this preface to the Proceedings of the Seventh International Pneumoconioses Conference which was conducted in Pittsburgh, Pennsylvania during August 23-26, 1988. This symposium, only the seventh such conference since 1930 and the first to be held in the United States, was conducted under the joint sponsorship of the International Labour Office (ILO), the National Institute for Occupational Safety and Health (NIOSH), the Mine Safety and Health Administration (MSHA), the Occupational Safety and Health Administration (OSHA), and the Bureau of Mines (BOM).

The Pittsburgh Conference was attended by over 1000 participants from 50 countries. The symposium call for papers was issued in 1987 and invited submission of abstracts focusing on research and scientific expertise on the pneumoconioses and other occupational respiratory disease. The response was truly gratifying and resulted in the acceptance of over 275 papers for presentation in various scientific sessions and workshops and 124 papers for presentation at poster sessions. The Proceedings (Part II) now in your hand contains over half of those presented at the Conference.

It is my pleasure to acknowledge with gratitude the invaluable assistance of the many individuals and organizations which contributed to the planning, conduct and follow-up of this Conference. The International Organizing Committee was extremely helpful in developing the framework of the Conference. Special thanks to the National Organizing Committee who generously gave of their time and talents so that this Conference was truly representative of an event of its preeminent stature. I wish to publicly thank Mr. John Pendergrass, Assistant Secretary of Labor, OSHA and Mr. David Taylor, Deputy Director General, ILO for their inspiring keynote presentations; to Dr. J. Donald Millar, Assistant Surgeon General, Director of the National Institute for Occupational Safety and Health, Mr. Lynn Williams, International President, United Steel Workers of America and Dr. Bruce Karrh, Vice President, Safety, Health and Environmental Affairs, E.I. Dupont de Nemours Co., USA for their incisive overview presentations; and to the many staff of NIOSH who worked tirelessly in the conduct of the Conference. All were important partners in this enterprise.

But there could have been no successful venture without the enthusiastic and committed support of two people. Dr. Jack Berberich who when called upon at a critical time served both as Executive Secretary-General of the Conference and Editor-in-Chief of these Proceedings and Mr. Georg Kliesch, ILO.

Part III, summaries of *Work Group Sessions I-VI*, will be printed under separate cover. On behalf of the International and National Organizing Committees, the five sponsoring organizations, these Proceedings (Part II) are presented with the hope that you will find them as rewarding as your participation in the Conference.

Edward L. Baker, M.D., M.P.H.
Chairman
VIIth International Pneumoconioses Conference

Georg Kliesch
Vice Chairman
VIIth International Pneumoconioses Conference

ACKNOWLEDGEMENTS

The International Labour Office, The National Institute for Occupational Safety and Health and the other sponsoring organizations wish to thank the following NIOSH employees for their diligent effort in the preparation of this document: Sandra K. Poulson, Terry S. Stewart, Helen A. Michael, Sharon K. Smith, Patricia Amendola, Judith A. Justis, Dorothy K. Basile, Martha W. Saab, Lunette Utter, Beverly J. Carter, Katherine S. Orosz and Anita L. Wolfe for their outstanding clerical and typing support; Carol Welch for the many hours she devoted to the electronic scanning of technical papers; Richard Carlson for assistance in the sizing and insertion of all charts, tables, graphs and photos into the text; Anne Stirnkorb for assistance in the pagination of Part I of the Proceedings; and especially, Pauline Elliott who spent literally hundreds of hours providing editorial assistance, inserting the necessary scientific symbols, organizing, formatting and, where necessary, typesetting this entire document.

Special recognition and appreciation is given to all of the NIOSH staff who assisted in the planning and preparation for the various activities during and after the Conference.
