

**North Pacific Fishery Management Council, December 2008**  
**C-2(a) Gulf of Alaska Fixed Gear Recency Motion**

The Council directed staff to develop an analysis based upon the following purpose and need statement, components, and options for initial public review. Final action is scheduled for April 2009.

**C-2(a) Gulf of Alaska Fixed Gear Recency**

Western GOA and Central GOA Pacific cod fisheries are subject to intense competition, particularly during the A season, when fish are aggregated and of highest value. Competition among fixed gear participants in the Western GOA and Central GOA Pacific cod fisheries has increased for a variety of reasons, including increased market value of Pacific cod products, a declining ABC/TAC, increased participation by harvesters displaced from other fisheries and introduction of capital that has been accrued from participation in rationalized fisheries. Additionally, fishery policies have created incentives that encourage non-traditional efficiency improvements for the less than 60 ft LOA vessel class. The possible future entry of latent effort and disproportionate vessel efficiency would have detrimental effects on LLP holders that have exhibited participation in, and dependence on, the fixed gear Pacific cod fisheries. Many fixed gear vessel owners have made significant investments, have long catch histories, and are dependent on the Western GOA and Central GOA Pacific cod resources. These long-term participants need protection from those who have little or no recent history and who have the ability to increase their participation in the Pacific cod fisheries. At the same time, retaining Federal waters opportunities for small community quota eligible (CQE) communities dependent on access to a range of fishery resources and expanding opportunities in Federal waters for small capacity jig operations is valued to promote community protections at a level that imposes minimal impact on historic catch shares of recent participants.

The intent of the proposed amendment is to prevent the future entry or re-entry of latent fixed gear groundfish fishing capacity that has not been utilized in recent years into the Pacific cod fisheries, and to preserve the traditional vessel operational efficiencies within the fisheries. This requires prompt action to promote stability in the fixed gear sectors of the GOA Pacific cod fisheries, and is expected to be implemented concurrently with the division of GOA Pacific cod among sectors which is currently under consideration. However, this action cannot address continued growth in the waters managed by the State of Alaska.

**ALTERNATIVE 1.**

**No Action.** No changes would be made to the current License Limitation Program.

**ALTERNATIVE 2.**

Add non-severable gear-specific Pacific cod endorsements to fixed gear licenses. Pacific cod endorsements would limit entry into the directed Pacific cod fisheries in Federal waters in the Western and Central Gulf of Alaska.

**Component 1— Areas included**

Western Gulf

Central Gulf (current LLP endorsement includes West Yakutat)

- Different options may be applied to each management area.

**Component 2— Identify and define sectors**

The sector definitions for awarding Pacific cod endorsements may be different from those used for the GOA Pacific cod sector split action. The purpose of sector definitions in this action is to allow the Council to select different catch thresholds for the different gear types, operation types, and vessel lengths. Individual licenses may qualify for any combination of a jig, hook-and-line, and pot endorsement if the license meets the respective threshold(s) for the appropriate gear type, operation type, and vessel length.

- Hook-and-line CP  
Option: Hook-and-line CP  $\geq 125$   
Hook-and-line CP  $< 125$
- Hook-and-line CV  
Option: Hook-and-line  $\geq 60$   
Hook-and-line  $< 60$
- Pot CP
- Pot CV  
Option: Pot CV  $\geq 60$   
Pot CV  $< 60$
- Jig  
Exempt vessels using jig gear from the LLP requirement (including the Pacific cod endorsement requirement) that use a maximum of 5 jigging machines, 5 lines, and 30 hooks per line or one line of 150 hooks.

Option: Exempt vessels participating with fixed gear in the Western GOA B season directed Pacific cod fishery from the Pacific cod endorsement requirement.

Suboption: Exempt vessels using pot gear only.

### **Component 3 – Qualifying years**

Option 1: 2000-2006

Option 2: 2002-2006

Option 3: Add the qualifying period January 1, 2007 through:

Suboption 1: June 4, 2008

Suboption 2: December 8, 2008

- Either of these suboptions will be selected in addition to one of the qualifying periods in Option 1 or Option 2.

Suboption 3: If an LLP license qualifies only when the supplemental range of years in Suboption 1 or Suboption 2 is included, any Pacific cod endorsements granted to licenses under these suboptions would be extinguished upon transfer of the LLP license to another vessel or owner.

- If a GOA hook-and-line catcher processor LLP license holder was a voluntary non-participant in the Freezer Longliner Coalition informal PSC co-op efforts of 2006, 2007, or 2008, and does not qualify under Component 3, Options 1, 2, or 3, the LLP would not be extinguished. If Pacific cod endorsements are a result of this action in the GOA hook-and-line CP sector, the LLP would receive a Pacific cod endorsement.

#### **Component 4 – Catch thresholds**

Thresholds shall be based on legally retained catch in the aggregate during all of the qualifying years in the Federal and parallel fisheries (excluding IFQ catch). Separate and distinct thresholds may be determined for each defined sector.

Option 1: All directed Pacific cod 1, 3, or 5 landings (resulting in a Pacific cod endorsement)

Option 2: All directed Pacific Cod 5, 10, 25, or 100 mt (resulting in a Pacific cod endorsement)

Option: Hardship provision. A GOA fixed gear LLP holder who had 5 or more Pacific cod landings in 1999, but had a vessel on which the LLP was used sink in 1999 or 2000, shall be credited with qualifying history so as to obtain a Pacific cod endorsement.

Directed Pacific cod catch is defined as landings made when the directed Pacific cod fisheries are open. For purposes of catch accounting, licenses are credited with deliveries or processing activity recorded up to 7 days after the directed season closes.

#### **Component 5 – Stacked license provisions**

Where there are multiple LLPs registered to a single vessel, also known as ‘stacking’ of LLPs, groundfish harvest history will be fully credited to all stacked licenses, each carrying its own qualifying endorsements and designations.

#### **Component 6 – Capacity/efficiency limits to CV and CP fixed gear LLPs**

Add a width restriction (efficiency restriction) on each CV and CP fixed gear LLP license that is eligible to access Pacific cod under this action. The width restriction would be 1 ft of width for each 3 ft of length, and is based on the LOA of the vessel assigned to the license on December 8, 2008. The licenses that are assigned to vessels on December 8, 2008 that exceed the width restriction will be grandfathered at their present LOA. For vessels under construction on December 8, 2008, the width restriction for the license shall be equal to the vessel width upon completion. Vessels would be required to report width measurements to RAM.

Option: Add a simple gross tonnage maximum to licenses.

#### **Component 7 – CQE community resident exemption**

CQE community residents currently holding latent, non-qualifying, LLP permits shall retain their LLP and area endorsement(s) and be exempt from the Pacific cod endorsement requirement. A hook-and-line or pot gear endorsement shall be made through (a) a one-time designation at the time the endorsement is issued or (b) designated at the time the first Pacific cod landing is made based on the gear type used. The CQE community resident’s LLP, shall not be leased, and can only be transferred to an individual who has lived continuously in the permit holder’s CQE community for 24 consecutive months prior to the transfer and who intends to remain a resident of the community. Residency shall be affirmed annually upon renewal. If a CQE community LLP holder with a restricted transfer LLP is no longer a resident of the CQE community or dies without a designated qualified LLP community beneficiary, the community CQE shall designate a qualified individual in the CQE community to hold the restricted transfer LLP.

Option: Restrict exemption to LLPs with a MLOA endorsement less than 60 feet.

Additional information requested

- Additional information on the number of identical stacked licenses that meet the catch thresholds (Component 5).
- Additional information on possible approaches to identifying a maximum length to width ratio or maximum simple gross tonnage for purposes of adding a capacity endorsement to licenses (Component 6).
