

Photo sequence of 30 Mile Sandbar Before, During & After the November 2004 High Flow Test

(Photos from 11/16/2004 to 3/9/2005)

◆ Photo Sequence

- Before the High Flow
- During the High Flow
- After the High Flow
- After 6K to 12K fluctuating flows
- After 5K to 20K fluctuating flows

Photo taken November 16, 2004

○ = Good references for orienting photo sequence.

Before HFT - November 16, 2004

During High Flow November 24, 2005 42,000cfs

After High Flow - November 26, 2004 – 8,000 cfs
– Note HFT water line

After High Flow - November 26, 2004 – 8,000 cfs

– Note HFT water line

- Camera focal length change to fit entire sandbar into photo

End of constant 8,000 cfs - December 4, 2004

- Daily fluctuating flows between 11,700 and 6,500 cfs begin Dec. 6, 2005

January 3, 2005 - Approx. 6,000 – 10,000 cfs

- Daily fluctuations between 5,000 – 20,000 cfs begin today
- Photo taken before first 20,000 cfs flow reaches sand bar

January 4, 2005 - Approx. 6,000 – 10,000 cfs

January 5, 2005 - Approx. 6,000 – 10,000 cfs

January 6, 2005 - Approx. 6,000 – 10,000 cfs

March 9, 2004 - Approx. 6,000 – 10,000 cfs

March 9, 2004 - Approx. 6,000 – 10,000 cfs
