66 September 2005

# Preview of the Benchmark Input-Output Accounts for 2002

# Preliminary Estimates of Gross Output Proposed Classification Framework

By Karla L. Stanley-Allen, Nicholas R. Empey, Douglas S. Meade, Stanislaw J. Rzeznik, Mary L. Streitwieser, and Monica S. Strople

HIS article presents BEA's preliminary estimates of gross output for the 2002 benchmark input-output (I-O) accounts.¹ These estimates provide a comprehensive view of the distribution of gross output in the U.S. economy for 2002 and a first look at the proposed classification framework for the industries and commodities to be presented in the final 2002 benchmark I-O accounts.

The final estimates of the Bureau of Economic Analysis' 2002 benchmark input-output accounts will be published in the summer of 2007. These accounts will provide a detailed picture of the interdependent struc-

1. Gross output is a measure of what is produced in the domestic economy. It reflects the value of intermediate inputs (energy, materials, and purchased services) and the value added created by the industry's labor and capital. Gross output includes both the value of what is produced and then used by others in their production processes as well as the value of what is produced and sold to final users. Gross output for the economy reflects

double counting and is much higher than GDP; in the benchmark I-O

accounts it is measured in nominal dollars.

ture of the U.S. economy.<sup>2</sup> BEA's I-O accounts—both the benchmark accounts and the annual industry accounts—provide detailed information on the production of goods and services (commodities) by industry, the use of the commodities required to produce the output, and the distribution to final users. The I-O accounts also provide the basis for a more detailed understanding of the national income and product accounts (NIPAs), showing the commodity composition of GDP by final use category and the distribution of value added by industry on an establishment basis.

These preliminary benchmark estimates are being

#### Plans for the 2002 Benchmark Input-Output Accounts

The preliminary 2002 benchmark I-O industry and commodity outputs released in this article and on BEA's Web site represent the first preview of the final I-O table scheduled for final release in 2007. Other major milestones include the following:

- Spring 2006: BEA will incorporate newly revised economic census data, imports and exports, and input estimates for broad input categories. BEA will conduct a preliminary reconciliation of value added estimates between the benchmark and annual I-O accounts.
- June 1, 2006: The latest date that BEA will entertain comments on the proposed industry classification framework.
- Summer 2006: BEA will publish revised sets of industry and commodity output in more detail on BEA's

Web site

- Summer 2006: Preliminary estimates of final uses will be developed and reconciled with the national income and product accounts (NIPAs).
- Fall 2006: Value added and final uses estimates will be reconciled with NIPAs and annual I-O.
- January–February 2007: The table will undergo final balancing and review.
- Summer 2007: The accounts will be published in the Survey and on the BEA Web site.

The 2002 benchmark table will be released with an alternative presentation based on the System of National Accounts (SNA), which comprises a supply table and a use table. Before the final publication date, BEA will provide interim status reports and discussions of methodology in the Survey.

<sup>2.</sup> The 2002 benchmark I-O accounts will be the tenth in a series of such accounts published by BEA. The nine previous benchmark accounts covered 1958, 1963, 1967, 1972, 1977, 1982, 1987, 1992, and 1997. The 1997 accounts were presented in the December 2002 issue of the Survey OF Current Business, and were the first set of accounts classified according to the 1997 North American Industry Classification System (NAICS). The new accounts will be classified according to the 2002 NAICS. Classification changes arising from the 2002 NAICS revision are discussed in a section below:

released 3 years after the reference year. Previously, estimates on industry and commodity gross output were released only with the final publication of the accounts, 5 years after the reference year. The release of these data provides information regarding the growth of production for 1997–2002.

This article also proposes a list of the industries and commodities that will be presented in the 2002 benchmark I-O accounts. BEA plans to publish greater industry and commodity detail in services sectors and less detail in the goods producing sectors. This revision reflects a number of factors. First, the Census Bureau's expansion of data collection for the service sectors enables BEA to expand the level of detail in the I-O accounts. Second, BEA proposes combining industries with small (less than \$3 billion) and declining gross output with larger, similar industries; this impacts primarily the agriculture and manufacturing sectors. Lastly, a decrease in the number of construction industries is proposed to make the benchmark I-O accounts consistent with BEA's NIPA categories. BEA welcomes comments on this issue, as it will play an important role in determining the final industry classification framework.

The remainder of this article consists of three sections. The first section compares these preliminary 2002 benchmark I-O estimates and the annual I-O accounts. The second section reviews the proposed detailed classification scheme for the final published accounts and describes changes in the 2002 North American Industry Classification System (NAICS). And the third section provides a summary of the methodology used to prepare these preliminary output estimates; it also describes the effects of the 2003 comprehensive NIPA revisions.

# Comparison of Benchmark I-O and Annual I-O Accounts

The benchmark I-O accounts include a comprehensive and detailed presentation of estimates of gross output by industry. The benchmark I-O accounts set "best levels" for industry and commodity output levels for the annual I-O accounts, which are prepared using less detailed and less comprehensive source data.<sup>3</sup> After the final benchmark estimates are published, BEA revises

the annual estimates to ensure the two sets of estimates are consistent.

These preliminary 2002 benchmark gross output estimates make clear that the annual estimates did a relatively good job of capturing overall growth across industries.

Gross output increased at an average annual rate of 4.4 percent in 1997–2002, from \$15.1 trillion to \$18.8 trillion, according to the preliminary estimates (table A). The estimates confirm the general economic picture previously presented by the annual industry accounts. Notably, the services sector increased its share of total U.S. gross output from 64 percent in 1997 to 69 percent in 2002, and the goods sector's share declined from 36 percent to 31 percent—the same as in the annual industry accounts (chart 1).

For the aggregate economy, the growth rate of gross output estimates in 1997–2002 differs only slightly from the annual industry accounts. The average annual growth rate for benchmark gross output was 4.4 percent compared with 4.5 percent for the annual industry accounts (table 1). In addition, the growth rates of industries in the benchmark and annual I-O accounts are highly correlated, with a correlation coefficient of 0.92. The mean absolute difference in growth is 1.1 percent, and 39 of the 60 industries differ by less than this amount.

Relative growth rates in both sets of accounts are highly similar. Of the 10 fastest growing industries in the preliminary benchmark estimates, 9 were also in the top 10 in the annual estimates. The exception was the "other transportation and support activities" in-

Table A. Gross Output by Major NAICS Sector

			Gross	output	Average annual
Line	NAICS code	Industry	1997	2002	growth rate 1997–2002
			Billions o	of dollars	Percent
1		Total output	15,141.2	18,810.8	4.4
2	11	Agriculture, forestry, fishing, and hunting	290.7	270.6	-1.4

4	22	Utilities	289.8	314.7	1.7
5	23	Construction	676.1	909.2	6.1
6		Durable-goods manufacturing <sup>1</sup>	2,108.6	2,080.5	-0.3
7		Nondurable-goods manufacturing <sup>1</sup>	1,663.8	1,758.7	1.1
8	42	Wholesale trade	747.3	866.6	3.0
9	44	Retail trade	825.0	1,046.0	4.9
10	48	Transportation and warehousing	503.4	603.6	3.7
11	51	Information	669.1	956.6	7.4
12	52	Finance, insurance, real estate, rental, and leasing	2,427.6	3,358.0	6.7
13	54	Professional, scientific, and technical services	743.5	1,052.1	7.2
14	55	Management of companies and enterprises	242.0	297.8	4.2
15	56	Administrative and waste management services	348.2	488.5	7.0
16	61-62	Educational services, health care, and social			
		assistance	927.9	1,310.8	7.2
17	71–72		500 7	700.0	
		food service	533.7	709.3	5.9
18	81	Other services, except public administration	348.0	452.7	5.4
19		Government	1,626.9	2,156.2	5.8
		1			

Durable-goods and nondurable-goods manufacturing are recombinations of North American Industry Classification System (NAICS) subsectors 311–339. Durable goods comprise subsectors 33, 321, and 327. Nondurable goods comprise subsectors; 31–2. excluding 321 and 327.

<sup>3.</sup> The concept of best-level is implicit in the term "benchmark," which means a fixed or known point of reference. Both the benchmark I-O and the NIPA benchmark are based on the more reliable Economic Census data. Annual I-O and annual NIPA estimates are "best-change," since they are estimated using extrapolators that are considered the most reliable estimates of year-to-year growth. When the next Economic Census data are completely incorporated into the accounts, the "best-change" estimates are revised so as to minimize the change from the original estimates, yet pass through the best-level estimate.

90	Private services-producing industries 4	8,605.6	11,456.5	11,475.6	-19.0	5.9	5.9

These annual estimates exclude the inventory valuation adjustment, which was included in the previously published annual estimates.
 These benchmark and annual estimates of farm output include nonpurchased feed and seed, which were excluded from the annual estimates.
 Consists of agriculture, forestry, fishing, and hunting; mining; construction; and manufacturing.

<sup>4.</sup> Consists of utilities; wholesale trade; retail trade; transportation and warehousing; information; finance, insurance, real estate, rental, and leasing; professional, scientific and technical services; management of companies and enterprises; administrative and waste management services; educational services; health care and social assistance; arts, entertainment, and recreation; accommodation and food services; and other services, except public administration.

dustry, which grew at only a moderate rate according to the annual estimates. The fastest growing industy according to both sets of estimates was the information and data processing services industry, which grew at an annual average rate of 15.7 percent according to the benchmark estimates and 15.6 percent according to the annual estimates.

Of the ten slowest growing industries according to the preliminary benchmark estimates, nine also ranked among the slowest growing industries in the annual accounts. The exception was the water transportation industry, which grew at a moderate rate according to the annual estimates.

## **Benchmark and Annual Accounts Background**

The benchmark accounts are based primarily on 2002 Economic Census data, which provide detailed and comprehensive coverage of economic activity on an establishment basis. The annual I-O accounts are based on levels from the 1997 benchmark I-O accounts, which are extrapolated forward using more current, but less detailed, survey data.4

The annual I-O accounts are published one year after the reference year, using survey data to extrapolate from the prior benchmark I-O accounts. This publication schedule requires annual source data that are published relatively soon after their reference period. This means that sources other than the quinquennial Economic Census must be used to compile the annual accounts, including the Services Annual Survey (SAS), Census M3 data, and the Annual Survey of Manufacturers (ASM).

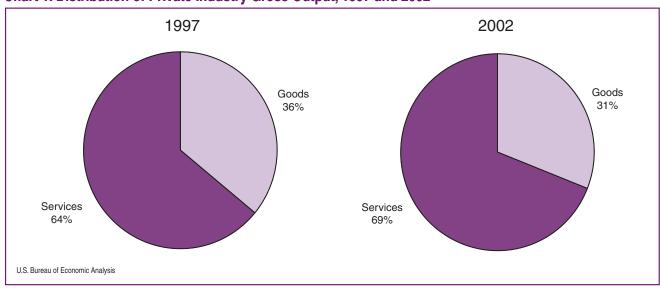

Whenever possible the annual I-O accounts use data at the same level of detail as the benchmark. However, if data on the same level are not available, the best available extrapolators are used. The samples for the annual surveys are designed to provide unbiased estimates, but have a higher sampling error than the Economic Census.

The Economic Census collects detailed industry and commodity output data for the entire universe of establishments. Thus, the Economic Census can be used to correct misclassifications and omissions in annual surveys. The Census Bureau reviews the results of an-

Table B. Benchmark Industries' Growth Rates

				annual
Line	Industry	1997	2002	growth rate 1997–2002

21	Air transportation	104.2	98.1	-1.2
22	Water transportation	24.6	23.7	-0.7

Chart 1. Distribution of Private Industry Gross Output, 1997 and 2002

<sup>4.</sup> For more information on differences in methodology between the benchmark and annual I-O accounts, see Brian C. Moyer, Mark A. Planting, Mahnaz Fahim-Nader, and Sherlene K.S. Lum, "Preview of the Comprehensive Revision of the Annual Industry Accounts," Survey 84 (March 2004): 38-51.

nual surveys such as the M3, the ASM, and the SAS, in light of the results of the Economic Census. If survey data are inconsistent with the results of the Economic Census, revisions are made to match previously published data to the levels shown in the Economic Census.

The comparison of gross output estimates between the benchmark and annual I-O accounts highlights industries where the annual extrapolators may need additional scrutiny. The revision of output levels in the annual I-O accounts after the publication of the Economic Census is part of a broad revision of BEA statistics to incorporate the best and most accurate data possible.

#### **Proposed classification for 2002 Benchmark**

The 2002 benchmark I-O accounts and the 1997 benchmark I-O accounts, although both on a NAICS basis, differ in their coverage of goods-producing industries and services-providing industries. The larger proportion of services industries in the 2002 benchmark accounts is intended to reflect both the increased information now available for these industries and the shifting focus of U.S. economic activity from goodsproducing to services-producing industries (Appendix A). The number of detailed goods producing industries in the 2002 accounts has decreased for a number of reasons (table C). BEA is proposing to combine industries that are small (gross output less than 3 billion dollars) and declining with larger, similar industries. This impacted the agriculture and manufacturing sectors. In addition, the number of construction industries is reduced to be consistent with the NIPA construction categories. The total number of industries has decreased, from 490 to 432.

Until June 1, 2006, BEA is soliciting public feedback regarding its proposed sectoring plan. To provide comments to BEA, please visit BEA's Web site at <www.bea.gov/bea/dn2/home/benchmark.htm> and click on the appropriate link in the "Questions and Comments" section, or send e-mail directly to <benchmarkio@bea.gov>.

Table C. Summary of Industry Coverage

	1997 benchmark	2002 benchmark
Total detailed industries	389	<b>432</b> 322 110
Total summary industries	<b>130</b> 69 61	<b>133</b> 66 67

#### Effects of the 2002 NAICS revisions

The 2002 benchmark I-O accounts will incorporate the 2002 NAICS revision. The 2002 NAICS identified

new, emerging, and advanced technology industries, made adjustments to various sectors for better comparability among the United States, Canada, and Mexico, and incorporated numerous recommendations from data users. As a result of the incorporation of the 2002 NAICS, the 2002 benchmark I-O account will be better able to measure the rapidly changing industry structure of the U.S. economy.

The 2002 NAICS revision included important changes:

- •A new industry in the wholesale trade sector to identify business-to-business (B2B) electronic markets was created.
- Changes were made to reflect differences in the nature of the products of merchant wholesalers and agents and brokers. The industries are now separated, yielding a clearer picture of trade margin activity in the I-O accounts.
- Revisions in the retail trade sector were intended to better capture new areas of growing activity. Discount department stores were moved out of the department stores industry and into a separate new industry. In addition, there is a more detailed breakdown of business-to-consumer electronic markets that includes electronic shopping, electronic auctions and mail-order houses.
- •The information sector was reorganized to recognize industries involved in Internet activity, moving Internet publishing and broadcasting into a new industry. In addition, a new industry was created to incorporate newly expanded data for internet service providers (ISP) and Web search portals.

#### Methodology

This section summarizes the methods used in compiling industry and commodity output estimates, discusses the treatment of secondary products, and reviews statistical and classification changes to be introduced in the 2002 benchmark I-O table.<sup>5</sup>

#### Measuring industry and commodity output

The basic unit of accounting for BEA's I-O accounts is the establishment, which is a single business unit or location for which Census or survey data may be collected. Each establishment is assigned a NAICS industry classification according to its largest share of production and the nature of its production process. Industry output is defined and measured as the total value of all goods and services being produced by the establishments in a given industry. Commodities are

<sup>5.</sup> For more detailed information on methods and concepts for the benchmark I-O, refer to Ann M. Lawson, Kurt S. Bersani, Mahnaz Fahim-Nader, and Jiemin Guo, "Benchmark Input-Output Accounts of the United States, 1997," Survey 82 (December 2002): 19–109.

defined as the different goods and services which are produced by establishments. Each establishment may produce one or more commodities which are not primary to that industry, or in other words, do not constitute that industry's standard or main product. These commodities are called secondary products or services.

The primary sources of data for industry output are shipments (for mining and manufacturing industries), expenses (for nonprofit industries serving households), commodities (for agricultural crops or livestock), receipts less cost of goods sold (for wholesale and retail trade), and receipts (for most other industries, especially services).6 (Table D shows the main sources of data for gross output for the major NAICS sectors.) Data from the Economic Census are supplemented with data based on administrative records for nonemployers and misreporters. For industries not covered by the Economic Census, data from other government agencies and trade associations are used. In addition, BEA makes imputations for industries where information is not directly available, such as for owner-occupied housing, own-account construction, and own-account software.7 To calculate commodity output, all similar primary and secondary activities are combined. For example, if a plant that primarily produces milk also produces some ice cream, then the shipments of milk and ice cream would both be included in the output of the milk industry. However, the milk production would be included in milk commodity output, and the ice cream in ice cream commodity output.

Final data are not currently available for all areas of the economy for 2002. In these cases, estimates were compiled using other information, such as extrapolators from annual surveys. In some cases, such as industries for which Economic Census data have previously been released, the data may still be subject to upcoming revisions which will later be incorporated by BEA.

The most significant changes in the final release will be limited to a few NAICS industries. The following sectors will receive revised or newly available 2002 data from Census: construction, auxiliaries, and wholesale trade. Some revised 2002 data will be received from other divisions within BEA prior to the final publication. These data include nonfiler misreporting adjustments, data for life insurance carriers, rail transportation, state and local government enterprises, state and local general government, Federal government enterprises, and Federal general government.

BEA will also receive revised data on state and local sales taxes.

Finally, a new methodology is currently being developed to estimate royalties, and new data sources are currently being identified to be used for education and hospitals.

# Effect of the NIPA comprehensive revision on the benchmark estimates

Several statistical and methodological changes introduced in the 2002 benchmark are the result of the 2003 comprehensive revision of the NIPAs.<sup>8</sup> The 2002 benchmark accounts incorporate the NIPA revisions to provide measures of output that are consistent with the NIPAs. The benchmark will be used in turn in the next comprehensive revision of the NIPAs. Major definitional changes from the NIPA comprehensive revision include the following:

- The new treatment of insurance services recognizes the income earned through insurers' investment of premiums as a supplement to premiums and will use normal losses instead of actual losses to compute insurance gross output. The effect of this change is to smooth the industry's gross output and reduce the effect of natural disasters on industry output.
- An important service provided by commercial banks is financial intermediation—the repackaging of funds collected from depositors or lenders to

#### **Data Availability**

The 2002 preliminary output estimates for the 60 industries and commodities included in table 1 of this article are available as a table in either MS Excel or HTML format on BEA's Web site at <www.bea.gov>. Select "Benchmark Input-Output Accounts" under the "Industry" column on the BEA home page.

Users will be able to find an input-output make table matrix, containing output estimates before industry redefinitions, for the 60 industries and commodities included in table 1.

In the spring of 2006, BEA will make preliminary output estimates for all 432 industries and commodities listed in Appendix A available on its Web site. These more detailed estimates will incorporate revisions made by the U.S. Census Bureau to the source data used in the production of the preliminary output estimates.

<sup>6.</sup> Expenses are also used when shipments or receipts data are unavailable in certain industries.

<sup>7.</sup> Own-account construction and software are construction and software development performed by a firm's own employees, rather than purchased in a market transaction.

<sup>8.</sup> For a detailed discussion of the NIPA Comprehensive Revision, see Brent R. Moulton and Eugene P. Seskin, "Preview of the 2003 Comprehensive Revision of the National Income and Product Accounts: Changes in Definitions and Classifications," Survey 83 (June 2003): 17–34, and Eugene P. Seskin and Daniel Larkins, "Improved Estimates of the National Income and Product Accounts for 1929–2002: Results of the Comprehensive Revision," Survey 84 (February 2004): 7–29.

meet the needs of borrowers. The new treatment of commercial bank services recognizes that both depositors and borrowers receive these implicit services and now allocates a portion to the borrowers. This change reduces gross output of banks by reallocating a portion of implicit services from final expenditures to intermediate consumption, reflecting the larger share of borrowed funds attributed to business.

•The new treatment of government as a producer makes the treatment of government inputs identical to the treatment of intermediate inputs in the private sector. Government purchases of goods and services will appear as intermediate inputs to the

general government services industry instead of as final uses purchases by Federal and state and local government. The commodity output of government is purchased by government final uses.

•A new government enterprise, Indian gaming, was created to show the output of Indian tribal casino and hotel activities, which boosted government output. Meanwhile, output was reduced in the amusements, gambling, and recreation industry, the hotel industry, and nonprofit institutions serving households, where these activities were previously counted.

Appendix A follows.

#### **Acknowledgments**

This article and the completion of the 2002 preliminary output estimates represent the contributions of many members of the Industry Accounts staff. Sumiye Okubo, Associate Director Industry Accounts, Ann M. Lawson, Chief of the Industry Economics Division, and Douglas S. Meade, Deputy Chief of the Industry Economics Division, supervised the preparation of the accounts. Mary L. Streitwieser, Chief of the Benchmark I-O Branch, planned and coordinated the staff of the branch to produce these estimates. Mark A. Planting and Karen J. Horowitz provided invaluable technical support and assistance in reviewing the estimates.

Douglas S. Meade and Mary L. Streitwieser coordinated and wrote sections of the article. Karla L. Stanley-Allen, Stanislaw Rzeznik, Nicholas Empey and Monica Strople contributed text and tables. Mahnaz Fahim-Nader contributed tables and assisted with coordination with publication staff.

The following staff members of the Industry Economics Division contributed significantly to the development of the preliminary output estimates for the 2002 Benchmark input-output (I-O) accounts

Agriculture, Forestry, Fishing, Hunting: Belinda L. Bonds, Lisa C. Phares, Stanislaw Rzeznik.

Mining: Belinda L. Bonds, Lisa C. Phares, Stanislaw Rzeznik.

Utilities: Bill McCarthy, Alvin Blake.

Construction: Belinda L. Bonds, Nicholas Empey.

Manufacturing: Belinda L. Bonds, Lisa C. Phares, Stanislaw Rzeznik, Nicholas Empey, Eric Bryda.

Wholesale Trade: Bill McCarthy, Simon Njaka Randrianarivelo.

Retail Trade: Bill McCarthy, Ricky L. Stewart.

Transportation and Warehousing: Bill McCarthy, Alvin Blake.

Information: Edward T. Morgan, Darlene C. Robinson-Smith.

Finance and Insurance: Edward T. Morgan, Karla L. Stanley-Allen.

Real Estate and Rental and Leasing: Edward T. Morgan, Yuen Lau, Kevin Muck, Emily Thompson.

Professional, Scientific, and Technical Services: Edward

T. Morgan, Emily Thompson, Kevin Muck.

Management of Companies and Enterprises: Edward T. Morgan.

Administrative and Waste Services: Edward T. Morgan, Yuen Lau.

Educational Services: Patricia W. Coles, Jessica Brede. Health Care and Social Assistance: Patricia W. Coles, Charles Hedden.

Arts, Entertainment, and Recreation: Patricia W. Coles, Jessica Brede.

Accommodation and Food Services: Patricia W. Coles, Nathan Klouda.

Other Services, except public administration and private households: Patricia W. Coles, Monica S. Strople.

Federal Government and Enterprises: Patricia W. Coles, Charles Hedden, Monica S. Strople.

State and Local Government and Enterprises: Patricia W. Coles, Jessica Brede, Nathan Klouda.

Taxes on Production and Imports: Patricia W. Coles, Charles Hedden.

Foreign Transactions: Edward T. Morgan, Robert Robinowitz, Karla Allen.

Misreporting filer adjustment, nonemployer filer adjustment and nonfiler adjustment: Patricia W. Coles, Bill McCarthy, Edward T. Morgan, Yuen Lau, Ricky L. Stewart, Monica S. Strople.

The following staff members of the Office of the Chief Information Officer coordinated the computer programming and processing system: Brian D. Kajutti, Paul A. Kilday, Ross F. Metzger, and Janice E. Townsend.

From the Industry Economics Division, Douglas Meade, assisted by Nicholas Empey, Nathan Klouda, Lisa C. Phares, Monica S. Strople, and Eric Weiss, updated and tested the database used for the 2002 benchmark accounts.

	327212 Other pressed and blown glass and glassware manufacturing			333611 Turbine and turbine generator set units manufacturing	333611
	327213 Glass container manufacturing	327213		333612 Speed changer, industrial high-speed drive, and gear manufacturing	333612
	327215 Glass product manufacturing made of purchased glass				333613
	327320 Ready-mix concrete manufacturing	32732		333618 Other engine equipment manufacturing	
	327330 Concrete pipe, brick, and block manufacturing	32733	3339	Other general purpose machinery manufacturing	
	327390 Other concrete product manufacturing	32739 3274		333911 Pump and pumping equipment manufacturing	
	327910 Abrasive product manufacturing	32791		333912 Air and gas compressor manufacturing	333912 333921–4
	327991 Cut stone and stone product manufacturing	327991		333991 Power-driven handtool manufacturing	333991
	327992 Ground or treated mineral and earth manufacturing	327992		33399A Other general purpose machinery manufacturing	333992, 333997,
	327999 Miscellaneous nonmetallic mineral products			333993 Packaging machinery manufacturing	333999
331A	Iron and steel mills and manufacturing from purchased steel			333994 Industrial process furnace and oven manufacturing	333994
	331110 Iron and steel mills and ferroalloy manufacturing	3311		33399B Fluid power process machinery	333995–6
	331210 Iron and steel pipe and tube manufacturing from purchased steel 331220 Rolling and drawing of purchased steel	33121 33122	3341	Computer and peripheral equipment manufacturing	
331B	Nonferrous metal production and processing			334111 Electronic computer manufacturing	334111 334112
	33131A Alumina refining and primary aluminum production	331311-2		33411A Computer terminals and other computer peripheral equipment	
	331314 Secondary smelting and alloying of aluminum	331314		manufacturing	334113, 334119
	rolling and drawing	331315, 331319	334A	Audio, video, and communications equipment manufacturing	00.404
	331316 Aluminum extruded product manufacturing	331316		334210 Telephone apparatus manufacturing	33421 33422
	331411 Primary smelting and refining of copper	331411		334290 Other communications equipment manufacturing	33429
	and aluminum)	331419		334300 Audio and video equipment manufacturing	3343
	331420 Copper rolling, drawing, extruding, and alloying	33142	3344	Semiconductor and other electronic component manufacturing	224411
	331490 Nonferrous metal (except copper and aluminum) rolling, drawing, extruding, and alloying	33149		334411 Electron tube manufacturing	334411 334412
3315	Foundries	33110		334413 Semiconductor and related device manufacturing	334413
	331510 Ferrous metal foundries	33151		33441A Electronic capacitor, resistor, coil, transformer, and other inductor	224414 6
	33152A Aluminum foundries	331521, 331524		manufacturing	334414–6 334417
	001020 INOTHETIOUS TOUTIONES, EXCEPT MUTHINITH	331528		334418 Printed circuit assembly (electronic assembly) manufacturing	334418
3321	Forging and stamping			334419 Other electronic component manufacturing	334419
	33211A All other forging, stamping, and sintering	332111-2, 332117	3345	Electronic instrument manufacturing	224510
	332114 Custom roll forming	332114 332115–6			334510 334511
3322	Cutlery and handtool manufacturing	552115 0		334512 Automatic environmental control manufacturing	334512
,,,,,	33221A Cutlery, utensil, pot, and pan manufacturing	332211, 332214		334513 Industrial process variable instruments manufacturing	334513
	33221B Handtool manufacturing	332212-3			334514 334515
323	Architectural and structural metals manufacturing	00001		334516 Analytical laboratory instrument manufacturing	334516
	332310 Plate work and fabricated structural product manufacturing 332320 Ornamental and architectural metal products manufacturing			334517 Irradiation apparatus manufacturing	334517
324	Boiler, tank, and shipping container manufacturing	- 30-		33451A Watch, clock, and other measuring and controlling device manufacturing	334518-9
	332410 Power boiler and heat exchanger manufacturing	33241	3346	Manufacturing and reproducing magnetic and optical media	
	332420 Metal tank (heavy gauge) manufacturing	33242	3040	33461A Software, audio, and video media reproducing	334611-2
	332430 Metal can, box, and other metal container (light gauge) manufacturing	33243		334613 Magnetic and optical recording media manufacturing	
32A	Ordnance and accessories manufacturing		3351	Electric lighting equipment manufacturing	
	33299A Ammunition manufacturing	332992-3		335110 Electric lamp bulb and part manufacturing	33511
	33299B Arms, ordnance, and accessories manufacturing	332994-5		335120 Lighting fixture manufacturing	SSS 12
	Other fabricated metal product manufacturing	2225	3352	Household appliance manufacturing 335210 Small electrical appliance manufacturing	33521
332B					1000E I
32B	332500 Hardware manufacturing	3326		335221 Household cooking appliance manufacturing	335221
332B	332500 Hardware manufacturing	3326 33271		335221 Household cooking appliance manufacturing	335221 335222
332B	332500 Hardware manufacturing	3326 33271 33272		335221 Household cooking appliance manufacturing	335221 335222 335224

## Appendix A. Proposed Industries for the 2002 Benchmark Input-Output Accounts—Continues

	I-O Industry code and title	Related 2002 NAICS codes		I-O Industry code and title	Related 2002 NAICS codes
3353	Electrical equipment manufacturing		4920	Couriers and messengers	
	335311 Power, distribution, and specialty transformer manufacturing			492000 Couriers and messengers	492
	335313 Switchgear and switchboard apparatus manufacturing	335313	4930	Warehousing and storage 493000 Warehousing and storage	493
0050	335314 Relay and industrial control manufacturing	335314		INFORMATION	100
3359	Other electrical equipment and component manufacturing 335911 Storage battery manufacturing	335911	5111	Newspaper, periodical, book, and directory publishers	
	335912 Primary battery manufacturing	335912	3111	511110 Newspaper publishers	51111
	335920 Communication and energy wire and cable manufacturing	33592 33593		511120 Periodical publishers	51112
	335991 Carbon and graphite product manufacturing	335991		511130 Book publishers 5111A0 Directory, mailing list, and other publishers	51113
	335999 All other miscellaneous electrical equipment and component manufacturing	335999	5112	Software publishers	
3361	Motor vehicle manufacturing			511200 Software publishers	51121
	336111 Automobile manufacturing	336111	5120	Motion picture and sound recording industries 512100 Motion picture and video industries	5101
	336120 Heavy duty truck manufacturing			512200 Sound recording industries	
336A	Motor vehicle body, trailer, and parts manufacturing		5151	Radio and television broadcasting	
	336211 Motor vehicle body manufacturing	336211	F4F0	515100 Radio and television broadcasting	5151
	336213 Motor home manufacturing	336213	5152	Cable networks and program distribution 515200 Cable and other subscription programming	5152
	336214 Travel trailer and camper manufacturing	336214	5161	Internet publishing and broadcasting	
3364	336300 Motor vehicle parts manufacturing  Aerospace product and parts manufacturing	3303		516110 Internet publishing and broadcasting	516
3304	336411 Aircraft manufacturing	336411	5170	Telecommunications 517000 Telecommunications	517
	336412 Aircraft engine and engine parts manufacturing	336412	5180	Internet service providers, web search portals, and data processing	317
	336414 Guided missile and space vehicle manufacturing	336414		518100 Internet service providers and web search portals	5181
	33641A Propulsion units and parts for space vehicles and guided missiles		E100	518200 Data processing, hosting, and related services	5182
336B	Other transportation equipment manufacturing 336500 Railroad rolling stock manufacturing	3365	5190	Other information services 519100 Other information services	519
	336611 Ship building and repairing	336611		FINANCE AND INSURANCE	
	336612 Boat building	336612	52A0	Monetary authorities, credit intermediation, and related activities	
	336992 Military armored vehicle, tank, and tank component manufacturing	336992	JEAU	52A000 Monetary authorities and depository credit intermediation	
	336999 All other transportation equipment manufacturing	336999		522A00 Nondepository credit intermediation and related activities	5222–3
3370	Furniture and related product manufacturing 337110 Wood kitchen cabinet and countertop manufacturing	33711	5230	Securities, commodity contracts, investments, and related activities 523000 Securities, commodity contracts, investments, and related	
	337121 Upholstered household furniture manufacturing	337121		activities	523
	337122 Nonupholstered wood household furniture manufacturing	337122 337124–5 337129	5240	Insurance carriers and related activities	
	33712A Metal and other household furniture manufacturing	337127		524100 Insurance carriers	5241 5242
	33721A Office furniture manufacturing	337211, 337214	5250	Funds, trusts, and other financial vehicles	02 12
	337215 Showcase, partition, shelving, and locker manufacturing	337215	1	525000 Funds, trusts, and other financial vehicles	525
	337910 Mattress manufacturing			REAL ESTATE AND RENTAL AND LEASING	
3391	Medical equipment and supplies manufacturing	30732	5310	Real estate	
	330111 Laboratory apparatus and furniture manufacturing	339111		531000 Real estate	531
	339112 Surgical and medical instrument manufacturing 339113 Surgical appliance and supplies manufacturing 339114 Dental equipment and supplies manufacturing 339115 Ophthalmic goods manufacturing	339112 339113	S008	Owner-occupied dwellings S008 Owner-occupied dwellings	n.a.
	339114 Dental equipment and supplies manufacturing	339114	5321	Automotive equipment rental and leasing	1
	339115 Ophthalmic goods manufacturing	339115 339116		532100 Automotive equipment rental and leasing	5321
3399	Other miscellaneous manufacturing		532A	Consumer goods and general rental centers	
	339910 Jewelry and silverware manufacturing			532A00 General and consumer goods rental except video tapes and discs	53221–2, 53229, 5323
	339920 Sporting and athletic goods manufacturing	33993		532230 Video tape and disc rental	53223
	339940 Office supplies (except paper) manufacturing	33994	5324	Commercial and industrial machinery and equipment rental and leasing	
	339950 Sign manufacturing	33995 339991		532400 Commercial and industrial machinery and equipment rental and leasing	5324
	339992 Musical instrument manufacturing	339992	5330	Lessors of nonfinancial intangible assets	
	33999A All other miscellaneous manufacturing	339999		533000 Lessors of nonfinancial intangible assets	533
	339994 Broom, brush, and mop manufacturing	339994		PROFESSIONAL, SCIENTIFIC, AND TECHNICAL SERVICES	
	WHOLESALE TRADE		5411	Legal services 541100 Legal services	5411
4200	Wholesale trade	40	5412	Accounting, tax preparation, bookkeeping, and payroll services	3411
	420000 Wholesale trade	42	3412	541200 Accounting, tax preparation, bookkeeping, and payroll services	5412
	RETAIL TRADE		5413	Architectural, engineering, and related services	
4A00	Retail trade 4A0000 Retail trade	44 45		541300 Architectural, engineering, and related services	5413
	TRANSPORTATION AND WAREHOUSING	. 1, 10	5414	Specialized design services 541400 Specialized design services	5414
	EXCLUDING POSTAL SERVICE		5415	Computer systems design and related services	
4810	Air transportation			541511 Custom computer programming services	541511
4000	481000 Air transportation	481		541512 Computer systems design services	541512 541513, 541519
4820	Rail transportation 482000 Rail transportation	482	5416	Management, scientific, and technical consulting services	
4830	Water transportation			541610 Management, scientific, and technical consulting services	54161
	483000 Water transportation	483	5417	Scientific research and development services	54102, 54109
4840	Truck transportation	40.4	0411	541700 Scientific research and development services	5417
4850	484000 Truck transportation	404	5418	Advertising and related services	5440
,000	485000 Transit and ground passenger transportation	485	5419	541800 Advertising and related services	5418
4860	Pipeline transportation		13	5419A0 All other miscellaneous professional, scientific, and technical	
	486000 Pipeline transportation	480		services	54191, 54193, 54199
4840	Scanic and cightegoing transportation and cumport activities				UT100
48A0	Scenic and sightseeing transportation and support activities 48A000 Scenic and sightseeing transportation and support activities for transportation			541920 Photographic services	

#### Appendix A. Proposed industries for the 2002 Benchmark Input-Output Accounts

	I-O Industry code and title	Related 2002 NAICS codes		I-O Industry code and title	Related 2002 NAICS codes
5500	MANAGEMENT OF COMPANIES AND ENTERPRISES  Management of companies and enterprises 550000 Management of companies and enterprises	55	7130	Amusements, gambling, and recreation 713A00 Amusement parks, arcades, and gambling industries 713B00 Other amusement and recreation industries 713940 Fitness and recreational sports centers 713950 Bowling centers	71391–3, 71399 71394
5613	Employment services 561300 Employment services	5613	7210	ACCOMMODATION AND FOOD SERVICES Accommodation	
5615	Travel arrangement and reservation services 561500 Travel arrangement and reservation services	5615		7211A0 Hotels and motels, including casino hotels	72111–2 72119, 7212–3
561A	All other administrative and support services 561100 Office administrative services 561200 Facilities support services.	5612	7220	Food services and drinking places 722000 Food services and drinking places OTHER SERVICES, EXCEPT PUBLIC ADMINISTRATION	722
	561400 Business support services 561600 Investigation and security services 561700 Services to buildings and dwellings 561900 Other support services	5617	8111	Automotive repair and maintenance 8111A0 Automotive repair and maintenance, except car washes	811198
620	Waste management and remediation services 562000 Waste management and remediation services  EDUCATIONAL SERVICES	562	811A	Electronic, commercial, and household goods repair 811200 Electronic and precision equipment repair and maintenance 811300 Commercial and industrial machinery and equipment repair and maintenance	8112
100	Educational services 611100 Elementary and secondary schools 611A00 Junior colleges, colleges, universities, and professional schools 611B00 Other educational services	6112-3	8120	811400 Personal and household goods repair and maintenance	8114 8121 8122 8123
210	Ambulatory health care services 621A00 Offices of physicians, dentists, and other health practitioners 621B00 Medical and diagnostic labs and outpatient and other ambulatory care services	6214–5, 6219	813A 813B	Religious, grantmaking, giving, and social advocacy organizations 813100 Religious organizations 813400 Grantmaking, giving, and social advocacy organizations Civic, social, professional, and similar organizations	8132, 8133
220	621600 Home health care services		8140	813B00 Civic, social, professional, and similar organizations  Private households 814000 Private households	,
230	Nursing and residential care facilities 623000 Nursing and residential care facilities			GOVERNMENT	814
240	Social assistance 624A00 Individual and family services	6241	S001	Federal Government enterprises 491000 Postal service. S00101 Federal electric utilities. S00102 Other Federal Government enterprises	n.a.
	rehabilitation services	6242–3 6244	S002	State and local government enterprises S00201 State and local government passenger transit	n.a.
1A0	Performing arts, spectator sports, museums, zoos, and parks 711100 Performing arts companies		S005	General Federal defense government industry S00500 General Federal defense government industry	
	711A00 Promoters of performing arts and sports and agents for public figures	7113–4	S006	General Federal nondefense government industry S00600 General Federal nondefense government industry	n.a.
	711500 Independent artists, writers, and performers		S009	General state and local government industry S00900 General state and local government industry	n.a.

n.a. Not applicable.

Note. The titles in boldface represent the industries used for the summary version of the 2002 input-output (I-O) tables.

An asterisk following a North American Industry Classification System (NAICS) code indicates that the NAICS industry is included in more than one I-O industry.
