Number of Employees and Employee Compensation

NUMBER OF EMPLOYEES — Employees on the payroll at the end of FY 2008 including part-time employees, but excluding temporary and contract employees not included on your payroll records. A count taken at some other date during the reporting period may be given provided it is a reasonable estimate of employees on the payroll at the end of FY 2008. If the number of employees at the end of FY 2008 (or when the count was taken) was unusually high or low due to temporary factors (e.g., a strike), enter the number of employees that reflects normal operations. If the number of employees fluctuates widely during the year due to seasonal business variations, report the average number of employees on the payroll during FY 2008. Base such an average on the number of employees on the payroll at the end of each pay period, month or quarter. If precise figures are not available, give your best estimate.

EMPLOYEE COMPENSATION — Sum of **wages and salaries** and **employee benefit plans**. Expenditures made by an employer in connection with the employment of workers, including cash payments, stock based compensation, payments in-kind, and employer expenditures for employee benefit plans including those required by statute. Base compensation data on payroll records. Report compensation which relates to activities that occurred during the reporting period regardless of whether the activities were charged as an expense on the income statement, charged to inventories, or capitalized. DO NOT include amounts related to activities of a prior period, such as those capitalized or charged to inventories in prior periods.

Part III — U.S. EXPORTS TO AND U.S. IMPORTS FROM MINORITY-OWNED FOREIGN AFFILIATE

Goods only valued f.a.s. at port of exportation; do not include services — See Instruction Booklet, Part V.

IMPORTANT NOTES

Report U.S. exports of goods to and U.S. imports of goods from the foreign affiliate in FY 2008. Report all goods that physically left or entered the U.S. customs area. Report data on a "shipped" basis, i.e., on the basis of when and to (or by) whom the goods were shipped. This is the same basis as official U.S. trade statistics to which these data will be compared. Do **not** record a U.S. import or export if the goods did not physically enter or leave (i.e., were not physically shipped to or from) the United States, even if they were charged to the foreign affiliate by, or charged by the foreign affiliate to, a U.S. person.

Foreign affiliates normally keep their accounting records on a "charged" basis, i.e., on the basis of when and to (or by) whom the goods were charged. The "charged" basis may be used if there is no material difference between it and the "shipped" basis. If there is a material difference, the "shipped" basis must be used or adjustments made to the data on a "charged" basis to approximate a "shipped" basis. The data should include goods only; they should exclude services.

Capital goods — Include capital goods but exclude the value of ships, planes, railroad rolling stock, and trucks that were temporarily outside the United States transporting people or goods.

Consigned goods — Include consigned goods in the trade figures when shipped or received, even though they are not normally recorded as sales or purchases, or entered into intercompany accounts when initially consigned.

In-transit goods — Exclude from exports and imports the value of goods that are in-transit. In-transit goods are goods that are not processed or consumed by residents in the intermediate country(ies) through which they transit; the in-transit goods enter that country(ies) only because that country(ies) is along the shipping lines between the exporting and importing countries. In-transit imports are goods en route from one foreign country to another via the United States (such as from Canada to Mexico via the United States), and in-transit exports are goods en route from one part of the United States to another part via a foreign country (such as from Alaska to Washington State via Canada).

Packaged general use computer software — Include exports and imports of packaged general use computer software. Value such exports and imports at the full transaction value, i.e., the market value of the media on which the software is recorded and the value of the information contained on the media. Do not include exports and imports of customized software designed to meet the needs of a specific user. This type of software is considered a service and should not be included as trade in goods. Also do not include negotiated leasing fees for software that is to be used on networks.

Natural gas, electricity, and water — Report ONLY the product value of natural gas, electricity, and water that you produce or sell at wholesale as exports and imports of goods. DO NOT report the service value (transmission and distribution).

Remarks

**2008 ANNUAL SURVEY OF U.S. DIRECT INVESTMENT ABROAD
FORM BE-11C
ADDITIONAL INSTRUCTIONS BY LINE ITEM**

**Part I — IDENTIFICATION OF MINORITY-OWNED
FOREIGN AFFILIATE**

3. Country of location — If the affiliate is engaged in petroleum shipping, other water transportation, or oil and gas drilling, and has operations spanning more than one country, use country of incorporation for country of location. For example, classify in country of incorporation an oil drilling rig that moves from country to country during the year.

6. Ownership interest held by U.S. Reporter named in item 1.

Voting interest is the U.S. Reporter's direct ownership in just the voting equity of the affiliate. Examples of voting equity include voting stock and a general partner's interest in a partnership. Thus, a U.S. Reporter could have a 100 percent direct voting interest in an affiliate but own less than 100 percent of the affiliate's total equity.

11. To be considered a holding company (ISI code 5512), a company's equity in net income of affiliates that it holds must constitute a majority of its total income. In addition, normally at least 50 percent of total assets must consist of investments in affiliates. ISI 5512 (holding company) is an invalid classification if more than 50 percent of income generated, or expected to be generated, by an affiliate is from non-holding company activities.

**Part II — FINANCIAL AND OPERATING DATA OF
FOREIGN AFFILIATE**

13. Sales or gross operating revenues, excluding sales taxes — Report gross operating revenues or gross sales minus returns, allowances, and discounts. Exclude sales or consumption taxes levied directly on the consumer. Exclude net value-added and excise taxes levied on manufacturers, wholesalers, and retailers. Affiliates classified in ISI codes 5223, 5224, 5231, 5238, 5252 and 5331 report interest income on this line. Insurance companies with ISI codes 5243 and 5249 should include gross investment income on this line. (Dealers in financial instruments and finance, insurance, and real estate companies see **Special Instructions** below.)

14. Net income (loss) — Net income for the year, after provision for foreign income taxes, but before provision for common and preferred dividends. Include income from equity investments and realized and unrealized gains (losses) (net of income tax effects) included in the determination of net income.

16. Employee compensation — Consists of wages and salaries of employees and employer expenditures for all employee benefit plans.

Wages and salaries — Consists of gross earnings of all employees before deduction of employees' payroll withholding taxes, social insurance contributions, group insurance premiums, union dues, etc. Include time and piece rate payments, cost of living adjustments, overtime pay and shift differentials, bonuses, profit sharing amounts, stock based compensation, and commissions. Exclude commissions paid to independent personnel who are not employees.

Include direct payments by employers for vacations, sick leave, severance (redundancy) pay, etc. Exclude payments made by, or on behalf of, benefit funds rather than by the employer. (Include employer contributions to benefit funds in "employee benefit plans" as discussed below.)

Include in-kind payments, valued at their costs, that are clearly and primarily of benefit to the employees as consumers. Do not include expenditures that benefit employers as well as employees, such as expenditures for plant facilities, employee training programs, and reimbursement of business expenses.

Employee benefit plans — Consists of employer expenditures for all employee benefit plans, including those mandated by government statute, resulting from collective bargaining contracts and those that are voluntary. Include Social Security and other retirement plans, life and disability insurance, guaranteed sick pay programs, workers' compensation insurance, medical insurance, family allowances, unemployment insurance, severance pay funds, etc. Also, include deferred post employment and post retirement expenses per FAS 106. If plans are financed jointly by the employer and the employee, include only the contributions of the employer.

**SPECIAL INSTRUCTIONS FOR DEALERS IN FINANCIAL
INSTRUMENTS, FINANCE COMPANIES, INSURANCE
COMPANIES AND REAL ESTATE COMPANIES**

A. Certain gains (losses) for (1) dealers in financial instruments and finance and insurance companies, and (2) real estate companies.

1. Dealers in financial instruments (including securities, currencies, derivatives, and other financial instruments) and finance and insurance companies — Include in the calculation of net income (item 14):

- impairment losses as defined by FAS 115,
- realized gains and losses on trading or dealing,
- unrealized gains or losses, due to changes in the valuation of financial instruments, that flow through the income statement, and
- goodwill impairment as defined by FAS 142.

EXCLUDE from item 13 and 14, unrealized gains or losses due to changes in the valuation of financial instruments that are taken to other comprehensive income.

Include income from explicit fees and commissions as operating income in item 13.

2. Real estate companies — Include in item 14:

- impairment losses as defined by FAS 144 and
- goodwill impairment as defined by FAS 142.

Include revenues earned from the sale of real estate you own as operating income in item 13.

B. Special Instructions for insurance companies

1. When there is a difference between the financial and operating data reported to the stockholders and the data reported in the annual statement to an insurance department, prepare the BE-11 on the same basis as the annual report to the stockholders. Valuation should be according to normal commercial accounting procedures, not at rates promulgated by national insurance departments, e.g., include assets not acceptable for inclusion in the annual statement to an insurance department, such as: 1. non-trusteed or free account assets and 2. nonadmitted assets, including furniture and equipment, agents' debit balances, and all receivables deemed to be collectible. Include mandatory securities valuation reserves that are appropriations of retained earnings in the owners' equity section of the balance sheet not in the liability section.

2. Do not include assets of the U.S. Reporter held in the country of location of the affiliate that are for the benefit of the U.S. Reporter's policyholders in the data reported for the affiliate.

3. Instructions for reporting specific items

Sales or gross operating revenues, excluding sales taxes (item 13) — Include items such as earned premiums, annuity considerations, gross investment income, and items of a similar nature.
