
Standard Error Tables for Supplemental Tables

This appendix includes tables of standard errors for the supplemental tables in appendix 1. This appendix only includes standard errors for tables that present data collected through sample surveys. There are no standard error tables for tables that present data from universe surveys (such as all school districts), compilations of administrative records, or statistical projections.

The standard error tables are labeled with the prefix "S" followed by the number of the table as it appears in appendix 1. Thus, the standard error table for Table 13-1 in indicator 13 is Table S13-1.

²The 2005 Grade 12 Mathematics Assessment was based on a new framework. The assessment includes more questions on algebra, data analysis, and probability to reflect changes in high school mathematics standards and coursework. Results could not be placed on the old National Assessment of Educational Progress (NAEP) scale and could not be directly compared with previous years; therefore, information on previous assessments are not shown. For more information on NAEP Grade 12 Mathematics Assessments, see <http://www.nces.ed.gov/nationsreportcard/mathematics/>.
