Most boat manufacturers have started with smaller boats and by trial and error, have expanded into larger boats. At Cobra we have experienced the worst offshore conditions at high speeds and used our engineering research and technology to build the ultimate Bass boat with the pro-fisherman in mind and bring a perfect match between fishability, performance and perfection in the Cobra Sidewinder.

Cobra boats successfully dominated the offshore racing circuit and moved into the World's Fastest Offshore Fishing Boats with the 100 mph 357 Sea Viper.

Years of offshore legacy have bred the exciting new ("Blow way the competition") stable, ultra fast *Cobra Sidewinder!*

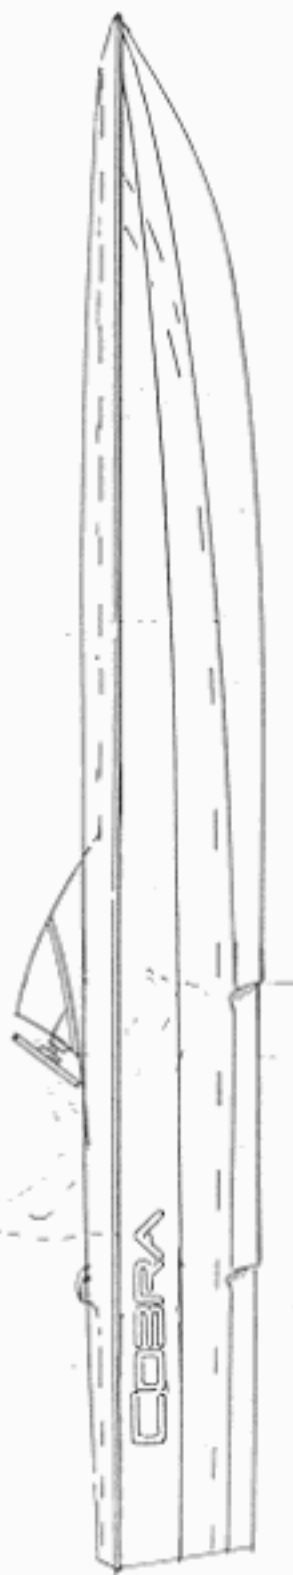

Lamination Schedule: Kevlar/E-glass, high density foams, vinylester resins, aerospace balsa coring with hull and deck fiber-glassed together around entire perimeter.
