^{1/} Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans.

^{2/} Includes multiemployer plans and multiple-employer collectively bargained plans.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the 2002 Private Pension Plan Bulletin for more information.

^{1/} Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans.

^{2/} Includes multiemployer plans and multiple-employer collectively bargained plans.

NOTE: Beginning in 2005 the number of participants reported is no longer adjusted. Please see page 31 for more details. The term "Participants" refers to Total Participants.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the 2002 Private Pension Plan Bulletin for more information.

^{1/} Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans.

^{2/} Includes multiemployer plans and multiple-employer collectively bargained plans.

^{3/} The row 2004r shows participants for 2004 computed using the revised definition summarized in the note below.

NOTE: Beginning in 2005 the number of participants reported is no longer adjusted. Please see page 31 for more details. The term "Participants" refers to Total Participants.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the 2002 Private Pension Plan Bulletin for more information.

^{1/} Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans.

^{2/} Includes multiemployer plans and multiple-employer collectively bargained plans.

^{3/} The row 2004r shows active participants for 2004 computed using the revised definition summarized in the note below.

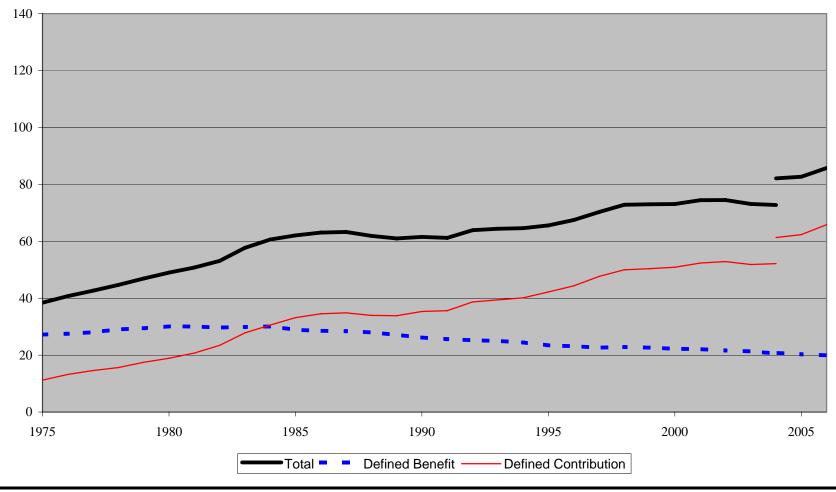

NOTE: Beginning in 2005 the number of participants reported is no longer adjusted. Please see page 31 for more details.

NOTE: The number of participants includes double counting of workers in more than one plan.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the 2002 Private Pension Plan Bulletin for more information.

Graph E8g. Number of Active Participants in Pension Plans by type of plan, 1975-2006

(numbers in millions)

NOTE: Beginning in 2005 the number of participants reported is no longer adjusted. Please see page 31 for more details. The higher point for 2004 represents the unadjusted participant count.

^{1/} Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans.

^{2/} Includes multiemployer plans and multiple-employer collectively bargained plans.

 $^{{\}it 3/The\ row\ 2004r\ shows\ active\ participants\ for\ 2004\ computed\ using\ the\ revised\ definition\ summarized\ in\ the\ note\ below.}$

^{*/} Less than 500 participants.

NOTE: Beginning in 2005 the number of participants reported is no longer adjusted. Please see page 31 for more details.

NOTE: Data for 1999 are based on actual count. Data for 1980-1998 are imputed. The number of participants includes double counting of workers in more than one plan.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the 2002 Private Pension Plan Bulletin for more information.

^{1/}Asset amounts shown exclude funds held by life insurance companies under allocated group insurance contracts for payment of retirement benefits. These excluded funds make up roughly 10 to 15 percent of total private fund assets.

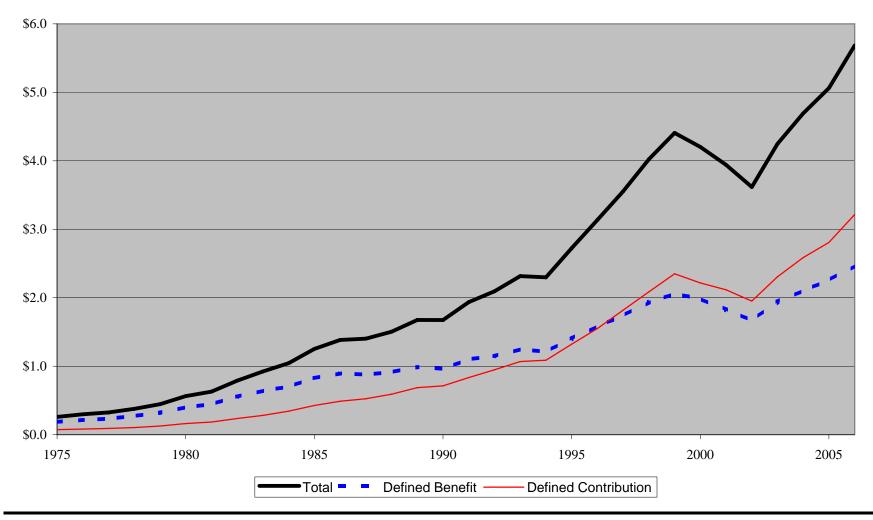

^{2/} Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans.

^{3/} Includes multiemployer plans and multiple-employer collectively bargained plans.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects fillings for plan years that in general end, rather than begin, in that calendar year. Please SOURCE: Form 5500 filings with the U.S. Department of Labor

^{1/} Asset amounts shown exclude funds held by life insurance companies under allocated group insurance contracts for payment of retirement benefits. These excluded funds make up roughly 10 to 15 percent of total private fund assets.

^{2/} Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans.

^{3/} Includes multiemployer plans and multiple-employer collectively bargained plans.

NOTE: Beginning in 2005 the number of participants reported is no longer adjusted. Please see page 31 for more details. The term "Participants" refers to Total Participants.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the 2002 Private Pension Plan Bulletin for more information.

^{1/} Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans.

^{2/} Includes multiemployer plans and multiple-employer collectively bargained plans.

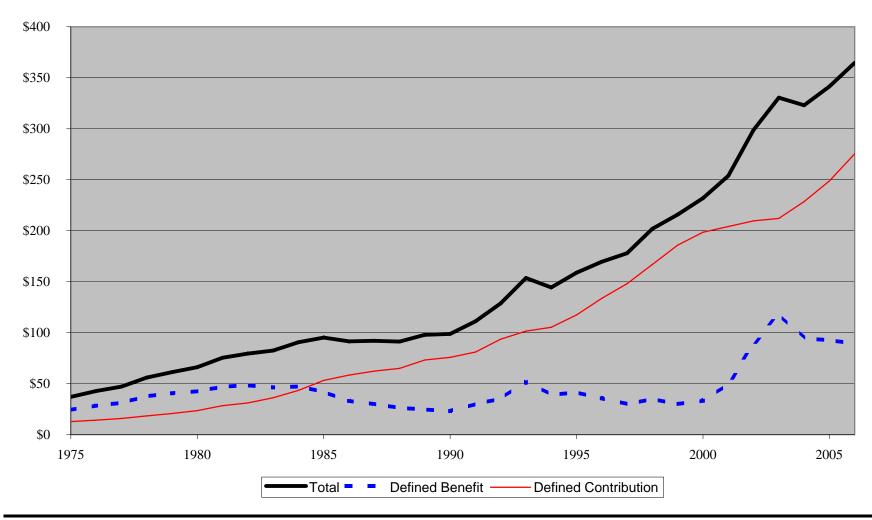

NOTE: Includes both employer and employee contributions.

NOTE: Beginning in 2005 the number of participants reported is no longer adjusted. Please see page 31 for more details. The term "Participants" refers to Total Participants.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the 2002 Private Pension Plan Bulletin for more information.

Table E16. Pension Plan Contributions to Plans with 100 or More Participants by type of plan, 1975-2006

(amounts in millions)

^{1/} Amounts shown include both benefits paid directly from trust funds and premium payments made by plans to insurance carriers. Amounts exclude benefits paid directly by insurance carriers.

^{2/} Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans.

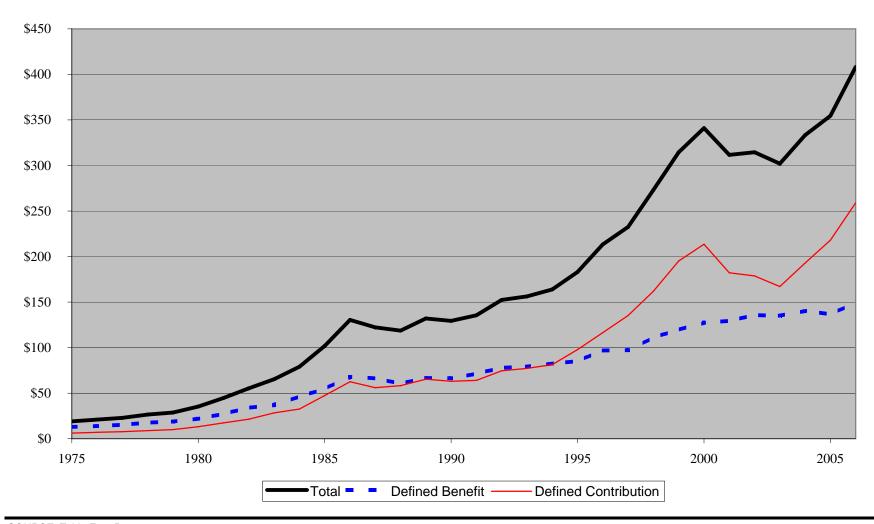

^{3/} Includes multiemployer plans and multiple-employer collectively bargained plans.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the 2002 Private Pension Plan Bulletin for more information.

^{1/} Amounts shown include both benefits paid directly from trust funds and premium payments made by plans to insurance carriers. Amounts exclude benefits paid directly by insurance carriers.

 $^{2/ \}textit{Includes single employer plans, plans of controlled groups of corporations, and \textit{multiple-employer noncollectively bargained plans}.$

^{3/} Includes multiemployer plans and multiple-employer collectively bargained plans.

NOTE: Beginning in 2005 the number of participants reported is no longer adjusted. Please see page 31 for more details. The term "Participants" refers to Total Participants.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the 2002 Private Pension Plan Bulletin for more information.

SOURCE: Form 5500 filings with the U.S. Department of Labor

^{1/} Amounts shown include both benefits paid directly from trust funds and premium payments made by plans to insurance carriers. Amounts exclude benefits paid directly by insurance carriers.

^{2/} Includes single employer plans, plans of controlled groups of corporations, and multiple-employer noncollectively bargained plans.

^{3/} Includes multiemployer plans and multiple-employer collectively bargained plans.

NOTE: Beginning in 2005 the number of participants reported is no longer adjusted. Please see page 31 for more details. The term "Participants" refers to Total Participants.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects fillings for plan years that in general end, rather than begin, in that calendar year. Please see the 2002 Private Pension Plan Bulletin for more information.

^{1/} The 1994 row, for example, represents all plan years that began in 1994. About 77 percent of these plan years began on January 1, 1994.

Note: Rates of return have been derived directly from tables C4-C11 and from similar published summary tables for prior years. The rate of return formula is the same as that described in Chapter 12 of the 1989 DOL volume entitled "Trends in Pensions," except that the return formula used here refines the treatment of receivables. The receivable line item called "income receivables," which first appeared on the 1988 form, is not deducted from total assets because such assets may produce investment income. The formula makes no adjustment for reporting periods other than one year, which are reported on approximately 3 percent of Form 5500 filings. Because the Form 5500 does not provide information on the timing of cash flows during the year, a time weighted rate of return cannot be derived. The formula used assumes that all cash flows occur in the middle of the plan's reporting period. The cash flow for which this assumption is most uncertain is contributions. The overall 1994 rate of return reported as 2.9 percent could be as low as 2.80 percent or as high as 2.98 percent depending on the assumption regarding the timing of contributions during the year. The overall 1995 rate of return reported as 20.8 percent could be as low as 20.15 percent or as high as 21.53 percent.

^{2/} The geometric mean is computed by adding one to the aggregate rate of return for each of the n years, taking the product of the sums, and taking the nth root of the product, and subtracting one. 3/ Standard deviation formula uses a denominator definition of n, not n-1.

NOTE: Beginning in 2005 the number of participants reported is no longer adjusted. Please see page 31 for more details. The term "Participants" refers to Total Participants.

NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the 2002 Private Pension Plan Bulletin for more information.

2004-2006	2.5	3.2	3.0	3.8

^{1/} Computed by adding one to the aggregate rate of return for each of the n years, taking the product of the sums, and taking the nth root of the product, and subtracting one. 2/ Standard deviation formula uses a denominator definition of n, not n-1.

NOTE: In the previous version of this table, the rates of return for Employee Stock Ownership Plans between 2000 and 2004 were calculated incorrectly. This error has been corrected.

NOTE: Beginning in 2005 the number of participants reported is no longer adjusted. Please see page 31 for more details. The term "Participants" refers to Total Participants. NOTE: Beginning with the 2002 Private Pension Plan Bulletin, the data for a given calendar year reflects filings for plan years that in general end, rather than begin, in that calendar year. Please see the 2002 Private Pension Plan Bulletin for more information.

Technical Appendix to the Private Pension Plan Bulletin Historical Tables – A Description of Changes in Definition and Methodology

Two significant changes were made in the methodology used to create the *Form 5500 Research File* and *Private Pension Plan Bulletin* beginning with the 2005 Bulletin. These changes were necessitated by two restrictions on the data received by the Employee Benefits Security Administration (EBSA). First, beginning in 2005, IRS Schedule T is no longer a required schedule. Information from this schedule was previously used to adjust the number of "active participants" to exclude 401(k)-eligible workers who did not elect to receive employer contributions and non-vested, separated employees who had not incurred a break in service. The loss of information from this schedule prompted EBSA to discontinue its adjustment of "active participants" in favor of accepting the definition of active participant provided in the instructions to the Form 5500. This change also affected the number of "total participants" because the number of individuals previously excluded from "active participants" was also excluded from "total participants." Second, at the time of *Bulletin* publication, data for the year of the publication is the most current, complete dataset available. Previously, the *Bulletin* relied on data from the year following the year in question. This change affected the methodology used in computing weights on the Research File. These changes are described in detail in the following sections.

Active Participants

Prior to the 2005 Private Pension Plan Bulletin, the count of active participants had been adjusted from the number of active participants that was actually reported using line 4c(5) from Schedule T and line 7g from Form 5500. The figure was adjusted to exclude two groups of individuals:

- 1. Individuals eligible to participate in a 401(k) plan who had not elected to have their employers make contributions and
- 2. Non-vested former employees who had not (at the time the Form 5500s were submitted) incurred the break in service period established by their plan.

The purpose for this adjustment was to provide through the *Private Pension Plan Bulletin* a more relevant statistic for research purposes. While legally individuals included in the two groups defined above are "active" participants, they are not active in a more intuitive sense; these individuals are not contributing and are not entitled to receive benefits. In the case of (1.), these individuals do not have account balances and are not contributing or receiving contributions from their employers, but are merely qualified to participate. In the case of (2.), these individuals have not yet qualified to receive benefits under the plan and only may do so by continuing employment with the particular organization and being in service for the necessary amount of time to become vested. In a purely economic sense and for research purposes, individuals in these groups should not be included in the count of active participants.

Because the IRS Schedule T filing is no longer mandatory, EBSA cannot continue to produce the above adjustments. Instead, as noted in the introduction, beginning with the 2005 *Bulletin* the definition of "active participants" corresponds directly to the definition on page 16 of the 2005 Instructions for Form 5500 (http://www.dol.gov/ebsa/pdf/2005-5500inst.pdf). That is,

Active participants include any individuals who are currently in employment covered by a plan and who are earning or retaining credited service under a plan. This category includes any individuals who are eligible to elect to have the employer make payments to a Code section 401(k) qualified cash or deferred arrangement. Active participants also include any nonvested individuals who are earning or retaining credited service under a plan. This category does not include (a) nonvested former employees who have incurred the break in service period specified in the plan or (b)

_

¹ For a more detailed explanation of the methodology used for creating counts of "active participants" prior to the 2005 *Bulletin*, please see the *Form 5500 Research File User Guide* on the *Form 5500 Research File CD-ROMs* distributed by the Employee Benefits Security Administration.

former employees who have received a "cash-out" distribution or deemed distribution of their entire nonforfeitable accrued benefit.

To illustrate the effect this definitional change has on the counts of active participants, the following tables and graphs detail the number of participants by types of plans using the previous and current definitions for plan years 2001-2004.

Table 1. The Adjustment to Active Participants in Defined Contribution Plans by year, 2001-2004

(numbers in thousands)

	Total Plans			Single	Employer Pl	ans 1/	Multiemployer Plans 2/

Chart 2. The Adjustment to Active Participants in Defined Benefit Plans by year, 2001-2004

Weights

Weights for the *Pension Plan Bulletin* are calculated by defining the universe of plans, stratifying plans by size and type, creating a sample of plans, and then dividing the number of plans in the universe by the number of plans in the sample for each stratum.² Prior to the *2005 Bulletin*, the number of plans in the universe was adjusted to account for "missing" plans: plans which filed in previous and later year samples, but not in that current plan year. The size of the universe was estimated by adding the number of current-year filers to an estimate of the number of missing plans derived using this "straddle" method. Since all large plans are included on the Research File, the weights for large DB and large DC plans (more than 100 participants) are close to 1.0. Since only a 5% sample of small plans is included on the Research File, the weights for small DB and small DC plans (less than 100 participants) are near 20.0.

As mentioned above, at the time of *Bulletin* publication, filings from the following year are not complete. Therefore, the "straddle" method for constructing the Form 5500 filer universe was discontinued beginning with the 2005 *Bulletin*. The new method used for calculating the universe starts by determining which plans from the previous year did not indicate they were terminating. Preliminary weights are computed on the assumption that all such plans should be included in the given year's sample. This method produces weights that are significantly higher than the weights historically used on the Research File based on the "straddle method". Therefore, an adjustment is necessary to produce final weights. To do so, the preliminary weights are computed for the three most recent, completed research files. For each stratum in each file, the multiplicative factors by which preliminary weights would have to be adjusted to equal final weights used in prior years are derived. The arithmetic average of these adjustment factors for each stratum is then applied to the preliminary weights calculated for the given year, arriving at a final weight that approximates what the weight derived using the "straddle" method would have been if data for the next year's filing year were already complete.

-

² For a more detailed explanation of the methodology for adding weights to the Research File, please see the *Form 5500 Research File User Guide* on the *Form 5500 Research File CD-ROMs* distributed by the Employee Benefits Security Administration.
