

APD ALERT

Interagency Contract Directory

Purpose

This APD ALERT is notification to all acquisition personnel that the Interagency Contract Directory (ICD) is available for use as a market research and planning device. The IDC can be found at www.contractdirectory.gov. The ICD assists personnel in examining existing multi-agency contracting vehicles to satisfy their requirements before developing new contracts. The database provides consolidated information about: Governmentwide Acquisition Contracts, Multi-Agency Contracts, Federal Supply Schedule (FSS) contracts, Blanket Purchase Agreements under FSS contracts, and other procurement instruments intended for multiple agency use.

How does this affect me?

Users of the ICD may search for contracts information by text field, principal product or service code, North American Industry Classification System Code, type of procurement, socio-economic information, and various other data elements.

ISSUE DATE: October 2004
