

MATHEMATICS CONCEPTS MATHEMATICS ITEMS

The *Mathematics Concepts and Mathematics Items* book contains the released TIMSS mathematics assessment items. These are the released items from the 1999 and 2003 assessments (as distinct from the secure items, which are kept confidential so that they may be used in subsequent cycles to monitor trends).

Guide to Using the Mathematics Concepts and Mathematics Items Materials

The materials contained in this book can be used in a number of ways as a tool to assist teachers in making a formative assessment of student knowledge and skills. Some of these ways include the following:

Teacher-designed formative assessments. A teacher might, for example, decide to examine how well his or her class can solve routine problems. In such a case, the first step would be to review the questions in *Mathematics Concepts and Mathematics Items*, selecting the ones of interest. Ready-to-use versions of these items can be found in the *Mathematics Items* book. Teachers can print these items or present them to students on an overhead. Student responses can be scored by referring to the appropriate page in *Mathematics Concepts and Mathematics Items*. Teachers can also compare the overall percentage of students responding correctly to the international benchmark for that item.

Feedback on teaching. To the extent that the items coincide with concepts taught, the teacher might follow the same process to gain rapid feedback on the success of the teaching episode.

Understanding misunderstandings. Again, a teacher might decide to examine the incorrect or partially correct responses of the class for insight into any general misunderstandings, with a view to re-teaching a particular topic or skill.

Identifying individual difficulties. In the same way, the teacher might use the items to identify particular difficulties experienced by individual students, as the basis for some remedial teaching or focused practice.

This book contains the released items from both TIMSS 1999 and TIMSS 2003. Due to slight revisions in terminology and released information between cycles, the format for the items in each cycle differs slightly. Each item appears on a single page and is accompanied by a number of descriptors.

1999 Content Domains:

- · Fractions and number sense
- Algebra
- Measurement
- Geometry
- Data representation, analysis, and probability

2003 Content Domains:

- Algebra
- Data
- Geometry
- Measurement
- Number

1999 Cognitive Domains:

- Knowing
- Using routine procedures
- Investigating and problem solving
- · Mathematical reasoning
- Communicating

2003 Cognitive Domains:

- Knowing facts and procedures
- Using concepts
- Solving routine problems
- Reasoning

Take a look at Calories in a portion of food from ratio, the name given to the first 1999 item in this book. As specified in boxes at the top of the page, the content domain for this item is fractions and number sense and the cognitive domain is investigating and solving problems. Looking at Value of -3x given value of x, the first item from TIMSS 2003 (page 85), the content domain (algebra) and the cognitive domain (knowing facts and procedures) are also accompanied by the Main Topic (algebraic expressions).

International item numbers identify each item. This number appears just below the item box.

Correct answers are shown beneath each item. These correct answers take two forms:

- **Letter code**. This form is used for the correct response on multiple-choice items. *Calories in a portion of food from ratio* provides an example of the letter code type—the correct answer is A.
- Scoring guide. This form is used to assist in scoring write-in responses. *Division of fractions* (J12) further along in the *Fractions and number sense* domain (page 13), provides an example of the scoring guide approach, indicating the general nature of correct and incorrect responses. In some cases, partial credit may be awarded and these items will provide guidelines for fully correct, partially correct, and incorrect responses.

Sample student responses are provided for TIMSS 2003 extended response items. An example of an actual U.S. eighth-grade student's response is provided for each scoring category. See item M032557 on page 89.

International benchmarks are provided in a table next to each item. These consist of statistics on the percentage of students in each country who answered the question correctly. The countries are ordered in terms of this percentage. The international average is included as well, and this display also indicates which countries scored significantly higher, significantly lower, and not significantly different from this international average.

Number/fraction of 2 types of boxes

Item Number: T02B

SCORING

B: Scoring for Fraction of Books in Smaller Boxes

Note: The term "equivalent" in the scoring guide below includes decimal fractions and percentages.

Correct Response

- 2/5
- Another fraction or percent equivalent to 2/5 (e.g., 8/20, 14/35, 28/70, etc.)
- Other correct

Incorrect Response

- 1/2
- 2/3 OR 8/12 OR 56/84 [fraction of boxes]
- Any integer
- Other incorrect (including crossed out/erased, stray marks, illegible, or off task)

Two possibilities for actual height

The height of a boy was reported as 140 cm. The height had been rounded to the nearest 10 cm. What are two possibilities for the boy's actual height?				
Answer:	cm and	cm		

Item Number: V01

SCORING

Correct Response

- One answer 140 and the other answer is in an acceptable range, 135 $\leq x \leq$ 140 or 140 $\leq x \leq$ 145.
- Neither answer is 140 cm but both are in the acceptable range $135 \le x < 140$ and/or 140 < x < 145.

Incorrect Response

- Both answers within the intervals $145 \le x \le 150$ and/or $130 \le x \le 135$
- 130 AND 150
- Other incorrect (including crossed out/erased, stray marks, illegible, or off task)

Distance traveled by elevator

In a sequence of starts and stops, an elevator travels from the first floor to the fifth floor and then to the second floor. From there, the elevator travels to the fourth floor and then to the third floor. If the floors are 3 m apart, how far has the elevator traveled?

A. 18 m

B. 27 m

C. 30 m

D. 45 m

Correct equation based on x/y table

The table represents a relation between x and y.

Which of the following equations could represent the same relation?

- A. y = 2x + 2
- B. y = 2x 1
- C. y = 3x + 2
- D. y = 3x + 1
- E. y = 3x 2

Value of x in mathematical equation

Find the value of x if $12x - 10 = 6x + 32$
Answer:

Item Number: L17

SCORING

Correct Response

• 7

- Incorrect Response $3\frac{2}{3}$ OR $2\frac{1}{3}$ OR $1\frac{2}{9}$ [uses incorrect operation: 32 10 = 22, 12x + 6x = 18x, or both]
- Any expression or equation, other than x = 7, containing x
- Other incorrect (including crossed out/erased, stray marks, illegible, or off task)

Value of expression substituting x=3

If $x = 3$, what is the value of $\frac{5x + 3}{4x - 3}$?
Answer:

Item Number: N13

SCORING

Correct Response

- . 2
- 18/9, 2/1 or other fraction equivalent to 2
- · Other correct

Incorrect Response

- Indicates the correct substitution of *x* = 3 in numerator and/or denominator but student did not correctly complete the solution.
- Indicates a wrong substitution such as 5x = 53 or 5x = 5 + 3 in the numerator; for example, any fractions with 56 or 11 as numerators, or 40 or 4 as denominators.
- ullet A response containing the variable x
- Cancels or ignores x's (e.g., 8/1, 8, 7, etc.)
- Other incorrect (including crossed out/erased, stray marks, illegible, or off task)

Expression equivalent to $n \times n \times n$

Which of these expressions is equivalent to $n \times n \times n$ for all values of n?

A. $\frac{n}{3}$

B. n + 3

C. 3n

D. n^3

Item Number: P09

Correct Response:

D

Total club members: boys and girls

A club has 86 members, and there are 14 more girls than boys. How many boys and how many girls are members of the club?

Show your work.

Item Number: T01

SCORING

Correct Response

- 36 boys and 50 girls [Numerical method: e.g., $86 \div 2 = 43$; 43 7 = 36 boys; 43 + 7 = 50 girls]
- 36 boys and 50 girls [Algebraic method: e.g., b + (b + 14) = 86; 2b = 72; b = 36; g = 36 + 14 = 50]
- Other fully satisfactory method including "guess and check" with justification that 36 + 50 = 86

Partial Response

- Either 36 boys or 50 girls, with or without another (incorrect) number
- 36 and 50 are given [Makes correct computations but reverses labels or does not include any mention of which is boys or girls]
- 36 boys and 50 girls, no method shown
- Gives an algebraic equation or system of equations that can lead to the correct solution
- · Other partially correct

Incorrect Response

- 29 boys and 57 girls [Computes 86 ÷ 2 = 43; 43 14 = 29 and 43 + 14 = 57]
- \bullet One of the numbers is 72 [Computes 86 14]
- 29 boys and 43 girls [Computes 43 14 = 29]
- Gives an algebraic equation or system of equations that cannot lead to a correct solution
- · Other incorrect (including crossed out/erased, stray marks, illegible, or off task)

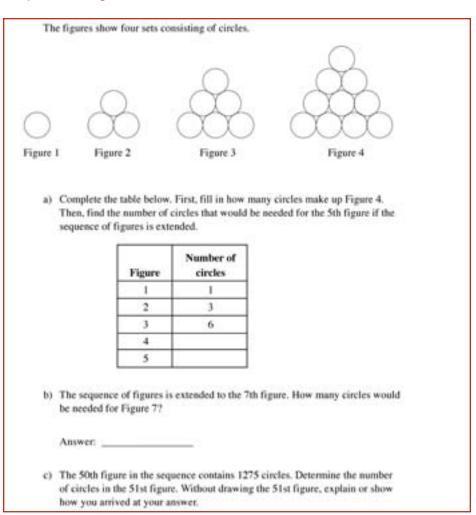

Overall Percent Correct

Position of point on number line

Point P (not shown) on the number line is 5 units from point N and 2 units from point M.

Where is point P located?

- A. Between O and L
- B. Between L and M
- C. Between M and N
- D. To the right of N

Likely result of fifth coin toss

If a fair coin is tossed, the probability that it will land heads up is $\frac{1}{2}$. In four successive tosses, a fair coin lands heads up each time. What is likely to happen when the coin is tossed a fifth time?

- A. It is more likely to land tails up than heads up.
- B. It is more likely to land heads up than tails up.
- C. It is equally likely to land heads up or tails up.
- D. More information is needed to answer the question.

Cheaper magazine subscription

Chris plans to order 24 issues of a magazine. He reads the following advertisements for two magazines. Ceds are the units of currency in Chris' country.

Teen Life Magazine

24 issues First four issues FREE The rest 3 ceds each.

Teen News Magazine

24 issues First six issues FREE The rest 3.5 ceds each.

Which magazine is the least expensive for 24 issues? How much less expensive? Show your work.

Item Number: V02

SCORING

Note: There is no distinction made between responses with or without units.

Correct Response

- Teen Life. Calculations of both magazines are correct (60 ceds for Teen Life and 63 ceds for Teen News) and correct savings of 3 ceds
- Other correct (e.g., Teen Life. Calculation of one magazine correct, the other not shown, and correct savings of 3 ceds).

Partial Response

- Correct calculations (60 and 63 ceds), but incorrect or no magazine identified and/or no difference given
- Correct calculation for Teen News (63 ceds), but incorrect calculation for Teen Life
- Incorrect calculation for Teen News but correct calculation for Teen Life (60 ceds)
- Teen Life, 3 ceds. No work shown
- $\bullet \ \ \text{Other partially correct response (e.g., \ correct \ calculations \ but \ incorrect \ difference)}\\$

Incorrect Response

• Other incorrect (including crossed out/erased, stray marks, illegible, or off task)
