Notes for Tables

Note: Amounts may not add to totals due to rounding.

* Denotes values greater than \$0 but less than \$500,000.

- 1/ Telecommunications services provided for resale consist of services provided for resale as telecommunications to other contributors to federal universal service support mechanisms. Revenues from services provided to firms that are *de minimis* or otherwise exempt from federal universal service support mechanisms are reported as end-user service.
- 2/ The FCC Form 499-A and the FCC Form 499-Q have different reporting requirements for revenues from telecommunications calls that traverse the United States but both originate and terminate in foreign points. These calls are termed international-to-international calls and are reported with end-user revenues on the FCC Form 499-A and are included in contribution bases for telecommunications relay service, local number portability and number administration. However, these revenues are exempt from universal service contribution and are not included with end-user telecommunications revenues on the FCC Form 499-Q. This table, which is based on the FCC Form 499-Q, does not include international-to-international revenues.
- 3/ Currently, the FCC Form 499-Q collects total, interstate, and international billed end-user revenues for the most recently completed quarter. Filers also project interstate and international (but not total) billed end-user revenues for the next calendar quarter. In addition, filers project how much of the billed revenues actually will be collected. Projected collected end-user interstate and international revenues form the base for universal service support contributions. For example, the May 2004 filings contain historic revenue data for the first quarter of 2004 and projected revenue data for the third quarter of 2004. From May 2001 through November 2002, the FCC Form 499-Q collected only revenues for the most recently completed quarter. Prior to the third quarter of 2001, the FCC used semi-annual revenue data for contribution purposes.
- 4/ These tables show carrier's carrier and end-user telecommunications revenues reported on FCC Form 499-Q filings. Telecommunications providers who are exempt from contributing to universal service support mechanisms are not required to file this form. Some exempt providers nonetheless file and their revenues are included in the tables. In addition, some filers are not required to contribute on international revenues if their interstate end-user revenues represent less than 12% of their combined interstate and international end-user revenues -- a test referred to as the 12% rule. Thus, total interstate and international revenues shown in this table slightly exceed universal service contribution base revenues.
- 5/ The February 2003 FCC Form 499-Q included projected revenues for both the first and second calendar quarters of 2003. For ease of presentation, the projections for the first quarter are included with roll-ups for the November 2002 filings.
