The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high-priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and highquality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public. Unless specifically noted, all information contained herein is in the public domain.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to

## I. Introduction to the Common Core of Data State Nonfiscal Survey of Public Elementary/Secondary Education: School Year 2003-04 File Version 1b

This data file for the State Nonfiscal Survey of Public Elementary/Secondary Education provides information about students and staff in public elementary and secondary education for the 200304 school year and numbers of high school completers for the prior year. The State Nonfiscal Survey of Public Elementary/Secondary Education is one of the five surveys of the Common Core of Data (CCD) and is conducted annually by the U.S. Department of Education's National Center for Education Statistics (NCES).

Data for the state nonfiscal survey are provided by state education agencies (SEAs) from their administrative records. ${ }^{1}$ NCES and the SEAs work cooperatively to ensure comparability between the data elements requested and reported. Each state's CCD coordinator (a designated staff person at the SEA) accesses a copy of the state's nonfiscal survey for the previous year with a request to update the data for NCES.

SEAs obtain the data in their administrative records from local education agencies (LEAs) that operate public schools. Each SEA may edit or examine the individual LEA reports before computing state totals. While SEAs are requested to provide counts as of the school day closest to October 1, the "as of" dates for membership counts may vary slightly from state to state.

Responses to the 2003-04 State Nonfiscal Survey of Public Elementary/Secondary Education were due to NCES on March 15, 2004, from SEAs in the 50 states, the District of Columbia, Puerto Rico, the four outlying areas (American Samoa, Guam, the Northern Marianas Islands, and the U.S. Virgin Islands), the Bureau of Indian Affairs, and the Department of Defense school system (overseas and domestic). NCES edits state submissions, returning for confirmation or correction any items that appear to be out of range in light of previous reports.

This documentation is intended to answer questions users may have about the contents of the CCD state nonfiscal survey data file. In the user's guide that follows this introduction, "Coverage, Response Rate, and Nonsampling Error" describes responding states and jurisdictions and issues related to state-by-state definitional differences. "Methodology" describes any adjustments that were made to the reported data, and how missing data were imputed. The "List of Imputations and Adjustments" identifies any data item that was adjusted for any state. "Comments for Users of the Data File" discusses item nonresponse, disclosure risk analysis and data perturbation and suppression, and identifies any cases in which states varied from the CCD standards in reporting data items. "User Guidelines for Processing the State Nonfiscal Survey of Public Elementary/Secondary Education Data File" explains the file version assignment system. Table 1 identifies the two-letter postal abbreviations and the Federal Information Processing Standards (FIPS) codes for each state or other jurisdiction reporting in the CCD.

[^0]There are three appendixes:

- Appendix A-Record Layout provides the variable names and labels of the data items discussed throughout the documentation, as well as their location in the data file.
- Appendix B-Value Distribution and Field Frequencies reports the minimum, maximum, and mean values for each continuous variable and the number of states for which the item was missing or not applicable. Also, the frequency, percentage, cumulative frequency, and cumulative percentage are reported for all categorical variables.
- Appendix C—Glossary provides definitions for CCD data items.

## II. User's Guide

## A. Coverage, Response, and Nonsampling Error

The State Nonfiscal Survey of Public Elementary/Secondary Education includes 59 responding units: the 50 states, the District of Columbia, Puerto Rico, the Department of Defense dependents schools (overseas and domestic), the Bureau of Indian Affairs, and the four outlying areas.

Nonsampling error occurs when reporting states use different item definitions than those supplied by CCD. This can arise when states follow different education policies and are not able to map their data exactly to the CCD. An example is that some states issue several kinds of high school credentials, while other states issue a regular diploma to every student who meets their requirements (which may vary); therefore high school diploma counts may represent different requirements across states. Or, one state may report revenues from enterprise activities while another state prohibits districts from collecting such revenues. Another source of nonsampling error is the timing of the initial data collection. States may vary from the "as of October 1" requirement of the CCD ; therefore student counts and other variables may not be comparable across states.

## B. Methodology

NCES has imputed and adjusted some reported values to create a data file that more accurately reflects student and staff counts and improves comparability among states. Imputations and adjustments were performed on data from the 50 states and the District of Columbia only. It should be noted that no imputations were made to the high school graduate or other high school completer categories; however, they have been adjusted to prevent identification of any individual. Imputation flags are used in the data file to indicate all items (including totals and subtotals) affected by adjustments and imputations

The imputation process consisted of several stages and steps, and varied with the nature of the missing data. (Section C, "List of Adjustments and Imputations," identifies all items affected by these procedures.) Imputations for prekindergarten students were performed first, then imputations for variables involving staff, then other adjustments. Totals and subtotals were recalculated after all imputations and adjustments had been performed.
"Imputations" provide estimates in cases in which the missing value is not reported at all, indicating that subtotals for the category are underreported. An imputation by NCES would assign a value to the missing item, and the subtotals containing this item would increase by the amount of the imputation.
"Adjustments" are changes in reported data to prevent identification of individuals and corrections in cases in which a value reported for one item contains a value for one or more additional items not reported elsewhere. For example, a state might not differentiate between kindergarten teachers and prekindergarten teachers, reporting " M " (missing) for prekindergarten teachers and a value representing the count of staff for both categories as kindergarten teachers. NCES adjusts these two responses by reducing the amount reported for kindergarten teachers and adding that amount to prekindergarten teachers. (See "Prekindergarten teacher imputation" below). The total count for teachers would not be affected by this adjustment.

## B.1. Imputations

Three different methods were used for imputing missing values: imputation using growth rate, impute/import approaches, and aggregation of corresponding data items collected on the school level. Imputation using growth rate was employed when the missing item had been reported by the state in the previous year. When data from the prior year were not available, imputation was done using the "impute/import" approach. Aggregation of corresponding data items collected on the school level was performed only for the District of Columbia, which reported student membership by race/ethnicity at the school level but not on the state level. Three variations of impute/import imputations (not aggregations) were used depending on the item being imputed, and each is described below. Variable names in the list can be identified by using the record layout in appendix A .

Impute using growth rate. If a missing item had been reported by the state in the previous year, the imputation was based on the rate of change from the previous to the current year among reporting states. The method was as follows: (1) calculate the ratio of the current year value for the item to the previous year's value among states reporting the item strictly by the definition; ${ }^{2}$ (a) calculate the average of these ratios; (3) multiply the value reported in the previous year (but missing this year) by this average ratio. These items are indicated in the list in Section C by "impute using growth rate."

Impute/import for Prekindergarten student counts. The method used to impute prekindergarten students is as follows: (1) calculate the ratio of prekindergarten students (PK) to total students (MEMBER) minus prekindergarten students (PK) for each state reporting these items strictly by the definition; (2) calculate the average of these ratios; and (3) multiply the count of total students (MEMBER) of the state with the missing item times the average ratio. These items are indicated in the list in Section C by "PK impute based on (MEMBER-PK)."

[^1]Impute/import for Prekindergarten teacher counts. The method used to impute prekindergarten teachers is as follows: (1) calculate the ratio of prekindergarten teachers (PKTCH) to prekindergarten students (PK) for each state reporting these items strictly by the definition; (2) calculate the average of these ratios; and (3) multiply the count of prekindergarten students (PK) of the state with the missing item times the average ratio. These items are indicated in the list in Section C by "PKTCH impute/import PK."

Impute/import for all other items. This method was used to impute items other than the prekindergarten items described above that a state failed to report in both the current year and the previous year. This method based the imputation on the ratio of the missing item to student membership, as these items were reported by other states for the current year. The method is as follows: (1) calculate the ratio of the missing item to total students (MEMBER) for each state reporting these items strictly by the definition; (2) calculate the average of these ratios; and (3) multiply the count of total students (MEMBER) of the state with the missing item times the average ratio. These imputations are indicated in the list in Section C by "impute/import." The first item listed is the item being imputed. The second item listed is the item used in calculating the ratios, and the state value for this item is multiplied by the calculated mean ratio. As noted above, the ratio of PK membership to (total membership minus PK membership) among reporting states was used to impute PK membership. PK membership was used to impute PK teachers. Other missing staff items were imputed based on membership.

Aggregation of corresponding data items collected on the school level. The District of Columbia did not report student membership by race/ethnicity at the state level. However, the District of Columbia did report student membership by race on their school-level data submission. Schoollevel data were aggregated to the state level. These imputations are indicated in the list in Section C by " $<$ Data item $>$ totaled from external (school-level) detail."

## B.2. Adjustments

There are several variations in the way adjustments were implemented. These variations are indicated in the list of adjustments and imputations in Section C. Variable names in the list can be identified by using the record layout in appendix A .
"Combined with" and "contains" adjustments. Statements with "combined with" indicate that the first item was reported as missing and the value included in the item(s) following "combined with." These statements can be matched to statements with "contains," where the first variable contains the value for that item plus the value for the item(s) following "contains." At the end of the "contains" statement, the total used in calculating the ratio used in the adjustment is indicated by the word "using." In all cases, this total is total students (MEMBER). For example, "STUSUP combined with LEAADM" indicates that the value for student support services staff (STUSUP) was included in the amount reported for LEA administrators (LEAADM). The adjustment process reduces the amount for LEAADM and places it in STUSUP. "LEAADM contains STUSUP using MEMBER" describes the same condition. The amount reported for LEAADM contains the count for STUSUP, and the distribution is based on a ratio with total students (MEMBER) in the denominator.

The method used for this adjustment is as follows: (1) calculate the ratio of each missing item and the item containing the missing value(s) to the total indicated at the end of the "contains"
statement for each state reporting these items strictly by the definition; (2) calculate the average of each of these ratios; (3) calculate the ratio of each average ratio to the sum of the average ratios for the unreported items as well as for the item that will be distributed; and (4) multiply the reported item by the ratio calculated in step 3 to determine the share for each item.
"Totals" and "supplemented by" adjustments. Adjustment statements with "totals" are used only for the distribution of total guidance counselors (TOTGUI) into elementary and secondary counselors (ELMGUI and SECGUI) in those states not reporting this detail. In these cases, the total number of counselors is not affected by the adjustment operation. "Totals" adjustments are similar to the "contains" adjustment described above. The method used for "totals" adjustments is as follows: (1) calculate the ratio of each item (in the totals list) to the reported total for each state reporting detail counselor counts; (2) calculate the average of each of these ratios; and (3) multiply the reported item by the ratio calculated in step 2 to determine the share for each item. Elementary counselors (ELMGUI) and secondary counselors (SECGUI) are also listed as being "supplemented" by the count of total guidance counselors (TOTGUI) in this operation.
"Totals from sum of internal detail" adjustments. In cases where a state reported a total count of Teachers (TOTTCH), guidance counselors (TOTGUI), or student membership (MEMBER) that exceeded or was less than the sum of associated detail, the reported total was adjusted to equal the sum of the associated detail. For example, if the sum of prekindergarten teachers (PKTCH), kindergarten teachers (KGTCH), elementary teachers (ELMTCH), secondary teachers (SECTCH), and ungraded teachers (UGTCH) was less than the total number of teachers reported (TOTTCH), TOTTCH was adjusted to match the sum of the associated teacher detail.
MEMBER was adjusted to sum of the total of grade detail only (i.e., MEMBER was not adjusted to match the sum of race/ethnicity by grade detail). These items are indicated in the list in Section C by " $<$ Data item $>$ totaled from internal detail."

## C. List of Adjustments and Imputations

Adjustments and imputations to data items in preliminary 2003-04 state nonfiscal data file, organized alphabetically by state or other jurisdiction, are as follows:

## D. Comments for users of the data file

## D.1. Item nonresponse of less than 1.

Values for items for which the states did not report anything or reported an entry of less than 1 , and for which no imputations or adjustments were made, have been adjusted to $0,-1$, or -2 according to the following criteria:

- 0 (zero) indicates that a numerical value was measured and no quantity was found.
- -1 indicates that the data are missing; a value was expected, but no value was measured.
- -2 indicates that the data are not applicable; a value was neither expected nor measured.

## D.2. Disclosure risk analysis, data suppression, and data perturbation for high school completers.

The CCD Local Education Agency Universe survey and the State Nonfiscal Survey of Public Elementary and Secondary Education data files have undergone disclosure risk analysis to remove the possibility of using the data to identify individuals who did not graduate with a diploma at the end of their $12^{\mathrm{th}}$-grade year. Each record on the two files was examined to determine cases where the number of diplomas compared to the affiliated $12^{\text {th }}$-grade membership could be used to make a prediction with a high level of accuracy of an individual's outcome as a non-diploma recipient.

Analysis of the Local Education Agency Universe survey file resulted in the suppression of diploma data for 197 agencies and the suppression of other high school completion data for 97 agencies. Suppressed cells were set to a value of -1 (missing). No changes were made to the imputation flags for these cells and the suppressed cells are indistinguishable from missing values reported by states. Overall, there are 408 agencies with a missing or suppressed value for the diploma recipient total, and 863 agencies with a missing or suppressed value for the total number of other high school completers. Suppression of detail on the Local Education Agency Universe survey file did not directly affect aggregate values for diploma recipients and other high school completer counts on the State Nonfiscal Survey of Public Elementary and Secondary Education file.

The State Nonfiscal Survey of Public Elementary and Secondary Education file also underwent disclosure risk analysis, but no suppression of this file occurred. Rather than suppressing completion data for entire states or outlying areas, data perturbation was used to remove the risk of disclosure. Each record was examined to determine if a comparison between the $12^{\text {th }}$-grade membership and the diploma count, or the difference between the state's reported total and the aggregate total from the Local Education Agency Universe survey file, could be used to determine with a high degree of certainty a diploma nonrecipient. This analysis led to the addition of 43 extra diplomas being added to 23 states or other jurisdictions, with no state receiving more than two diplomas. These adjustments did not correspond with a change in the imputation flag and are indistinguishable from regular reported values.

## D.3. NCES edits to nonfiscal data

This section presents information on anomalies for nonfiscal data submitted by states, as well as any edits made by NCES. These edits include imputations and adjustments as described previously, as well as any edits made as the result of a consistency check on submitted data (for example, reported membership cannot be less than the sum of the individual grade variables; in those cases, membership is edited to match the sum of the grade detail.) When known, specific state reporting practices concerning missing data are also listed. All nonfiscal edits and reporting practices listed below apply to school year 2003-04. NCES does not impute data for jurisdictions other than the 50 states and the District of Columbia.

Prekindergarten student membership. California, Tennessee, the Bureau of Indian Affairs schools, and the Virgin Islands reported prekindergarten membership as missing. Data were imputed for California and Tennessee.

Ungraded student membership. Alabama, Alaska, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Louisiana, Massachusetts, Minnesota, Nebraska, New Mexico, North Carolina, North Dakota, Ohio, Rhode Island, South Carolina, South Dakota, Texas, Washington, Wisconsin, Wyoming, the Department of Defense Dependents Schools, Guam, and the Bureau of Indian Affairs schools reported zero or not applicable for ungraded student membership. In most of these states and territories, all students are assigned grades, and therefore in those states and territories, this category does not exist. There were no imputations performed on the counts.

Total student membership. Prekindergarten student membership was imputed for California and Tennessee. These imputed values were added to their total student membership counts.

Prekindergarten teachers. This item was missing for California, Maine, Massachusetts, Michigan, Montana, Nebraska, Pennsylvania, Rhode Island, the Bureau of Indian Affairs schools, and the Virgin Islands. Maine, Montana, Nebraska, and Pennsylvania included prekindergarten teachers in the elementary and secondary teacher counts. Massachusetts included prekindergarten teachers in the kindergarten teachers count. Imputations or adjustments were performed for each state, but not for the Bureau of Indian Affairs schools and the Virgin Islands.

Kindergarten teachers. This item was missing for Hawaii, Maine, Michigan, Montana, Nebraska, Pennsylvania, Rhode Island, and the Bureau of Indian Affairs schools. Hawaii, Kentucky, Maine, Montana, Nebraska, and Pennsylvania included these teachers with elementary and secondary teacher counts. Massachusetts included prekindergarten teachers in the kindergarten teachers count. Imputations or adjustments were performed for each state, but not for the Bureau of Indian Affairs schools.

Elementary teachers. This item was missing for Michigan, Rhode Island, and the Bureau of Indian Affairs schools. Hawaii, Kentucky, Maine, Montana, Nebraska, and Pennsylvania included prekindergarten and/or kindergarten teachers in the elementary and secondary teacher counts. Imputations or adjustments were performed for each state, but not for the Bureau of Indian Affairs schools.

Secondary teachers. This item was missing for Michigan and Rhode Island, and the Bureau of Indian Affairs schools. Imputations were performed for Michigan and Rhode Island.

Ungraded teachers. Ungraded teachers were reported as not applicable for Alabama, Alaska, Arizona, Colorado, Delaware, Georgia, Idaho, Maine, Maryland, Minnesota, Montana, Nebraska, New Hampshire, North Dakota, Ohio, Virginia, and the Bureau of Indian Affairs schools. This item was missing for Michigan, Rhode Island, and Guam. Louisiana reported ungraded teacher counts as zero. Ungraded teacher counts were imputed for Michigan and Rhode Island.

Total teachers. Prekindergarten teachers were imputed for California. This imputed value was added to the total teachers count. This item was missing for Bureau of Indian Affairs schools.

Instructional aides. This item was missing for Illinois, Rhode Island, and the Bureau of Indian Affairs schools. Instructional aides were imputed for both states, but not for the Bureau of Indian Affairs schools.

Instructional coordinators and supervisors. Alaska, New Hampshire, Rhode Island, Tennessee, and the Bureau of Indian Affairs schools did not report instructional coordinators and supervisors. These counts were imputed or adjusted for each state, but not for the Bureau of Indian Affairs schools.

Elementary guidance counselors. This item was missing for Michigan, Rhode Island, and the Bureau of Indian Affairs schools. Michigan reported total guidance counselors only. These counts were imputed or adjusted for both states, but not for the Bureau of Indian Affairs schools.

Secondary guidance counselors. This item was missing for Michigan, Rhode Island, and the Bureau of Indian Affairs schools. Michigan reported total guidance counselors only. These counts were imputed or adjusted for both states, but not for the Bureau of Indian Affairs schools.

Total guidance counselors. Rhode Island and the Bureau of Indian Affairs schools did not report total guidance counselors. Total guidance counselors were imputed for Rhode Island. Marlyand reported total guidance counselors greater than the sum of elementary and secondary guidance counselors. Total guidance counselors were decreased to equal the sum of elementary and secondary guidance counselors for each state.

Librarians/media specialists. Rhode Island and the Bureau of Indian Affairs schools did not report librarians/media specialists. These counts were imputed for Rhode Island.

Library/media support staff. This item was missing for California, Illinois, Massachusetts, Montana, Tennessee, Texas, the Department of Defense Dependents Schools, and the Bureau of Indian Affairs Schools. This category was imputed or adjusted for each state, but not for the Bureau of Indian Affairs Schools and the Department of Defense Dependents Schools.

LEA administrators. This item was missing for the Bureau of Indian Affairs schools. These counts were not imputed for the Bureau of Indian Affairs schools.

LEA administrative support staff. This item was missing for Illinois, Maine, Montana, South Carolina, Tennessee, and the Bureau of Indian Affairs schools. Nebraska included school administrative support staff with LEA administrative support staff, and the numbers were adjusted. LEA administrative support staff counts were imputed or adjusted for each state, but not for the Bureau of Indian Affairs schools.

School administrators. Rhode Island and the Bureau of Indian Affairs schools did not report school administrators. New Hampshire included instructional coordinators and supervisors with school administrators, and the numbers were adjusted. These counts were imputed or adjusted for each state, but not for the Bureau of Indian Affairs Schools.

School administrative support staff. This item was missing for Illinois, Maine, Minnesota, Montana, Nebraska, South Carolina, and the Bureau of Indian Affairs schools. Data for all of these states were imputed or adjusted, but not for the Bureau of Indian Affairs schools. New Hampshire included student support services with school administrative support staff. Tennessee included instructional coordinators and supervisors with school administrative support staff. These numbers were adjusted for both New Hampshire and Tennessee.

Student support services staff. New Hampshire, Tennessee, and the Bureau of Indian Affairs schools did not report student support services staff. Data were imputed or adjusted for each state, but not for the Bureau of Indian Affairs schools.

All other support staff. The category of all other support staff was missing for Illinois, Montana, and the Bureau of Indian Affairs schools. California, Maine, Minnesota, Tennessee, and Texas included other staff counts in all other support staff. These counts were imputed or adjusted for each states, but not for the Bureau of Indian Affairs schools.

Regular diploma recipients. The Bureau of Indian Affairs schools reported regular diploma recipients as missing. See "Section II. User's Guide, Disclosure risk analysis, data suppression, and data perturbation for high school completers" for a discussion of data perturbation to remove disclosure risk of $12^{\text {th }}$-grade students who did not receive regular diplomas.

High school equivalency recipients. The General Educational Development (GED) Testing Service was the source for the numbers of individuals 19 or younger who passed the GED examination between October 1, 2002 and September 30, 2003. GED Testing Service data are published here because they are available for every state and are comparable from state to state. However, these numbers are an approximation of the number of high school equivalencies awarded in that year. Not every individual who meets the GED Testing Service's passing score applies for and is awarded an equivalency diploma. A state may also grant an equivalency diploma on the basis of some test other than the GED, and those degrees would not be reflected in this count. Also, the state or jurisdiction in which an individual takes the GED is not necessarily the state in which he or she was last enrolled in school. GED data are missing for the Bureau of Indian Affairs schools, the Department of Defense Dependents Schools, and Puerto Rico.

Other high school completers. California, Illinois, Kansas, Minnesota, Missouri, Montana, New Jersey, North Dakota, Ohio, Oklahoma, Pennsylvania, South Dakota, Texas, the Bureau of Indian Affairs schools, the Commonwealth of the Northern Marianas, the Department of Defense Dependents Schools, Guam, and the Virgin Islands reported other high school completers as not applicable. New Hampshire and Wisconsin reported other high school completers as missing. Other high school completers counts were not imputed. See "Section II. User's Guide, Disclosure risk analysis, data suppression, and data perturbation for high school completers" for a discussion of data perturbation to remove disclosure risk of $12^{\text {th }}$-grade students who did not receive regular diplomas.

Race/ethnicity student by grade data. The District of Columbia reported student by grade, race/ethnicity data as missing. Data for this state were imputed by aggregating student counts by race/ethnicity that were reported on the school level.

Race/ethnicity diploma data. New Hampshire, South Carolina, and the Bureau of Indian Affairs schools reported race/ethnicity diploma data as missing. See "Section II. User's Guide, Disclosure risk analysis, data suppression, and data perturbation for high school completers" for a discussion of data perturbation to remove disclosure risk of $12^{\text {th }}$-grade students who did not receive regular diplomas.

Race/ethnicity high school equivalency data. Race/ethnicity high school equivalency data are missing for all states. NCES does not impute race/ethnicity data for high school equivalencies.

Race/ethnicity other high school completer data. New Hampshire, South Carolina, and Wisconsin reported race/ethnicity other high school completer data as missing. See "Section II. User's Guide, Disclosure risk analysis, data suppression, and data perturbation for high school completers" for a discussion of data perturbation to remove disclosure risk of $12^{\text {th }}$-grade students who did not receive regular diplomas.

## D.4. Revised file changes

Each year CCD files are revised one year later if errors are found on the file or a state resubmits. The following are changes from the original release of the Common Core of Data State Nonfiscal Survey of Public Elementary/Secondary Education: School Year 2003-04.

1. Some data imputed based on current year (Fall 2003) data changed due to the states for which the imputations were based upon resubmitting actual data.
2. Student membership by race/ethnicity and grade was aggregated from the schoollevel file for the District of Columbia.
3. Student membership, membership by grade, and /or membership by race/ethnicity were revised for the following states: Kentucky and Virginia.
4. Directory information street addresses were edited to ensure they fit the 30 character field length.

Table 1. State and other jurisdiction FIPS codes and abbreviations used in CCD datasets

| State name/jurisdiction | FIPS ${ }^{1}$ | Abbreviation ${ }^{2}$ | State name/jurisdiction | FIPS ${ }^{1}$ | Abbreviation ${ }^{2}$ |
| :---: | :---: | :---: | :---: | :---: | :---: |

| New Jersey | 34 | NJ | Northern Marianas | 69 | MP |
| New Mexico | 35 | NM | Puerto Rico | 72 | PR |
| New York | 36 | NY | U.S. Virgin Islands | 78 | VI |
| North Carolina | 37 | NC |  |  |  |
| North Dakota | 38 | ND |  |  |  |

${ }^{1}$ Federal Information Processing Standards Codes (01-78).
${ }^{2}$ Postal state abbreviation codes.
${ }^{3}$ Not official U.S. FIPS code. The state abbreviations for Department of Defense (overseas) schools are AA, AE, and AP to indicate schools located in Asia, Europe, and the Pacific, respectively. For Department of Defense (domestic) schools and Bureau of Indian Affairs schools, state abbreviations correspond to the state in which the school is located.

## E. User guidelines for processing the State Nonfiscal Survey of Public Elementary and Secondary Education

Starting in 1999-2000, CCD data file names were changed to include a two-digit version number. This 2003-04 State Nonfiscal Survey of Public Elementary and Secondary Education Excel file is called ST031B.XLS and the flat ASCII file is called ST031B.DAT. The first two characters of the file name indicate the type of file ( $\mathrm{SC}=$ School Universe, AG = Agency Universe, ST = State), the third and fourth characters indicate the file year ( $03=2003-04$ CCD collection), and the fifth and sixth characters indicate the version number $(1=$ Public File, $\mathrm{B}=$ second version $)$. Note that the preliminary files are identified by a version number beginning with 0 (zero). The final files are assigned a version number beginning with 1 (one). The record layout for the file is contained in appendix A .

Approximately 1 year after the release of the 1a files (first final file,) NCES releases a revised data file. The purpose of the revised data file is to allow state education agencies to resubmit any corrections to their data. This revised file is labeled 1 b , unless another revision of the original file has occurred sometime in that year due to an error NCES finds on the file.

Imputation flags:
A - Adjustment
C - Combined with data provided elsewhere by the state
I - Imputation based on a method other than prior year's data
N - Not applicable
P - Imputation based on prior year's data
R - As reported by the state
$T$ - Total based on sum of internal or external detail

[^32]Appendix C—Glossary for the Common Core of Data State Nonfiscal Survey of Public Elementary/Secondary Education: School Year 2003-04

# APPENDIX C-Glossary for the Common Core of Data: School Year 2003-04 

For the CCD to have comparable data across states, all states must abide by the same standard definitions when reporting on schools, students, and staff. To ensure a common understanding, definitions for critical terms are presented below. The glossary contains definitions for all variables and terms found on the CCD school, agency, or state files.

## Alternative Education School

A public elementary/secondary school that addresses needs of students that typically cannot be met in a regular school; provides nontraditional education; serves as an adjunct to a regular school; and falls outside of the categories of regular, special education, or vocational education.

## American Indian/Alaska Native

A person having origins in any of the original peoples of North America and who maintains cultural identification through tribal affiliation or community recognition.

## Asian/Pacific Islander

A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. This includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

## Black

A person having origins in any of the black racial groups of Africa.

## Boundary Change

See "Operational Status, Agency" for definition. Name of term was changed to "Operational Status, Agency," after 1997-98.

## Charter School

A school providing free public elementary and/or secondary education to eligible students under a specific charter granted by the state legislature or other appropriate authority, and designated by such authority to be a charter school. Item was first collected in 1998-99.

## Classroom Teacher

See "Teacher."

## Combined Statistical Area (CSA)

If an area that qualifies as a metropolitan area (MA) has more than one million people, two or more core-based statistical areas (CBSAs) may be defined within it. Each CBSA consists of a large urbanized county or cluster of counties (cities and towns in New England) that demonstrate very strong internal economic and social links, in addition to close ties to other portions of the larger area. When CBSAs are established, the larger MA of which they are component parts is designated a combined statistical area (CSA). CSAs and CBSAs are established only where local governments favor such designations for a large MA.

## Core Based Statistical Area (CBSA)

Each CBSA must contain at least one urban area of 10,000 or more people. Under the Census standards, the county (or counties) in which at least 50 percent of the population resides within urban areas of 10,000 or more people, or

## APPENDIX C-Glossary for the Common Core of Data: School Year 2003-04

that contains at least 5,000 people residing within a single urban area of 10,000 or more people, is identified as a "central county" (or counties). Additional "outlying counties" are included in the CBSA if they meet specified requirements of commuting to or from the central counties. Counties or equivalent entities form the geographic "building blocks" for metropolitan and micropolitan statistical areas throughout the United States and Puerto Rico.

## Diploma, High School

A formal document certifying the successful completion of a secondary school program prescribed by the state education agency or other appropriate body.

## Diploma Recipient

A student who has received a diploma during the previous school year or subsequent summer school.

## District Locale Code

A code based upon the school locale codes to indicate the location of the district in relation to populous areas. (See also "Large City," "Midsize City," "Urban Fringe of a Large City," "Urban Fringe of a Midsize City," "Large Town," "Small Town," "Rural, Outside CBSA," and "Rural, Inside CBSA.")

## Dropout

A student who was enrolled in school at some time during the previous school year; was not enrolled at the beginning of the current school year; has not graduated from high school or completed a state- or district-approved educational program; and does not meet any of the following exclusionary conditions: has transferred to another public school district, private school, or state- or district-approved educational program; is temporarily absent due to suspension or school-approved illness; or has died. Item was first collected in 1992-93.

## Education Agency

A government agency administratively responsible for providing public elementary and/or secondary instruction or educational support services.

## Elementary

A general level of instruction classified by state and local practice as elementary, composed of any span of grades not above grade 8 ; preschool or kindergarten included only if it is an integral part of an elementary school or a regularly established school system.

## English Language Learner (ELL)

"English language learner (ELL)" was formerly referred to as "limited English proficient (LEP)." Refers to students being served in appropriate programs of language assistance (e.g., English as a Second Language, High Intensity Language Training, bilingual education). Does not include pupils enrolled in a class to learn a language other than English. Also, ELL students are individuals who were not born in the United States or whose native language is a language other than English; individuals who come from environments where a language other than English is dominant; or individuals who are American Indians or Alaskan Natives and who come from environments where a language other than English has had a significant impact on their level of English language proficiency; and who, by reason thereof, have sufficient difficulty speaking, reading, writing, or understanding the English language to deny such individuals the opportunity to learn successfully in classrooms where the language of instruction is English or to participate fully in our society. Item was first collected in 1998-99.

# APPENDIX C-Glossary for the Common Core of Data: <br> School Year 2003-04 

## Federally Operated Education Agency

A federally operated agency that is charged, at least in part, with providing elementary and/or secondary instruction or support services.

## Free Lunch Program

A program under the National School Lunch Act that provides cash subsidies for free lunches to students based on family size and income criteria.

## Full-time Equivalency (FTE)

The amount of time required to perform an assignment stated as a proportion of a full-time position and computed by dividing the amount of time employed by the time normally required for a full-time position.

## General Educational Development (GED) Test

A comprehensive test used primarily to appraise the educational development of students who have not completed their formal high school education and who may earn a high school equivalency certificate through achievement of satisfactory scores.

## Grade Span Offered

The span of grades intended to be served by a school or agency, whether or not there are students currently enrolled in all grades. If a high school also has a prekindergarten program, the grade span of the high school is reported as a high school, not as a PK-12 school. For example, if a school has PK as well as grades 9, 10, 11, and 12, the grade span will be reported as grades 9 through 12 (0912). Also, the ungraded designation (UG) cannot be used in a grade span unless the whole school consists of ungraded students, and in this case the grade span is reported as UGUG. "Grade span" was calculated from school membership through 1997-98 and first collected as a separate item in 1998-99.

## Graduate, High School

A high school graduate is defined as an individual who received a diploma recognizing the completion of secondary school requirements during the previous school year and subsequent summer school. It excludes high school equivalency and other high school completers (e.g., those granted a certificate of attendance).

## Guidance Counselor/Director

Professional staff assigned specific duties and school time for any of the following activities in an elementary or secondary setting: counseling with students and parents; consulting with other staff members on learning problems; evaluating student abilities; assisting students in making educational and career choices; assisting students in personal and social development; providing referral assistance; and/or working with other staff members in planning and conducting guidance programs for students. The state applies its own standards in apportioning the aggregate of guidance counselors/directors into the elementary and secondary level components.

## Head Start Program

A federally funded program that provides comprehensive educational, social, health, and nutritional services to lowincome preschool children and their families, and children from ages 3 to school entry age (i.e., the age of compulsory school attendance). Head Start students and teachers are reported on the CCD only when the program is administered by a local education agency.

# APPENDIX C—Glossary for the Common Core of Data: <br> School Year 2003-04 

## High School Completion Count

A count of graduates and other high school completers including diploma recipients and other high school completers.

## High School Equivalency Certificate

A formal document certifying that an individual met the state requirements for high school graduation equivalency by obtaining satisfactory scores on an approved examination, and meeting other performance requirements (if any) set by a state education agency or other appropriate body.

## High School Equivalency Recipient

Individual age 19 years or younger who received a high school equivalency certificate during the previous school year or subsequent summer. Item was last reported on the Local Education Agency Survey in 1990-91, but was collected by the State Nonfiscal Survey through 2002-03. Beginning with the 2003-04 collection, the item was replaced by the number of individuals age 19 or younger who passed the GED examination, as reported by the GED Testing Service.

## High School Graduate, Other Programs

A student who received a high school diploma, equivalency diploma, or other completion credential during the previous school year or subsequent summer school; the credential is based upon completion of other than the standard high school requirements or is achieved through nontraditional means. Term was last used in 1986-87. See "Other Diploma Recipient," "High School Equivalency Recipient," and "Other High School Completer."

## High School Graduate, Regular Day School

A student who received a high school diploma during the previous school year or subsequent summer school; the diploma is based upon completion of high school requirements through traditional means. Term was last used in 1986-87. See "Regular Diploma Recipient."

## Hispanic

A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

## Individualized Educational Program (IEP)

A written instructional plan for students with disabilities designated as special education students under the Individuals With Disabilities Education Improvement Act (IDEA), Part B. The written instructional plan includes a statement of the child's present level of educational performance; a statement of annual goals, including short-term instructional objectives; a statement of specific educational services to be provided and the extent to which the child will be able to participate in regular educational programs; the projected date for initiation and anticipated duration of services; the appropriate objectives, criteria, and evaluation procedures; and the schedule for determining, on at least an annual basis, whether instructional objectives are being achieved.

## Instructional Aide

Staff member assigned to assist a teacher with routine activities associated with teaching, i.e., activities requiring minor decisions regarding students, such as monitoring, conducting rote exercises, operating equipment, and clerking. Includes only paid staff, and excludes volunteer aides.

# APPENDIX C-Glossary for the Common Core of Data: <br> School Year 2003-04 <br> Instructional Coordinators and Supervisors 

Persons who supervise instructional programs at the school district or subdistrict level: category includes educational television staff; coordinators and supervisors of audiovisual services; curriculum coordinators and inservice training staff; Title I coordinators and home economics supervisors; and staff engaged in the development of computer-assisted instruction. School-based department chairpersons are excluded.

## Kindergarten

A group or class that is part of a public school program and is taught during the year preceding first grade.

## Large City

A principal city of a metropolitan CBSA, with the city having a population greater than or equal to 250,000 . (See also "Locale Code.") Prior to 1994-95, "Large City" was defined as a principal city of a metropolitan area with a population of 400,000 or more, or a population density of at least 6,000 people per square mile.

## Large Town

An incorporated place or Census-designated place with a population greater than or equal to 25,000 and located outside a metropolitan CBSA or inside a micropolitan CBSA.

## Latitude

Latitude is the north or south angular distance from the equator that, when combined with longitude, reflects an estimation of where the school is physically situated on the street segment to which it was coded. Coordinate degrees, minutes, and seconds have been converted to and are displayed in terms of their decimal equivalent. The first 3 digits of the code represent the number of degrees from the equator; the last 6 digits represent the fraction of the next degree carried out to six decimal places, with an implied decimal. For example, if a school's latitude is 30 degrees, 30 minutes north, then it is shown as 030500000 .

## Local Education Agency (LEA) Administrative Support Staff

All staff members who provide direct support to LEA administrators, business office support, and data processing.

## LEA Administrator

Chief executive officers of education agencies, including superintendents, deputies, and assistant superintendents; other persons with districtwide responsibilities, e.g., business managers, administrative assistants, and professional instructional support staff. Excludes supervisors of instructional or student support staff.

## Librarian

A professional staff member or supervisor assigned specific duties and school time for professional library services activities. These include selecting, acquiring, preparing, cataloging, and circulating books and other printed materials; planning the use of the library by students, teachers, and instructional staff; and guiding individuals in the use of library books and material maintained separately or as a part of an instructional materials center.

## Library and Media Support Staff

Staff member who renders other professional library and media services; also includes library aides and those involved in library/media support. Duties include selecting, preparing, caring for, and making available to instructional staff, equipment, films, filmstrips, transparencies, tapes, TV programs, and similar materials

## APPENDIX C-Glossary for the Common Core of Data: School Year 2003-04

maintained separately or as part of an instructional materials center. Also included are activities in the audiovisual center, TV studio, related work-study areas, and services provided by audiovisual personnel.

## Limited-English Proficient (LEP)

See "English Language Learner (ELL)."

## Locale Code

Locale code is defined based on how the school is situated in a particular location relative to populous areas, based on the school's address. (See also "Large City," "Midsize City," "Urban Fringe of a Large City," "Urban Fringe of a Midsize City," "Large Town," "Small Town," "Rural, Outside CBSA," and "Rural, Inside CBSA.")

## Longitude

Longitude is the east or west angular distance from the prime meridian that, when combined with latitude, reflects an estimation of where the school is physically situated on the street segment to which it was coded. Coordinate degrees, minutes, and seconds have been converted to and are displayed in terms of their decimal equivalent. The first 3 digits of the code represent the number of degrees from the prime meridian; the last 6 digits represent the fraction of the next degree carried out to six decimal places, with an implied decimal. For example, if a school's longitude is 90 degrees, 15 minutes west, then it is shown as -090250000 .

## Magnet School or Program

A special school or program designed to attract students of different racial/ethnic backgrounds for the purpose of reducing, preventing, or eliminating racial isolation ( 50 percent or more minority enrollment); and/or to provide an academic or social focus on a particular theme (e.g., science/math, performing arts, gifted/talented, or foreign language). Item was first collected in 1998-99.

## Media Specialist

Directors, coordinators, and supervisors of media centers. See "Library and Media Support Staff."

## Membership

The count of students on the current roll taken on the school day closest to October 1, by using either the sum of original entries and re-entries minus total withdrawals or the sum of the total present and the total absent.

## Metropolitan Statistical Area (MSA)

An area consisting of one or more contiguous counties (cities and towns in New England) that contain a core area with a large population nucleus, as well as adjacent communities having a high degree of economic and social integration with that core.

## Metropolitan Status (Metro Status)

Metro status is defined as the classification of an education agency's service area relative to a CBSA. (See also Metropolitan Statistical Area.)

# APPENDIX C-Glossary for the Common Core of Data: School Year 2003-04 

## Micropolitan Statistical Area

A core based statistical area associated with at least one urban cluster that has a population of at least 10,000 but less than 50,000 . The micropolitan statistical area comprises the central county or counties that contain the core, plus adjacent outlying counties having a high degree of social and economic integration with the central county as measured through commuting.

## Midsize City

A principal city of a metropolitan CBSA, with the city having a population less than 250,000. (See also "Locale Code.") Prior to $1994-95$, term was defined as a central city of a metropolitan area with a population less than 400,000 and a population density less than 6,000 people per square mile.

## Migrant Student

Defined under 34 CFR (Code of Federal Regulations) 200.40: (1) (a) Is younger than 22 (and has not graduated from high school or does not hold a high school equivalency certificate), but (b) if the child is too young to attend school-sponsored educational programs, is old enough to benefit from an organized instructional program; and (2) A migrant agricultural worker or a migrant fisher or who has a parent, spouse, or guardian who is a migrant agricultural worker or a migrant fisher; and (3) Performs, or has a parent, spouse, or guardian who performs qualifying agricultural or fishing employment as a principal means of livelihood; and (4) Has moved within the preceding 36 months to obtain or to accompany or join a parent, spouse, or guardian to obtain, temporary or seasonal employment in agricultural or fishing work; and (5) Has moved from one school district to another; or in a state that is comprised of a single school district, has moved from one administrative area to another within such district; or resides in a school district of more than 15,000 square miles, and migrates a distance of 20 miles or more to a temporary residence to engage in a fishing activity. (Provision 5 currently applies only to Alaska.) Item was first collected in 1998-99.

## Officials and Administrators

Chief executive officers of education agencies, including superintendents, deputies, and assistant superintendents; and other persons with districtwide responsibilities, such as business managers, administrative assistants, etc.

## Operational Status, Agency

Classification of changes in an education agency's boundaries or jurisdiction. Classifications include no change, currently in operation; closed with no effect on another agency's boundaries; new agency with no effect on another agency's boundaries; added; significant change in geographic boundaries or instructional responsibility; temporarily closed and may reopen within 3 years; scheduled to be operational within 2 years. Prior to 1998-99, the term "Boundary Change" was used.

## Operational Status, School

Classification of the operational condition of a school. Classifications include currently operational; closed; new; added; changed agency; temporarily closed and may reopen within 3 years; and scheduled to be operational within 2 years.

## Other Diploma Recipient

A student who received a diploma through other than a regular school program during the previous school year or subsequent summer. Last reported in 1997-98; combined with "Regular Diploma Recipient" in 1998-99, with both categories reported as "Diploma Recipient."

## APPENDIX C-Glossary for the Common Core of Data: <br> School Year 2003-04

## Other High School Completer

Student who has received a certificate of attendance or other certificate of completion in lieu of a diploma during the previous school year and subsequent summer school.

## Other Support Staff

Staff who serve in a support capacity and who are not included in the categories of central office administrative support, library support, student support, or school administrative support: e.g., data processing staff; bus drivers; and health, building, equipment maintenance, security, and cafeteria workers.

## Prekindergarten Student

Student who is enrolled in a group or class that is part of a public school program taught during the year or years preceding kindergarten, excluding Head Start students unless part of an authorized public education program of a local education agency.

## Prekindergarten Teacher

Teacher of a group or class that is part of a public school program that is taught during the year or years preceding kindergarten; includes teachers of Head Start students if part of authorized public education program of a local education agency.

## Principal City

The largest city in each metropolitan or micropolitan statistical area is designated a "principal city." Additional cities qualify if specified requirements are met concerning population size and employment. The title of each metropolitan or micropolitan statistical area consists of the names of up to three of its principal cities and the name of each state into which the metropolitan or micropolitan statistical area extends. Titles of metropolitan divisions also typically are based on principal city names but in certain cases consist of county names. (See also "Locale Code.")

## Public School

An institution that provides educational services and has one or more grade groups ( $\mathrm{PK}-12$ ) or that is ungraded, has one or more teachers to give instruction, is located in one or more buildings, has an assigned administrator, receives public funds as primary support, and is operated by an education agency.

## Reduced-Price-Lunch Student

A student who is eligible to participate in the Reduced-Price Lunch Program under the National School Lunch Act. (See also "Free Lunch Program")

## Regional Education Service Agency

Agency providing services to a variety of local education agencies, or a county superintendent serving the same purposes.

## Regular Diploma Recipient

See "High School Graduate, Regular Day School." Last reported in 1997-98; combined with "Other Diploma Recipient" in 1998-99, with both categories reported as "Diploma Recipient."

# APPENDIX C-Glossary for the Common Core of Data: School Year 2003-04 

## Regular School

A public elementary/secondary school that does not focus primarily on vocational, special, or alternative education.

## Rural

Any incorporated place, Census-designated place, or non-place territory not within a metropolitan CBSA or within a micropolitan CBSA and defined as rural by the Census Bureau. From 1998-99 onward, the category was separated into "Rural, Inside CBSA" and "Rural, Outside CBSA."

## Rural, Inside CBSA

Any incorporated place, Census-designated place, or non-place territory within a metropolitan CBSA and defined as rural by the Census Bureau. Category represents a subset of "Rural," and was introduced in 1998-99. (See also "Locale Code.")

## Rural, Outside CBSA

Any incorporated place, Census-designated place, or non-place territory not within a metropolitan CBSA or within a micropolitan CBSA and defined as rural by the Census Bureau. Category represents a subset of "Rural," and was introduced in 1998-99. (See also "Locale Code.")

## School Administrative Support Staff

Staff whose activities are concerned with support of the teaching and administrative duties of the office of the principal or department chairpersons; this includes clerical staff and secretaries.

## School Administrator

Staff member whose activities are concerned with directing and managing the operation of a particular school, including principals, assistant principals, and other assistants; and those who supervise school operations, assign duties to staff members, supervise and maintain the records of the school, and coordinate school instructional activities with those of the education agency, including department chairpersons.

## School District

An education agency or administrative unit that operates under a public board of education.

## Secondary

The general level of instruction classified by state and local practice as secondary and composed of any span of grades beginning with the next grade following the elementary grades and ending with or below grade 12 .

## Shared Time School

A school offering vocational/technical education or other education services, in which some or all of the students are enrolled at a different school of record and attend the shared time school on a part-day basis: for example, a regional vocational center attended by students from multiple high schools on a part-day basis.

## Small Town

An incorporated place or Census Designated Place (CDP) with a population less than 25,000 and greater than or equal to 2,500 and located outside a metropolitan CBSA or inside a micropolitan CBSA. (See also "Locale Code.")

# APPENDIX C-Glossary for the Common Core of Data: School Year 2003-04 

## Special Education School

A public elementary/secondary school that focuses primarily on special education-including instruction for any of the following: autism, deaf-blindness, developmental delay, hearing impairment, mental retardation, multiple disabilities, orthopedic impairment, serious emotional disturbance, specific learning disability, speech or language impairment, traumatic brain injury, visual impairment, and other health impairments-and that adapts curriculum, materials, or instruction for students served.

## State Education Agency (SEA)

An agency of the state charged with primary responsibility for coordinating and supervising public instruction, including setting standards for elementary and secondary instructional programs.

## State-Operated Agency

Agency that is charged, at least in part, with providing elementary and/or secondary instruction or support services. Examples include elementary/secondary programs operated by the state for the deaf or blind; and programs operated by state correctional facilities.

## Student

An individual for whom instruction is provided in an elementary or secondary education program that is not an adult education program and is under the jurisdiction of a school, school system, or other education institution.

## Student Support Services Staff

Staff members whose activities are concerned with the direct support of students and who nurture, but do not instruct, students. Includes attendance officers; staff providing health, psychology, speech pathology, audiology, or social services; and supervisors of the preceding staff and of health, transportation, and food service workers.

## Supervisory Union

An education agency where administrative services are performed for more than one school district by a common superintendent.

## Teacher

An individual who provides instruction to prekindergarten, kindergarten, grade 1-12, or ungraded classes; or individuals who teach in an environment other than a classroom setting and who maintain daily student attendance records.

## Title I Eligible School

A school designated under appropriate state and federal regulations as being eligible for participation in programs authorized by Title I of Public Law 103-382. Item was first collected in 1998-99.

## Title I Schoolwide Program

A school in which all pupils are designated under appropriate state and federal regulations as being eligible for participation in programs authorized by Title I of Public Law 103-382. Item was first collected in 1998-99.

## Ungraded Student

Individual assigned to class or program that does not have standard grade designations.

## APPENDIX C-Glossary for the Common Core of Data: School Year 2003-04

## Urban Fringe

A closely settled area, contiguous to a principal city, outside a principal city; with a minimum population of 2,500 inhabitants; with a population density of at least 1,000 per square mile; and with a Census Urbanized Area Code. (See also "Locale Code.")

## Urban Fringe of a Large City

Any incorporated place, Census-designated place, or non-place territory within a metropolitan CBSA of a large city and defined as urban by the Census Bureau. Prior to 1994-95, defined as any incorporated place, Census-designated place, or non-place territory within a CBSA or CSA and defined as urban by the Census Bureau, with a principal city with a population of 400,000 or more, or a population density of at least 6,000 people per square mile. (See also "Locale Code.")

## Urban Fringe of a Midsize City

Any incorporated place, Census-designated place, or non-place territory within a CBSA of a midsize city and defined as urban by the Census Bureau. Prior to 1994-95, defined as any incorporated place, Census-designated place, or non-place territory within a CBSA or CSA and defined as urban by the Census Bureau, with a principal city with a population less than 400,000 , or a population density less than 6,000 people per square mile. (See also "Locale Code.")

## Urbanized Area

An area with a population concentration of at least 50,000 - generally consisting of a principal city and the surrounding, closely settled, contiguous territory-and with a population density of at least 1,000 inhabitants per square mile.

## Vocational Education School

A public elementary/secondary school that focuses primarily on providing formal preparation for semiskilled, skilled, technical, or professional occupations for high school-age students who have opted to develop or expand their employment opportunities, often in lieu of preparing for college entry.

## White

A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

[^0]:    ${ }^{1}$ There is one exception. The number of individuals passing the General Education Development (GED) test is provided by the GED Testing Service.

[^1]:    ${ }^{2}$ States reporting these items "strictly by the definition" are those states that (a) report values greater than 0 for each of the items involved in the imputation/adjustment; and (b) have no values affected by other imputations/adjustments.
