(TCNS) Tower Construction Notification System

Are you interested in learning more about the Federal Communications Commission's (FCC) Tower Construction Notification System (TCNS)?

The TCNS is a voluntary system to facilitate licensees, applicants and private tower constructors' identification of and early communication with federally-recognized Indian Tribes, including Alaska Native Villages, Native Hawaiian Organizations, and State Historic Preservation Officers.

As part of a continuing effort to improve the TCNS, the Wireless Telecommunications Bureau and the Consumer and Governmental Affairs Bureau will hold a public demonstration and live web cast of changes and enhancements to be made to TCNS on Thursday, March 30, 2006, from 1:00 to 3:00 p.m.

The public demonstration will take place in the FCC's 6th Floor South Conference Room (Room 6-B516) at the FCC's Washington, D.C. Headquarters, located at 445 Twelfth Street, S.W. The FCC requests that interested parties pre-register for the live event by March 28, 2006. Please pre-register for the live demonstration at http://esupport.fcc.gov/fccevents/reports/submitmsg.jsp, or contact Eugene Chun by telephone at 202-513-4575, by Tuesday, March 28, 2006.
