FEDERAL COMMUNICATIONS COMMISSION RELEASES *STATISTICS OF COMMUNICATIONS COMMON CARRIERS*

Washington, D.C. – Each year since 1939, the FCC has published the *Statistics of Communications Common Carriers*, a reference work widely used by academics, consultants, and other researchers in the field of telecommunications. This report includes a wealth of data on telecommunications costs, revenues, prices, and usage.

In order to expedite release of the information, the FCC is making all of the data available electronically at this time, well before the report's formal publication in December 2004. A second notice will be issued when printed versions can be purchased from the U.S. Government Printing Office.

The electronic version of the publication is available to the public free of charge. The 208-page volume is divided into the following five sections:

- Part 1 contains general information on industry structure.
- Part 2 contains financial and operating data relating to telephone carriers.
- Part 3 contains data on international communications.
- Part 4 contains historical financial and operating statistics.
- Part 5 contains data on industry trends.

The full report is available for public inspection and copying during regular business hours at the FCC Reference Information Center, Portals II, 445 12th Street SW, Room CY-A257, Washington, DC 20554. This report may be purchased from the Commission's duplicating contractor, Best Copy and Printing, Inc., Portals II, 445 12th Street SW, Room CY-B402, Washington, DC 20554, telephone 800-378-3160 or via their website at www.bcpweb.com. The publication also may be downloaded from the **FCC-State Link** Internet site at www.fcc.gov/web/stats.

Statistics of Communications Common Carriers

2003/2004 Edition

**Federal Communications Commission
Washington, DC 20554**

Statistics of Communications Common Carriers

Introduction and Overview

The *Statistics of Communications Common Carriers (SOCC)*, which has been published annually since 1939, is one of the most widely used reference works in the field of telecommunications. It is the only permanent record of common carrier activity published by the Government Printing Office and sent to repository libraries. The most recent edition may be purchased by mail from the Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or by calling GPO's Order and Inquiry Desk at (866) 512-1800.

Sources of Information

Much of the material contained in this volume is available well before the *SOCC* is published by the Government Printing Office.

Internet

The Wireline Competition Bureau (formerly the Common Carrier Bureau) has a home page on the World Wide Web. This home page can be accessed directly at www.fcc.gov/wcb/ through a link from the main FCC home page at www.fcc.gov. The materials available include orders, notices of proposed rulemaking, statistical reports, public notices, news releases, fact sheets, and answers to frequently asked questions (FAQs). Prior to the development of the Internet, an electronic bulletin board called **FCC-State Link** had been established to share data electronically with state agencies, and a portion of the FCC's Internet site still bears that original name. The **FCC-State Link** includes all of the files contained in the *SOCC* and a variety of other reports that are used in the preparation of the *SOCC*. It can be reached directly at www.fcc.gov/wcb/stats/. The annual carrier submissions that are used in developing many of the tables in this publication can also be found at www.fcc.gov/wcb/armis/.

Duplicating Contractors and Reference Information Center

Several private firms specialize in locating, duplicating, and distributing FCC documents. The Commission's current duplicating contractor is Best Copy and Printing, Inc. Documents may be purchased by calling Best Copy and Printing, Inc., (202) 488-5300, or via e-mail at FCC@bcpiweb.com. Reports and the summaries used in the preparation of the *SOCC* are also available in the FCC's Reference Information Center, located on the Courtyard Level, 445 12th Street S.W., Washington, D.C.

Coverage

Local Telephone Companies

There are approximately 1,300 companies that have historically provided local telephone service in the United States. These companies, often referred to as incumbent local exchange carriers (ILECs), range in size from rural cooperatives serving fewer than 100 customers to large holding companies serving millions of telephone lines. In most cases, only larger companies (those with more than \$123 million in annual revenues in 2003) are required to file information with the FCC, and only telephone companies affiliated with the four largest holding companies are required to file the most extensive information. New telephone service providers, referred to as competitive local exchange carriers (CLECs), and providers of wireless telephone service are not required to file detailed statistical data with the Commission.

Statistics of Communications Common Carriers

In 2003, as shown in the detailed statistics in Table 2.8, there were 28 reporting large ILECs required to file the ARMIS USOA Report 43-02. In addition to these large carriers, 26 mid-sized ILECs report less detailed data in the ARMIS Annual Summary Report 43-01, and statistical tabulations based on this report are shown in Tables 2.9 through 2.17. While these 54 companies account for more than 90% of the local telephone lines served by ILECs, they do not reflect a complete census of the industry.

Long Distance Companies

Over 900 firms buy access from local telephone companies in order to provide long distance service, and a limited amount of information on the larger long distance companies is contained in various tables throughout the *SOCC*. Among long distance carriers, only AT&T and Alascom, which once were regarded as dominant carriers possessing market power, were ever required to file detailed reports. These data are contained in earlier editions of this publication. The reporting requirements, however, were eliminated when the FCC determined that AT&T was no longer a dominant carrier.

Accounting Standards

A new Uniform System of Accounts (USOA) for the telephone industry became effective at the beginning of 1988. The detailed tables in this report are based on that system. Full Class A reporting requirements are imposed only where the aggregate revenues of an ILEC and its affiliates exceed \$7.240 billion. In 2003, only BellSouth, Qwest, SBC, and Verizon remained subject to full Class A reporting requirements. The results for the 28 carriers affiliated with these firms appear in Table 2.8. The amount of state-by-state information varies from company to company. Ameritech, now a subsidiary of SBC, has historically maintained a separate operating company in each state served and consequently files information for each one. In contrast, Qwest, formerly U S WEST, has consolidated its operations into a single company servicing 14 states, for which it files aggregated information.

Where a company's revenues from all its affiliated ILECs total less than \$7.240 billion, each of the affiliated ILECs earning revenues over the reporting threshold is eligible for Class B (streamlined) reporting treatment. Summary tabulations for these mid-sized companies are included in Tables 2.9 through 2.17.

The USOA applies to telephone operating companies. It is not designed to capture the activities of parent holding companies or subsidiaries. Where activities have been transferred from telephone companies to holding companies or subsidiaries, the revenues from those activities cease to be reported by the operating companies. For this reason, along with several other differences between financial and regulatory accounting systems, the results contained in reports to the FCC may differ markedly from reports to the Securities and Exchange Commission (SEC).

Timing of the *SOCC*

Most companies report information for the prior calendar year to stockholders and to the SEC by April 1. At the same time, they provide annual reports on their domestic operations to the FCC. The basic raw data are made available to the public as soon as received. This statistical summary is produced after the data have been checked, inquiries on suspect items sent to the carriers, corrected submissions received, and the industry tables compiled. Unlike data for domestic operations, corrected data for international services are typically not received until at least ten months after the end of the year being reported. Summaries of the international data are usually prepared and released by the end of the year.

Statistics of Communications Common Carriers

We have shortened the production cycle in order to reduce the delay in publication and we now complete the production within a six-month timeframe. This has been done by lagging the publication of international data by one year. Thus, this edition of the *SOCC* contains the international statistics *only through 2002*.

International data for 2003 will be available via the Internet, from duplicating contractors, and in the FCC's public reference center, but it will not be published in the *SOCC* until next year.

Other Information Sources

The United States Telecom Association represents most local telephone companies. Like many trade associations, it collects information from each of its members. Annually, it prepares, publishes and sells statistical publications such as *Phone Facts*.

The Cellular Telecommunications & Internet Association (CTIA) represents the wireless industry. Since January 1985, it has conducted a semi-annual wireless survey, which consists of data on the wireless industry including the number of subscribers, revenues, employees, and average local monthly bill.

The Telecommunications Industry Association's (TIA) members consist of manufacturers and suppliers of the products and services used in telecommunications. TIA publishes annually the *Telecommunications Market Review and Forecast*, which provides an overview of the telecommunications industry.

* * * * *

The 2003/2004 volume of the *Statistics of Communications Common Carriers*, was prepared by John Adesalu, Linda Blake, Mike Lehner, and Katie Rangos under the supervision and direction of Alan Feldman. All have worked long and hard to expand and improve the publication.

We invite comments and suggestions for further improvements. For your convenience, the survey form on the following page may be used for your response.

Customer Response

Publication: *Statistics of Communications Common Carriers, 2003/2004 Edition*

You can help us provide the best possible information to the public by completing this form and returning it to the Industry Analysis and Technology Division of the FCC's Wireline Competition Bureau.

1. Please check the category that best describes you:

- press
- current telecommunications carrier
- potential telecommunications carrier
- business customer evaluating vendors/service options
- consultant, law firm, lobbyist
- other business customer
- academic/student
- residential customer
- FCC employee
- other federal government employee
- state or local government employee
- Other (please specify)

2.	Please rate the report:	Excellent	Good	Satisfactory	Poor	No opinion

Note: Carriers controlled by other companies are indicated by indentations from the margin. In some cases, an intermediate level of control has been omitted. The information shown is primarily from annual reports filed with the Commission.

p - preliminary.

¹ AT&T Communications reported total operating revenues of \$25.63 billion for 2003.

² Teleport is basically a competitive local exchange carrier, but it reports to the FCC because of its long distance operations. The company's total operating revenues for 2003 amounted to \$1.45 billion.

³ WilTel Communications has been engaged primarily in non-common carrier activities, but it is required to report to the FCC because of its long distance operations.

⁴ The division consists principally of Sprint Communications Company L.P.

Statistics of Communications Common Carriers

Table 1.3 - Changes Affecting Coverage of Table 1.2

No.	Name of Company	Type of Company	Remarks
Additions:			
1	Broadwing Communications, LLC	Interexchange	Carrier became subject to the Commission's reporting requirements at 47 C.F.R. § 43.21(c).
2	Corvis Corporation	Holding	Parent company of Broadwing Communications, LLC, a reporting interexchange carrier.
3	Iowa Telecommunications Services, Inc.	Telephone	Company classified as a carrier subject to the Communications Act of 1934, as amended.
4	Leucadia National Corporation	Holding	Parent company of WilTel Communications, LLC. See merger remarks below.
5	NYNEX Long Dist. Co. d/b/a Verizon Enterprise Solutions	Interexchange	Carrier became subject to the Commission's reporting requirements at 47 C.F.R. § 43.21(c).
6	Primus Telecommunications, Inc.	"	Carrier again became subject to the Commission's reporting requirements at 47 C.F.R. § 43.21(c).
7	Valor Telecommunications of Texas, LP	Telephone	Company classified as a carrier subject to the Communications Act of 1934, as amended.
8	Verizon Select Services, Inc.	Interexchange	Carrier again became subject to the Commission's reporting requirements at 47 C.F.R. § 43.21(c).
Deletions:			
1	Cable and Wireless plc	Holding	In June 2003, company announced its intention to withdraw from the U.S. domestic market.
2	Cable & Wireless USA, Inc.	Interexchange	Carrier entered into an agreement to sell substantially all of its assets. (The sale was completed on March 8, 2004.)
3	Contel of the South, Inc. d/b/a Verizon Mid-States	Telephone	Carrier's revenues were below the indexed threshold established for reporting purposes.
4	Cox California Telecom, LLC d/b/a Cox Communications	Interexchange	Carrier's revenues fell below the indexed threshold established for reporting purposes.
5	Touch America Holdings, Inc.	Holding	Company filed for Chapter 11 bankruptcy protection on June 19, 2003, and sold substantially all of its assets by year's end.
6	Touch America, Inc.	Interexchange	Operating subsidiary of Touch America Holdings, Inc., included in the parent company's bankruptcy petition.
7	WilTel Communications Group, Inc.	Holding	See Leucadia/ Wiltel merger remarks below.
Mergers and Other Changes:			
1	BCSI Inc.	Interexchange	Name changed from Broadwing Communications Services Inc.
2	Cincinnati Bell Any Distance Inc.	"	Name changed from Broadwing Telecommunications Inc.
3	Cincinnati Bell Inc.	Holding	Name changed from Broadwing Inc. (f/k/a Cincinnati Bell Inc.)
4	Leucadia National Corp. and WilTel Comm. Group (WCG)	Holding	In Nov. 2003, Leucadia completed its acquisition (begun in '02) of WCG's outstanding common stock, and the WilTel Group became a consolidated subsidiary of the company.
5	Primus Telecommunication, Inc.	Interexchange	Carrier completed the acquisition of the retail switched voice services customer base of Cable & Wireless USA, Inc.
6	SureWest Telephone	Telephone	Name changed from Roseville Telephone Company.
7	Teleglobe America Inc.	Interexchange	Name changed from Teleglobe USA Inc.
8	Teleglobe International Holdings Ltd	Holding	Company acquired all of the shares of companies formed by its predecessor, Teleglobe Inc.
9	WorldCom Inc. d/b/a MCI	Interexchange	In April 2003, company began conducting its business using the brand name "MCI." (On April 20, 2004, WorldCom emerged from bankruptcy and merged with and into MCI, Inc.)

p - preliminary.

NA - Not applicable

* Includes incumbent local exchange carriers and competitive local exchange carriers.

¹ Figures reported by RBOC long distance affiliates, which may include both in-region and out-of-region long distance service, and local exchange operating companies for the years 2000 - 2003. Some of the RBOC long distance affiliates' revenues fall below the reporting threshold and are therefore included in the all other long distance carriers' market share.

² Includes wireless toll service revenues reported by wireless carriers and toll service revenues reported by competitive local exchange carriers. For 2000 - 2003, also includes non-RBOC ILEC toll service revenues.

Statistics of Communications Common Carriers

Notes for Table 1.4 - 1.5.

NA - Not Available.

* Regional Bell operating company long distance affiliates.

¹ ACC Long Distance Corp. and Teleport Communications Group merged in April of 1998, and the combined company, Teleport Communications Group, merged with AT&T Communications, Inc., in July of that year. AT&T Communications acquired Alascom, Inc., August 7, 1995 and began filing a consolidated revenue statement in 1996.

² On July 21, 2002, WorldCom, Inc., and certain of its direct and indirect U.S. subsidiaries filed voluntary petitions for relief under Chapter 11 of Title 11 of the United States Code in the United States Bankruptcy Code in the United States Bankruptcy Court for the Southern District of New York and continued in the possession of their assets and the management of their business. Their Plan of Reorganization was confirmed by the Bankruptcy Court on October 31, 2003.

³ MCI WorldCom's revenues were revised for 1998 to exclude enhanced services and to be consistent with revenues reported for 1999. WorldCom, Inc., completed a merger with MCI Communications Corp. in September of 1998 and filed 1998 revenue figures for the combined company, MCI WorldCom, Inc. In 1993, LDDS merged with Metromedia Comm. Corp. and Comsystems Network Services. For 1993, only the revenues that were received after the merger are included in LDDS's revenues; those preceding the merger are listed individually. LDDS and Wiltel merged January 5, 1995. In May 1995, LDDS changed its name to WorldCom, Inc. WorldCom acquired MFS Intelenet December 31, 1996. On July 1, 2001, WorldCom acquired Intermedia Communications, Inc.

⁴ Sprint's revenues were revised for 1998 to exclude enhanced services and to be consistent with revenues reported for 1999.

⁵ In July 1986, GTE Sprint and US Telecom merged into US Sprint. United Telecommunications, Inc., then majority owner of US Sprint, purchased the remaining interest from GTE in July of 1992. Effective February 16, 1992, the company's name became Sprint Communications Co.

⁶ For the years 1993 - 1999, the RBOC ILEC toll service revenues are included in total ILEC toll revenues.

⁷ LCI International Telecom Corp. and USLD Communications, Inc., merged in December of 1997 and filed separate statements for the year. Qwest Communications Corp. merged with LCI and USLD Communications in June of 1998, and each of the three affiliated companies filed a separate revenue statement for 1998.

⁸ On January 28, 2002, Global Crossing Holdings, Ltd. and certain subsidiaries and affiliates filed a voluntary petition in the United States Bankruptcy Court for the Southern District of New York and continued in the possession of their assets and the management of their business. Global Crossing's Plan of Reorganization was confirmed by the Bankruptcy Court on December 26, 2002.

⁹ VarTec acquired Excel Telecommunications on April 8, 2002.

¹⁰ On April 22, 2002, Williams Communications Group, Inc., the parent company of Williams Communications LLC, filed a voluntary petition for reorganization under Chapter 11 of the U.S. Bankruptcy Code in the U.S. Bankruptcy Court for the Southern District of New York. Effective October 15, 2002 upon completion of its financial restructuring Williams Communications Group, Inc. emerged from Chapter 11 bankruptcy proceedings as Wiltel Communications Group, Inc.

¹¹ Cincinnati Bell Inc., merged with IXC Communications, Inc. on November 9, 1999 and soon began doing business as Broadwing, Inc. The corporate name was changed from Broadwing back to Cincinnati Bell, Inc. on May 27, 2003 with the sale of the majority of its broadband business to C III Communications, LLC and C III Communications Operations, LLC.

¹² On June 25, 2002, ITC^DeltaCom, Inc. filed a voluntary petition for relief under Chapter 11 of the U.S. Bankruptcy Code in the United States Bankruptcy Court for the District of Delaware. On October 29, 2002, the company consummated a plan of reorganization.

¹³ On January 31, 2002, McLeodUSA Incorporated, the parent company, filed voluntary petitions for relief under Chapter 11 of the United States Bankruptcy Code in the United States Bankruptcy Court for the District of Delaware. On April 16, 2002, McLeodUSA, Inc. emerged from the Bankruptcy court proceeding pursuant to the terms of its amended plan of reorganization.

¹⁴ Data for 1996 were taken from the Annual Report to the Colorado Public Utilities Commission from telecommunications carriers regulated pursuant to §40-15-301 C.R.S.

¹⁵ As part of its process of exiting the U.S. retail voice business, Cable and Wireless plc entered into a definitive agreement on September 16, 2002 to transfer its U.S. retail customer base to a wholly-owned subsidiary of Primus Telecom pending regulatory approval.

¹⁶ ILEC totals are shown separately through 1999 because ILECs primarily carried intraLATA calls, in part because of restrictions imposed on the RBOCs by the 1984 Divestiture agreement. By 2000 most local exchange customers could presubscribe to any carrier for intraLATA toll service and some RBOCs began to receive section 271 approval to provide interLATA toll services.

¹⁷ Includes wireless toll service revenues reported by wireless carriers, toll service revenues reported by CLECs, and toll service revenues reported by non-RBOC ILECs.

¹⁸ Estimated by FCC staff.

Source: The revenue information for the larger long distance telephone companies, shown in Table 1.4, is reported annually to the FCC in response to 47 C.F.R. § 43.21(c). The revenue information for large local exchange telephone companies is based on annual ARMIS (Automated Reporting Management Information System) USOA reports (FCC Reports 43-02). The Commission also collects revenue information on FCC Form 499-A, Telecommunications Reporting Worksheet, and, in previous years, on FCC Form 431, Telecommunications Relay Service Worksheet, and FCC Form 457, Universal Service Worksheet. Revenues for carriers not subject to section 43.21 or ARMIS reports are estimated by FCC staff based on carriers' filings of FCC Forms 431, 457, and 499-A.

Level 3 Communications, LLC	Broomfield, Colo.	134,355	3,530,020
BCSI Inc. f/k/a Broadwing Communications Services Inc.	Cincinnati, Ohio	128,472	22,960

p - preliminary.

* In some cases, the headquarters listed is for the parent company. See Table 1.2 for the intercorporate relations of communication carriers and controlling companies.

Includes plant under construction. Figures may also include plant used by some carriers (e.g., Teleport Communications Group, WilTel Communications, and Level 3 Communications) to provide communications services other than long distance toll. See also footnotes to Table 1.2.

¹ Data reported by MCI, Inc., successor to WorldCom, Inc. On April 20, 2004, WorldCom emerged from bankruptcy protection and merged with and into MCI, the surviving company.

² Company is basically a reseller; therefore, it reported little or no communications plant.

³ Teleglobe America (f/k/a Teleglobe USA) became a subsidiary of Teleglobe International Holdings Ltd, which purchased the core assets of Teleglobe Inc. (Teleglobe USA's former parent) on June 30, 2003.

⁴ Revenues exclude \$31.4 million from non-communications operations; plant excludes \$43.9 million.

⁵ Company was formerly known as Broadwing Telecommunications Inc.

Statistics of Communications Common Carriers

Statistics of Communications Common Carriers

Notes for Tables 2.2 through 2.5

Data for Tables 2.2 through 2.5 were obtained from annual ARMIS (Automated Reporting Management Information System) operating data reports (FCC Report 43-08) of reporting incumbent local exchange carriers. ARMIS Report 43-08 definitions and carrier data can be accessed at www.fcc.gov/wcb/armis/.

See Table 2.6 for data of individual carriers. Certain data pertaining to the carriers are unavailable. Where such is the case, the space provided for the information has been left blank, as distinguished from insertion of zero, which means that none are reported.

Totals by state for some items may be understated because of incomplete data.

Detailed values may not match totals because of necessary rounding.

For Colorado, Qwest includes El Paso County Telephone company data and for Idaho, it includes Malheur Home Telephone Company and two other Idaho study areas (MSID and PNID).

Changes to Companies during Year 2003

In 2003, SureWest Communications changed the name of its Roseville Telephone Company to SureWest Telephone.

On June 30, 2003, Valor Telecommunications Enterprises, LLC, merged its three operating companies for Oklahoma, New Mexico, and Texas into one operating company, Valor Telecommunications of Texas, LP (VANT), which files the ARMIS Report 43-08. The company's four study areas (VAOK, VANM, VANN, and VATX) file the ARMIS Report 43-01 and ARMIS Report 43-05.

Outside Plant Statistics

Unless otherwise stated, data include local loop and interoffice facilities. A cable containing only copper, coaxial, or other metallic conductors is classified as metallic, but a cable containing both fiber and copper, coaxial or other metallic conductors is classified as fiber.

Kilometers equal total miles multiplied by 1.6093 and then rounded to the nearest whole number. Non-zero entries in the ARMIS reports of less than 1 kilometer are reported as 1 kilometer.

Equivalent number of poles is the number of solely-owned poles plus the sum of the products of the numbers of jointly-owned poles times their ownership percentages.

Company notes

Qwest changed to the Trunks Integrated Record-Keeping System (TIRKs) database to calculate fiber km equipped with electronics (lit) to be consistent with other companies.

SBC companies' results were obtained from a new source using a standardized 13-state criteria that reports equipped, rather than available, local loop facilities. For Southwestern Bell, km of terrestrial radio, one-way terrestrial radio channel, and radio telephone channel decreased due to the retirement of radio facilities. In addition, for Southwestern Bell, intra-building network cable decreased as a result of accounting reclassification.

For Verizon West companies (GTE study areas), reporting equipped circuit km has been mechanized as opposed to being done manually in the past.

For 2003, the Sprint companies did a complete rebuild of the outside plant statistics database resulting in a continued cleanup and verification of the data. This caused variances between 2002 and 2003 in some items.

Access Lines

Access lines include 800 and 800-like access lines, resold telephone exchange service lines, and employee concession lines, but not official/company circuits. Analog access lines are shown in 4kHz equivalents and include access lines from digital switches if the lines themselves are not terminated at the customer's premises as digital lines. ISDN and other digital access lines are shown in 64 kbps equivalents. To be classified as digital, the access lines must be terminated at the customer premises end as digital lines or be available for use by the customer as digital lines. A fully-equipped DS-1 line, for example, corresponds to 24 - 64 kbps equivalents.

Other Switched Access Lines and Total Switched Access Lines include resold telephone exchange service lines. Total Special Access Lines connect an end user's premises to an interexchange carrier or other access customer point of presence. Local Private Lines originate and terminate within the same LATA.

Statistics of Communications Common Carriers

Notes for Tables 2.2 through 2.5 -- Continued

Access Lines - Continued

Figures for switched access lines reported in the ARMIS Report 43-08 for some companies are slightly different from figures for billable access lines reported in the annual summary report (ARMIS Report 43-01) for a variety of reasons, including different reporting requirements, the interpretation of those requirements by the various companies, and the methods different companies use to calculate the number of lines. The majority of the differences come from the fact that derived ISDN channels are included in the count of switched access lines in the ARMIS Report 43-08, but are not treated billable access lines in the ARMIS Report 43-01.

Company notes

BellSouth Telecommunications, Inc., included all lines subject to the customer access line charge (CALC). Feature Group A, out-WATS, 800 service, and two-way WATS did not have the CALC and were omitted. The company reported that CPE and semi-public were the only public phone lines with the CALC. Other Switched Access Lines included resold resold telephone exchange lines.

For Other Switched Access Lines, Qwest includes only resold access lines. Decrease from 2002 is due to the migration to UNE-P.

For Other Switched Access Lines, Southwestern Bell data represents resold access lines. The decrease from 2002 for SBC companies is due to the customer shift to the UNE-P product.

Verizon East companies (non-GTE study areas) corrected their data mapping templates to account for the proper reporting of ISDN-BRI, -PRI, and resold lines in the proper columns. For Verizon West (GTE study areas), data have been reclassified to be consistent with relationships shown on the ARMIS Report 43-01, pursuant to ARMIS Report 43-08 instructions. Verizon East and West companies include UNE-Ps and resold lines in Other Switched Access Lines.

Citizens Telecommunications Co. of New York, Inc. did not report Centrex extensions by type of service.

Sprint companies include UNE-P in main switched access lines, single line and multiline business switched access lines, and residential non-lifeline (primary and non-primary) switched access lines. Sprint companies report the decrease in ISDN is due to consumers switching from ISDN to cable modems and DSL.

Telephone Calls and Minutes

The number of toll calls is based on originating message volumes and includes outward calls, 800 and 800-like service, directory service, dial-it services (e.g., 900 service), and optional calling plans. IntraLATA toll calls are carried by the reporting local operating company within a given Local Access and Transport Area (LATA). InterLATA toll calls are directed to and carried by interexchange carriers. Billed access minutes are based on bills sent to interexchange carriers and include total originating and terminating minutes-of-use, including call set-up time, holding time, and conversation time.

Company notes

SBC companies' access minutes are actual minutes obtained from customer usage tracking data.

Verizon Washington, DC, Inc., has no intrastate toll.

For Verizon companies (East and West), interLATA toll calls completed (originating) and interLATA switched access minutes (originating and terminating) are based on a regional process that includes interstate and state traffic associated with interexchange carriers.

ALLTEL companies' local calls are based on seven-day usage studies conducted for the larger switches. Calculations are annualized and based on access lines.

For Cincinnati Bell Telephone Co., Indiana calls and minutes of use are included in the Ohio calls and minutes of use data. The methodology behind the calculations for intraLATA toll calls (completed) was updated for the 2003 reporting year. This corrected the several local calls being reported as intraLATA toll calls in previous filings.

Due to research and review of the source documents for reporting interLATA toll calls completed and the intrastate-, interLATA access minutes, Commonwealth Telephone Company inadvertently omitted data from another billing source in 2002 for intraLATA toll calls (completed) and inadvertently reported interLATA and intraLATA minutes incorrectly. The data for 2003 are complete.

Due to the overall national economy, Sprint experienced a decrease in calls, minutes, and messages which reflects the industry trends in wireless and Voice Over IP substitution.

Statistics of Communications Common Carriers

Notes for Table 2.6.

Name of Company	Code
BellSouth Corporation	BS
Qwest Corporation	Q
SBC Communications Inc.	SBC
Verizon Communications Inc.	VZ
ALLTEL Corporation	AL
Citizens Communications Company	C
Sprint Corporation	S

Source: Annual ARMIS (Automated Reporting Management Information System) operating data reports (ARMIS Report 43-08) of reporting incumbent local exchange carriers. ARMIS Report 43-08 definitions and carrier data can be accessed at www.fcc.gov/wcb/armis/.

Note -- Certain data pertaining to the carriers included in this table are unavailable.

- Detail may not match totals because of necessary rounding.
- Unless otherwise stated, outside plant statistics include local loop and interoffice facilities. A cable containing only copper, coaxial or other metallic conductors is classified as metallic, but a cable containing both fiber and copper, coaxial or other metallic conductors is classified as fiber.
- Kilometers equal total miles multiplied by 1.6093 and then rounded to the nearest whole number. Non-zero entries in the ARMIS reports of less than 1 kilometer are reported as 1 kilometer.
- Equivalent number of poles is the number of solely-owned poles plus the sum of the products of the numbers of jointly-owned poles times their ownership percentages.
- Access lines include 800 and 800-like access lines, resold telephone exchange service lines, and employee concession lines, but do not include official/company circuits. Analog access lines are shown in 4kHz equivalents and include access lines from digital switches if the lines themselves are not terminated at the customer's premises as digital lines. ISDN and other digital access lines are shown in 64 kbps equivalents. To be classified as digital, the access lines must be terminated at the customer end as digital lines or be available for use by the customer as digital lines.
- Other Switched Access Lines and Total Switched Access Lines include resold telephone exchange service lines.
- Figures for switched access lines reported in the ARMIS Report 43-08 report differ slightly from figures reported for billable access in the ARMIS Report 43-01. There are several reasons including different reporting requirements, the interpretation of these requirements by the various companies, and the methods different companies use to calculate the lines. The majority of the differences come from the fact that 800 and 800-like and derived ISDN channels are included in the count of switched access lines in the ARMIS 43-08, but are not treated as billable access lines in the ARMIS Report 43-01.
- The number of toll calls is based on completed originating message volumes and includes outward calls, 800 and 800-like service, directory service, dial-it services (e.g., 900 service), and optional calling plans. Completed intraLATA toll calls are carried by the reporting local operating company within a given Local Access and Transport Area (LATA). Completed interLATA toll calls are directed to and carried by interexchange carriers. Billed access minutes are based on bills sent to interexchange carriers and include total originating and terminating access minutes of use including call set-up time, holding time, and conversation time.

Footnotes Pertaining to Data on Individual Carriers

- ¹ BellSouth Telecommunications, Inc., included all lines subject to the customer access line charge (CALC). Feature Group A, out-WATS, 800 service, and two-way WATS access lines did not have the CALC and were omitted. The company reported that CPE and semi-public were the only public coin lines with the CALC.
- ² For Colorado, Qwest includes El Paso County Telephone company data and for Idaho, it includes Malheur Home Telephone Company and two other Idaho study areas (MSID and PNID).
- ³ SBC companies' results were obtained from a new source using a standardized 13-state criteria that reports equipped rather than available local loop facilities.
- ⁴ Citizens Telecommunications Co. of New York, Inc. did not report Centrex extensions by service.
- ⁵ For 2003, the Sprint companies did a complete rebuild of the outside plant statistics database resulting in a continued cleanup and verification of the data. This will result in some variances between 2002 and 2003.
- ⁶ In 2003, SureWest Communications changed the name of its Roseville Telephone Company to SureWest Telephone.
- ⁷ On June 30, 2003, Valor Telecommunications Enterprises, LLC, merged its three operating companies for Oklahoma, New Mexico and Texas into one operating company, Valor Telecommunications of Texas, LLP (VANT) which files the ARMIS Report 43-08. The company's four study areas (VAOK, VANM, VANN, and VATX) file the ARMIS Report 43-01 and the ARMIS Report 43-05.

Statistics of Communications Common Carriers

Statistics of Communications Common Carriers

Notes for Table 2.8

Source: Annual ARMIS (Automated Reporting Management Information System) USOA Reports (FCC Report 43-02) of reporting local exchange carriers.

Note: Detail may not match totals because of necessary roundings

- In the account number column, four-digit numbers are used when there is a corresponding account number in the Uniform System of Accounts (USOA). Three-digit numbers correspond to items defined in the ARMIS USOA report (FCC Report 43-02). Information on the accounts can be found in 47 C.F.R. part 32 which can be accessed on the Internet at www.fcc.gov/wcb/iatd/47cfr.html.
- Individual carrier ARMIS 43-02 filing instructions, forms, data as well as footnotes can be found on the Internet at www.fcc.gov/wcb/armis.

Code letters are shown above the name of each company owned or controlled by a holding company as of December 31, 2003.

Name of Company	Code
BellSouth Corporation	BS
Qwest Communications International, Inc.	Q
SBC Communications Inc.	SBC
Verizon Communications Inc.	VZ

Starting with the year 2003, significant revisions were made to the ARMIS USOA Report 43-02. *See Revision of ARMIS Annual Summary Report (FCC Report 43-01), ARMIS USOA Report (FCC Report 43-02), ARMIS Joint Cost Report (FCC Report 43-03), ARMIS Access Report (FCC Report 43-04), ARMIS Service Quality Report (FCC Report 43-05), ARMIS Customer Satisfaction Report (FCC Report 43-06), ARMIS Infrastructure Report (FCC Report 43-07), ARMIS Operating Data Report (FCC Report 43-08), ARMIS Forecast of Investment Usage Report (FCC Report 495A), and ARMIS Actual Usage of Investment Report (FCC Report 495B) for Certain Class A and Tier 1 Telephone Companies, CC Docket No. 86-182, Order, 18 FCC Red 25759 (2003).*

The following rows were deleted: 1130 - 1160, 1180 - 1210, 1290 - 1330, 1401, 1402, 1407, 1408, 1437, 1439, 2215, 2215.1, 2215.2, 2215.3, 2231.1, 2231.2, 2425, 3400, 3420, 3500, 3600, 4010, 4020, 4030, 4050, 4060, 4120, 4210 - 4270, 4310, 4360, 5002 - 5004, 5050, 5069, 5084, 5100 - 5169, 5200, 5240 - 5270, 5301, 5302, 6215, 6425, 6612, 6710, 6711, 6712, 6721 - 6728, 7110 - 7160, 7310 - 7370, 7410 - 7450, 7510 - 7540, and 7610 - 7640.

The following row titles have changed: 120, 1438, 2211, 2341, 2424, 5060, 6110, 6120, 6210, 6211, 6212, 6220, 6230, 6310, 6341, 6410, 6424, 650, 6510, 6530, 6540, 690, 6610, 6611, 700, 6790, 7200, 790,

The following rows have been added: 1170, 1171, 2212.1, 2212.2, 2232.1, 2232.2, 2690.1, 2690.2, 4000, 4300, 526, 527, 6212.1, 6212.2, 6232.1, and 6232.2.

The following rows have been changed: 420 to 4200, 510 to 5001, 525 to 5100, and 5080 to 522.

¹ During 2003, the company observed that the services used by SBC Services, Inc., an administrative affiliate of Southwestern Bell Telephone Company LP (SWBT) and Pacific Bell Telephone Company (Pacific), to allocate its costs among benefitting affiliates were not applied appropriately. The prior method used resulted in too much costs being allocated to SWBT and Pacific. In addition, it was also discovered that certain costs billed from Pacific to SBC Services, Inc., for leased assets were not calculated appropriately. This also caused an incorrect amount of shared costs to be billed to SWBT. Both of these issues were corrected in 2003. The accounts affected for SWBT were: 4000, 4070, 4341, 4361, 4540, 615, 6121, 6123, 6124, 665, 685, 6623, 6720, 7220, and 7230. Those affected for Pacific were: 1170, 1190, 4070, 4550, 526, 6121, 6123, 6124, 6212.2, 665, 685, 6623, 6720, 7220, 7230 and 7250. Amended ARMIS 43-02 Reports have been filed for 2001 and 2002.

² A review of USOA/Account assignments was conducted during 2003 resulting in revised revenue account classifications. A reclassification was recorded in 2003 affecting rows 5001, 5040, 5060, 5081, 5082, 5083, 5100, 526, and 5280. Total operating revenues were not impacted.

³ For 2003, account 5084, state access revenues, is now included in accounts 5081 - 5083.

⁴ Directory revenues, Account 5230, are no longer included in miscellaneous revenues, Row 526. Total miscellaneous revenues, Row 527, are the total of directory revenues and miscellaneous revenues.

⁵ Uncollectible revenues decreased due to fewer bankruptcy customers in 2003 than in 2002 and the reversal of bad debt due to settlements.

⁶ Decrease is the result of a five-year amortization of small value items that commenced in 1998 and terminated at the end of 2002. Per Docket 95-60.

⁷ Total compensation includes both expenses and capitalized salaries and benefits.

See notes following this table.

Statistics of Communications Common Carriers

Notes for Tables 2.9 through 2.17

NA - Not Applicable.

Data for these tables were obtained from the ARMIS (Automated Reporting Management Information System) reports (ARMIS Report 43-01) filed by incumbent local exchange companies with operating revenues for the year 2003 equal to or in excess of \$123 million. The FCC's Phase 1 Accounting Review Order, 14 Rcd 11396 (1999), established streamlined reporting requirements for mid-sized incumbent local exchange carriers (ILECs) beginning in the 1999 reporting year. A mid-sized carrier is a carrier whose annual operating revenues either individually or when aggregated with those of any ILEC it controls, is controlled by, or which it is under common control, are less than \$7.240 billion.

Individual carrier ARMIS Report 43-01 filing instructions, forms, data as well as footnotes can be found on the Internet at www.fcc.gov/wcb/armis/.

Starting with the year 2003, significant revisions were made to the ARMIS USOA Report 43-02. See *Revision of ARMIS Annual Summary Report (FCC Report 43-01)*, *ARMIS USOA Report (FCC Report 43-02)*, *ARMIS Joint Cost Report (FCC Report 43-03)*, *ARMIS Access Report (FCC Report 43-04)*, *ARMIS Service Quality Report (FCC Report 43-05)*, *ARMIS Customer Satisfaction Report (FCC Report 43-06)*, *ARMIS Infrastructure Report (FCC Report 43-07)*, *ARMIS Operating Data Report (FCC Report 43-08)*, *ARMIS Forecast of Investment Usage Report (FCC Report (495A))*, and *ARMIS Actual Usage of Investment Report (FCC Report 495B) for Certain Class A and Tier 1 Telephone Companies*, CC Docket No. 86-182, Order, 18 FCC Rcd 25759 (2003).

The following rows were deleted from Table I of the ARMIS Report 43-01: Rows 1050, 1340, 1350, 1360, 1870, and 1881.

The following rows have been added: Row 1365 (replaced Rows 1340, 1350, and 1360) and Row 1865 (replaced Rows 1870 and 1881.)

The title of Row 1160 has been changed from Corporate Operations to General & Administrative.

The reports are filed on a study-area basis and include financial and operational data on revenues, expenses, investment, access lines and minutes of use.

Information presented in these tables was received from 13 companies for 120 study areas representing all states (except Alaska) including the District of Columbia and the Commonwealth of Puerto Rico. Data for all tables are derived from the 2003 calendar-year submissions from the companies.

Detail may not match totals because of necessary rounding.

Detail and totals shown may not match detail or totals shown elsewhere in this publication or from sources which have similar data element names. Some of the reasons are:

1. Some companies may interpret the Commission's instructions differently.
2. Some companies may use different internal data bases to compile data for different ARMIS reports; e.g., Qwest includes data for Malheur Telephone Company in its ARMIS Report 43-01 data submission in a Idaho study area; however, the company does not include data from Malheur in its ARMIS Report 43-02 (USOA report) data submission, which is aggregated at the total company level. Table 2.9 does not include the data reported for Verizon-North General whereas it is included in Verizon North in the ARMIS Report 43-02.
3. Some companies discover discrepancies and refile data for one ARMIS report but not another.

Both Commission and company personnel are working to detect and correct discrepancies in the data and to clarify the reporting requirements.

The thirteen companies or groups of companies that filed ARMIS 43-01 data from which these tables were derived are:

Statistics of Communications Common Carriers

Notes for Tables 2.9 through 2.17 - Continued

Financial Data

The total column reflects the operating results for each of the rows itemized in these tables, and it includes all regulated and nonregulated company operations for each row. These amounts are presented prior to separation between state and interstate jurisdictions.

Subtracting all non-regulated and adjustments from the total column gives the subject-to-separations column, which reflects that portion of each row that must be allocated between state and interstate jurisdictions pursuant to part 36 of the Commission's rules.

The state and interstate columns reflect the allocation of the amount in the subject-to-separations column into its state and interstate components pursuant to those rules. In some instances, the interstate column also reflects Commission-prescribed adjustments made after the separations process. These adjustments are made only at the interstate level; consequently, the state and interstate columns may not necessarily add up to the subject-to-separations column.

All the remaining columns concern the further sub-division of the interstate column amount into various elements pursuant to part 69 of the Commission's rules.

The common line access element columns reflect costs that are recovered through subscriber line charges and a carrier common line charge assessed upon all interexchange carriers that use local exchange common line facilities for the provision of interstate or foreign telecommunications services.

The traffic-sensitive access element columns reflect costs associated with traffic-sensitive plant engineered to handle the anticipated volume of calls. The switching column reflects that portion of each row associated with the connection of toll lines to toll lines, or toll lines to local central offices, exclusive of equal access costs if the exchange carrier has a separate equal access element. The transport column reflects that portion of each line item applicable to charges assessed upon all interexchange carriers who use switching or transport facilities that are apportioned to the transport element or elements for purposes of apportioning net investment. The total traffic sensitive column reflects those amounts that are assigned to the traffic sensitive element and sub-elements pursuant to part 69 of the Commission's rule: (The total traffic sensitive column equals the total of the switching column plus the transport column plus the traffic-sensitive information: charges assessed upon all interexchange carriers who are connected to assistance boards through interexchange directory assistance trunks.)

The special access column reflects that portion of each row applicable to the total of all sub-elements that have been established for the use of equipment or facilities assigned to the special access element for purposes of apportioning net investment pursuant to part 69 of the Commission's rules.

The total access column reflects the sum of the common line total column, the traffic-sensitive total column, and the special access column.

The billing and collection column reflects that portion of each row applicable to billing and collection services.

The interexchange column reflects that portion of each row applicable to interexchange services.

The mid-sized ILECs do not file rows 1410, 1420, 1490, and 1590 for taxes, but do file row 1595, federal, state, and other. This is reflected in Tables 2.9, 2.10, and 2.13.

Statistics of Communications Common Carriers

Notes for Tables 2.9 through 2.17 - Continued

Billable Access Lines

Billable access lines are access lines that are billed either the end-user common line charge (EUCL) or the special access surcharge. Billable access lines as reported in the ARMIS Report 43-01 will differ slightly from switched access lines as reported in the ARMIS Report 43-08. There are several reasons for this, including different reporting requirements, the interpretation of those requirements by the various companies, and the methods different companies use to calculate the number of lines. The majority of the differences come from the fact that 800 and 800-like lines and derived ISDN channels are not treated as billable access lines in the ARMIS Report 43-01, but are included in the count of access lines in the ARMIS Report 43-08.

Definitions of the billable access columns in the table follow:

1. Residence lifeline - access lines for which the residence interstate end-user common line charge is reduced or waived. The implementation of lifeline plans is left to the individual state commissions.
2. Residence non-lifeline - access lines subject to the residence interstate end-user subscriber line charge. Lines include employee concession lines and resold lines per § 51.617(a) of the Commission's rules.
3. Business single line - access lines subject to the single-line business interstate end-user common line charge, excluding company/official, mobile/telephone pagers, off-premises extensions, and special access lines. Lines include resold lines per § 51.617(a).
4. Business multiline - access lines subject to the multiline business interstate end-user common line charge, including payphone lines, PBX trunks, Centrex CU trunks, hotel/motel LD trunks and Centrex CO lines. Lines include resold lines per § 51.617(a).
5. Special access - access lines subject to a \$25 special access surcharge. The surcharge applies to lines connecting two customer premise locations, one of which is a PBX that may connect to the public switched network.
6. Total billable access lines - lines billed the end-user common line charge or the special access surcharge

Company Notes

Sprint Companies include UNE-P counts in single line and multi line business and residence lifeline and non-lifeline access lines.

Traffic-Sensitive Minutes of Use

Total premium traffic-sensitive MOU are calculated using premium local switching revenues and the appropriate rates. MOU are calculated pursuant to § 69.205. All reseller minutes are included.

Total non-premium traffic-sensitive MOU are calculated using non-premium local switching revenues and the appropriate rates. MOU are calculated pursuant to § 69.113.

Notes for Tables 3.1 through 3.3.

Data shown were combined from reports submitted to the FCC by international carriers pursuant to section 43.61(a) of the Commission's rules and regulations. Detail may not add to totals due to rounding.

The data are for all U.S. points. The total for U.S. points shown in the tables represents not only the total traffic between the domestic United States (the conterminous U.S., Alaska, Hawaii and Puerto Rico) and other U.S. points (American Samoa, Guam, the Northern Mariana Islands, Wake Island, and the U.S. Virgin Islands), but also, the total traffic between other U.S. points.

In Table 3.1, figures between -500 and 0 are denoted (*). Figures between 0 and 500 are denoted *.

Data for individual United States points (including small points such as American Samoa, Guam, the Northern Mariana Islands, and the U.S. Virgin Islands), and data for individual carriers, are included in the *Section 43.61 International Telecommunications Data* report, published annually by the Federal Communications Commission.

Carriers have requested confidential treatment for transiting minutes by country.

Carriers report the number of leased circuits as of year end and the number of 64 kilobits per second (64 Kbps) equivalent bearer circuits.

Epixtar Communications, Corp.	Teleconex Inc.
Ernest Communications, Inc.	Telmatch Telecommunications, Inc.
Exergy Group, LLC	Telmex USA, L.L.C.
Forte Communications, Inc.	TGEC Communications Co., LLC d/b/a First
Globalcom, Inc.	World Connect
Greenfield Communications, Inc.	Universal Access, Inc.
GTC, Inc.	Universal Telecom
In Touch Communications, Inc.	Webshoppe Communications, Inc.

Traffic Arrangements: U.S. carriers use the following types of arrangements to govern the exchange of traffic between themselves and foreign carriers.

- 1/ Traditional - Traffic settled according to the Commission's International Settlements Policy (ISP). The ISP requires that the U.S. carrier and its foreign correspondent share the accounting rate on a 50/50 basis. An accounting rate is part of a compensation agreement negotiated between a U.S. carrier and its foreign correspondent on a particular international route.
- 2/ ISR/Hubbed - International Simple Resale (ISR) refers to the provision of switched services over private lines, interconnected to the public switched network, between the United States and Commission-approved countries. Switched hubbing refers to the provision of switched services over interconnected private lines between the U.S. and an ISR-approved country in order to originate or terminate U.S. traffic in a third country. See 47 C.F.R. 63.17.

The following companies' section 43.61(a) international telecommunications traffic reports were combined because of mergers, acquisitions, and changes in corporate structure:

- 3/ AT&T sold AT&T Easylink Services' international exchange telex and message telegraph services February 1, 2001. AT&T Corp. & Concert Global Networks, USA LLC's calendar year 2002 43.61(a) submission includes Concert's information for January 1 through March 31, 2002. Concert Global Networks, USA, LLC was dissolved March 31, 2002. Concert was a global venture of AT&T Corp. and British Telecommunications.
- 4/ Effective March 31, 2002, BellSouth International Access merged into BellSouth Long Distance, Inc.
- 5/ Bixby Telephone Sales and Service d/b/a Bixby Telephone Long Distance and PrimeTel Long Distance transferred its long distance services to Bixby Telephone Long Distance, LLC.
- 6/ For calendar year 2002, Centennial Puerto Rico Operations Corporation changed its carrier status from an international pure resale provider to a facilities-based/facilities-resale international provider. Therefore, the carrier had to file the more comprehensive section 43.61(a) requirements for calendar year 2002.
- 7/ On January 1, 2003, Clark Fork Telecommunications, Inc., merged with its parent company Blackfoot Telephone Cooperative, Inc. The companies filed separate section 43.61(a) annual international traffic and revenue reports for calendar year 2002.
- 8/ Colt Telecommunications' year 2002 section 43.61(a) submission includes Colt GmbH.
- 9/ As of June 18, 2002, Electric Lightwave LLC became a wholly-owned subsidiary of Citizens Communications Co.
- 10/ FairPoint Communications Solutions Corp., a competitive local exchange carrier, is no longer in business.
- 11/ As of June 29, 2001, Frontier Communications of America, Inc., became a wholly-owned subsidiary of Citizens Communications Company.

Statistics of Communications Common Carriers

Notes for Table 3.4 -- Continued

- 12/ Global Crossing Ltd.'s company, International Exchange Networks, Ltd. (iXnet), discontinued international services after calendar year 2001.
- 13/ Hemingford Telephone Company's long distance services are provided by Mobius Communications Company, its wholly-owned subsidiary.
- 14/ Infonet Broadband Services Corporation, while it is authorized as a common carrier under Section 214 of the Communications Act, has determined that it provides only enhanced services and, therefore, does not meet the requirement to file pursuant to section 43.61 of the Commission's rules.
- 15/ Intetech, L.C., after October 1, 2001, sold its assets to Campus Communications Group, Inc.
- 16/ KPU Telecommunications, City of Ketchikan d/b/a Ketchikan Public Utilities, has determined its international data services to be within the definition of enhanced services under section 64.702 and, therefore, is exempt from filing section 43.61 data.
- 17/ Lemonweir Valley Telephone Company's subsidiary, LVT Corporation, for calendar year 2002, determined that it did not offer international services.
- 18/ Local Communications Network, Inc., has determined itself to be a private carrier, and no longer subject to section 43.61 of the Commission's rules.
- 19/ Melbourne International Communications, Limited filed for liquidation in Florida on October 3, 2002.
- 20/ ODC International, Inc., for calendar year 2002, had not commenced operations in the United States.
- 21/ PanAmSat Communications Carrier Services, Inc., terminated international services after year 2001.
- 22/ PSO, Inc. d/b/a Canal Uno terminated international services after year 2001.
- 23/ RSL COM USA filed for Chapter 11 bankruptcy protection in New York on March 16, 2001.
- 24/ SES Americom, Inc.'s calendar year 2002 section 43.61(a) submission includes its wholly-owned subsidiary, Columbia Communications Corporation.
- 25/ Sprint PCS' calendar year 2002 section 43.61(a) submission includes Sprint's Wireless Division which consists of:
PhillieCo, L.P.
SprintCom, Inc.
Sprint Spectrum Holding Company, L.P.
- 26/ Telecom New Zealand Communications (USA), Ltd., ceased all operations and carried no international traffic after year 2001.
- 27/ The Other Phone Company, Inc. d/b/a Access One Communications' annual section 43.61(a), for calendar year 2002, is combined with the submission for Talk America, Inc.
- 28/ Viatel Inc., and its U.S. subsidiaries, are succeeded by Viatel Holding (Bermuda) Limited.
- 29/ In late calendar year 2001, Williams Communications acquired the wholesale international voice assets previously reported by SBC Communications, Inc., companies: Ameritech Communications International, Inc., and Southwestern Bell Communications Svcs., Inc. Additionally, international pure resale services previously reported by Ameritech Communications International, Inc., were also transferred to Williams Communications.

The following companies either changed their name or filed a report name different from the previous years:

- 30/ Agate Mutual Telephone filed its calendar year 2002 section 43.61(a) as its subsidiary, Prairie Networks.
- 31/ Arapahoe Cable TV, Inc. d/b/a ATC Long Distance filed its calendar year 2002 section 43.61(a) as its subsidiary, Applied Communications Technology d/b/a ATC Long Distance.
- 32/ BiznessOnline Inc./Telecom Communications Corp. filed its calendar year 2002 section 43.61(a) as Telecon Communications Corporation.
- 33/ Chippewa County Telephone Company filed its calendar year 2002 section 43.61(a) as Superior Long Distance.
- 34/ Claricom Networks, Inc., filed its calendar year 2002 section 43.61(a) as Claricom Networks, LLC.
- 35/ Direct Communications Rockland, Inc., filed its calendar year 2002 section 43.61(a) as Direct Communications LD.
- 36/ Easton Telecom Services, L.L.C., was formerly known as Weston Telecommunications, L.L.C.
- 37/ In year 2002, Genesis Communications Inc., changed its name to Vicera Communications, Inc., and then later changed its name to Vycera Communications, Inc. d/b/a Genesis Communications, Inc.
- 38/ On July 1, 2002, Heart of Iowa Communications, Inc., changed its name to Heart of Iowa Communications Cooperative.
- 39/ As of October 2, 2000, KDD America, Inc., changed its name to KDDI America, Inc.
- 40/ Lennon Telephone Company filed its calendar year 2002 section 43.61(a) as Total Communications Systems, Inc.
- 41/ NOS Communications, Inc. d/b/a 011 Communications, also d/b/a International Plus filed its calendar year 2002 section 43.61(a) as NOS Communications, Inc.
- 42/ One Call Communications Inc., d/b/a Opticom filed its calendar year 2002 section 43.61(a) as OCMC, Inc. d/b/a One Call Communications, Inc., d/b/a OPTICOM.
- 43/ OpicTel Long Distance was formerly known as Infonet Long Distance, LLC.
- 44/ Phillips County Communications, Inc. filed its calendar year 2002 section 43.61(a) as Phillips County Commun., LLC.
- 45/ T-Systems USA, Inc. was formerly known as Deutsche Telekom, Inc. Effective October 1, 2003, T-Systems changed its name to T-Systems North America, Inc. Its calendar year 2002 section 43.61(a) was submitted as T-Systems USA, Inc.
- 46/ Telenational Communication, Inc. d/b/a Worldport filed its calendar year 2002 section 43.61(a) as Telenational Communications, Inc.
- 47/ Telia International Carrier, Inc. was formerly known as Telia North America, Inc.
- 48/ Wilson Communication Co. filed its calendar year 2002 section 43.61(a) as its sister company Wilson Telephone Co., Inc.

Statistics of Communications Common Carriers

Notes for Table 3.4 -- Continued

The following companies requested confidential treatment pertaining to their calendar year 2002 section 43.61(a) submission:

Allegiance Telecom, Inc.	Mobile Satellite Ventures Subsidiary LLC
American Cellular Corporation	Seren Innovations, Inc. d/b/a Astound Broadband
AT&T Wireless	Swisscom North America, Inc.

Miscellaneous International Resale Services
 <<< 2003 Data Not Available at Time of Publication >>>

Carrier	Number of Messages	Number of Minutes	Number of Words	U.S. Carrier Revenues
Nevadacom				
Telegraph Service	3,234		129,031	\$266,230
Telex Service	7	597		696
Total Reporting Miscellaneous Resale Carriers: 1				
Sum of Figures	3,241	597	129,031	\$266,926

Note: Carriers provide pure resale services by switching traffic to (and reselling the switched services of) underlying U.S. carriers. The underlying carriers control the circuit that carries the traffic to the international point, arrange for termination of the traffic and report the traffic on a country-by-country basis. Reporting underlying U.S. carriers' country-by-country data are available in Section A: Switched Services Telephone of the annual publication, *International Telecommunications Data*. The report can be downloaded from the FCC-State Link Internet site at <http://www.fcc.gov/wcb/iatd/stats.html>.

Statistics of Communications Common Carriers

Notes for Tables 3.7 through 3.12

Note: Some previously published data have been revised. "*" signifies an amount greater than 0 but less than a half million. "n.m." signifies not meaningful.

- 1/ Data have been taken from the latest version of *Section 43.61 International Telecommunications Data* reports and represent traffic between all U.S. points and all international points. Data include a small amount of traffic between domestic U.S. points and offshore U.S. points.
- 2/ The Herschfeld-Herfendahl Index (HHI) value for the market is based on the market shares for each entrant. A lower bound estimate is calculated using the share for the largest entrants only. An upper bound is calculated by imputing the shares of all other carriers to three equal-sized firms.
- 3/ End-user revenues are estimated as the total revenues for facilities-based and facilities-resale traditional and International Simple Resale (ISR)/Hubbed service plus 10% of pure resale revenues. In Table 3.8, the amount of end-user revenues attributed to carriers other than the three largest are estimated as half of their total billed revenues. The amounts for the largest carriers are estimated as the balance of total end-user revenues. For 2001, these assumptions produce data that are relatively consistent with data filed on FCC Form 499-A.
- 4/ Retained revenues are shown for service that originates or terminates in the United States. These figures exclude revenues for calls that transit the United States. Retained revenues are calculated as revenues billed by U.S. carriers, less settlement amounts owed to foreign carriers for U.S. billed traffic, plus settlement amounts due to U.S. carriers for foreign billed traffic.
- 5/ The 1992 figure includes traffic for the former Soviet republics.
- 6/ The accounting rates shown are for rates available to all carriers for traffic carried during the peak period. The peak period is defined in the accounting rate agreement and varies by country. In addition to varying by time of day, some accounting rate agreements vary by volume of traffic. See annual *Section 43.61 International Telecommunications Data* reports for detailed descriptions of different traffic arrangements. Historically, accounting rates typically were denominated in dollars, gold francs (G.F.), or Standard Drawing Rights (S.D.R.). Gold francs are no longer typically used.

Where more than one foreign carrier connects with U.S. carriers, the table shows rates for the first foreign carrier providing service. These include Korea Telecom in Korea, Kokusai Denshin Denwa in Japan, PLDT in the Philippines, CODETEL in the Dominican Republic, and British Telecom in the United Kingdom.

Once the FCC determines that U.S. carriers can terminate at least 50% of U.S. billed traffic to a country at least 25% below the benchmark settlement rate for the country, the FCC grants relief from the international settlements policy. This permits each U.S. carrier to negotiate its own settlement rates. These negotiated settlement rates are not public and, therefore, are not available for publication.

- 7/ Accounting rates do not exist for service between Mexico and the United States. The average settlement rate per minute (ASPM) is shown in the table. It's an average of all the per-minute settlement rates in effect for service between the United States and Mexico. The settlement rate varies by service classification and the originating or terminating locations.

* Beginning in 1984, excludes AT&T Communications and Alascom, each of which reported small amounts of local service revenues for some of the years prior to 1989.

[#] Beginning in 1999, the figures in italics are totals for the large local exchange carriers for which detailed individual company data are presented in Table 2.8. The figures in roman type, which include revenues reported by the mid-sized carriers, are from Table 2.9.

[@] For changes in row/account numbers and names implemented by FCC accounting order released Dec. 17, 2003 (18 FCC Rcd 25759), see listing of accounts in Table 2.8.

See additional notes following Table 4.9.

* Access revenues were first reported in 1984 following the AT&T divestiture.

[#] Beginning in 2001, the figures in italics are for the large local exchange carriers for which detailed individual company data are presented in Table 2.8, whereas the figures in roman type are from Table 2.9 and include revenues reported by the mid-sized carriers.

^x Beginning in 2003, included in accounts 5081-5083.

See additional notes following Table 4.9.

* Beginning in 1984, excludes AT&T Communications and Alascom.

Beginning in 1999, the figures in italics are for the large local exchange carriers for which detailed individual company data are presented in Table 2.8. The figures in roman type, which include revenues reported by the mid-sized carriers, are from Table 2.9.

^x The breakdown of long distance revenues by class of service was eliminated by FCC accounting order released Dec. 17, 2003 (18 FCC Rcd 25759).

See additional notes following Table 4.9.

* Beginning in 1984, excludes AT&T Communications and Alascom.

[#] Beginning in 1999, the figures in italics are for the large local exchange carriers for which detailed individual company data are presented in Table 2.8. The figures in roman type, which include revenues reported by the mid-sized carriers, are from Table 2.9.

[@] For changes in row/account numbers and names implemented by FCC accounting order released Dec. 17, 2003 (18 FCC Rcd 25759), see listing of accounts in Table 2.8.

See additional notes following Table 4.9.

Statistics of Communications Common Carriers

Table 4.5 - Total Operating Revenues of Reporting Incumbent Local Exchange Carriers, 1960-2003 *

(Dollar Amounts Shown in Thousands)

Year	Number of Carriers	Local Service Revenues (500)	Access Revenues (508)	Toll Service Revenues (510)	Miscellaneous Revenues (520)	Uncollectible Operating Revenues (530)	Total Operating Revenues

* Beginning in 1984, excludes AT&T Communications and Alascom. For 2001-03, the expense data are from Table 2.9, which is based on an ARMIS report different from that used for the 1988-2000 period. See notes for said table (following Table 2.17).

^x In 2003, account 6710 was deleted; data now included in account 6720.

See additional notes following Table 4.9.

Statistics of Communications Common Carriers

Table 4.7 - Earnings Summary of Reporting Incumbent Local Exchange Carriers, 1960-2003 *

* Beginning in 1984, excludes AT&T Communications and Alascom.

[#] Beginning in 1999, the figures in italics are for the large local exchange carriers for which detailed individual company data are presented in Table 2.8. The figures in roman type, which include plant data reported by the mid-sized carriers, are from Table 2.9.

^x In 2003, account 2425 was deleted; data are now included in account 2424.

See additional notes following this table.

Statistics of Communications Common Carriers

Statistics of Communications Common Carriers

Notes to Tables 4.1 through 4.9

The historical data presented in these tables were compiled from previous editions of *Statistics of Communications Common Carriers* (SOCC), formerly known as *Statistics of the Communications Industry in the United States*. For the most part, the original data were gathered from the annual reports of Class A telephone carriers and, beginning in 1957, include the voluntary submissions of selected large telephone companies not subject to the Commission's reporting requirements.

Over the years, the number of carriers reporting to the Commission has varied because of mergers, carrier reclassification, and changes in the reporting criteria. In 1985, the annual operating revenue requirement for telephone carrier reporting was changed from \$1 million to \$100 million. As a result, twenty-one companies that had filed a report for 1984 were relieved of this requirement the following year. These carriers accounted for about \$440 million in total operating revenues in 1984, with two-thirds of them reporting less than \$20 million.

On Jan. 1, 1988, a revised Uniform System of Accounts (USOA) went into effect. As a result of these revisions, data submitted under the new rules may not be comparable on a one-to-one basis with data filed for previous years. In these tables, USOA account numbers are given for each column heading (where applicable). The three-digit numbers refer to Part 31 of the Commission's rules, whereas those with four digits refer to Part 32, the revised USOA that superseded Part 31.

In the 1995/96 edition of this publication, the 1995 data did not include AT&T Communications or Alascom (which had been acquired by AT&T Corp.) because the detailed reporting requirements for these carriers were eliminated after the Commission had decided that AT&T would no longer be considered a dominant carrier. In the 1996/1997 book, these tables were revised to exclude data for the aforementioned carriers for 1984 and subsequent years--the period since AT&T's divestiture of the Bell operating companies. (The double line in the year column of each table marks the time of divestiture, which was effective Jan. 1, 1984.) Therefore, the data for 1984 to the present are not comparable to the data for 1960-83. Historical data that include AT&T Communications and Alascom appear in the 1994/1995 and earlier editions of this publication.

Beginning with the reports filed for 1999, the Commission streamlined the reporting requirements for certain mid-sized incumbent local exchange carriers in Phase 1 of its Accounting Review Report and Order, 14 FCC Rcd 11396 (1999). Further streamlining was undertaken by the FCC's Phase 2 Report and Order, 16 FCC Rcd 19911 (2001), which included the elimination of certain reporting requirements for mid-sized carriers. As a result of these changes, only the large carriers included in Table 2.8 of this publication continue to report much of the financial data that are presented in these historical tables. Such items are indicated by the figures in italics. Because of different data sources for 2001-2003 and prior years (1988-2000), the figures for all reporting carriers for these two periods are not strictly comparable; the differences, however, are for the most part relatively minor.

The annual ARMIS Order that was released on Dec. 17, 2003 (18 FCC Rcd 25759) implemented the revisions to FCC Report 43-01, the Annual Summary Report, and FCC Report 43-02, the USOA Report, that were approved by the Commission in its Phase 2 Report and Order, 16 FCC Rcd 19911 (2001). The two ARMIS reports are the source of the post-1987 data for incumbent local exchange carriers that are presented in these historical tables.

Revenues

In Table 4.3, the toll private line revenue categories used for the 1960-87 period were introduced in the 1981 annual reports, and are not completely comparable to the categories listed in the reports for 1980 and prior years. The revenue breakdown before 1981 was as follows: telephone, teletypewriter, other telegraph, Telpak (beginning in 1961), program transmission - audio, program transmission - video, and other private line services.

¹ Effective Nov. 15, 1999, account 5010, public telephone revenues, was eliminated.

² In the 1957 through 1973 *SOCC* books, details of private line revenues were not totaled for carriers that had filed reports on a voluntary basis. In this tabulation, aggregate data for those carriers are included in the other services category of toll private line service revenues.

³ In 1982 through 1987, some of the non-Bell companies did not provide a breakdown of their toll private line revenues. These revenues were reported as either voice-grade service revenues or other private line service revenues.

⁴ Wide area toll service (WATS) began in 1961. During the 1961-75 period, some of the non-Bell companies included WATS revenues in their message toll service revenues. The WATS figures for 1961-65 include revenues for wide area data service, which was offered on a limited developmental basis during that period.

⁵ Beginning in 1961, includes earth station revenues.

⁶ For 2002, includes reserves recorded for MCI WorldCom.

⁷ Includes revenue settlements (row 1050 of ARMIS 43-01 report).

Statistics of Communications Common Carriers

Notes to Tables 4.1 through 4.9 -- Continued

Expenses

- ¹ The plant specific operations expense accounts are used to record the expenses associated with particular kinds of telecommunications plant. For details, see expense accounts in Table 2.8.
- ² Beginning in 2001, other property, plant and equipment expenses (account 6510) are included with network operations expenses (account 6530).

Earnings

- ¹ Net operating income for 1960-87 is after the addition and subtraction of rents from and for the lease of operating property from net operating revenues. Beginning in 1988, these rents are included in operating revenues and expenses.
- ² Beginning in 1970, net income is after extraordinary and delayed items. In earlier years, these items were charged or credited to retained earnings.
- ³ The significant change in nonoperating income and expense and nonoperating taxes that occurred in 1993 is primarily attributable to business restructuring and the adoption of new accounting standards.

Assets and Liabilities

- ¹ Includes prepaid accounts.
- ² Includes miscellaneous physical property (account 103), which is reported as nonoperating plant (account 2006) under the revised USOA.
- ³ Includes other jurisdictional assets (account 1500), which were not reported before 1988.
- ⁴ In 1983, AT&T changed the par value of its common stock from \$16.67 to \$1 per share.

Plant

- ¹ During the 1960-84 period, detailed plant account data for those carriers that reported to the Commission on a voluntary basis were not included in the *SOCC* tabulations. Accordingly, the number of carriers included in this table for that period differs from the number included in Tables 4.1 through 4.8.
- ² In 1999, accounts 2114, 2115, and 2116 (special purpose vehicles, garage work equipment, and other work equipment, respectively) were combined into a single new account 2114, tools and other work equipment.
- ³ Includes operator systems (account 2220).
- ⁴ Includes satellite and earth station facilities (account 2231.1).
- ⁵ Drop and block wires, formerly included in this column, are included in aerial wire (account 242.1), or buried cable (account 242.3), as appropriate.
- ⁶ Prior to 1984, public telephone equipment was included in account 231, station apparatus.
- ⁷ Account 262 includes PBX and station equipment installed for official company use. Under the new rules, such plant is included in account 2123, office equipment.
- ⁸ Intra-building network cable was called "house cable" under the old rules and was included in the aerial cable account (242.1).
- ⁹ Includes account 207, right-of-way, which was eliminated as a separate account effective Jan. 1, 1960. From 1960 through 1987, right-of-way was included primarily in the appropriate outside plant account.
- ¹⁰ Includes unclassified plant (reported in 1969, 1974, 1975, and 1984).
- ¹¹ Consists of capital leases (account 2681) and leasehold improvements (account 2682). Beginning in 2001, includes intangibles (account 2690).
- ¹² Beginning in 2001, included with amortizable tangible assets (account 2680).
- ¹³ Under the revised USOA, satellite earth stations are included in central office transmission facilities.
- ¹⁴ Beginning in 1995, the distinction between short-term and long-term plant under construction was eliminated. Account 2003 now comprises total plant under construction; account 2004 was deleted.

Source: These historical statistics were compiled from previous editions of *Statistics of Communications Common Carriers*. Totals may be understated because certain data pertaining to the carriers included in this table are not available.

Note: Between 1987 and 1988, there were significant changes in the definitions of many of the items in this table. With the implementation of a new Uniform System of Accounts (USOA) in 1988, as indicated in the notes to Tables 4.1 - 4.9, new categories of reporting units of physical plant and network usage were created and defined. In 1992, some of these definitions were further refined when the reporting mechanism of the carriers was changed for the filing of 1991 data. For these reasons, there may be inconsistencies in the data reported for 1984-1987 compared to what was reported for 1988, and also between 1988 and subsequent years, as the carriers were adapting to the new USOA and automated reporting requirements.

In 2003, the analog/digital breakdown of business and residential switched access lines was replaced by a single-line/multiline division of business lines and a lifeline/non-lifeline separation of residential lines.

¹ For 1988-1990, miles were converted to kilometers by multiplying the number of miles by 1.6093 and rounding to the nearest whole number.

² Beginning in 2001, employee and compensation figures (shown in italics) are for the Bell operating companies only.

³ Before 1997, referred to as sheath kilometers of copper cable.

NA - Not available at time of publication.

¹ Include end-user switched access lines for competitive local exchange carriers (CLECs) and incumbent local exchange carriers (ILECs) as reported in FCC Form 477. Carriers with greater than 10,000 lines in a state are required to report.

² Include end-user switched access lines, resold lines, and UNE-P lines.

³ Beginning in 2001, a substantial number of ILEC lines provided to CLECs as UNE-P lines are not included in this total.

⁴ The lines for 2003 are a preliminary estimate using the 2003 ARMIS Report 43-08 total and the 2002 adjustment factor.

Source: CLEC and ILEC access lines: Industry Analysis and Technology Division, Wireline Competition Bureau, *Local Telephone Competition: Status as of December 31, 2003* (June 2004).

Local loops: National Exchange Carrier Association, Universal Service Fund filings.

Access Lines: *Statistics of Communications Common Carriers*, Table 4.10, after inflating access lines of reporting carriers to represent the total industry. The 1996 adjustment factor was used for the years prior to 1996.

¹ Providers with 250 or more lines in a state are required to report.

² A high-speed line is a connection to an end-user customer that is faster than 200 kbps/second in at least one direction. Advanced services lines, which are a subset of high-speed lines, are connections to end-user customers that are faster than 200 kbps in both directions. The speed of the purchased service varies among end-user customers. For example, a high-speed service delivered to the end-user customer over other traditional wireline technology, such as DS1 or DS3 service, or over optical fiber to the end user's premises may be much faster than the ADSL or cable modem service purchased by a different, or by the same, end user. Numbers of lines reported here are not adjusted for the speed of the service delivered over the line or the number of end users able to utilize the lines.

³ The mutually exclusive types of technology are, respectively: Asymmetric digital subscriber line (ADSL) technologies, which provide speeds in one direction greater than speeds in the other direction; wireline technologies "other" than ADSL, including traditional telephone company high-speed services and symmetric DSL services that provide equivalent functionality; coaxial cable, including the typical hybrid fiber-coax (HFC) architecture of upgraded cable TV systems; optical fiber to the subscriber's premises (e.g., Fiber-to-the-Home, or FTTH); and satellite and terrestrial wireless systems, which use radio spectrum to communicate with a radio transmitter at the subscriber's premises.

¹ See Industry Analysis and Technology Division, Wireline Competition Bureau, *Local Telephone Competition: Status as of December 31, 2003* (June 2004). Carriers with under 10,000 lines in a state are not required to report, so FCC Form 477 data are likely to undercount the total number of wireless lines in service.

² See current and previous editions of Industry Analysis and Technology Division, Wireline Competition Bureau, *Numbering Resource Utilization in the United States*.

¹ Includes loops owned by Verizon/GTE and SBC Communications, Inc./Southern New England Telephone Co. Woodbury Telephone Company of Connecticut, a subsidiary of SBC, has 25,634 loops and Verizon of the Northern Mariana Islands has 22,206 loops that are not included in the total. These loops are included in the category "All Other Local Exchange Companies."

Note: Universal Service Fund loops (USF) are subscriber or common lines that are jointly used for local exchange service and exchange access for state and interstate interexchange services.

Source: Data filed periodically by the National Exchange Carrier Association pursuant to Part 36 of the Commission's Rules.

2003	1.9	-2.7	2.6	-10.9	-9.4	2.0	0.5	6.2

Note: The CPI for all items measures the impact of inflation on consumers. The CPI index of all telephone services is based on a "market basket" intended to represent the telephone related expenditures of a typical urban household. It includes both local and long distance services. The CPI index of local telephone charges is based on monthly service charges, message unit charges, leased equipment, installation, enhanced services (such as tone dialing and call waiting), taxes, subscriber line charges, and all other consumer expenditures associated with telephone services except long distance charges. In contrast, the PPI index of local residential services is based only on service charges for residential service, optional touch-tone service, and subscriber line charges. The PPI telephone indexes were revised in July 1995. Index values after July 1995 are not comparable to index values published from 1972 through July 1995.

NA - Not available.

* The CPI telephone service index was revised in December of 1997.

¹ Due to month-to-month variation in the new PPI index, PPI price levels are determined using a five-month weighted average.

¹ Revised figures.

² Subject to revision.

³ Rates are based on flat-rate service where available, and measured/message service with 100 five-minute, same-zone, business-day calls elsewhere. As of 2001, all 95 cities surveyed offered flat-rate residential service, which made measuring the cost of such calls unnecessary.

⁴ Beginning in 2002, the representative monthly charge includes additional monthly charges for touch-tone service.

2004	June	21,363,124	764,082	22,127,206	9,522,794

Note: For individual month assignments through June 2003, see Industry Analysis and Technology Division, Wireline Competition Bureau, *Trends in Telephone Service* (August 2003).

* Toll-free (800) service was initially offered by AT&T in 1967. On May 1, 1993, procedures for routing toll-free calls were changed and 800 numbers were made "portable" so customers who switched service providers could retain their numbers. Due to the growth in toll-free numbers, a new toll-free calling code, 888, was added in March 1996, which made it possible to assign about 8 million new toll-free numbers. A third toll-free calling code, 877, was added in April 1998; and a fourth toll-free code, 866, was added in July 2000.

¹ Miscellaneous numbers include those in the 800, 888, 877, and 866 service management systems maintained by Database Service Management, Inc., and categorized as reserved, assigned but not yet activated, recently disconnected, or suspended.

Note: Detail may not add to totals due to rounding.

¹ TRS filers generally reported pay telephone revenues as local service revenues, access revenues or operator toll revenues. The Universal Service and FCC Form 499-A worksheets contain a separate category for payphone coin revenues. Starting in 1997, payphone revenues include payphone compensation received from toll carriers.

² TRS Worksheet filers generally reported special access revenues as access revenues. Reporting changes implemented with the Universal Service Worksheet explain the increase in local private line revenues and the fall in access revenues shown for 1997. TRS Worksheet filers included subscriber line charges with other access charges. For the years 1992 - 1996, these revenues have been disaggregated by assuming that the end-user access revenues in Table 4.2 of *Statistics of Communications Common Carriers* represents 93% of industry total subscriber line charge revenues. Universal Service Worksheet filers report subscriber line charges in a separate category. The increase from 1997 to 1998 represents PICC charges levied by ILECs as well as \$1.2 billion of PICC pass-through charges levied by toll carriers.

³ Significant amounts of enhanced services, billing and collection, CPE and other non-telecommunications revenues were reported in the TRS mobile and other local service categories through 1996. Universal Service Worksheet filers report these revenues in the non-telecommunications category. For prior years, the amounts of non-telecommunications revenues reported as mobile and other local revenues were estimated as 70% of the amounts that Tier 1 ILECs reported in ARMIS as miscellaneous and nonregulated revenues (currently account 5200 + account 5280) and 10% of amounts reported as mobile service revenues.

⁴ Charges on end-user bills identified as recovering state or federal universal service contributions are reported separately from local, wireless and toll revenues. Reported amounts are apportioned between local, wireless and toll service based on the proportions of local, wireless and toll intrastate and interstate revenues by type of carrier.

¹ Filers are asked to select for themselves a service provider category that best describes their operations. The choices have changed over the years. For example, most satellite service providers identified themselves as other toll carriers in their 1997 Form 431 TRS worksheets because that worksheet did not contain a separate category for satellite service providers.

² Significant amounts of enhanced service, billing and collection, CPE and other non-telecommunications revenues were reported on TRS worksheets by incumbent local exchange carriers (ILECs) and wireless carriers through 1996. Universal Service Worksheet filers report these revenues in the non-telecommunications category. For prior years, the amounts of non-telecommunications revenues reported as mobile and other local revenues were estimated as 70% of the amounts that Tier 1 ILECs reported in ARMIS as miscellaneous and nonregulated revenues (currently account 5200 + account 5280) and 10% of amounts reported as mobile service revenues.

³ Other adjustments include some amounts withheld to preserve confidentiality and revisions made after the initial publication of the data.

Source: Industry Analysis and Technology Division, Wireline Competition Bureau, *Telecommunications Industry Revenues* (March 2004).

Statistics of Communications Common Carriers

General Index 1. By Company

The company index that appeared in previous editions of this publication has been eliminated. The names of companies that provide domestic telecommunications services appear in the following tables: 1.1 through 1.4, 1.5 and (the 3 largest interexchange carriers), 2.1, 2.6, and 2.8. Individual company statistical data and other information are presented in each of these tables.

For a listing of companies that provide international telecommunications services, see Table 3.4, general traffic information. The notes for this table list mergers, name changes, and other information regarding traffic reports filed by these carriers. See also Tables 3.5 through 3.9, each a subset of Table 3.4.
