

## Federal Personal Income Tax Liabilities and Payments, 1959–98

THE TABLE below presents the estimates of Federal personal income tax liabilities and of Federal personal income tax payments for 1959–98.<sup>1</sup> The estimates for 1997 are revised, and the estimates for 1998 are new; these estimates reflect the incorporation of the results of this year's annual revision of the national income and product accounts and newly available tax return data from the Internal Revenue Service (IRS).

1. For a discussion of the payments series, the derivation and the use of the estimates of tax liabilities, and the sources of the differences between liabilities and payments, see Thae S. Park, "Federal Personal Income Tax Liabilities and Payments, 1959-97," SURVEY OF CURRENT BUSINESS 80 (March 2000): 11–14.

Note.—Thae S. Park prepared this presentation.

For 1998, tax payments exceeded tax liabilities by \$26.3 billion. The excess payments primarily resulted from the implementation of substantial tax cuts under the Taxpayer Relief Act of 1997. The most important provisions that reduced liabilities were the child tax credit and the credits for higher education tuition, both of which became effective on January 1, 1998. The withholding tables for tax year 1998 that were issued by the IRS for use by employers to calculate the amounts to be withheld from wages and salaries did not fully reflect the reduction in liabilities, so tax refunds were substantial. 

### Federal Personal Income Tax Liabilities and Payments, 1959–98

[Billions of dollars]

	Federal personal income taxes			Disposable personal income (DPI)	
	Liabilities basis <sup>1</sup>	Payments basis <sup>2</sup>	Difference	Alternative DPI with NIPA Federal personal income taxes on a liabilities basis	Published DPI with NIPA Federal personal income taxes on a payments basis <sup>3</sup>
1959 .....	39.0	38.5	0.5	350.7	351.2
