

GDP and Other Major NIPA Series, 1929–2002:1

Tables 1–4 present the historical series from the national income and product accounts (NIPAs).

Specifically, table 1 presents current-dollar gross domestic product and its components. Table 2A presents real gross domestic product and its components in chained dollars, and table 2B presents real

gross domestic product and its components in chain-type quantity indexes. Table 3 presents NIPA price indexes. Table 4 presents national income and personal income. The estimates are available on BEA's Web site at <www.bea.gov>; for more information, call 202–606–5304.

Table 1. Gross Domestic Product

[Billions of dollars; quarterly estimates are seasonally adjusted at annual rates]

Year and quarter	Gross domestic product	Personal consumption expenditures				Gross private domestic investment						Net exports of goods and services			Government consumption expenditures and gross investment			Final sales of domestic product	Gross national product	Percent change from preceding period		
		Total	Durable goods	Non-durable goods	Services	Total	Fixed investment				Change in private inventories	Net	Exports	Imports	Total	Federal	State and local			Gross domestic product	Final sales of domestic product	
							Total	Nonresidential		Residential

See footnotes at the end of the table.

NOTE. Chain-type estimates provide the best available method for comparing the level of a given series at two points in time. Chained-dollar estimates are obtained by multiplying the chain-type quantity index for an aggregate by its value in current dollars in the reference year (currently 1996) and dividing by 100. For analysis of changes over time in an aggregate or in a component, the percentage changes calculated from the chained-dollar estimates and the chain-type quantity indexes are the same. Thus, chained-dollar estimates can be used to compute "real" (that is, inflation-adjusted) rates of growth. However, comparisons of two or more different chained-dollar series must be made with caution, because the prices used as weights in the chained-dollar calculations usually differ from the prices in the reference period, and the resulting chained-dollar values for detailed GDP components usually do not sum to the chained-dollar estimate of GDP or to any

intermediate aggregate. A measure of the extent of such differences is provided in most chained-dollar tables by a "residual" line, which indicates the difference between GDP (or another major aggregate) and the sum of the most detailed components in the table. It is usually best to make comparisons of aggregate series in current dollars or to use BEA's estimates of contributions to percent change. Measures of the contributions of components to the percentage change in real GDP and to the percentage change in other major aggregates are provided in NIPA tables S.2 and 8.2-8.6. In general, the use of chained-dollar estimates to calculate component shares or component contributions may be misleading for periods away from the reference year. To assist users in undertaking historical analysis, BEA has provided supplemental tables that present estimates for selected timespans in chained 1937, 1952, 1972, and 1982 dollars (see tables 1.2A, 1.2B, 1.2C, and 1.2D).

Table 2A. Real Gross Domestic Product—Continued
 [Billions of chained (1996) dollars; quarterly estimates are seasonally adjusted at annual rates]

Year and quarter	GDP	Personal consumption expenditures	Gross private domestic investment	Exports and imports of goods and services		Government ¹	Residual	Final sales of domestic product	Gross domestic purchases	Final sales to domestic purchasers	GNP	Percent change from preceding period				
				Exports	Imports							GDP	Final sales of domestic product	Gross domestic purchases	Final sales to domestic purchasers	GNP

1. Government consumption expenditures and gross investment.
 Note: The residual is the difference between GDP and the sum of the detailed components shown in this table.
 GDP: Gross domestic product.
 GNP: Gross national product.

Table 2B. Chain-Type Quantity Indexes for Gross Domestic Product

[Index numbers, 1996=100; quarterly estimates are seasonally adjusted]

Year and quarter	Gross domestic product	Personal consumption expenditures				Gross private domestic investment						Exports and imports of goods and services		Government consumption expenditures and gross investment			Final sales of domestic product	Gross national product
		Total	Durable goods	Non-durable goods	Services	Total	Fixed investment				Exports	Imports	Total	Federal	State and local			
							Total	Nonresidential		Residential								
								Total	Structures							Equip-ment and software
