

Personal Income by State, First Quarter 2002

By Duke Tran

IN the first quarter of 2002, personal income grew solidly in all States and the District of Columbia (DC), ranging from 0.6 percent to 3.0 percent (table A).¹ In contrast, personal income either fell or grew slowly in most States in the fourth quarter of 2001.²

1. In this article, percent changes from the preceding quarter are expressed at quarterly rates.

2. This article features the latest estimates of State personal income that were released by the Bureau of Economic Analysis on July 24, 2002. These estimates do not yet incorporate the results from the most recent annual revision of the national income and product accounts (NIPAs) that were released on July 31, 2002 (see "Annual Revision of the National Income and Product Accounts" in this issue). The results of the NIPA revision will be incorporated into the quarterly estimates of State personal income in October 2002.

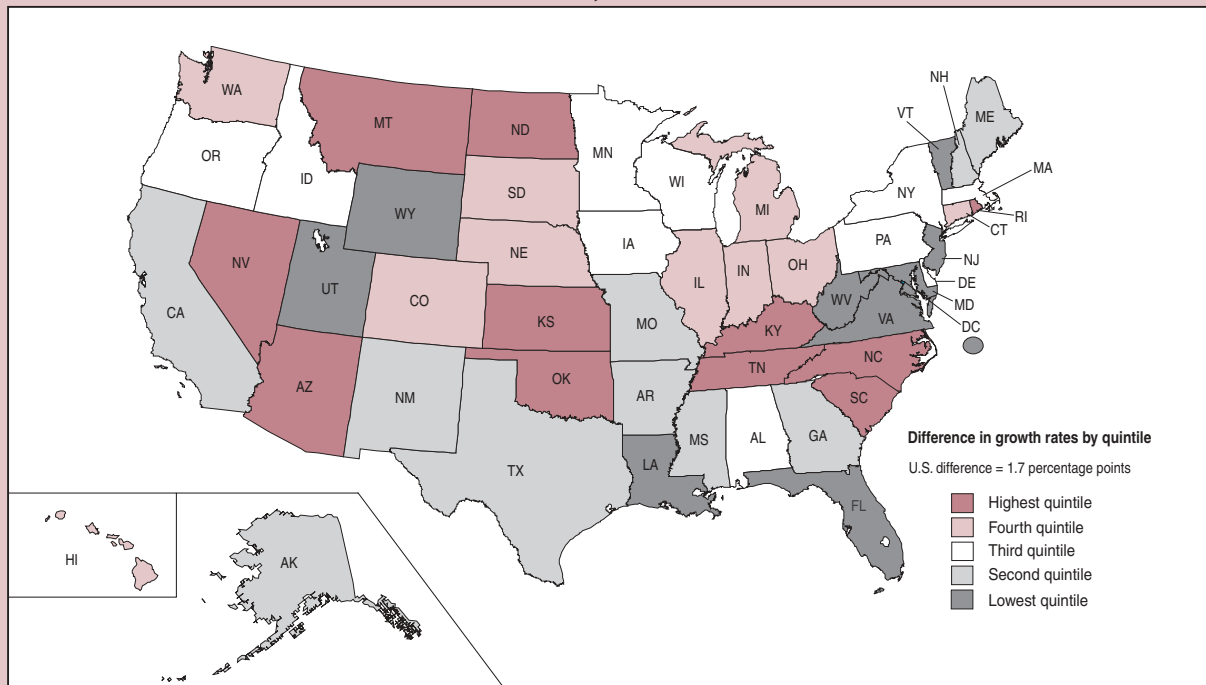

NOTE. The quarterly estimates of State personal income are prepared by the Regional Economic Measurement Division.

For the Nation, personal income increased \$118.2 billion, or 1.4 percent, in the first quarter after declining \$21.7 billion, or 0.3 percent, in the fourth quarter. In the first quarter, a pickup in transfer payments contributed substantially to personal income growth in all 50 States and DC; almost half of the overall pickup in transfer payments resulted from the annual cost-of-living adjustments to social security program benefits, and almost one-fourth of the pickup resulted from the expansion of the personal income tax child credit that was enacted in 2001. Personal income was also boosted by strength in Federal Government earnings, almost two-thirds of which reflected the annual Federal civilian and military pay raises.

The first-quarter upturn ended a yearlong downtrend in personal income growth: From a 1.3-percent increase in the fourth quarter of 2000 to a

CHART 1

Difference in Growth Rates in Personal Income, 2001:IV Versus 2002:I

0.8-percent increase in the first quarter of 2001, to a 0.4-percent increase in the second, to a 0.2-percent increase in the third, and then to a drop of 0.3 percent in the fourth.

The following are some additional highlights in the first quarter of 2002:

- Growth in earnings turned up or accelerated in most major industries.
- Forty-nine States and DC had substantial upturns or accelerations in income growth.
- The upturn in U.S. personal income spread to 31 States.

Table 1 at the end of this article presents the quarterly estimates of personal income for each State and region, beginning with the second quarter of 1998. Table 2 presents the quarterly estimates of personal income by major source and of earnings by industry, beginning with the third quarter of 2000.

The sharp upturn in personal income in the first quarter reflected faster growth in all major components, particularly transfer payments, which were boosted by the annual cost-of-living adjustments to social security program benefits. Dividends, interest, and rent grew 1.3 percent after declining 0.5 percent;

Table A. Personal Income by State and Region [Ranked by Upturns or Accelerations in Personal Income Growth, 2002:1]

	Percent change [at quarterly rates]									Dollar change [at annual rates]							
	Personal income			Net earnings ¹		Dividends, interest, & rent		Transfer payments		Personal income		Net earnings ¹		Dividends, interest, & rent		Transfer payments

1. Net earnings is earnings by place of work—the sum of wage and salary disbursements (payrolls), other labor income, and proprietors' income—less personal contributions for social insurance plus an adjustment to convert earnings by place

of work to a place-of-residence basis.
Note: Estimates may not add to totals because of rounding.

the upturn reflected large increases in personal interest income and rental income. Net earnings grew 1.0 percent after declining 0.5 percent; the upturn reflected upturns in wages and salaries, which grew 0.7 percent after declining 0.5 percent, and in proprietors' income, which grew 2.4 percent after declining 1.2 percent.³

By industry, U.S. earnings by place of work grew 1.0 percent in the first quarter after declining 0.5 percent in the fourth quarter (tables B and C). The upturn in earnings reflected increases in earnings growth in farms; construction; finance, insurance, and real estate; trade; services; and government. In addition, earnings in durable and nondurable goods manufac-

turing and in transportation and public utilities de-

3. Net earnings is calculated as earnings by place of work less personal contributions for social insurance plus an adjustment that converts these earnings to a place-of-residence basis. Earnings by place of work is the sum of wage and salary disbursements (payrolls), other labor income, and proprietors' income.

Net earnings is used to analyze changes in the composition of personal income; earnings by place of work is used to analyze changes in the industrial structure of earnings. Estimates of net earnings by industry are not available, because the source data used to adjust earnings to a place-of-residence basis are not available by industry and because personal contributions for social insurance are not estimated by industry. For the definitions of the components of earnings, see U.S. Bureau of Economic Analysis, State Personal Income, 1929-97 (Washington, DC: U.S. Government Printing Office, 1999), or go to BEA's Web site at <www.bea.gov/bea/mp.htm>, and look under "Regional programs" for "State Personal Income, 1929-97."

1. Also includes agricultural services, forestry, fishing, and other.
2. Data are suppressed to avoid disclosure of confidential information.

clined at smaller rates than in the fourth quarter. The only industry in which earnings decelerated was mining, whose earnings had grown rapidly in the fourth quarter.

Changes in State Personal Income Growth

The upturn in personal income in the first quarter of 2002 was widespread. In 31 States, personal income increased in the first quarter after declining in the fourth quarter. In 18 States and DC, personal income grew faster in the first quarter than in the fourth quarter. In Wyoming, personal income growth decelerated, but only slightly.

States with the largest upturns in personal income growth. In the first quarter, the top quintile of States in terms of the size of the upturn in personal income growth consisted of Nevada, North Dakota, Kansas, Tennessee, North Carolina, Rhode Island, South Carolina, Arizona, Kentucky, Montana, and Oklahoma (chart 1, page 168). All these States had upturns of at least 2.4 percentage points. These 11 States accounted for 11.7 percent of U.S. personal income and contributed 16.3 percent of the \$118.2 billion increase in the first quarter.

All 11 States had large upturns in net earnings and in dividends, interest, and rent. In addition, the growth

Note: Percent changes are expressed at quarterly rates.

in transfer payments in these States was at least 2.0 percentage points higher in the first quarter than the fourth, reflecting the annual cost-of-living adjustments.

By industry, earnings either grew faster or turned up sharply in trade, in finance, insurance, and real estate, and in government in all 11 States.

In North Dakota, Kansas, Tennessee, North Carolina, South Carolina, Montana, and Arizona, farms earnings turned up substantially after declining in the fourth quarter, reflecting large increases in cash receipts.

In Nevada, Tennessee, North Carolina, South Carolina, Kentucky, and Montana, construction earnings turned up substantially.

In Tennessee and North Carolina, earnings in both durable and nondurable goods manufacturing—slow-growing industries nationwide—turned up substantially. In addition, North Dakota, Kansas, and Kentucky had upturns in nondurable goods manufacturing, and South Carolina and Oklahoma had upturns in durable goods manufacturing.

In Nevada, North Carolina, Rhode Island, and South Carolina, earnings turned up substantially in

1. Also includes agricultural services, forestry, fishing, and other.
2. Data are suppressed to avoid disclosure of confidential information.

transportation and public utilities—another slow-growing industry nationwide.

States with the smallest changes in personal income growth. In the first quarter, the bottom quintile of States that had the smallest changes in growth rates consisted of Wyoming, Louisiana, New Jersey, Utah, Maryland, Virginia, DC, West Virginia, Florida, and Vermont. Except for Wyoming, which had a slight deceleration, all these States and DC had accelerations in personal income growth of 1.2 percentage points or less.

In these States, first-quarter growth rates ranged

from 0.7 percent in New Jersey to 1.7 percent in West Virginia, compared with the U.S. average of 1.4 percent. In the fourth quarter, personal income growth was positive in these States, compared with a decline of 0.4 percent in U.S. personal income. Most of these States were among the fastest growing States in the fourth quarter. These States accounted for about 17.2 percent of U.S. personal income and contributed 14.7 percent of the \$118.2 billion increase in the first quarter.

By type of income, transfer payments contributed more than net earnings to personal income growth in

Note: Estimates are expressed at annual rates and may not add to totals because of rounding.

Wyoming, Louisiana, New Jersey, Florida, and Vermont. By comparison, net earnings was the major contributor to income growth in the fourth quarter; all these States except Vermont had positive growth in contrast to the 0.5-percent decline in U.S. net earnings.

By industry, in most of these States, accelerations in earnings growth reflected faster growth or upturns in wholesale trade; finance, insurance, and real estate; services; and government.

In Louisiana, New Jersey, Utah, Virginia, and Florida, strength in earnings in retail trade also contributed to faster earnings growth.

In Wyoming, New Jersey, West Virginia, and Vermont, construction contributed to faster earnings growth. In Maryland, strength in nondurable goods manufacturing and in retail trade contributed to faster earnings growth.
