

CHAPTER 7 TRUSTEE'S REPORT OF NO DISTRIBUTION (NDR)

GENERAL INFORMATION AND INSTRUCTIONS

UST Form 101-7-NDR ("NDR") must be filed by the chapter 7 trustee as a virtual docket text entry with the United States Bankruptcy Court for all no-asset cases closed on or after April 1, 2009.

Version 3.3 of CM/ECF contains the virtual docket event described herein. CM/ECF will automatically compute the length of time a case has been pending. The dollar amounts are taken from the information on the debtor's Schedules, which is captured by the court as part of the CM/ECF case opening process. The trustee is not required to manually enter information from the Schedules if the data is not in the court's CM/ECF system by the time the trustee files the NDR. The trustee is not required to verify the accuracy of the pre-populated information supplied through CM/ECF.

The NDR virtual docket text entry shall include the following key information about the case as reported in the Schedules filed by the debtor(s) or otherwise found in the case record. All dollar amounts must include cents (\$x.xx). The date format to be followed is mm/dd/yyyy.
