**E. TAKE OF GOLDEN EAGLE NESTS  
(Bald & Golden Eagle Protection Act, 50 CFR 22.25)**

***Note:*** A Federal permit to take golden eagle nests is available only to parties engaged in a resource development or recovery operation and only when nests are inactive. An inactive nest is one that is not currently used by golden eagles as determined by the absence of any adult, egg, or dependent young at the nest during the 10 days before the nest is taken.

***Please provide the following information on a separate sheet of paper:***

1. Describe the resource development or recovery operation in which you are engaged.
2. Indicate the number of golden eagle nests you propose to take and how they were determined to be inactive.
3. Describe the property on which the taking is proposed, with reference made to its exact geographic location. An appropriately scaled map or plat must be included which delineates the areas of the resource development or recovery operation and identifies the exact location of each golden eagle nest you propose to take. The map or plat must contain enough detail so that each golden eagle nest proposed to be taken can be readily located by the Service.
4. For each nest you propose to take, calculate the area nesting population of golden eagles and identify on an appropriately scaled map or plat the exact location of each golden eagle nest used to calculate the area nesting population. (This is not required if the Service has sufficient data to independently calculate the area nesting population.) The map or plat must contain enough details so that each golden eagle nest used to calculate the area nesting population can be readily located by the Service.
5. Describe each activity to be performed during the resource development or recovery operation which involves the taking of a golden eagle nest.
6. Provide a statement with any supporting documents from ornithologists experienced with golden eagles or other qualified persons who have made on-site inspections and can verify your calculation of the area nesting population.
7. Indicate the length of time you need the permit to be valid. What are the start and ending dates of the resource development or recovery operation?
8. What is the intended disposition of each nest you propose to take? Are you willing to collect any nests for scientific or educational purposes?
9. Provide a statement indicating any proposed mitigation measures that are compatible with the resource development or recovery operation to encourage golden eagles to reoccupy the site. Mitigation measures may include reclaiming disturbed land to enhance golden eagle nesting and foraging habitat, relocating in suitable habitat any inactive golden eagle nest taken, or establishing one or more nest sites. If the establishment of one or more nest sites is proposed, provide a description of the materials and methods to be used and the exact location of each artificial nest site.
10. You must retain records relating to the activities conducted under your permit for at least 5 years after the date of expiration of your permit. Is the physical address you provided in Section C on page 1 of this application the address where your records will be kept?     Yes     No    If "no", provide the physical address.

- 
11. Have you obtained all required State permits or approvals to conduct this activity?

Yes    If "yes", attach a copy of the approval(s).     Have applied     None required
