File 4-557 Customer Account Rule submitted by the National Investor Protection Coalition accurately describes the mechanisms being used by some of the Market Participants to fleece the small investor. The petition also offers solutions to attempt to rectify these problems. Please adopt this citizen petition.

As a small investor, I'm concerned about the integrity of our markets & how they are regulated. I have lost a substantial amount thru bear raids & manipulation of stock prices.

The SEC seems to be authorizing naked short selling, an activity which destroys confidence in the markets, not to mention resulting in financial losses for many market participants such as myself. I wish to have real securities credited to my account when I have paid for them, not "air shares" or "phantom shares" or entitlements.

Sincerely,
Dennis Fulk
