1996 International Telecommunications Data

Introduction

This report contains data regarding telecommunications service between the United States and international points in 1996. The data are compiled from reports submitted to the Federal Communications Commission by U.S. carriers pursuant to Section 43.61 of the Commission's rules. Section 43.61(a) directs carriers to file reports by July 31 that summarize international telecommunications service provided during the preceding calendar year. Carriers submit their final data for the preceding calendar year by October 31. The specific filing requirements are set forth in the Manual for Filing Section 43.61 Data (June 1995), which governs filings beginning with the 1995 international traffic data.

The Commission summarizes these filings in statistical reports. The statistical reports are used to monitor the development of competition in international telecommunications markets. These reports are also used by the United States to develop and support positions in discussions with foreign governments and international standards organizations, and by industry for facilities planning.

Figure 1 summarizes the traffic and revenue data reported by all U.S. facilities-based and facilities-resale carriers for 1996. These figures include facilities-based service and facilities-resale service, but do not include pure resale service. These categories are explained below.

Figure 1

1996	Traffic*	Revenue billed by U.S. carriers (millions)	Net settlements with foreign carriers (millions)	Net retained revenue** (millions)
Message Telephone	27,562	\$14,234	(\$5,658)	\$8,576
Message Telegraph	21	5	0	5
Teleprinter Exchange (Telex)	77	119	(9)	110
Private Line	19,124	661	none	661
Other and Miscellaneous	not meaningful	26	10	36
Total	Not meaningful	\$15,045	(\$5,657)	\$9,388

* The following traffic measures are shown in the table:

Message Telephone: Millions of minutes

Message Telegraph: Millions of words

Telex: Millions of minutes

Private Line: Number of Circuits

Message and word counts include both U.S. billed traffic and foreign billed traffic that terminates in the United States, but excludes most traffic that transits the United States.

** Net U.S.-carrier revenue equals billed revenues plus settlement amounts receivable from foreign carriers less amounts due to foreign carriers. See Figure 4, below.

Reporting Requirements

Different levels of reporting are used for different categories of service. Figure 2 shows that carriers must report traffic and revenue on a country-by-country basis for the most prevalent communications services.

Figure 2

Service	Level of reporting for traffic and revenue for larger U.S. points *
Facilities-Based and Facilities-Resale Services Switched Services Message Telephone Service Message Telegraph Service Teleprinter Exchange Service (Telex) Private Line Services	 Country-by-country Country-by-country Country-by-country Country-by-country
Facilities-Based and Facilities-Resale Services Miscellaneous and Other International Services Packet Switching Switched Video Occasional Use Television	 Region and world totals Region and world totals Region and world totals
Pure Resale Services	World totals
* Carriers may file world totals in lieu of country-by-country data for the smaller U.S. points identified in Figure 5.	

Facilities-based services are those services provided using international transmission facilities owned in whole or in part by the carrier providing service. Facilities-based carriers use one or more international channels of communications to provide international telecommunications service. An international channel is a wire or radio link that facilitates electronic communications between a United States point and another world point. A facilities-based carrier either owns international channels, has an ownership interest in the channel such as an indefeasible right of use (IRU), or leases the channel from an entity that does not report those circuits. Carriers must provide detailed data for the facilities-based services that they provide. Pure resale services are switched services that are provided by reselling the international switched services of other carriers. Pure resale services are not provided to the public over the reseller's international channels of communications. Pure resale carriers may own domestic switches and circuits, but rely on other carriers to carry switched traffic between the United States and foreign points. Facilities-resale services are provided by a carrier utilizing non-switched international circuits leased from other reporting international carriers. A facilities-resale service is provided over international channels which are subject to Section 43.61 reporting by the underlying carrier. Carriers must provide detailed data for the facilities resale services that they provide. Figure 2 shows that there are reduced reporting requirements for services provided on a pure resale basis. Some carriers provide all three different types of service. Carriers have been instructed to separate the different types of services being provided by using the appropriate billing codes as described in the filing manual. Starting with 1991 data, carriers were required to file facilities-based traffic separately from pure resale traffic. Starting with 1995 data, carriers were required to file facilities-resale traffic separately from facilities-based traffic. Facilities-based and facilities-resale traffic have been combined in Figure 1 as well as in many of the detailed traffic tables.

International points are grouped into ten regions for reporting purposes. The regions include all countries of the world as well as three maritime classifications -- the Atlantic, Pacific, and other oceans. In some cases, international points have been grouped outside the geographic region for reporting purposes. For example, the Azores and Madeira Islands are included with Portugal. Any data reported to these points are included with Portugal traffic and are summarized with Western Europe traffic in the tables. (See International Points Used for FCC Reporting Purposes, April 1994.)

Carriers must report switched traffic in three categories. U.S. billed traffic is all traffic billed by U.S. carriers, and includes traffic billed by U.S. carriers which originates from U.S. carrier "country-beyond" services. Country-beyond services are U.S. carrier offerings that allow customers in foreign locations to route calls through U.S. carriers to reach any world point. These services rely on alternative billing arrangements, such as credit cards, and enable the customer in a foreign point to be served by a U.S. carrier rather than by a foreign carrier. In their public filings, carriers include country-beyond traffic with other U.S. billed traffic. In proprietary filings, carriers separate country-beyond traffic from other U.S. billed traffic. Foreign billed traffic is all traffic billed by a foreign or correspondent carrier which originates or terminates in the United States. Transiting traffic is traffic that is billed by a foreign or correspondent carrier which originates from an international point, is routed through the U.S., and terminates at an international point. Transiting traffic is reported for the country in which the service is billed. As explained below, reorigination

traffic is included with U.S. billed traffic rather than with transiting traffic even though it is billed by a foreign carrier, originates from an international point and terminates in an international point.

Section 43.61 traffic totals do not represent the levels of traffic that actually originate and terminate in the United States. Through 1990, carriers were instructed to report originating, terminating, and transiting traffic. For settlement purposes, however, the term "originating" meant traffic billed by the carrier. Thus, collect calls placed from the United States are reported as foreign billed calls, not as originating or U.S. billed calls. Similarly, collect calls placed to the United States are reported as U.S. billed calls, not as terminating or foreign billed calls. The U.S. billed traffic totals also do not precisely match the amount of traffic originating in the United States because of reorigination traffic.

Carriers report both traffic and revenue information for the communications services that they provide. Figure 3 summarizes the traffic measures required for each type of service.

Figure 3

Service	Traffic measures
Message Telephone Service	Messages* and minutes**
Message Telegraph Service	Messages* and words
Teleprinter Exchange Service (Telex)	Messages* and minutes
Private Line Services	Circuits at year-end, 64-kilobit equivalent circuits at year-end, revenue for the entire year
Miscellaneous Services	Kilo segments, hours, minutes, sessions, depending on service ***
<p>* Carriers are not required to file message counts for transiting traffic.</p> <p>** Many carriers have requested proprietary treatment for country-by-country transiting minutes. Both U.S. and foreign carriers compete for transiting traffic. The minutes data would allow competitors to estimate contract revenues per minute. The published tables contain region and world totals for transiting minutes.</p> <p>*** Prior to filing 1995 data, carriers selected their own traffic measures for miscellaneous services.</p>	

For private line services, carriers report the number of actual circuits leased to customers at year-end. Beginning with their 1995 international traffic data, carriers also report these circuits in terms of voice-equivalent circuits. For lower bandwidths, this means reporting the number of 64-kilobit-per-second channels that would equal the actual circuits. An 18 megahertz video channel, however, should be reported as 240 voice-equivalent channels, a 24-megahertz video channel should be reported as 288 voice-equivalent channels, and a 36-megahertz video channel should be reported as 630 voice-equivalent channels. This is the same conversion factor used by carriers in preparing circuit data reports filed pursuant to Section 43.82 of the Commission's rules, and to calculate regulatory fees. Voice-equivalent circuits are denoted "64 K" in the attached tables.

Facilities-based U.S. and foreign carriers (often called post, telephone and telegraph administrations or PTTs) jointly provide most international services. This is not always apparent to the customer but is reflected in some of the traffic and revenue data that are filed. For switched services, one carrier collects from customers and then compensates its foreign partners through the settlement process. Compensation is based on minutes of calling and on accounting rates specified in settlement agreements. The number of minutes used for settlement purposes is generally based on the number of conversation minutes. Facilities-resale carriers may have settlement-like arrangements under which they compensate PTTs for traffic that originates or terminates at foreign points.

For facilities-based and facilities-resale services, carriers must report the minutes used for settlement purposes. Prior to 1991, carriers were directed to report billed minutes, rather than settlement minutes. Billed minutes tend to be greater than settlement minutes because some carriers bill in 30 second or whole minute increments. Pure resale carriers continue to file billed minutes, since they do not participate in the settlement process, and may not have access to settlement minutes data.

For U.S. billed switched services, the tables show the amount that the customers are billed for service, the corresponding settlement amount that the carrier owes to its foreign partner, and the amount of revenue that it retains. Carriers are instructed to report the actual amount of revenues that they bill for service, net of discounts. Many carriers offer discount plans that entitle customers to discounts based on the customer's total bill. Some carriers do not recalculate discounted bill amounts on a call-by-call basis. These carriers collect country-by-country revenue totals based on non-discounted rates and must estimate the amount of discounts for each country.

For foreign billed traffic, the tables show the settlement amounts owed to U.S. carriers by foreign carriers. These amounts are referred to as "Receipts from Foreign Carriers" in the tables. In the case of transiting traffic, the U.S. carrier often receives a settlement amount, part of which is owed to a third carrier. Thus, the tables show receipts, payouts and a net amount for transiting traffic. Figure 4 shows the revenue relationships.

Figure 4

U.S. Billed Traffic	$\begin{aligned} & \text{Billed revenues} \\ & - \text{Settlements owed to foreign carriers} \\ & = \text{U.S. carrier retained revenue} \end{aligned}$
Foreign Billed Traffic	$\begin{aligned} & \text{Settlements due from foreign carriers} \\ & = \text{U.S. carrier retained revenue} \end{aligned}$
Transiting Traffic	$\begin{aligned} & \text{Settlements due from foreign carriers} \\ & - \text{Settlements owed to foreign carriers} \\ & = \text{U.S. carrier retained revenue} \end{aligned}$
Total	$\begin{aligned} & \text{Retained revenue for U.S. billed} \\ & + \text{Retained revenue from foreign billed} \\ & + \text{Retained revenue from transiting} \\ & = \text{Total U.S. carrier retained revenue} \end{aligned}$

Financial arrangements for private line services are different than for public switched services. The U.S. carrier provides the circuit to a theoretical mid-point, and the foreign partner provides the remainder of the circuit. In some cases, each carrier bills for its half of the service; in other cases, one carrier acts as the collection agent. Unlike message telephone service, where the rate covers the whole cost of the call, the U.S. carrier's private line rate covers only the half-circuit to the theoretical mid-point. The filing manual states that U.S. carriers must report the amount of private line revenue that they record for their half of the service, regardless of who actually collects the revenue. The U.S. carriers should not report revenue that they collect on behalf of the foreign carriers or amounts that they bill for services that they provide in foreign countries.

U.S. carriers report the number of private line circuits actually leased at year-end. As with switched services, U.S. carriers file separate data for facilities-based and facilities-resale private line services.

Carriers are required to file separate data for each U.S. point that they serve. Alaska and Hawaii are considered distinct U.S. points for this purpose. Figure 5 identifies the U.S. points used for reporting purposes. Carriers serving larger U.S. points are required to file detailed country-by-country data on computer disk. Carriers serving smaller U.S. points may file world totals in lieu

of country-by-country data. In a few instances, carriers have obtained waivers so that they can consolidate data for Hawaii and the conterminous United States.

Figure 5

Reporting Requirements for Facilities-Based Service	
Larger U.S. points for which carriers file country-by-country data	Smaller U.S. points for which carriers file world total data
<u>Domestic U.S. points</u> Alaska Conterminous U.S.* Hawaii Puerto Rico	American Samoa Baker Island Howland Island Jarvis Island Johnston Atoll Kingman Reef Midway Atoll Navassa Island Northern Mariana Islands Palmyra Atoll Wake Island
<u>Other populous U.S. points</u> Guam U.S. Virgin Islands	
* The conterminous U.S. consists of the 48 contiguous states and the District of Columbia.	

The treatment of traffic between U.S. points causes some confusion. Alaska, Hawaii, the conterminous U.S. and Puerto Rico are defined as domestic U.S. points. Calls between these points are considered domestic and therefore are not reported.

Figure 5 shows which U.S. points are classified as domestic and which are classified as other. Calls between domestic U.S. points and other U.S. points are defined as international and are reported as such. For example, a directly dialed call originating in Guam and terminating in Hawaii is reported by the carrier serving Guam as U.S. billed traffic to Hawaii. The carrier serving Hawaii reports this same call as a foreign billed call from Guam. Thus, our aggregate call statistics double-counts both the call and the associated minutes. Table A1 shows that U.S. carriers reported almost 5.5 billion calls between the U.S. and international points. Of these calls, 27 million (less than 1%) were reported for traffic between U.S. points. Thus, the double-counting is small when compared to the overall number of calls.

As noted above, carriers now separate their facilities-based traffic from their facilities-resale traffic. Table A58 shows facilities-based telephone data for all carriers. Table A59 shows facilities-resale telephone data for all carriers.

Carriers also separate "country-beyond" traffic from other types of U.S. billed traffic. Country-beyond services, such as AT&T's World Direct service, allow the customer to place a call through a U.S. carrier's facilities even though the customer is at a foreign point. Carriers file details on their country-beyond traffic on a confidential basis. The tables for individual carriers summarize all country-by-country data. Table A60 shows both facilities-based and facilities-resale telephone data, but excludes country-beyond and reorigination¹ traffic. Table A61 shows country-by-country telephone data for country-beyond and reorigination traffic.

A very small percentage of switched traffic was carried on facilities-resale circuits in 1996. Carriers reported \$75 million of U.S. billed facilities-resale traffic compared with \$14.1 billion of U.S. billed facilities-based traffic. While facilities-resale is authorized to relatively few countries, carriers reported facilities-resale traffic to a great number of countries in 1996. According to carriers, this arises where the first leg of the international call is carried over a resold private line to an authorized country. Thereafter, the call is carried over circuits of the foreign carrier. The foreign carrier treats the call as if it had originated in that carrier's service area and terminates the call with a carrier in the destination country under the traditional settlement process that exists between those two countries. This type of traffic is sometimes termed 'reorigination', 'refiled' or 'hubbed' traffic.

Country-beyond and reorigination traffic represented a greater percentage of total telephone traffic in 1996 than in 1995. In 1996, carriers reported that these types of traffic represented approximately 6% of U.S. billed minutes, 6% of settlement payments, 11% of U.S. billed revenue, and 13% of net retained revenue. Note that these calls frequently have two international legs. Carriers report minutes and settlement payouts for both legs of the call, but report revenues only for the country of origin. Therefore, revenue-per-minute and other ratios may not be meaningful on a country-by-country basis.

Section B includes country-by-country circuit counts and revenues for private line services for all U.S. points and for domestic U.S. points. Data for miscellaneous services for all U.S. points are in Section C. Data for pure resale traffic for all U.S. points are in Section D.

Presentation of Data

Figure 6 lists the carriers whose data are presented in the attached tables. Figure 7 summarizes the billed revenue data contained in the tables, and Figure 8 summarizes the net revenue

¹ Reorigination traffic originates from a foreign carrier, transits a U.S. carrier's facilities and terminates in a foreign point. Unlike normal transiting arrangements, reorigination is used where the originating and terminating carriers do not have an accounting rate agreement. Reorigination allows the foreign carrier to take advantage of the U.S. carrier's accounting rate agreement with the carrier in the terminating country. The U.S. carrier treats reorigination traffic like U.S. billed traffic when it settles with the carrier in the country of termination.

data contained in the tables -- that is, billed revenue net of settlement payments. Figure 9 is similar to Figure 7, but shows amounts for facilities-based service only. Carriers that provide facilities-resale service but not facilities-based service are shown in the Figure 9 with no revenue. Figure 10 is similar to Figure 7, but shows amounts for facilities-resale service only. Carriers that provide facilities-based but not facilities-resale service are shown in Figure 10 with no revenue. Figure 11 summarizes international message telephone service for the four largest carriers (AT&T, MCI, Sprint and LDDS WorldCom) for 1991 through 1996.

The Section 43.61 data have been summarized for all reporting carriers and for all U.S. points. Some tables show totals for all carriers serving individual U.S. points. Other tables show totals for all data filed by individual carriers. Data have been consolidated where a holding company owns more than one carrier. For example, the data MCI reported for its subsidiary, Western Union International, Inc., have been consolidated and included with other MCI data.

The country-by-country data are presented by region of the world. The foreign points are listed alphabetically in each region, followed by U.S. points listed alphabetically. As noted above, the data for U.S. points shown in the regional breakdowns represent traffic between those points and other U.S. points, as reported by carriers that file country-by-country data. Carriers serving smaller U.S. points file world totals for international traffic. Those totals for all international points are shown separately, following the regional data. Thus, some smaller U.S. points appear twice in the tables. Those totals for smaller U.S. points are included in the total traffic reported for foreign points even though some of that traffic was carried between U.S. points.

U.S. carriers are required to file message counts for switched services that originate or terminate at a U.S. point. They are not required to provide message counts for traffic that transits U.S. points. Carriers have ready access to message counts for traffic that they bill, but sometimes have difficulty obtaining message counts for traffic billed by foreign telephone companies. As noted in Figure 3, transiting minutes are not being published on a country-by-country basis. Region totals are provided for those regions where transiting traffic is carried from more than one country.

The table titles indicate whether the tables contain facilities-based, facilities-resale or both types of traffic. The titles also list the billing types covered by the tables. The following definitions are based on the filing manual and Sprint and AT&T waivers.²

- Bill type 1 Facilities-based U.S. billed switched traffic that either originates in the U.S. point served or terminates in the U.S. point served and is billed collect or to a toll free number; facilities-based private line circuits.
- Bill type 2 Facilities-based switched traffic billed by foreign carriers that either terminates in the U.S. point served or terminates in a foreign point but is billed collect, billed to a foreign toll-free number, or is billed to a foreign carrier calling card or other arrangement.
- Bill type 3 Facilities-based switched traffic that originates and terminates outside the U.S. point served and is billed by a foreign carrier.
- Bill type 4 Facilities-based U.S. billed switched traffic that originates outside the United States and is billed to a calling card or other U.S. carrier billing arrangement. This category includes country-direct service and is sometimes referred to as "country beyond".
- Bill type 5 Facilities-based switched reorigination traffic handled by a U.S. carrier.
- Bill type 11 Facilities-resale U.S. billed switched traffic that either originates in the U.S. point served or terminates in the U.S. point served and is billed collect or to a toll free number; facilities-resale private line circuits.
- Bill type 12 Facilities-resale switched traffic billed by foreign carriers that either terminates in the U.S. point served or terminates in a foreign point but is billed collect, billed to a foreign toll-free number, or is billed to a foreign carrier calling card or other arrangement.

² Sprint Communications Company L.P. and AT&T Corp. received waivers to file reorigination traffic using two different billing codes. Reorigination traffic does not conform to any existing categories of switched traffic set forth in the filing manual. In its public filing, the carriers used Billing Code 1 to report reorigination traffic as U.S. billed traffic by country of destination. In separate, confidential filings, the carriers removed the reorigination traffic from Billing Code 1 totals and separately identified that traffic by country of destination using Billing Code 5. The data fields included messages, minutes, billed revenues, payouts, and retained revenues. These data were included with billing codes 4 and 14 in the tables in section A. Letters from Peyton L. Wynns, Chief, Industry Analysis Division, to Marybeth M. Banks, Director, Sprint, Federal Regulatory Affairs, July 3, 1997 and Diane C. Borman, Manager, AT&T, July 25, 1997.

- Bill type 13 Facilities-resale switched traffic that originates and terminates outside the U.S. point served and is billed by a foreign carrier.
- Bill type 14 Facilities-resale U.S. billed switched traffic that originates outside the United States and is billed to a calling card or other U.S. carrier billing arrangement. This category includes country-direct service.
- Bill type 15 Reserved.

The statistical tables in Appendix A summarize international message telephone traffic.

The total traffic in Table A1 is divided as follows:

- Table A58 Facilities-Based traffic only
- Table A59 Facilities-Resale traffic only

Additionally, the total traffic in Table A1 is divided as follows:

- Table A60 All traffic other than "country beyond" and reorigination traffic.
- Table A61 "Country beyond" and reorigination traffic.

Addendum to Figure 6:

Carriers that did not provide the Commission with an annual Section 43.61 international telecommunications traffic report for calendar year 1996:

1. Advanced TeleMedia International did not provide international message telephone service in calendar year 1996.
2. Alascom was sold to AT&T in August of 1995.
3. Amer-I-Net Services Corp. had no international traffic to report for calendar year 1996.
4. Americas Telecom, Inc. had no international traffic to report for calendar year 1996.
5. BellSouth Long Distance (BSLD), in calendar year 1996, had not yet commenced international service operations.
6. Communications Services of America sold their assets to MIDCOM Communications Inc. in August, 1995.
7. Domtel Communications Inc., a subsidiary of TRICOM, S.A., was authorized in 1995 to provide international operations, however, did not initiate traffic until 1997.
8. GST Telecommunications, Inc.:
 - GST Net, Inc. - A facilities-based and resale carrier had no international traffic to report for calendar year 1996.
 - GST Telecom, Inc - A facilities based and resale carrier had no international traffic to report for calendar year 1996.
9. In-Flight Phone Corporation filed bankruptcy and is no longer operational.
10. Linknet International, Inc. had no international traffic to report for calendar year 1996.
11. MagnaCom Corporation dissolved.
12. One-2-One Communications, Inc. filed bankruptcy.
13. Operator Service Company had no international traffic to report for calendar year 1996.
14. Pennsylvania Alternative Communications, Inc. calendar year 1996 international traffic report is for the reporting period 1/1/96-5/31/96. Company no longer operates as an international pure reseller.
15. Shared Technologies Farichild is currently a private carrier and not subject to Section 43.61.
16. Southern Satellite Systems., LMC SatCom, Inc. is currently providing international service as a non-common carrier (video to Canada), and therefore asserts that it's not subject to Section 43.61 of the C.F.R.
17. Southwestern Bell Communications Services Inc. had no international traffic to report for calendar year 1996.
18. Telstra, Inc. ("TI") had no international traffic or revenue to report for calendar year 1996.
19. The Phone Company international circuits were idle during calendar year 1996. The Manual for Filing Section 43.61 Data, June 1995, requires carriers to report data for activated circuits only.
20. U.S. West Long Distance, Inc. did not provide international service during calendar year 1996.

The following companies' Section 43.61 international telecommunications traffic reports were combined in calendar year 1996 because of mergers, acquisitions, and changes in corporate structure:

21. Allnet merged with Frontier Corporation.
22. AMC Cellular Associates was sold to Horizon Cellular Co. in June, 1995.
23. American Telegram Corporation, in 1996, ceased to provide international miscellaneous pure resale services. Nevadacom commenced service.
24. EMI Communications Corporation, as of June 1996, was acquired by Intermedia Communications Inc.
25. Enhanced TeleManagement merged with Frontier Corporation.
26. Keystone Telecommunications, Inc. merged with Chadwick Telecommunications Corporation in October 1996.
27. LCI International Telemanagement Corp. and LCI International Telecom Corp. merged in 1996.
28. Long Distance Wholesale Club is owned by Telco Communications Group.
29. MFS Communications, Inc. is included in 1996 with LDDS WorldCom.
30. North American Telecommunications Corporation was sold to GlobalCom International in August, 1997.
31. Union Pacific Railroad merged with Southern Pacific Railroad. The company no longer provides international pure resale.
32. The following United Telephone companies have been dissolved:
 - Carolina Telephone Long Distance, Inc. stopped providing services to consumers in North Carolina in early 1997.
 - United Telephone Long Distance, Inc. - (Florida) stopped providing services to consumers in Florida in early 1997.
 - United Telephone Long Distance, Inc. - (Indiana) stopped providing services to consumers in Indiana in early 1997.
 - United Telephone Long Distance, Inc. - (Ohio) stopped providing services to consumers in Ohio in early 1997.
 - United Telephone Long Distance, Inc. - (Pennsylvania) stopped providing services to consumers in Pennsylvania in early 1997.
 - United Telephone Long Distance, Inc. - (Southeast) stopped providing services to consumers in S. Carolina, Tennessee and Virginia in early 1997.
 - United Telephone Long Distance, Inc. - (Midwest) (Teleservices) stopped providing services to consumers in Kansas, Minnesota, Missouri, Nebraska, and Texas in early 1997.

The following companies changed names:

33. Concord Telephone Long Distance Company filed their 1996 Section 43.61 report as CTC Long Distance Services, Inc.
34. Consolidated Network Inc. changed its name to Consolidated Communications Telecom Services, Inc.
35. Custom Telecom filed as Advanced Management Services Inc. (A.M.S.)/Custom Telecom.
36. Domtel Communications Inc., changed its name to TRICOM USA.
37. Eastern TeleLogic Corporation became a subsidiary of Teleport Communications Group. The company changed its name to TCG Delaware Valley Inc.
38. Fairchild Communications is now called Shared Technologies Fairchild Inc.
39. Frontier:
 - Frontier Communications North Central Region, Inc.; formerly American Sharecom, Inc.
 - Frontier Communications of the West, Inc.; formerly West Coast Telecommunications, Inc.
 - Frontier Telemanagement Inc.; formerly Frontier Communications of the Great Lakes, Inc. which was formerly Schneider Communications, Inc.
40. Hughes Communications Carrier Services Inc., is now known as PanAmSat Communications Carriers Services, Inc.
41. Indiantown Telephone Long Distance Company, Inc., in calendar year 1995 reported as Arrow Communications, Inc. d/b/a Indiantown Telephone Long Distance Company.
42. International Telecommunications Corporation changed its name to RSL COM U.S.A., Inc.
43. One Star Long Distance, Inc. was formerly known as Telstar Communications, Inc.
44. Strategic Alliances was sold to London Telecom Network, Corp., in June 1997. The company currently operates as Strategic Alliances d/b/a London Telecom Network Corp.
45. United Telecom of America, Inc. changed its name to USN Communications Long Distance.

Addendum to Figure 6 -- Continued

The following companies filed an annual Section 43.61 for the calendar year 1995, however, have not filed annual 1996 data and their status at time of publication is unknown.

Adir International Communications Services Corp. Ltd.
Caribbean Telephone & Telegraph, Inc.
Chernow Communications, Inc.
Cherokee Communications
Digital Network Services, Inc. ("DNSI")
E-Tel Incorporated
Genesis Communications, Int'l., Inc.
Interlink Telecommunications, Inc.
Kardan Communications Lines, Ltd.
LD Corporation d/b/a Basic Business Telephone
Miami International Gateway
National Accounts, Inc.
Pacific General Telecom, Inc. d/b/a Westar Network
Phoenix Network, Inc.
Polar Communications Corp.
QCC, Incorporated
Scherers Communications Group, Inc.
World Technical Services dba Worldwide Telephone Co.
World Telecom Group (AmeriVox)
WPM Inc.

Customer Response

Publication: 1996 Section 43.61 International Telecommunications Data, January 1998

You can help us provide the best possible information to the public by completing this form and returning it to the Industry Analysis Division of the FCC's Common Carrier Bureau.

1. Please check the category that best describes you:

- press
- current telecommunications carrier
- potential telecommunications carrier
- business customer evaluating vendors/service options
- consultant, law firm, lobbyist
- other business customer
- academic/student
- residential customer
- FCC employee
- other federal government employee
- state or local government employee
- Other (please specify) _____

2. Please rate the report: Excellent Good Satisfactory Poor No opinion
