## FCC RELEASES 1999 INTERNATIONAL TRAFFIC DATA

Washington, D.C. -- The Federal Communications Commission (FCC) has released a report prepared by the Common Carrier Bureau's Industry Analysis Division entitled *1999 International Telecommunications Data*.

Traffic between the United States and other countries is reported on a country-by-country basis for international message telephone and private line services. Starting with the 1998 traffic data, carriers were no longer required to file country-by-country data for international telex and telegraph services. Although international traffic data is reported in great detail, it is not reported until after U.S. and foreign carriers can reconcile their books. Carriers were required to file their 1999 data by July 31, 2000, and revisions by October 31, 2000.

### Statistical Findings

- In 1999, U.S. carriers reported that they billed \$14.5 billion for international telephone service, \$1 billion for private line services and \$0.1 billion for international telex, telegraph and other miscellaneous services.
- U.S. billed minutes of telephone service increased 16% since 1993. In 1999, U.S. carriers billed for 28.4 billion minutes of telephone service.
- Traditional settlement arrangements were used to handle 19.3 billion of the minutes while International Simple Resale (ISR/Hubbing) arrangements were used to handle the remaining 9.1 billion minutes.
- U.S. and foreign carriers compensate each other for completed calls. Because U.S. customers place more calls than do foreign customers, U.S. carriers make net payments to foreign carriers. The net amount was approximately \$4.6 billion in 1999, down from \$4.8 billion in 1998. U.S. carriers retained about \$11.2 billion of international revenues.

The report is available for reference in the FCC's Reference Information Center, Courtyard Level, 445 12th Street, SW, Washington, D.C. 20554. Copies may be purchased by calling International Transcription Services, Inc. (ITS) at (202) 857-3800. The report, including the spreadsheets containing the report's statistical tables and the figures, can be downloaded [file names: 4361-F99.ZIP or 4361-F99.PDF] from the **FCC-State Link** internet site at <http://www.fcc.gov/ccb/stats> on the World Wide Web.

# 1999 International Telecommunications Data

## December 2000

### Introduction

This is the Federal Communications Commission's (FCC's) December 2000 report regarding telecommunications service between the United States and international points during 1999. The data are compiled from reports submitted to the Federal Communications Commission by U.S. carriers pursuant to Section 43.61 of the Commission's rules. Section 43.61(a) directs carriers to file reports by July 31 that summarize international telecommunications service provided during the preceding calendar year. Carriers submit their final data for the preceding calendar year by October 31. The specific filing requirements are set forth in the *Manual for Filing Section 43.61 Data* (June 1995), which governs filings beginning with the 1995 international traffic data.

The Commission summarizes these filings in statistical reports. The statistical reports are used to monitor the development of competition in international telecommunications markets. These reports are also used by the United States to develop and support policies and positions in discussions with foreign governments and international standards organizations, and by the telecommunications industry for facilities planning.

### Statistical Findings

- In 1999, U.S. carriers reported that they billed \$14.5 billion for international telephone service, \$1 billion for private line services and \$0.1 billion for international telex, telegraph and other miscellaneous services.
- U.S. billed minutes of telephone service increased 16% since 1993. In 1999, U.S. carriers billed for 28.4 billion minutes of telephone service.
- Traditional settlement arrangements were used to handle 19.3 billion of the minutes while International Simple Resale (ISR/Hubbing) arrangements were used to handle the remaining 9.1 billion minutes.
- U.S. and foreign carriers compensate each other for completed calls. Because U.S. customers place more calls than do foreign customers, U.S. carriers make net payments to foreign carriers. The net amount was approximately \$4.6 billion in 1999, down from \$4.8 billion in 1998. U.S. carriers retained about \$11.2 billion of international revenues.

Figure 1 summarizes the traffic and revenue data reported by all U.S. facilities-based and facilities-resale carriers for 1999, but does not include pure resale service. These categories are explained below.

**Figure 1**

1999	Traffic*	Revenue billed by U.S. carriers (millions)	Net settlements With foreign carriers (millions)	Net retained revenue** (millions)
Message Telephone	39,128	\$14,505	(\$4,579)	\$9,925
Private Line	20,815	1,201	none	1,201
International Telex, Telegraph and Other Miscellaneous***	Not meaningful	89	(8)	81
Total	Not meaningful	\$15,795	(\$4,587)	\$11,207

\* The following traffic measures are shown in the table:

Message Telephone: Millions of minutes; Private Line: Number of Circuits

Message and word counts include both U.S. billed traffic and foreign billed traffic that terminates in the United States, but excludes most traffic that transits the United States.

\*\* Net U.S. carrier revenue equals billed revenue plus settlement amounts receivable from foreign carriers less amounts due to foreign carriers. See Figure 4, below. Detail may not match totals because of necessary roundings.

\*\*\* Starting with 1998 traffic data, carriers were no longer required to file country-by-country data for international telex and telegraph services.

## Reporting Requirements

Different levels of reporting are used for different categories of service. Figure 2 shows that carriers must report traffic and revenue on a country-by-country basis for the most commonly used communications services.

**Figure 2**

Service	Level of reporting for traffic and revenue for larger U.S. points *
<p><b>Traffic exchanged with foreign carriers under Traditional Settlement, International Simple Resale (ISR)/Hubbed, and Alternative Settlement Arrangements</b>            [Includes service provided over owned and resold circuits.]</p> <p>Switched Services            Message Telephone Service</p> <p>Miscellaneous and Other International Services            Message Telegraph Service            Occasional Use Television            Packet Switching            Switched Video            Teleprinter Exchange (Telex) Service</p>	<p>Country-by-country</p> <p>Region and world totals            Region and world totals            Region and world totals            Region and world totals            Region and world totals</p>
<p><b>Facilities-Based and Facilities-Resale Services</b></p> <p>Private Line Services</p>	<p>Country-by-country</p>
<p><b>Pure Resale Services</b> (resale of underlying carrier switched services)</p>	<p>World totals</p>
<p>* Carriers may file world totals in lieu of country-by-country data for the smaller U.S. points identified in Figure 5.</p>	

International services are provided either on a facilities-based, facilities-resale, or pure resale basis. For categorizing traffic, **facilities-based** refers to services provided using

international transmission facilities owned in whole or in part by the carrier providing the service. Facilities-based carriers use one or more international channels of communications to provide international telecommunications service. An international channel is a wire or radio link that facilitates electronic communications between a U.S. point and a point outside the domestic United States (see Figure 5, below). A facilities-based carrier either owns international channels, has an ownership interest in the channel such as an indefeasible right of use (IRU), or leases the channel from an entity that does not report those circuits in its own Section 43.61 reports. For categorizing traffic, **facilities-resale** refers to services provided by a carrier utilizing international circuits leased from other reporting international carriers. The determination as to whether international private line services are reported as facilities-based or facilities-resale generally is based on the first international link of a circuit. If the carrier has an ownership interest in that link, or leases it from an entity that does not report that link, then service provided over that circuit will be reported as facilities-based. Otherwise, the international private line service should be reported as facilities-resale.

Carriers provide **pure resale** services by switching traffic to (and reselling the switched services of) other underlying U.S. carriers. The underlying carriers control the circuit that carries the traffic to the international point, arrange for termination of the traffic, and report the traffic on a country-by-country basis in their own Section 43.61 reports. Switchless resellers generally operate on a pure resale basis. A switchless reseller, however, could lease international circuits and operate on an international simple resale (ISR) basis. Figure 2 shows that there are reduced reporting requirements for services provided on a pure resale basis. Some carriers report traffic carried over circuits that they own, over circuits that they lease from other carriers, as well as traffic that they handle on a pure resale basis (i.e., by reselling the switched services of underlying carriers). These carriers report detailed data for traffic that they carry over owned and resold circuits and summary data for switched traffic that they route to other U.S. carriers.

Starting with 1991 data filings, carriers were required to file facilities-based traffic separately from pure resale traffic. Facilities-resale traffic was not separated from facilities-based traffic. Beginning with the 1995 data filings, carriers were required to provide separate switched service and private line data for facilities-based and facilities resale services. At that time, a few carriers were offering ISR services, which at that time consisted of telephone services provided over resold private lines, i.e. on a facilities-resale basis. The Commission subsequently allowed carriers to provide ISR services using owned circuits as well as using resold circuits. Beginning with the 1997 data filings, carriers were required to separate switched services data by the financial arrangements made with carriers in foreign countries for terminating that traffic. Carriers now classify traffic as traditional settlement with proportionate return, international simple resale including traffic hubbed through an intermediate foreign country, and alternative settlement arrangements approved under Section 64.1002 of the Commission's rules. Carriers continue to separately report facilities-based and facilities-resale private line services.

Carriers must report switched traffic in three broad categories: U.S. billed; foreign billed; and transiting. **U.S. billed** traffic includes all traffic billed by U.S. carriers, and includes most calls that originate in the United States, calls that are placed collect or "caller toll free" to the United States, U.S. carrier "country-beyond" and "country-direct" calls, and U.S. carrier reorigination traffic.

**Country-direct** and **country-beyond services** are U.S. carrier offerings that allow customers in foreign locations to route calls through U.S. carrier facilities to reach the United States (country-direct) or any world point (country-beyond). Country-direct and country-beyond services rely on alternative billing arrangements, such as credit cards, and enable the customer at a foreign point to be served by a U.S. carrier rather than by a foreign carrier. Note that U.S. carriers or their affiliates may operate in foreign countries as foreign carriers. They do not report 43.61 traffic on calls that they carry from one foreign country to another unless they carry this traffic through a U.S. point.

**Reorigination traffic** is billed by a foreign carrier, transits a U.S. carrier's facilities and terminates in a foreign point. Unlike traditional transiting arrangements, reorigination traffic is not settled pursuant to an accounting rate agreement between the originating and terminating carriers. Reorigination allows the foreign carrier to take advantage of the U.S. carrier's accounting rate agreement with the carrier in the terminating country. The U.S. carrier treats reorigination traffic like U.S. billed traffic when it settles with the carrier in the country of termination and reports this traffic as U.S. billed traffic for filing purposes.

In their public filings, carriers include country-direct, country-beyond and reorigination traffic with other U.S. billed traffic. In proprietary filings, carriers separate these services from other U.S. billed traffic. Table A1 shows that carriers reported 28.4 billion minutes of U.S. billed traffic in 1999, for which they billed \$14.5 billion. Table A46 shows that 25 billion of these minutes, and \$12.3 billion of this revenue was for calls that originated in the United States or terminated collect or caller toll free in the United States. Table A47 shows that 1.9 billion of these minutes and \$1.8 billion of this revenue was for country-direct and country-beyond type services. Table A48 shows that 1.4 billion of these minutes and \$.4 billion of this revenue was for reorigination services billed to foreign carriers.

**Foreign billed** traffic is all traffic billed by a foreign or correspondent carrier and includes most calls that originate at foreign points as well as collect and caller toll free calls placed by U.S. customers to foreign points. Foreign billed calls do not necessarily originate in the country for which the traffic is reported. In some cases, foreign carriers reoriginate traffic for other foreign carriers. U.S. carriers may not know which calls originated in a country and which calls had originated in some third country and then been reoriginated by the foreign carrier that sent the calls to the United States.

**Transiting** traffic is traffic that originates from an international point, is billed by a foreign or correspondent carrier, is routed through the U.S., and terminates at an international point. Transiting traffic is reported for the country in which the service is

billed. Unlike reorigination traffic, transiting traffic is settled based on the settlement rate between the actual countries of origination and destination.

As explained above, carriers separately report international switched telephone, telegraph, telex, and miscellaneous services based on the financial termination arrangements. **Traditional Settlement** traffic is settled according to the Commission's International Settlements Policy (ISP). (See 47 C.F.R. Sections 43.51(e) & 64.1001.) The settlement is based on the accounting rate, which is part of a compensation agreement negotiated between a U.S. carrier and its foreign correspondent on a particular international route. The ISP requires nondiscriminatory accounting rates among U.S. carriers on a given route and that the U.S. carrier and its foreign correspondent share the accounting rate on a 50/50 basis. The ISP also requires that the U.S. carrier agree to accept no more than its proportionate share of return traffic from the foreign carrier. Table A44 shows that U.S. carriers reported 19.3 billion minutes of U.S. billed traditional settlement traffic in 1999, for which they billed \$10.9 billion.

**ISR/Hubbed** traffic is switched traffic that is routed and settled by the U.S. carrier outside the traditional settlement process and that may be carried over private lines that are interconnected to the public switched network on one or both ends of the private line. The Commission allows carriers to use ISR as a means to route U.S.-inbound traffic between the United States and a limited number of approved countries. In many cases, U.S. carriers exchange traffic with a carrier in an approved country and that carrier "hubs" the call, i.e. terminates the call in or from a third country under a traditional settlement agreement. See 47 C.F.R. Sec. 63.17. Table A45 shows that U.S. carriers reported 9.1 billion U.S. billed ISR/Hubbed minutes of traffic in 1999, for which they billed \$3.6 billion. U.S. carriers also reported receiving 5.4 billion foreign billed ISR/Hubbed minutes of traffic in 1999.

**Alternative Settlement traffic** is settled under Commission approved agreements that may deviate from the ISP pursuant to Section 64.1002 of the rules. See 47 C.F.R. Sec. 64.1002. These are also referred to as "flexible settlement" agreements.

Figure 3 summarizes the traffic measures required for each type of service.

**Figure 3**

Service	Traffic measures
Message Telephone Service	Messages* and minutes**
Message Telegraph Service	Messages* and words
Teleprinter Exchange (Telex) Service	Messages* and minutes
Private Line Services	Circuits at year-end, 64-kilobit equivalent circuits at year-end, revenue for the entire year
Miscellaneous Services	Kilo segments, hours, minutes, sessions, depending on service ***
<p>* Carriers are not required to file message counts for transiting traffic.</p> <p>** Many carriers have requested proprietary treatment for country-by-country transiting minutes. Both U.S. and foreign carriers compete for transiting traffic. The minutes data would allow competitors to estimate contract revenues per minute. The published tables contain region and world totals for transiting minutes.</p> <p>*** Prior to filing 1995 data, carriers selected their own traffic measures for miscellaneous services.</p>	

For private line services, carriers report the number of actual circuits leased to customers at year-end. Beginning with their 1995 international traffic data, carriers also report these circuits in terms of voice-equivalent circuits. For lower bandwidths, this means reporting the number of 64-kilobit-per-second channels that would equal the actual circuits. An 18 megahertz video channel, however, should be reported as 240 voice-equivalent channels, a 24-megahertz video channel should be reported as 288 voice-equivalent channels, and a 36-megahertz video channel should be reported as 630 voice-equivalent channels. This is the same conversion factor used by carriers in preparing circuit data reports filed pursuant to Section 43.82 of the Commission's rules, and to calculate regulatory fees. Voice-equivalent circuits are denoted "64 K" in the attached tables.

Facilities-based U.S. and foreign carriers (often called post, telephone and telegraph administrations or PTTs) jointly provide most international services. This is not always apparent to the customer but is reflected in some of the traffic and revenue data that are filed. For switched services, one carrier collects from customers and then compensates its foreign partners through the settlement process. Compensation is based on minutes of

calling and on accounting rates specified in settlement agreements. The number of minutes used for settlement purposes is generally based on the number of conversation minutes. Carriers providing international simple resale and hubbed services may have settlement-like arrangements under which they compensate PTTs for traffic that originates or terminates at foreign points.

For facilities-based and facilities-resale services, carriers must report the minutes used for settlement purposes. Prior to 1991, carriers were directed to report billed minutes, rather than settlement minutes. Billed minutes tend to be greater than settlement minutes because some carriers bill in 30 second or whole minute increments. Pure resale carriers continue to file billed minutes, since they do not participate in the settlement process, and may not have access to settlement minutes data.

Country-beyond calls have two international legs. Carriers are instructed to report both the originating and terminating legs of such calls. Consequently, approximately two minutes will be reported for each conversation minute. Each leg of the call may have settlement payments and these payments should be reported for the appropriate country. Carriers are instructed to report all of the revenue by the country in which the call originates. Country-direct and country-beyond traffic cannot be separately identified from a carrier's publicly filed data. Similarly, an individual carrier's public data include reoriginated traffic. This traffic is included for the country in which the call terminates.

For U.S. billed switched services, the tables show the amount that the customers are billed for service, the corresponding settlement amount that the carrier owes to its foreign partner, and the amount of revenue that it retains. Carriers are instructed to report the actual amount of revenues that they bill for service, net of discounts. Many carriers offer discount plans that entitle customers to discounts based on the customer's total bill. Some carriers do not recalculate discounted bill amounts on a call-by-call basis. These carriers collect country-by-country revenue totals based on non-discounted rates and must estimate the amount of discounts for each country.

For foreign billed traffic, the tables show the settlement amounts owed to U.S. carriers by foreign carriers. These amounts are referred to as "Receipts from Foreign Carriers" in the tables. In the case of transiting traffic, the U.S. carrier often receives a transit fee for itself, and a settlement amount which is owed to the terminating carrier. Thus, the tables show receipts, payouts and a net amount for transiting traffic. Figure 4 shows the revenue relationships.

**Figure 4**

U.S. Billed Traffic	Billed revenues - <u>Settlements owed to foreign carriers</u> = U.S. carrier retained revenue
Foreign Billed Traffic	Settlements due from foreign carriers = U.S. carrier retained revenue
Transiting Traffic	Transit fee and settlements due from foreign carriers - <u>Settlements owed to foreign carriers</u> = U.S. carrier retained revenue
Total	Retained revenue for U.S. billed + Retained revenue from foreign billed + <u>Retained revenue from transiting</u> = Total U.S. carrier retained revenue

U.S. carriers report the number of private line circuits actually leased at year-end. Financial arrangements for private line services are different than for public switched services. The U.S. carrier provides the circuit to a theoretical mid-point, and the foreign partner provides the remainder of the circuit. In some cases, each carrier bills for its half of the service; in other cases, one carrier acts as the collection agent. Unlike message telephone service, where the rate covers the whole cost of the call, the U.S. carrier's private line rate covers only the half-circuit to the theoretical mid-point. The filing manual states that U.S. carriers must report the amount of private line revenue that they record for their half of the service, regardless of who actually collects the revenue. U.S. carriers should not report revenue that they collect on behalf of the foreign carriers or amounts that they bill for services that they provide in foreign countries.

International points are grouped into ten regions for reporting purposes. The regions include all countries of the world as well as three maritime classifications -- the Atlantic, Pacific, and other oceans. In some cases, international points have been grouped outside the geographic region for reporting purposes. For example, the Azores and Madeira Islands are included with Portugal. Any data reported to these points are included with Portugal traffic and are summarized with Western Europe traffic in the tables. (See *International Points Used for FCC Reporting Purposes*, April 1994.)

Carriers are required to file separate data for each U.S. point that they serve. Alaska and Hawaii, for example, are considered distinct U.S. points for this purpose. Figure 5 identifies the U.S. points used for reporting purposes. Carriers serving larger U.S. points are required to file detailed country-by-country data on computer disk. Carriers serving smaller U.S. points may file world totals in lieu of country-by-country data. In a few instances, carriers have obtained waivers so that they can consolidate data for Hawaii and the conterminous United States.

**Figure 5**

Reporting Requirements for Facilities-Based Service	
Larger U.S. points for which carriers file country-by-country data	Smaller U.S. points for which carriers file world total data
<u>Domestic U.S. points</u> Alaska Conterminous U.S.* Hawaii Puerto Rico	American Samoa Baker Island Howland Island Jarvis Island Johnston Atoll Kingman Reef Midway Atoll Navassa Island Northern Mariana Islands Palmyra Atoll Wake Island
<u>Other U.S. points</u> Guam U.S. Virgin Islands	
* The conterminous United States consists of the 48 contiguous states and the District of Columbia.	

Figure 5 shows which U.S. points are classified as **domestic** and which are classified as **other**. Calls between domestic U.S. points are considered domestic and therefore are not reported. Calls between domestic U.S. points and other U.S. points are defined as international and are reported. For example, a directly dialed call originating in Guam and terminating in Hawaii is reported by the carrier serving Guam as U.S. billed traffic to Hawaii. The carrier serving Hawaii reports this same call as a foreign billed call from Guam. Thus, our aggregate call statistics double-count both the call and the associated minutes. Table A1 shows that U.S. carriers reported almost 7.9 billion calls between the U.S. and international points. Of these calls, 49 million (less than 1%) were reported for traffic between U.S. points. Thus, the double-counting is small when compared to the overall number of calls.

**Presentation of Data**

Figure 6 lists the carriers whose data are presented in the attached tables. Figure 7 summarizes the billed revenue data contained in the tables, and Figure 8 summarizes the net revenue data contained in the tables -- that is, billed revenue net of settlement payments. Figure 9 summarizes international message telephone service for the three largest carriers (AT&T, MCI WorldCom, Inc. and Sprint) for 1991 through 1999.

The Section 43.61 data have been summarized for all reporting carriers and for all U.S. points. Some tables show totals for all carriers serving individual U.S. points. Other tables show totals for all data filed by individual carriers. Data have been consolidated where a holding company owns more than one carrier. For example, the data GTE Corporation reported for its subsidiary, GTE Pacifica, have been consolidated and included with other GTE Corporation data.

The country-by-country data are presented by region of the world. The foreign points are listed alphabetically in each region, followed by U.S. points listed alphabetically. As noted above, the data for U.S. points shown in the regional breakdowns represent traffic between those points and other U.S. points, as reported by carriers that file country-by-country data. Carriers serving smaller U.S. points file world totals for international traffic. Those totals for all international points are shown separately, following the regional data. Thus, some smaller U.S. points appear twice in the tables. Those totals for smaller U.S. points are included in the total traffic reported for foreign points even though some of that traffic was carried between U.S. points.

U.S. carriers are required to file message counts for switched services that originate or terminate at a U.S. point. They are not required to provide message counts for traffic that transits U.S. points. Carriers have ready access to message counts for traffic that they bill, but sometimes have difficulty obtaining message counts for traffic billed by foreign telephone companies. As noted in Figure 3, transiting minutes are not being published on a country-by-country basis. Region totals are provided for those regions where transiting traffic is carried from more than one country.

Carriers file detailed traffic data using a record format contained in the filing manual. For switched services, each record contains a billing type code that signifies the traffic exchange method and whether the call was U.S. billed, foreign billed or transiting. For U.S. billed calls the billing type code indicates whether the data represents a) U.S. originated traffic and U.S. terminated collect and subscriber toll free traffic; b) country direct and country beyond traffic; or c) U.S. carrier reorigination traffic. For private services, the billing type code signifies whether the data contain facilities-based or facilities-resale circuits. The billing codes used for filing 1999 data are contained in the International Bureau's Public Notice DA 00-1526, *Annual Section 43.61(a) International Telecommunications Traffic Reports Due by July 31, 2000*, July 7, 2000.

The table titles use the billing types to indicate the type of data aggregated in a particular table. There are three groups of billing type codes for switched services. Billing types 1 through 6 are used for traditional settlement traffic. Billing types 11 through 16 are used for ISR/hubbed traffic. Billing types 21 through 26 are used for alternative settlement arrangement traffic. The billing types do not distinguish whether a switched service was provided over a carrier's owned facilities or over leased circuits.

The specific billing types allow the following breakdowns.

**Billing**

**Type(s)**

1, 11, 21	U.S. billed calls that originate in or terminate collect or subscriber toll free in the United States
2, 12, 22	foreign billed calls
3	traditional transiting calls (there is no billing type 13 or 23 because all traditional transiting calls are exchanged under traditional settlement arrangements)
4, 14, 24	U.S. billed country-direct and country-beyond calls
5, 15, 25	terminating leg of calls reoriginated by U.S. carriers and were terminated via facilities-based or facilities-resale circuits
35	terminating leg of calls reoriginated by U.S. carriers and were terminated via pure resale of another carrier's switched service
6, 16, 26	originating leg of calls reoriginated by U.S. carriers

There are only two billing type codes used for private line services. Billing type 1 signifies facilities-based circuits. Billing type 11 signifies facilities-resale circuits.

Traffic Arrangements: U.S. carriers use the following types of arrangements to govern the exchange of traffic between themselves and foreign carriers.

Traditional - Traffic settled according to the Commission's International Settlements Policy (ISP). The ISP requires that the U.S. carrier and its foreign correspondent share the accounting rate on a 50/50 basis. An accounting rate is part of a compensation agreement negotiated between a U.S. carrier and its foreign correspondent on a particular international route.

ISR/Hubbed - International Simple Resale "ISR" refers to the provision of switched services over private lines, interconnected to the public switched network, between the United States and Commission-approved countries. Switched hubbing refers to the provision of switched services over interconnected private lines between the U.S. and an ISR-approved country in order to originate or terminate U.S. traffic in a third country. See 47 CFR 63.17.

Alternative - Also referred to as "flexible" settlement arrangements. Carriers must report separately in their Section 43.61 traffic reports their U.S. and foreign billed traffic that was settled under an alternative settlement arrangement for which the carrier received Commission approval under Section 64.1002 of the rules. See 47 CFR 64.1002.

## Addendum to Figure 6

### The following carriers submitted reports with no international messages, minutes or billed revenues for calendar year 1999:

Access Integrated Networks d/b/a Teligee  
AICall, Inc.  
Arrival Communications, Inc.  
BellSouth BSE, Inc.  
Chesnee Long Distance, Inc.  
Communications Support Services, Inc.  
Connect International, Inc. (Connect.com)  
Discount Network Services, Inc.  
DSLnet Communications, LLC  
Empire Telecom Service, Inc.  
Farmers Long Distance, Inc.  
Global NAPS, Inc.  
ICall, Inc.  
IDS Long Distance, Inc.  
Infosat Communications, Inc.  
Interactive Services network, Inc.  
LightNetworks, Inc.  
LineDrive Communications, Inc.  
Maxcess, Inc.

Megsinet-CLEC, Inc.  
Palmetto Telephone Communications, LLC  
Pathway Com-Tel, Inc.  
PDS, Inc. d/b/a Phone Debit Systems, Inc.  
Plant Long Distance Company  
Planters Telephone Long Distance, Inc.  
PRTCommunications, LLC  
Pulaski White Rural Telephone Cooperative, Inc.  
RRV Enterprises, Inc. d/b/a Consumer Access  
SouthNet Telecomm Services, Inc.  
Stonehenge Telecom, Inc.  
Telecoin Guest Entertainment Co.  
Telecommunications Cooperative Network, Inc.  
TeleKey, LLC  
Telmatch Telecommunications, Inc.  
Teltrust Communications Services, Inc.  
Universal Access, Inc.  
Universal Telecom  
West Carolina Communications, LLC

### The following companies' Section 43.61(a) international telecommunications traffic reports were combined because of mergers, acquisitions, and changes in corporate structure:

1. Access Telecom discontinued international circuit facilities and became a pure reseller in 1999.
2. AirTouch Communications included with Verizon Wireless for calendar year 1999.
3. ATC Teleports, started by American Tower Corp., bought ICG Satellite Services and its subsidiary Maritime Telecommunications Network, Dallas Teleport, US ElectroDynamics, and Washington Int'l. Teleport.
4. BLD, Inc. sold its assets to Conversat Communications, LLC on December 21, 1999.
5. Cable & Wireless filed a letter with the Federal Communications Commission on 1/12/99 to decertify BPGI, Inc.
6. CenturyTel Area Long Lines, Inc. and CenturyTel Telecommunications, Inc. combined their long distance operations and formed CenturyTel Long Distance, Inc. in January, 1999. CenturyTel Telecommunications, Inc. continues to provide separate operator services. The above information is for only the international services provided by the companies for calendar year 1999.
7. Cincinnati Bell Wireless, LLC is a joint venture between Broadwing, Inc. and AT&T Wireless PCS, LLC.
8. Coastal Telephone merged with Eclipse Telecommunications on 5/24/99.
9. ComTel Computer Corp.'s assets were purchased on April 30, 1999 by Hotel Connect Management, Inc. ComTel Computer is no longer operating.
10. CruisePhone inc. filed Chapter 11 on November 30, 1999. On May 4, 2000 CruisePhone sold its assets and contracts to Maritime Telecommunications Network. As of May 31, 2000 CruisePhone ceased providing telecommunications services to customers.
11. Flat Rate Communications, Inc. and YYC Communications, Inc. operations were both folded into Viatel, Inc.
12. Global Crossing Telecommunications, Inc. was formerly Allnet Communication Services, Inc. Global Crossing's international traffic report includes the following Global Crossing companies:
  - Frontier Communications International Inc.
  - Frontier Communications of the West, Inc.
  - Global Crossing Telemangement, Inc. (formerly Frontier Telemangement Inc.)
13. Group Long Distance, Inc. discontinued providing international telecommunications services after calendar year 1998.
14. GST Action Telecom sold its long distance services to NTS Communications, Inc. in November, 1999. GST USA, Inc. aggregated its annual Section 43.61(a) international traffic reports for the following subsidiaries:
  - GST Call America, Inc.
  - GST Net, Inc.
  - GST Telecom, Inc.
  - TotalNet Communications, Inc.
15. GTE and Bell Atlantic's merger was completed 6/30/2000. GTE Telecom was completely separated from GTE. It is no longer a GTE subsidiary. The new name of the company is Genuity Telecom.
16. Infonet Broadband Services Corporation determined that, during calendar year 1999, it provided enhanced services which are not covered under Section 43.61(a) of the Commission's Rules. NEXTLINK Communications, Inc. consolidated its annual Section 43.61(a) international traffic report for the following subsidiaries:
  - ITC d/b/a NEXTLINK Affinity
  - NEXTLINK Arizona, Inc.
  - NEXTLINK California, Inc.
  - NEXTLINK Colorado, L.L.C.
  - NEXTLINK D.C., Inc.
  - NEXTLINK Delaware, Inc.
  - NEXTLINK Florida, Inc.
  - NEXTLINK Georgia, Inc.
  - NEXTLINK Illinois, Inc.
  - NEXTLINK Massachusetts, Inc.
  - NEXTLINK Michigan, Inc.
  - NEXTLINK Missouri, Inc.
  - NEXTLINK New Jersey, Inc.
  - NEXTLINK New York, Inc.
  - NEXTLINK Ohio, Inc.
  - NEXTLINK Pennsylvania, Inc.
  - NEXTLINK Pennsylvania Merger Company II, Inc.
  - NEXTLINK Tennessee, Inc.
  - NEXTLINK Utah, Inc.
  - NEXTLINK Virginia, L.L.C.
  - NEXTLINK Washington, Inc.
  - Telecommunications of Nevada, L.L.C. d/b/a NEXTLINK Nevada
17. Northern Communications, Inc., after 1998, discontinued its private line service which it leased to customers.
18. OGC Telecom Ltd. was merged into OGIT General, Inc. on February 25, 2000. OGIT General changed its name to Integra Telecom of Oregon, Inc.

## Addendum to Figure 6 -- Continued

19. Overseas Telecommunications, Inc.'s information was incorporated in WorldCom Inc. for calendar year 1999.
20. Telecom One, Inc. merged with Eclipse Telecommunications on 12/31/99.
21. Trinet, Inc. was acquired by ALLTEL Communications, Inc. in 1999 and is included in ALLTEL's annual report.
22. Qwest Communications Corporation purchased US West Communications, Inc. in June, 2000.
- Calendar year 1999 international information for US WEST Wireless, L.L.C. has been incorporated in the report for Qwest Wireless, LLC.
23. USN Communications Midwest, Inc. filed bankruptcy in calendar year 1999. Corecomm Newco, Inc. acquired its assets.
24. USX Consultants, Inc. discontinued service after calendar year 1998.
25. Winstar Midcom merged into WinStar Wireless, Inc.

### The following companies changed names:

26. Adelphia Business Solutions, Int'l., L.L.C. formerly known as Hyperion Communications Int'l., L.L.C.
27. ATU Long Distance, Inc. changed its name to ACS Long Distance, Inc.
28. Bell Atlantic Business Services was formerly known as Bell Atlantic Long Distance Company.
29. Broadwing Telecommunications, Inc was formerly known as Eclipse Telecommunications, Inc.  
Broadwing Communications Services, Inc. was formerly known as IXC Communications Services, Inc. which was formerly known as IXC Long Distance Inc. into Eclipse Telecommunications, Inc. The information reported for Broadwing Telecommunications is consolidated for Broadwing Telecommunications, Telecom One and Coastal Telephone.
30. Desita Communications Services Inc. was acquired by Viatel, Inc. in December, 1999. Since that time, the name has been changed to Viatel Services, Inc.
31. eGlobe, Inc. was formerly Executive TeleCard, Ltd.
32. FirsTel, Inc. changed its name to Ionex Communications North, Inc. The information for Ionex Telecommunications, Inc. includes its four subsidiaries; Ionex Communications, Inc, Ionex Communications North, Inc., Ionex Communications South Inc., and Telecom Resources, Inc..
33. Hotel Connect Management, Inc. was formerly known as ComTel Computer Corp.
34. LD Exchange.com filed their Section 43.61(a) as ACS Systems, Inc. in 1998.
35. Lightyear Communications, Inc. was formerly known as UniDial Communications, Inc.
36. Mountain West Long Distance changed its name to Emery Telcom Long Distance.
37. North Texas Communications Company, in April 2000, changed its name to Nortex Communications Company.
38. Primus Telecommunications, Inc's report includes data for all Primus-owned entities, including TresCom International, Inc. TresCom is a wholly-owned subsidiary of Primus and will no longer be filing a separate international traffic and revenue report.
39. Talk.com Holding Corp. was formerly known as Tel-Save, Inc.
40. Telco Holdings, Inc. changed its name to Teleglobe Business Solutions, Inc.
41. Unisource Carrier Services AG changed their name to Energis (Switzerland) AG.

### The following companies filed an annual Section 43.61(a) report for calendar year 1998. However they have not filed annual 1999 data and their status at time of publication is unknown.
