2003 International Telecommunications Data

January 2005

Introduction

This is the Federal Communications Commission's (FCC's) annual compilation regarding telecommunications service between the United States and international points during the year 2003. The last report was released March 31, 2004. The data are compiled from reports submitted to the FCC by U.S. carriers pursuant to Section 43.61 of the Commission's rules.¹ Section 43.61(a) directs carriers to file reports by July 31 that summarize international telecommunications service provided during the preceding calendar year. Carriers submit their final data for the preceding calendar year by October 31. The specific filing requirements are set forth in the *Manual for Filing Section 43.61 Data* (June 1995).

The Commission summarizes these filings in statistical reports. The Commission uses these statistical reports to monitor competition in international telecommunications markets. The U.S. government also uses these reports to develop and support policies and positions in discussions with foreign governments and international standards organizations. The telecommunications industry uses these reports for facilities planning.

Statistical Findings

- U.S. billed minutes increased 18.6% from 36.0 billion in 2002 to 42.7 billion in 2003.
- In 2003, fifty-seven U.S. facilities-based and facilities-resale (see definitions on page 3) carriers reported that they billed \$8.4 billion for international telephone service, \$620 million for private line services and \$156 million for international other miscellaneous services, compared to \$9.4 billion, \$988 million, and \$113 million, respectively, in 2002.
- An additional eighteen carriers requesting confidential treatment reported that they billed \$550 million in the above categories in 2003.
- Settlement payments and retained revenues. U.S. and foreign carriers compensate each other for completed calls. U.S. customers place more calls than do foreign customers, therefore, U.S. carriers make net payments to foreign carriers. U.S. carriers net settlement payments and retained international revenues decreased.
- Pure resale providers resell the services of underlying U.S. facilities-based and facilities-resale carriers. The number of reporting carriers grew from 710 in 2002 to 770 in 2003, including twenty-two pure resale providers requesting confidential treatment. Pure resale minutes grew from 30.4 billion in 2002 to 34.5 billion in 2003. Billed revenue increased from \$5.1 billion in 2002 to \$5.4 billion in 2003.

³ 47 C.F.R. § 43.61. The Commission, in April 2004, proposed modifications to the Sections 43.61 and 43.82 international data collection rules. See *Reporting Requirements for U.S. Providers of International Telecommunications Services; Amendment of Part 43 of the Commission's Rules*, IB Docket 04-112, Notice of Proposed Rulemaking, 19 FCC Rcd 6460 (2004)

Figure 1 summarizes the traffic and revenue data reported by all U.S. facilities-based and facilities-resale carriers for 2003, but does not include pure resale service. These categories are explained below.

Figure 1

2003 Data	Traffic*	Revenues Billed by U.S. Carriers (millions)	Net Settlements with Foreign Carriers (millions)	Net Retained Revenues** (millions)
Message Telephone	58,338	\$8,402	(\$2,777)	\$5,625
Private Line	14,948	620	None	620
International Other Miscellaneous***	Not meaningful	156	(11)	145
Total****	Not meaningful	\$9,728	(\$3,169)	\$6,559

* The following traffic measures are shown in the table:
For message telephone, millions of minutes; for private line, number of circuits.

Traffic measures for international message telephone and other miscellaneous service include both U.S. billed traffic and foreign billed traffic that terminates in the United States, but excludes most traffic that transits the United States.

** Net U.S. carrier retained revenues equal billed revenues plus settlement amounts receivable from foreign carriers less amounts due to foreign carriers. See Figure 4, below. Detail may not match totals because of necessary roundings.

*** In 2003, recognizing the de minimis nature of associated revenues and burden to file, the Commission granted MCI's request not to report its miscellaneous other international telex, telegraph, and packet switching services. The Commission, however, did require the carrier to retain the data for telex, telegraph, and packet switching services for two years from the date of the Commission's response to the carrier's waiver request (i.e., until August 4, 2006). Other carriers that previously reported providing telex or telegraph service explained that they had either sold or discontinued their international telex and telegraph operations. As a result, there are no data reported on a facilities-based/facilities-resale basis for miscellaneous other international telex and telegraph services in 2003. Pure resale miscellaneous other international services are located in Section D (Pure Resale Services Page 19).

**** Total above includes \$550 million billed revenues, \$382 million net settlements, and \$169 million net revenues for eighteen facilities-based and facilities-resale carriers requesting confidential treatment in the above categories.

Definitions

International services are provided either on a facilities-based, facilities-resale, or pure resale basis. For categorizing traffic, **facilities-based** refers to services provided using international transmission facilities owned in whole or in part by the carrier providing the service. Facilities-based carriers use one or more international channels of communication to provide international telecommunications service. An international channel is a wire or radio link that facilitates electronic communications between a U.S. point and a point outside the domestic United States (see Figure 5, below). A facilities-based carrier either owns international channels, has an ownership interest in the channel such as an indefeasible right of use (IRU), or leases the channel from an entity that does not report those circuits in its own Section 43.61 reports. For categorizing traffic, **facilities-resale** refers to services provided by a carrier utilizing international circuits leased from other reporting international carriers. The determination as to whether international private line services are reported as facilities-based or facilities-resale generally is based on the first international link of a circuit. If the carrier has an ownership interest in that link, or leases it from an entity that does not report that link, then service provided over that circuit will be reported as facilities-based. Otherwise, the international private line service should be reported as facilities-resale.

Carriers provide **pure resale** services by switching traffic to (and reselling the switched services of) underlying U.S. carriers. The underlying carriers control the circuit that carries the traffic to the international point, arrange for termination of the traffic, and report the traffic on a country-by-country basis in their own Section 43.61 reports. Figure 2 shows that there are reduced reporting requirements for services provided on a pure resale basis. Some carriers report traffic carried over circuits that they own and those that they lease from other carriers, as well as traffic that they handle on a pure resale basis (i.e., by reselling the switched services of underlying carriers). These carriers report detailed data for traffic that they carry over owned and resold circuits and summary data for switched traffic that they route to other U.S. carriers. Section D of this report has information on pure resale services. In 2003, 770 carriers reported that they provided international message telephone service on a pure resale basis. These pure resale providers billed customers \$5.4 billion for 34.5 billion minutes. Twenty of these pure resale providers also reported international facilities-based and facilities-resale services.

Starting with the 1991 data filings, the Commission required carriers to file facilities-based traffic separately from pure resale traffic. Facilities-resale traffic was not separated from facilities-based traffic. Beginning with the 1995 data filings, the Commission required carriers to provide separate switched service and private line data for facilities-based and facilities resale services. At that time, a few carriers were offering international simple resale (ISR) services, which at that time consisted of telephone services provided over resold private lines, i.e. on a facilities-resale basis. The Commission subsequently allowed carriers to provide ISR services using owned circuits as well as resold circuits. Beginning with the 1997 data filings, the Commission required carriers to separate switched services data by the settlement arrangements made with carriers in foreign countries for terminating that traffic. Carriers now classify traffic as traditional settlement with proportionate return, and international simple resale including traffic hubbed through an intermediate foreign country. Carriers continue to report facilities-based and facilities-resale private line services separately.

Carriers must report switched traffic in three broad categories: U.S. billed; foreign billed; and transiting. **U.S. billed** traffic includes all traffic billed by U.S. carriers, and includes most calls that originate in the United States, calls that are placed collect or "caller toll-free" to the United States, U.S. carrier "country-beyond" and "country-direct" calls, and U.S. carrier reorigination traffic.

Country-direct and **country-beyond services** are U.S. carrier offerings that allow customers in foreign locations to route calls through U.S. carrier facilities to reach the United States (country-direct) or any world point (country-beyond). Country-direct and country-beyond services rely on alternative billing arrangements, such as credit cards, and enable the customer at a foreign point to be served by a U.S. carrier rather than by a foreign carrier. Note that U.S. carriers or their affiliates may operate in many foreign countries as foreign carriers. They do not report section 43.61 traffic on calls that they carry from one foreign country to another unless they carry this traffic through a U.S. point.

Reorigination traffic is traffic of a foreign carrier that transits a U.S. carrier's facilities and terminates with another carrier in a foreign point. The carrier terminating the traffic in the foreign point views the traffic as U.S. traffic. Reorigination allows the foreign carrier to take advantage of the U.S. carrier's accounting rate agreement with the carrier in the terminating country. The U.S. carrier treats reorigination traffic like U.S. billed traffic when it settles with the carrier in the country of termination, and it reports this traffic as U.S. billed traffic for filing purposes.

In their public filings, carriers include country-direct, country-beyond and reorigination traffic with other U.S. billed traffic. In proprietary filings, carriers separate these services from other U.S. billed traffic. Table A1 shows that carriers reported 42.7 billion minutes of U.S. billed traffic in 2003, for which they billed \$8.4 billion. Table A41 shows that 35.9 billion of these minutes and \$6.7 billion of this revenue was for calls that originated in the United States or terminated collect or caller toll-free in the United States. Table A42 shows that 1.4 billion of these minutes and \$1.0 billion of this revenue was for country-direct and country-beyond type services. Table A43 shows that 5.4 billion of these minutes and \$0.6 billion of this revenue was for reorigination services billed to foreign carriers.

Foreign billed traffic is all traffic billed by a foreign or correspondent carrier and includes most calls that originate at foreign points as well as collect and caller toll free calls placed by U.S. customers to foreign points. Foreign billed calls do not necessarily originate in the country for which the traffic is reported. In some cases, foreign carriers reoriginate traffic for other foreign carriers. U.S. carriers may not know which calls are reoriginated.

Transiting traffic is traffic that originates from an international point, is routed through the United States, and terminates at an international point. Transiting traffic is billed by the originating carrier and settlement payments are reported by U.S. carriers for the country in which the service is billed. Unlike reorigination traffic, transiting traffic is settled based on the settlement rate between the actual countries of origination and destination. Where there are so-called "cascade billing arrangements," U.S. carriers report both settlement receipts and settlement payments for transiting calls. In a cascade billing arrangement, the U.S. carrier collects from the originating foreign carrier both a transit fee and the settlement amount that the originating foreign carrier will owe to the

terminating foreign carrier. The U.S. carrier then makes the settlement payment to the terminating foreign carrier.

As explained above, carriers separately report international switched telephone, telegraph, telex, and miscellaneous services based on the financial termination arrangements. **Traditional Settlement** traffic is settled according to the Commission's International Settlements Policy (ISP).² The settlement is based on the accounting rate, which is part of a compensation agreement negotiated between a U.S. carrier and its foreign correspondent on a particular international route. The ISP requires nondiscriminatory accounting rates among U.S. carriers on a given route and that the U.S. carrier and its foreign correspondent share the accounting rate on a 50/50 basis. The ISP also requires that the U.S. carrier agree to accept no more than its proportionate share of return traffic from the foreign carrier. Table A39 shows that U.S. carriers reported 21.1 billion minutes of U.S. billed traditional settlement traffic in 2003, for which they billed \$3.1 billion.

ISR/Hubbed traffic is switched traffic that is routed and settled by the U.S. carrier outside of the traditional settlement process and that may be carried over private lines that are interconnected to the public switched network on one or both ends of the private line.³ The Commission allowed carriers to use ISR as a means to route U.S.-outbound and U.S.-inbound traffic between the United States and a number of approved countries. In many cases, U.S. carriers exchange traffic with a carrier in an approved country and that carrier "hubs" the call, i.e. terminates the call in or from a third country under a traditional settlement agreement. See 47 C.F.R. §§ 63.17. Table A40 shows that U.S. carriers reported 21.6 billion U.S. billed ISR/Hubbed minutes of traffic in year 2003, for which they billed \$5.3 billion. U.S. carriers also reported receiving 8.7 billion foreign billed ISR/Hubbed minutes of traffic in year 2003. These figures understate the totals because the following carriers reported substantial amounts of ISR traffic as traditional settlement traffic: AT&T Corp. & Concert Global Networks, USA L.L.C., MCI, Inc., ABS-CBN Telecom North America, Inc., Centennial Puerto Rico Operations Corp., Harris Corporation/MCS, IT&E Overseas, Inc., KDDI America, Inc., KPN-INS Inc., Singapore Telecom USA, Inc., Startec Global Communications Corporation, Telecom Italia North America, Inc., Telefonica Larga Distancia, Inc., and Telenor Global Services AS. For example, while carriers reported 3.5 billion minutes of ISR traffic for Canada, and 1.4 billion minutes for the United Kingdom, they also reported 2.0 and 1.2 billion minutes of traditional settlement traffic respectively. These countries should not show any traditional minutes. The same problem exists for other ISR-approved countries.

³ See 47 C.F.R. §§ 43.51(c), 64.1001 (2003). In the *2004 International Settlements Policy Reform Order*, the Commission removed the ISP from all routes on which carriers have negotiated benchmark-compliant rates. *International Settlements Policy Reform, International Settlement Rates*, IB Docket No. 02-234, First Report and Order, 19 FCC Rcd 5709 (2004). These changes were not effective until 2004, however, and do not affect the 2003 data presented in this report.

ⁱⁱ In the *2004 International Settlements Policy Reform Order*, the Commission eliminated its ISR policy. 19 FCC Rcd 5709. This change was not effective until 2004, however, and does not affect the 2003 data presented in this report

Reporting Requirements

Different levels of reporting are used for different categories of service. Figure 2 shows that carriers must report traffic and revenues on a country-by-country basis for the most commonly used communications services.

Figure 2

Service	Level of reporting for traffic and revenues for larger U.S. points *	Traffic Measures
<p>Traffic exchanged with foreign carriers under Traditional Settlement, and International Simple Resale (ISR)/Hubbed (Includes service provided over owned and resold circuits.)</p> <p>Switched Services Message Telephone Service</p> <p>Miscellaneous and Other International Services Message Telegraph Service Teleprinter Exchange (Telex) Service Occasional Use Television Packet Switching Switched Video</p>	<p>Country-by-country</p> <p>Region and world totals Region and world totals Region and world totals Region and world totals Region and world totals</p>	<p>Messages** and minutes***</p> <p>Messages** and words Messages** and minutes Hours Kilo Segments Sessions and minutes</p>
<p>Facilities-Based and Facilities-Resale Services</p> <p>Private Line Services</p>	<p>Country-by-country</p>	<p>Circuits at year-end, 64-kilobit equivalent circuits at year-end, revenues for the entire year</p>
<p>Pure Resale Services (resale of underlying carrier switched services)</p>	<p>World totals</p>	

See notes to Figure 2 below.

Figure 2 -- Continued

Notes:

- * Carriers may file world totals in lieu of country-by-country data for the smaller U.S. points identified in Figure 4.
- ** Carriers are not required to file message counts for transiting traffic.
- *** Many carriers have requested proprietary treatment for country-by-country transiting minutes. Both U.S. and foreign carriers compete for transiting traffic. The minutes data would allow competitors to estimate contract revenues per minute. The published tables contain region and world totals for transiting minutes.
- **** Prior to filing 1995 data, carriers selected their own traffic measures for miscellaneous services.

For private line services, carriers report the number of actual circuits leased to customers at year-end. Beginning with their 1995 international traffic data, carriers also report these circuits in terms of voice-equivalent circuits. For lower bandwidths, this means reporting the number of 64-kilobit-per-second channels that would equal the actual circuits. An 18 megahertz video channel, however, should be reported as 240 voice-equivalent channels, a 24-megahertz video channel should be reported as 288 voice-equivalent channels, and a 36-megahertz video channel should be reported as 630 voice-equivalent channels. This is the same conversion factor used by carriers in preparing circuit data reports filed pursuant to Section 43.82 of the Commission's rules, and to calculate regulatory fees. Voice-equivalent circuits are denoted "64 K" in the attached tables.

Facilities-based U.S. and foreign carriers (often called post, telephone and telegraph administrations or PTTs) jointly provide most international services. This is not always apparent to the customer, but is reflected in some of the traffic and revenue data that are filed. For switched services, one carrier collects from customers and then compensates its foreign partners through the settlement process. Compensation is based on minutes of calling and on accounting rates specified in settlement agreements. The number of minutes used for settlement purposes is generally based on the number of conversation minutes. In many cases, accumulated seconds are used to determine the minutes used in settlements. In the case of Mexico, billed minutes are used to determine settlements. Carriers providing international simple resale and hubbed services may have settlement-like arrangements under which U.S. carriers and PTTs compensate each other for traffic that originates or terminates at foreign points. For facilities-based and facilities-resale services, carriers must report the minutes used for settlement purposes.⁴ Pure

⁴ Prior to 1991, the Commission directed carriers to report billed minutes, rather than settlement minutes. Billed minutes tend to be greater than settlement minutes because some carriers bill in 30-second increments.

resale carriers continue to file billed minutes, since they do not participate in the settlement process, and may not have access to settlement minutes data.

Country-beyond calls have two international legs. Carriers are instructed to report both the originating and terminating legs of such calls. Consequently, approximately two minutes will be reported for each conversation minute. Each leg of the call may have settlement payments and these payments should be reported for the appropriate country. Carriers are instructed to report all billed revenues by the country in which the call originates. Country-direct and country-beyond traffic cannot be identified separately from a carrier's publicly filed data.

For U.S. billed switched services, the tables show the amount that the customers are billed for service, the corresponding settlement amount that the carrier owes to its foreign partner, and the amount of revenues that it retains. Carriers are instructed to report the actual amount of revenues that they bill for service, net of discounts. Many carriers offer discount plans that entitle customers to discounts based on the customer's total bill. Some carriers do not recalculate discounted bill amounts on a call-by-call basis. These carriers collect country-by-country revenue totals based on non-discounted rates and must estimate the amount of discounts for each country.

For foreign billed traffic, the tables show the settlement amounts owed to U.S. carriers by foreign carriers. The tables refer to these amounts as "Receipts from Foreign Carriers." In the case of transiting traffic, the U.S. carrier often receives a transit fee for itself, and a settlement amount which is owed to the terminating carrier. Thus, the tables show receipts, payouts and a net amount for transiting traffic. Figure 3 shows the revenue relationships.

Figure 3

U.S. Billed Traffic	<p>Billed revenues</p> <p>- <u>Settlements owed to foreign carriers</u></p> <p>= U.S. carrier retained revenues</p>
Foreign Billed Traffic	<p>Settlements due from foreign carriers</p> <p>= U.S. carrier retained revenues</p>
Transiting Traffic	<p>Transit fee and settlements due from foreign carriers</p> <p>- <u>Settlements owed to foreign carriers</u></p> <p>= U.S. carrier retained revenues</p>
Total	<p>Retained revenues for U.S. billed</p> <p>+ Retained revenues from foreign billed</p> <p>+ <u>Retained revenues from transiting</u></p> <p>= Total U.S. carrier retained revenues</p>

U.S. carriers report the number of private line circuits actually leased at year-end. Financial arrangements for private line services are different than for public switched services. The U.S. carrier provides the circuit to a theoretical mid-point, and the foreign partner provides the remainder of the circuit. In some cases, each carrier bills for its half of the service; in other cases, one carrier acts as the collection agent. Unlike message telephone service, where the rate charged to consumers covers the whole cost of the call, the U.S. carrier's private line rate covers only the half-circuit to the theoretical mid-point. The FCC filing manual states that U.S. carriers must report the amount of private line revenues that they record for their half of the service, regardless of who actually collects the revenues.⁵ U.S. carriers should not report revenues that they collect on behalf of the foreign carriers or amounts that they bill for services that they provide in foreign countries.

International points are grouped into ten regions for reporting purposes. The regions include all countries of the world as well as three maritime classifications -- the Atlantic, Pacific, and other oceans. In some cases, international points have been grouped outside the geographic region for reporting purposes. For example, the Azores and Madeira Islands are included with Portugal. Any data reported to these points are included with Portugal traffic and are summarized with Western Europe traffic in the tables. (See *International Points Used for FCC Reporting Purposes*, April 1994.)

Carriers are required to file separate data for each U.S. point that they serve. Alaska and Hawaii, for example, are considered distinct U.S. points for this purpose. Figure 4 identifies the U.S. points used for reporting purposes. Carriers serving larger U.S. points are required to file detailed country-by-country data on computer disk. Carriers serving smaller U.S. points may file world totals in lieu of country-by-country data. In a few instances, carriers have obtained

⁵ *Manual for Filing Section 43.61 Data*, June 1995, available from the FCC's Internet site at <http://www.fcc.gov/ib>, under "Industry Information," click "Section 43.61 International Traffic Data."

waivers so that they can consolidate data for Hawaii and the conterminous United States.⁶

Figure 4

Reporting Requirements for Facilities-Based and Facilities-Resale Services	
Larger U.S. points for which carriers file country-by-country data	Smaller U.S. points for which carriers file world total data
<u>Domestic U.S. points</u> Alaska Conterminous U.S. Hawaii Puerto Rico	American Samoa Baker Island Howland Island Jarvis Island Johnston Atoll Kingman Reef Midway Atoll Navassa Island Northern Mariana Islands Palmyra Atoll Wake Island
<u>Other U.S. points</u> Guam U.S. Virgin Islands	

Figure 4 shows which U.S. points are classified as **domestic** and which are classified as **other**. Calls between domestic U.S. points are considered domestic and therefore are not reported. Calls between domestic U.S. points and other U.S. points are defined as international and are reported. For example, a directly dialed call originating in Guam and terminating in Hawaii is reported by the carrier serving Guam as U.S. billed traffic to Hawaii. Note that the carrier serving Hawaii reports this same call as a foreign billed call from Guam.⁷

Presentation of Data

Figure 5 lists the carriers whose data are presented in the attached tables. Figure 6 summarizes the billed revenue data contained in the tables, and Figure 7 summarizes the net revenue data contained in the tables -- that is, billed revenues net of settlement payments. Figure 8 summarizes international message telephone service for the three largest carriers (AT&T, MCI, Inc., and Sprint) for 1993 through 2003.

⁶ The conterminous United States consists of data from the 48 contiguous states and the District of Columbia.

⁷ Thus, our aggregate call statistics double-count both the call and the associated minutes. Table A1 shows that U.S. carriers reported 7.3 billion calls between the U.S. and international points. Of these calls, 28 million (less than 1%) were reported for traffic between U.S. points. Thus, the double-counting is small when compared to the overall number of calls. The NPRM proposes to eliminate the requirement that carriers report traffic between U.S. points. See footnote 1 above.

The Section 43.61 data have been summarized for all reporting carriers and for all U.S. points. Some tables show totals for all carriers serving individual U.S. points. Other tables show totals for all data filed by individual carriers. Data have been consolidated where a holding company owns more than one carrier. For example, the data Lockheed Martin Corporation reported for its then subsidiary, COMSAT General Corporation, have been consolidated and included with other Lockheed Martin Corporation data. The country-by-country data are presented by region of the world. The foreign points are listed alphabetically in each region.

U.S. carriers are required to file message and minute counts for switched services that originate or terminate at a U.S. point. They are required to provide only minutes for traffic that transits U.S. points, though, because U.S. carriers sometimes have difficulty obtaining message counts for traffic billed by foreign telephone companies. As noted in Figure 2, transiting minutes are not published on a country-by-country basis. Region totals are provided for those regions where transiting traffic is carried from more than one country.

Carriers file detailed traffic data using a record format contained in the filing manual. For switched services, each record contains a billing type code that signifies the traffic exchange method (e.g., traditional settlement vs. ISR/Hubbed) and whether the call was U.S. billed, foreign billed or transiting. For U.S. billed calls, the billing type code indicates whether the data represents (a) U.S.-originated traffic and U.S.-terminated collect and subscriber toll free traffic; (b) country direct and country beyond traffic; or (c) U.S. carrier reorigination traffic. For international private line services, the billing type code signifies whether the data contain facilities-based or facilities-resale circuits. The billing codes used for filing year 2003 data are contained in the International Bureau's Public Notice DA 00-1526, *Annual Section 43.61(a) International Telecommunications Traffic Reports Due by July 31, 2000*, released July 7, 2000.

The table titles use the billing types to indicate the type of data aggregated in a particular table. There are three groups of billing type codes for switched services. Billing types 1 through 6 are used for traditional settlement traffic. Billing types 11 through 16 are used for ISR/hubbed traffic. The billing types do not distinguish whether a switched service was provided over a carrier's owned facilities or over leased circuits.

The specific billing types allow the following breakdowns.

<u>Billing Type(s)</u>	
1, 11	U.S. billed calls that originate in, or terminate collect or subscriber toll-free in, the United States
2, 12	foreign billed calls
3	traditional transiting calls (there is no billing type 13 because all traditional transiting calls are exchanged under traditional settlement arrangements)
4, 14	U.S. billed country-direct and country-beyond calls
5, 15	terminating leg of calls reoriginated by U.S. carriers and terminated via facilities-based or facilities-resale circuits
35	terminating leg of calls reoriginated by U.S. carriers and terminated via pure resale of another carrier's switched services
6, 16	originating leg of calls reoriginated by U.S. carriers

There are only two billing type codes used for private line services. Billing type 1 signifies facilities-based circuits. Billing type 11 signifies facilities-resale circuits.

Addendum to Figure 5

The following carriers submitted reports with no international message telephone, private line, or miscellaneous services for calendar year 2003:

Amerimex Communications Corp.	Network PTS, Inc.
AmMex Communications, Inc. d/b/a Easycomm Beepers	New Horizons Communications
Arizona Dialtone, Inc.	NTWS Digital Broadband Incorporated
BBH Corp.	Paging USA South, Inc. d/b/a Paging USA
Buckeye Telesystem, Inc. d/b/a Buckeye Telesystem	Paramount International Telecommunications Inc.
Business Network Long Distance	Phonetec PCS, LLC
Communication Technology, Inc.	RAM Technologies, Inc. d/b/a RAM Paging
Cooperative Light & Power Association of Lake County	SBC Communications, Inc.
DigiTel Network Corporation	SNET Diversified Group, Inc.
Doylestown Communications, Inc.	Source Communications, LLC
DSLnet Communications, LLC	Telmatch Telecommunications, Inc.
Ernest Communications, Inc.	TGEC Communications Co., LLC d/b/a First
Forte Communications, Inc.	World Connect
Global Unique Communications, Inc.	TON Services, Inc.
Globalcom, Inc.	Universal Access, Inc.
Greenfield Communications, Inc.	WestCom LLC d/b/a Digital Easy Chair
Indiana Fones, Inc.	WTI Communications, Inc.

Traffic Arrangements: U.S. carriers use the following types of arrangements to govern the exchange of traffic between themselves and foreign carriers.

- 1/ Traditional - Traffic settled according to the Commission's International Settlements Policy (ISP). The ISP requires that the U.S. carrier and its foreign correspondent share the accounting rate on a 50/50 basis. An accounting rate is part of a compensation agreement negotiated between a U.S. carrier and its foreign correspondent on a particular international route.
- 2/ ISR/Hubbed - International Simple Resale (ISR) refers to the provision of switched services over private lines, interconnected to the public switched network, between the United States and Commission-approved countries. Switched hubbing refers to the provision of switched services over interconnected private lines between the United States and an ISR-approved country in order to originate or terminate U.S. traffic in a third country. See 47 C.F.R. §§ 63.17.

The following companies' section 43.61(a) international telecommunications traffic reports were combined because of mergers, acquisitions, and changes in corporate structure:

- 3/ Adelphia Communication's wholly owned subsidiaries voice and long distance customer bases were sold to Telcove, Inc. Section 43.61(a) submissions for the companies are for a partial year.
- 4/ American Fiber Systems was not engaged in providing any form of international telecommunications services in calendar year 2003.
- 5/ BellSouth International Access, Inc., on March 31, 2002, was merged with BellSouth Long Distance, Inc.
- 6/ Cable & Wireless USA, Inc. is currently in bankruptcy.
- 7/ Choice One Communications International Inc.'s calendar year 2003 section 43.61(a) includes information for US Xchange, L.L.C.
- 8/ Cimarron Telephone Company advises that it only provides local service, and inadvertently submitted a section 43.61(a) international traffic and revenue report for calendar year 2002.
- 9/ Citizens Telecommunications Company (CTC) merged with Frontier Communications of America, Inc. (FCA).
- 10/ Clark Fork Telecommunications, Inc., on January 1, 2003, merged with its parent company Blackfoot Telephone Cooperative, Inc.
- 11/ Consolidated Communications Ventures Company bought TXU Communications.
- 12/ Dobson Communications Corporation, in 2003, filed a combined report for Dobson Communications Corporation and its wholly-owned subsidiary American Cellular Corporation.
- 13/ Elephant Talk, Inc. ceased operating in May, 2003. Its year 2003 section 43.61(a) submission is for Jan., 1 to May 31, 2003.
- 14/ Equant Operations, Inc. combined its international voice services with France Telecom. Its data services stayed with Equant Operations, Inc.
- 15/ Global Crossing Telecommunications, Inc.'s 2003 section 43.61(a) submission includes all of the international traffic for the following Global Crossing companies:
 - Global Crossing Bandwidth, Inc.
 - Global Crossing North American Networks, Inc.
 - Global Crossing Telemanagement, Inc.
- 16/ Infonet Broadband Services Corporation is authorized as a common carrier under section 214 of the Communications Act. The carrier, however, advises that it currently provides only enhanced services between the United States and foreign points and did not operate as a common carrier in 2003.
- 17/ International Telnet, Inc., which had provided miscellaneous international facilities-based/facilities-resale services for 2002, only provided international pure resale message telephone service for 2003.
- 18/ IUSATEL USA, Inc. is no longer affiliated with Verizon Communications, Inc.
- 19/ Maritime Telecommunications, Inc. is included in Verestar, Inc.'s section 43.61(a) submission for calendar year 2003.
- 20/ Marlink, Inc. described its international terrestrial termination component of mobile satellite services as pure resale.

Addendum to Figure 5 -- Continued

- 21/ Primus Telecommunications, Inc. did not provide any international pure resale information for calendar year 2003.
- 22/ SAVVIS, Inc., currently a common carrier engaged in providing international telecommunications services, did not provide any such services in calendar year 2003. SAVVIS purchased Cable & Wireless USA, Inc.'s assets in early 2004. The company, however, did not take over C&W's international services.
- 23/ SES Americom, Inc., in April 2004, relinquished its authority pursuant to Section 214 to provide international telecommunications services.
- 24/ StarHub, Inc. discontinued providing U.S. billed or receipt international services after calendar year 2002.
- 25/ Swisscom North America's international message telephone service was sold to SwissFone, Inc.
- 26/ Telcorp Ltd. was purchased by BCN Telecom.
- 27/ Telecommunications Cooperative Network, Inc. discontinued providing international service as of 12/31/2002.
- 28/ The Rye Telephone Company no longer provides resale toll services. Those type services have been transferred to its subsidiary ghValley.net d/b/a Valley Long Distance.
- 29/ TW Wireless, LLC merged with Qwest Wireless, LLC on 12/31/2003.

The following companies either changed their name or filed a report name different from the previous years:

- 30/ Aliant Systems, Inc. changed its name to ALLTEL Systems of the Midwest, Inc.
- 31/ Berkshire Cable Corporation d/b/a Berkshire Long Distance filed its calendar year 2003 section 43.61(a) report as Berkshire Telephone Long Distance.
- 32/ Blackfoot Communications, Inc. was formerly Montana Wireless, Inc.
- 33/ Celulares Telefonica d/b/a PRTC Larga Distancia, Inc. filed its calendar year 2003 section 43.61(a) report as Puerto Rico Telephone/PRT Larga Distancia (PRTLTD).
- 34/ Cincinnati Bell Any Distance, Inc. was formerly known as Broadwing Telecommunications Inc. Cincinnati Bell - BCSI, Inc. was formerly known as Broadwing Communications Services Inc.
- 35/ Citizens Telephone Long Distance filed its calendar year 2003 section 43.61(a) report as Citizens Telephone Cooperative.
- 36/ Consolidated Communications Telecom Services of Fort Bend Company was formerly Fort Bend Long Distance Company. Consolidated Communications Telecom Services of Texas Company was formerly TXU Communications Telecom Services Company.
- 37/ Dial-Thru, Inc. was formerly known as RDST, Inc.
- 38/ Easton Telecom Services, L.L.C. was formerly known as Weston Telecommunications, L.L.C.
- 39/ GVN Services was formerly known as Evans Long Distance.
- 40/ Infone LLC was formerly known as North by NortheastCom, LLC
- 41/ Iowa Wireless, L.P. filed its calendar year 2003 section 43.61(a) report as Iowa Wireless Services, L.L.C., d/b/a i wireless.
- 42/ Last Mile Connections, Inc. submitted its calendar year 2003 section 43.61(a) report as its subsidiary, Universal Interconnect Services, Inc. The carrier no longer provides any telecommunications services.
- 43/ Megagate Broadband was formerly known as Cellular XL Associates, L.P.
- 44/ Metropolitan Telecommunications Holding Company's 2003 section 43.61(a) submission includes traffic generated by Manhattan Telecommunications Corporation (New York), Metropolitan Telecommunications of New Jersey, Inc. and Metropolitan Telecommunications of PA, Inc. The carrier's 2002 report was submitted as Manhattan Telecommunications Corp.
- 45/ Mid-Rivers Long Distance filed its calendar year 2003 section 43.61(a) report as Mid-Rivers Telephone Cooperative, Inc., d/b/a Mid-Rivers Long Distance.
- 46/ MidlandsNet LLC d/b/a WestTel Systems filed its calendar year 2003 section 43.61(a) report as HTC Communications LLC d/b/a WesTel Systems.
- 47/ Momentum Telecom, Inc. was formerly Momentum Business Solutions, Inc.
- 48/ North Texas Cellular, Inc. d/b/a Brazos Long Distance filed its calendar year 2003 section 43.61(a) report as Brazos Long Distance.
- 49/ NUI Telecom, Inc. changed its name to BCN Telecom, Inc.
- 50/ OpicTel was formerly Infonet Long Distance, LLC.
- 51/ Phillips County Communications, LLC filed its calendar year 2003 section 43.61(a) report as Phillips County Communications LLC, d/b/a PC Telcom.
- 52/ Rainier Connect, Inc. filed its calendar 2003 section 43.61(a) report as Mashell Telecom d/b/a Rainier Connect.
- 53/ RTC Communications filed its calendar year 2003 section 43.61(a) report as Daviess-Martin County Rural Telephone Corp. d/b/a RTC Communications.
- 54/ SCS Communications & Security, Inc. d/b/a NSC TeleSystems filed its calendar year 2003 section 43.61(a) report as SCS Communications & Security, Inc. d/b/a SCTC Long Distance.
- 55/ South Central Utah Telephone Association, Inc. filed its calendar year 2003 section 43.61(a) report as South Central Communications.
- 56/ SRT Communications, Inc. was formerly known as Souris River Telecommunications d/b/a SRT Long Distance.
- 57/ Telapak Networks, Inc. was formerly Telapex Long Distance, Inc.
- 58/ TeleDanmark USA, in April 2003, changed its name to TDC Carrier Services USA, Inc.
- 59/ Telia International Carrier, Inc. changed its name to TeliaSonera International Carrier, Inc.
- 60/ Vycera Communications, Inc. d/b/a Genesis Communications Inc. filed its calendar year 2003 section 43.61(a) report as Vycera Communications, Inc.
- 61/ Williams Communications, LLC, in January 2003, changed its name to WilTel Communications, LLC.

Addendum to Figure 5 -- Continued

The following companies requested confidential treatment pertaining to their calendar year 2003 section 43.61(a) submission:

AT&T Wireless	TDC Carrier Services USA, Inc.
BellSouth Corporation	Telecom New Zealand USA, Ltd.
BellSouth BSE, Inc.	Teleglobe America, Inc.
BellSouth Long Distance, Inc.	TeliaSonera AB
BT Americas, Inc.	Sonera Corporation
Cbeyond Communications, LLC	TeliaSonera International Carrier, Inc.
China NetCom (USA) Operations Limited	TELUS Corporation, Inc.
Comcast Business Communications, Inc. d/b/a	TRICOM USA, Inc.
Comcast Long Distance	United States Advanced Network, Inc.
Deutsche Telekom AG	US LEC Corp.
T-Systems North America, Inc.	Verizon Communications, Inc.
Dobson Cellular Systems, Inc.	Bell Atlantic Communications, Inc. d/b/a Verizon Long Distance
Emery Telecom Long Distance	Codetel International Communications Incorporated.

* MCI for years 1993-1997. MCI WorldCom, Inc. for years 1998-2003. In 2004, WorldCom emerged from Chapter 11 bankruptcy as MCI, Inc.

Addendum to Figure 8

Note: Some previously published data have been revised.

- 1/ Data exclude pure resale traffic unless otherwise noted.
- 2/ Retained revenues shown for service that originates or terminates in the United States. These figures exclude revenues for calls that transit the United States. Retained revenues are calculated as revenues billed by U.S. carriers, less settlement amounts owed to foreign carriers for U.S. billed traffic, plus settlement amounts due to U.S. carriers for foreign-billed traffic.

2003 Annual Section 43.61 International Traffic Data for All U.S. Points: All Settlement Arrangements

Table A1: All United States Carriers Message Telephone Service Billing Types Covered: 1, 2, 3, 4, 5, 11, 12, 14, 15

International Point	Traffic Billed in the United States					Traffic Billed in Foreign Countries							Total U.S. Carriers Retained Revenues

Sum of Figures	2,867	929	112,723	\$220,181

Note: Carriers provide pure resale services by switching traffic to (and reselling the switched services of) underlying U.S. carriers. The underlying carriers control the circuit that carries the traffic to the international point, arrange for termination of the traffic and report the traffic on a country-by-country basis. Reporting underlying U.S. carriers' country-by-country data are available in Section A: Switched Services Telephone of this annual publication, International Telecommunications Data.
