Petitions for Modification

The following parties have filed petitions to modify the application of existing safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. Pine Ridge Coal Company

[Docket No. M-2000-085-C]

The petitioner requests a modification to its previously granted petition for modification, docket number M-98-004-C, allowing 2400 volt cables to be used in the last open crosscut at the working continuous miner sections at the Pine Ridge Coal Company, Robin Hood No. 9 Mine (I.D. No. 46-02143), to be transferred to Pine Ridge Coal Company's Whites Branch Mine (I.D. No. 46-08827), where equipment will be transferred and production begins the first of August 2000. The petitioner asserts that the proposed alternative method would provide at least the same measure of protection as the existing standard.

The petitioner requests modification of the existing standard to require suitable transportation be provided for miners traveling to and from the centrally located bathing facility. The petitioner states that the miners have to crawl in mud, coal dust, oil, grease, and other contaminants in the underground mine environment and then drive to the centrally located bathing facility which creates unsafe conditions for the miners, and conflicts with applicable state highway laws that promote safe operation of motor vehicles. The petitioner asserts that the existing standard would result in a diminution of safety to the miners.
