

## Energy and Minerals

- How should energy and mineral development, including pipelines and other infrastructure, be managed to minimize resource conflicts?
- Are there public lands that should be withdrawn from mineral entry because of conflicts with other public land uses?
- Are there special conditions of approval that should be placed on mineral or oil and gas development? If so, what are they and where should they be applied?
- What are the visual considerations relating to management of energy and mineral resources, and how should the BLM's VRM play a role?
- What are the potential social and economic effects associated with oil and gas and mineral development. How will Plan decisions affect communities in northwest Colorado?
