

Wildlife–Fisheries–T&E Species

- Are there areas where management practices or use restrictions need to be employed to minimize conflicts between wildlife, wild horses, and livestock?
- What effects do wildlife populations, especially elk, have on the ecosystem?
- What areas are important for big-game wildlife winter and summer range and migratory corridors? How should they be managed? How is winter range changing?
- What role should fuel treatments play in wildlife habitat?
- Are there special management actions or land use practices needed to protect T&E and Special Status species? If so, where?
