New vs. Return Visits

This report compares the number of visits by new and returning visitors to your site.

New vs. Return Visits

Visitor Type	Visits	%
1. Returning Visitors	1,156	100.00%
Total	1,156	100.00%

Visitors by Number of Visits

This report shows the distribution of visitors based on how many times each visitor visited your site.

Visitors by Number of Visits

Number of Visits	Unique Visitors	%
1 visit	522	85.71%
2 visits	34	5.58%
3 visits	15	2.46%
4 visits	10	1.64%
5 visits	4	0.66%
6 visits	2	0.33%
7 visits	3	0.49%
8 visits	2	0.33%
9 visits	3	0.49%
Subtotal	595	97.70%
Other	14	2.30%
Total	609	100.00%

Visitors Trend

This report shows how many times visitors visited your web site and how long they stayed. The information is divided into time slices based on the duration of the log file. Visits are freshly counted during each time interval in the report. Some visits may span more than one time interval, and therefore a single visit may be counted more than once. This manner of counting visits may cause the Visits Trend total visits to exceed the total visits shown on the Overview Dashboard page.

Top Organizations

If you have enabled the WebTrends GeoTrends Database for this profile, this page will list the most active companies and other organizations visiting your web site. The second table will show you the most active domain names from each organization.

No data for this section in the log data analyzed.

No data for this section in the log data analyzed.

Top Authenticated Usernames

This report identifies the true name and relative activity level of the visitors logging onto a server that requires a user name and password.

No data for this section in the log data analyzed.

Top Domain Names

This report lists the domain name that generates the most activity to your web site.

Top Domain Names

	Domain Name	Visits	%	Hits
1.	googlebot.com	85	7.35%	315
2.	65.54.164.0	52	4.49%	93

Top Paths Through Site

This report tracks visitor activity beginning with their entry page into the site—the first page they open—then all subsequent pages during their visit. The default definition for a page in this context is defined as a document ending with the extension .htm, .html, or .asp. This definition can be changed by the system administrator.

Summary of Visits by Hour of the Day

Most Active Hour of the Day	10:00–10:59
Least Active Hour of the Day	02:00–02:59

Hits by Hour of the Day

This report shows the most and the least active hour of the day for the report period. The second table breaks down activity for the given report period to show the average activity for each individual hour of the day. If there are several days in the report period, the value presented is the sum of all hits during that period of time for all days. All times are referenced to the location of the system running the analysis.

Hits by Hour of the Day

Top Spiders

This report identifies robots, spiders, crawlers and search services visiting your site. The spiders shown in this report are based on a configured list in the product code. If your site uses JavaScript tagging to monitor traffic (for example, WebTrends SmartSource Data Collector), only spiders that use JavaScript will appear in this report.

Glossary

The following terms are used in Reporting Center reports, and some are used throughout the World Wide Web in general.

Glossary

Active Campaign	The Active Campaign is one that a visitor has seen or received that has not reached the end of its duration.
Active Campaigns	The Active Campaign is one that a visitor has seen or received that has not reached the end of its duration.
Ad	A graphic or banner which takes a visitor to another web site when clicked.
Ad Click	A click on an advertisement which takes a visitor to another web site.
Ad View	Occurs when an ad is displayed to a visitor. Once visitors have viewed an ad, they can click on it (see Ad Click). There may be more than one ad on an ad view.
Authenticated Username	A unique visitor tracked by user name and password rather than by IP address. You may find more authenticated user names than total visitors because several persons may be using the same IP address. Since many ISPs dynamically assign IP addresses, and since multiple visitors may use a single IP address, authentication is a much more accurate way to identify visitors.
Authentication	Technique that limits access to Internet or intranet resources to visitors who identify themselves by entering a user name and password.
Avg. Frequency	This measure is the average number of times these visitors have visited your site over their lifetime.
Avg. Latency	This measure is the average number of days between visits for visitors over their lifetime. Note: A zero latency means the average time between visits is less than 24 hours.
Avg. Lifetime Value	The average lifetime value is the average of the sum of all order values.
Avg. Most Recent Purchase Amt.	The average most recent purchase amount for this group of visitors.
Avg. Recency	The number of days since the last visit is averaged for each visit in the reporting timeframe. Note: A zero recency means you have visited within the last 24 hours, or that the average value is less than one day.
Bandwidth	Measure of the traffic on a site. Bandwidth is expressed as the amount of data transferred in a specified unit of time.
Browser	A program used to locate and view web pages. These include Netscape, Mosaic, Microsoft Internet Explorer, and others.
Campaign Lifetime Value	The total order value associated to the campaign.
Click Through Rate	Percentage of visitors who viewed an ad and also clicked on it. This is a good indication of an ad's effectiveness.
Client	A computer that accesses resources provided by another computer, called a server.
Client Errors	An error occurring due to an invalid request by the visitor's browser. Client errors are in the 400-range. See the "Status Code" glossary entry for more information.

Company Database	The database installed and used by Reporting Center to look up the company name, city, state, and country corresponding to a specific domain name.
Cookies	Files containing information about web site visitors. This information can include the visitor's user name, preferences, etc. The information is provided by visitors during their first visit to a web site. The server records this information in a text file and stores it on the visitor's hard drive. At the beginning of later visits, the server looks for a cookie and configures itself based on the information provided.
Days Since First Purchase	The number of days since the first purchase since these visitors have been tracked.
Days Since Most Recent Purchase	The number of days since the last purchase for the campaign.
Destination Page	A page chosen by the system administrator for Path Analysis. The Path Analysis pages track which clicks brought each visitor to the selected Destination Page.
Domain Name	The text name corresponding to the IP address of a computer on the Internet. For example, www.webtrends.com is a domain name.
Domain Name Lookup	The process of converting an IP address into a text name (for example, 204.245.240.194 is converted to www.webtrends.com).
Entry File	The first file requested by a visitor during a visit to your web site.
Entry Page	The first page viewed during a visit to your web site. If a visit consists only of hits to non-page files, that visit has no entry page. This can cause the total number of entry pages to be less than the total number of visits.
Exit Page	The last page viewed during a visit to your web site. If a visit consists only of hits to non-page files, that visit has no exit page. This can cause the total number of exit pages to be less than the total number of visits.
FTP	File Transfer Protocol. It is a standard method of sending files from one computer to another over the Internet.
File Type	Identifies types of files by their file extension. For example, a file named graphic.gif is identified as type "gif."
Filters	A means of narrowing the scope of a report by specifying ranges or types of data to include or exclude.
First Campaign	The First Campaign is the one that originally drove a visitor to your site.
First Campaign Lifetime Value	The lifetime value is the sum of all order values.
First Campaign Type	User-defined category shown for the first campaign for a visitor. Examples include online banner ads, e-marketing newsletters, and direct mail campaigns.
Frequency	Frequency is the number of times this visitor has visited your site since this visitor has been tracked.
GIF	Graphics Interchange Format. It is a graphics file format commonly used in HTML documents.
Geography	Geography indicates the world region, country, state/province, and city.
HTML	Hypertext Markup Language. It is the programming language for static web pages. It usually includes hypertext links between related objects and documents.
HTTP	Hypertext Transfer Protocol. It is a standard method of transferring data between a Web server and a Web browser.
Hit	Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.
Home Page	The main or introductory page of a web site. The home page provides visitors with an

overview and links to the rest of the site. It often contains or links to a Table of Contents.

Home Page URL	The URL for the home page of the site analyzed in the report.
IP Address	Internet Protocol Address. It is a series of four one- to three-digit numbers separated by periods. It is used to identify a computer connected to the Internet. For example, 212.6.125.76 is an IP address.
JPEG	Joint Photographic Expert Group. It is a compressed graphics format common on the Internet.
Latency	This measure is the average number of days between visits for visitors over their lifetime. Note: A zero latency means the average time between visits is less than 24 hours.
Lifetime Value	This is the maximum value for all orders for this period.
Log File	A file created by a Web or proxy server which contains information about the activity of the server.
Most Recent Campaign	The Most Recent Campaign is the last one that a visitor has seen or received that has not reached the end of its duration.
New Users	Visitors who didn't have a cookie on their first visit, but had one during later visits.
No Referrer	Indicates visits to your web site that did not originate from any other site. For example, any visitor who types the URL of your site directly into their browser window fits into this category.
Order Count	This measure reflects the number of orders from completed purchases.
Order Value	This measure reflects the monetary amount generated from completed purchases.
Other	In tables showing a variable-length list of items, the number of items may exceed the number that can be viewed at one time. The values for the items not currently shown are added together and shown in the row named "Other."
Page	Any document, dynamic page, or form. Different types of profiles have different default settings for which file extensions qualify a file as a page. These settings can be changed by the Reporting Center system administrator.
Page View	A hit to any file classified as a page. Contrast the value for "page views" with the value for "hits," which includes hits to files of every type.
Palm Browser	A program used on a Palm device to display site content, similar to Netscape or Internet Explorer on PCs.
Palm Device	A portable personal computer small enough to fit in the palm of a person's hand. Reporting Center reports only include Palm devices if the log files shows the device used a Palm browser.
Path Through Site	The sequence of pages a visitor views, from the entry page to the exit page and all pages in between.
Paths from Start	The sequence of pages a visitor views, excluding the entry page.
Paths to Destination	The sequence of pages a visitor views before arriving at a selected Destination Page.
Platform	Refers to the operating system, such as Linux or Windows 98.
Protocol	An established method of exchanging data over the Internet.
Purchase Conversion Funnel	Analysis of the conversion process through a four-step purchase process.
Purchase Count	The total number of purchase transactions (not units ordered) for this visitor since the visitor has been tracked.
Recency	This measure is the number of days since the most recent visit for a visitor.

Referrer	URL of a web page that refers visitors to your site.
Report Period	The dates covered in the report. You may select a report period of any day, week, month, quarter, or year within the data provided by the log analysis.
Returning Visitors	Visitors who already had a cookie from your site before they visited.
Scenario Analysis Step	The name of the step in the defined scenario. The step marks progress on the path that is being monitored.
Script	A simple programming language used to execute specific or limited tasks. Scripts are often used for pages on the Internet to serve dynamic content and to tailor pages for individual visitors.
Search Keywords	A keyword is a single word from within a search phrase. In the phrase "cordless phone" the individual keywords are "cordless" and "phone".
Search Phrase	The search phrase a visitor used to find your site.
Server	A computer that hosts information available to anyone accessing the Internet or an internal intranet.
Server Error	An error occurring on the server. Web server errors have codes in the 500 range.
Single Access Page	A page on your web site that visitors open, then exit from, without viewing any other page. To qualify, the visit must be to a page with a valid document type. If the visit is to a document with a different type (such as a graphic or sound file), the file does not count as a single access page, and the visit is not included in the total. Such visits are often the result of other sites referencing a specific downloadable file or graphic on your site. In these cases, a visit may have a single hit to a non-document type file, and will not be counted in the percentage calculations.
Spider	An automated program which searches the internet.
Status Code	The HTTP status code of a file request specifies whether the transfer was successful or not, and why. These codes are defined in RFC 2616, section 6.1.1.

"Success" codes:

- 100 = Success:** Continue
- 101 = Success:** Switching Protocols
- 200 = Success:** OK
- 201 = Success:** Created
- 202 = Success:** Accepted
- 203 = Success:** Non-Authoritative Information
- 204 = Success:** No Content
- 205 = Success:** Reset Content
- 206 = Success:** Partial Content
- 300 = Success:** Multiple Choices
- 301 = Success:** Moved Permanently
- 302 = Success:** Found
- 303 = Success:** See Other
- 304 = Success:** Not Modified
- 305 = Success :** Use Proxy
- 307 = Success :** Temporary Redirect

"Failed" codes:

- 400 = Failed:** Bad Request
- 401 = Failed:** Unauthorized
- 402 = Failed:** Payment Required
- 403 = Failed:** Forbidden

- 404 = Failed:** Not Found
- 405 = Failed:** Method Not Allowed
- 406 = Failed:** Not Acceptable
- 407 = Failed:** Proxy Authentication Required
- 408 = Failed:** Request Time-out
- 409 = Failed:** Conflict
- 410 = Failed:** Gone
- 411 = Failed:** Length Required
- 412 = Failed:** Precondition Failed
- 413 = Failed:** Request Entity Too Large
- 414 = Failed:** Request-URI Too Large
- 415 = Failed:** Unsupported Media Type
- 416 = Failed:** Requested range not satisfiable
- 417 = Failed:** Expectation Failed
- 500 = Failed:** Internal Server Error
- 501 = Failed:** Not Implemented
- 502 = Failed:** Bad Gateway
- 503 = Failed:** Service Unavailable
- 504 = Failed:** Gateway Time-out
- 505 = Failed:** HTTP Version Not Supported

Subtotal	In tables showing a variable length list of items, the number of items may exceed the number that can be viewed at one time. The values for the items currently shown are added together and shown in the row named "Subtotal."
Suffix (Domain Name)	See "Top-Level Domain."
Time Interval	A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.
Time before Order	The number of days between a new buyer's first visit and first purchase.
Time between Purchases	The number of days between a visitor's previous purchase and most recent purchase in this report period.
Top-Level Domain	<p>The suffix of a domain name. A top-level domain can be based on the type of organization (.com, .edu, .museum, .name, etc) or it can be a country code (.uk, .de, .jp, .us, etc.). The top-level domain can be used to identify the type of web site. The following is a partial list of how this report categorizes top-level domains:</p> <p>ARPANET: .arpa</p> <p>Commercial: .com .co .com.[country code] .co.[country code] .firm.co .firm.ve .ltd.uk .info .biz</p> <p>Education: .edu .edu.[country-code] .ed.[country code] .ac.[country code] .school.[country code] .k12.[country code] .re.kr .sch.uk .edunet.tn</p> <p>International: .int .int.co .int.ve .intl.tn</p> <p>Government: .gov .gov.[country code] .gove.[country code] .go.[country code]</p> <p>Military: .mil .mil.[country code]</p> <p>Network: .net .ad.jp .ne.kr .net.[country code]</p>

Organization: .org .or .org.[country code] .or.[country code]

Personal: .name

Total	This table row gives the sum of all of the items for the current table during this report period. If the number of items for the table exceeds the number that can be viewed at one time, then a "Subtotal" row and an "Other" row will also be provided, and their sum will equal the Total row.
Traffic	The quantity of data transferred.
URL	Uniform Resource Locator. It is a means of identifying an exact location on the Internet. For example, http://www.webtrends.com/html/info/default.htm is the URL which defines the location of the page Default.htm in the /html/info/ directory on the NetIQ Corporation web site. As the previous example shows, a URL is comprised of four parts: Protocol Type (HTTP), Machine Name (webtrends.com), Directory Path (/html/info/), and File Name (default.htm).
Unique Visitors	Individuals who visited your site during the report period. If someone visits more than once, they are counted only the first time they visit.
User Agent	Portion of a log file that identifies the browser and platform used by a visitor.
Users Without Cookies	Visitors who come to your site with cookies disabled. There is no way to determine if these visitors are new or returning.
Visit	A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.
Visit Duration (Minutes)	The number of minutes your web site was viewed by a visitor.
Visitor Minutes	Total number of minutes your site was viewed by all visitors during the report period.
Visits with Clicks	Visits to your site where at least one ad was clicked on.
WAP Browser	A program used on a WAP device to display site content, similar to Netscape or Internet Explorer on PCs.
WAP Carrier	A server that acts as an intermediary and relays requests from visitors with WAP devices to your site.
WAP Device	A wireless device using Wireless Application Protocol (WAP), such as a cellular telephone or radio transceiver, that can be used to access the Internet. Reporting Center reports only include WAP devices if the log file shows the device used a WAP browser.
WTLS	Acronym for Wireless Transport Layer Security protocol, which is the security layer endorsed by the WAP Forum (www.wapforum.org). Its primary goal is to provide privacy, data integrity, and authentication for WAP applications.
