# Visitors Trend

This report shows how many times visitors visited your web site and how long they stayed. The information is divided into time slices based on the duration of the log file. Visits are freshly counted during each time interval in the report. Some visits may span more than one time interval, and therefore a single visit may be counted more than once. This manner of counting visits may cause the Visits Trend total visits to exceed the total visits shown on the Overview Dashboard page.

# Top Spiders

This report identifies robots, spiders, crawlers and search services visiting your site. The spiders shown in this report are based on a configured list in the product code. If your site uses JavaScript tagging to monitor traffic (for example, WebTrends SmartSource Data Collector), only spiders that use JavaScript will appear in this report.

# Glossary

The following terms are used in Reporting Center reports, and some are used throughout the World Wide Web in general.

## Glossary

<b>Active Campaign</b>	The Active Campaign is one that a visitor has seen or received that has not reached the end of its duration.
<b>Active Campaigns</b>	The Active Campaign is one that a visitor has seen or received that has not reached the end of its duration.
<b>Ad</b>	A graphic or banner which takes a visitor to another web site when clicked.
<b>Ad Click</b>	A click on an advertisement which takes a visitor to another web site.
<b>Ad View</b>	Occurs when an ad is displayed to a visitor. Once visitors have viewed an ad, they can click on it (see Ad Click). There may be more than one ad on an ad view.
<b>Authenticated Username</b>	A unique visitor tracked by user name and password rather than by IP address. You may find more authenticated user names than total visitors because several persons may be using the same IP address. Since many ISPs dynamically assign IP addresses, and since multiple visitors may use a single IP address, authentication is a much more accurate way to identify visitors.
<b>Authentication</b>	Technique that limits access to Internet or intranet resources to visitors who identify themselves by entering a user name and password.
<b>Avg. Frequency</b>	This measure is the average number of times these visitors have visited your site over their lifetime.
<b>Avg. Latency</b>	This measure is the average number of days between visits for visitors over their lifetime. Note: A zero latency means the average time between visits is less than 24 hours.
<b>Avg. Lifetime Value</b>	The average lifetime value is the average of the sum of all order values.
<b>Avg. Most Recent Purchase Amt.</b>	The average most recent purchase amount for this group of visitors.
<b>Avg. Recency</b>	The number of days since the last visit is averaged for each visit in the reporting timeframe. Note: A zero recency means you have visited within the last 24 hours, or that the average value is less than one day.
<b>Bandwidth</b>	Measure of the traffic on a site. Bandwidth is expressed as the amount of data transferred in a specified unit of time.
<b>Browser</b>	A program used to locate and view web pages. These include Netscape, Mosaic, Microsoft Internet Explorer, and others.
<b>Campaign Lifetime Value</b>	The total order value associated to the campaign.
<b>Click Through Rate</b>	Percentage of visitors who viewed an ad and also clicked on it. This is a good indication of an ad's effectiveness.
<b>Client</b>	A computer that accesses resources provided by another computer, called a server.
<b>Client Errors</b>	An error occurring due to an invalid request by the visitor's browser. Client errors are in the 400-range. See the "Status Code" glossary entry for more information.

<b>Company Database</b>	The database installed and used by Reporting Center to look up the company name, city, state, and country corresponding to a specific domain name.
<b>Cookies</b>	Files containing information about web site visitors. This information can include the visitor's user name, preferences, etc. The information is provided by visitors during their first visit to a web site. The server records this information in a text file and stores it on the visitor's hard drive. At the beginning of later visits, the server looks for a cookie and configures itself based on the information provided.
<b>Days Since First Purchase</b>	The number of days since the first purchase since these visitors have been tracked.
<b>Days Since Most Recent Purchase</b>	The number of days since the last purchase for the campaign.
<b>Destination Page</b>	A page chosen by the system administrator for Path Analysis. The Path Analysis pages track which clicks brought each visitor to the selected Destination Page.
<b>Domain Name</b>	The text name corresponding to the IP address of a computer on the Internet. For example, www.webtrends.com is a domain name.
<b>Domain Name Lookup</b>	The process of converting an IP address into a text name (for example, 204.245.240.194 is converted to www.webtrends.com).
<b>Entry File</b>	The first file requested by a visitor during a visit to your web site.
<b>Entry Page</b>	The first page viewed during a visit to your web site. If a visit consists only of hits to non-page files, that visit has no entry page. This can cause the total number of entry pages to be less than the total number of visits.
<b>Exit Page</b>	The last page viewed during a visit to your web site. If a visit consists only of hits to non-page files, that visit has no exit page. This can cause the total number of exit pages to be less than the total number of visits.
<b>FTP</b>	File Transfer Protocol. It is a standard method of sending files from one computer to another over the Internet.
<b>File Type</b>	Identifies types of files by their file extension. For example, a file named graphic.gif is identified as type ".gif."
<b>Filters</b>	A means of narrowing the scope of a report by specifying ranges or types of data to include or exclude.
<b>First Campaign</b>	The First Campaign is the one that originally drove a visitor to your site.
<b>First Campaign Lifetime Value</b>	The lifetime value is the sum of all order values.
<b>First Campaign Type</b>	User-defined category shown for the first campaign for a visitor. Examples include online banner ads, e-marketing newsletters, and direct mail campaigns.
<b>Frequency</b>	Frequency is the number of times this visitor has visited your site since this visitor has been tracked.
<b>GIF</b>	Graphics Interchange Format. It is a graphics file format commonly used in HTML documents.
<b>Geography</b>	Geography indicates the world region, country, state/province, and city.
<b>HTML</b>	Hypertext Markup Language. It is the programming language for static web pages. It usually includes hypertext links between related objects and documents.
<b>HTTP</b>	Hypertext Transfer Protocol. It is a standard method of transferring data between a Web server and a Web browser.
<b>Hit</b>	Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.
<b>Home Page</b>	The main or introductory page of a web site. The home page provides visitors with an

overview and links to the rest of the site. It often contains or links to a Table of Contents.

<b>Home Page URL</b>	The URL for the home page of the site analyzed in the report.
<b>IP Address</b>	Internet Protocol Address. It is a series of four one- to three-digit numbers separated by periods. It is used to identify a computer connected to the Internet. For example, 212.6.125.76 is an IP address.
<b>JPEG</b>	Joint Photographic Expert Group. It is a compressed graphics format common on the Internet.
<b>Latency</b>	This measure is the average number of days between visits for visitors over their lifetime. Note: A zero latency means the average time between visits is less than 24 hours.
<b>Lifetime Value</b>	This is the maximum value for all orders for this period.
<b>Log File</b>	A file created by a Web or proxy server which contains information about the activity of the server.
<b>Most Recent Campaign</b>	The Most Recent Campaign is the last one that a visitor has seen or received that has not reached the end of its duration.
<b>New Users</b>	Visitors who didn't have a cookie on their first visit, but had one during later visits.
<b>No Referrer</b>	Indicates visits to your web site that did not originate from any other site. For example, any visitor who types the URL of your site directly into their browser window fits into this category.
<b>Order Count</b>	This measure reflects the number of orders from completed purchases.
<b>Order Value</b>	This measure reflects the monetary amount generated from completed purchases.
<b>Other</b>	In tables showing a variable-length list of items, the number of items may exceed the number that can be viewed at one time. The values for the items not currently shown are added together and shown in the row named "Other."
<b>Page</b>	Any document, dynamic page, or form. Different types of profiles have different default settings for which file extensions qualify a file as a page. These settings can be changed by the Reporting Center system administrator.
<b>Page View</b>	A hit to any file classified as a page. Contrast the value for "page views" with the value for "hits," which includes hits to files of every type.
<b>Palm Browser</b>	A program used on a Palm device to display site content, similar to Netscape or Internet Explorer on PCs.
<b>Palm Device</b>	A portable personal computer small enough to fit in the palm of a person's hand. Reporting Center reports only include Palm devices if the log files shows the device used a Palm browser.
<b>Path Through Site</b>	The sequence of pages a visitor views, from the entry page to the exit page and all pages in between.
<b>Paths from Start</b>	The sequence of pages a visitor views, excluding the entry page.
<b>Paths to Destination</b>	The sequence of pages a visitor views before arriving at a selected Destination Page.
<b>Platform</b>	Refers to the operating system, such as Linux or Windows 98.
<b>Protocol</b>	An established method of exchanging data over the Internet.
<b>Purchase Conversion Funnel</b>	Analysis of the conversion process through a four-step purchase process.
<b>Purchase Count</b>	The total number of purchase transactions (not units ordered) for this visitor since the visitor has been tracked.
<b>Recency</b>	This measure is the number of days since the most recent visit for a visitor.

<b>Referrer</b>	URL of a web page that refers visitors to your site.
<b>Report Period</b>	The dates covered in the report. You may select a report period of any day, week, month, quarter, or year within the data provided by the log analysis.
<b>Returning Visitors</b>	Visitors who already had a cookie from your site before they visited.
<b>Scenario Analysis Step</b>	The name of the step in the defined scenario. The step marks progress on the path that is being monitored.
<b>Script</b>	A simple programming language used to execute specific or limited tasks. Scripts are often used for pages on the Internet to serve dynamic content and to tailor pages for individual visitors.
<b>Search Keywords</b>	A keyword is a single word from within a search phrase. In the phrase "cordless phone" the individual keywords are "cordless" and "phone".
<b>Search Phrase</b>	The search phrase a visitor used to find your site.
<b>Server</b>	A computer that hosts information available to anyone accessing the Internet or an internal intranet.
<b>Server Error</b>	An error occurring on the server. Web server errors have codes in the 500 range.
<b>Single Access Page</b>	A page on your web site that visitors open, then exit from, without viewing any other page. To qualify, the visit must be to a page with a valid document type. If the visit is to a document with a different type (such as a graphic or sound file), the file does not count as a single access page, and the visit is not included in the total. Such visits are often the result of other sites referencing a specific downloadable file or graphic on your site. In these cases, a visit may have a single hit to a non-document type file, and will not be counted in the percentage calculations.
<b>Spider</b>	An automated program which searches the internet.
<b>Status Code</b>	The HTTP status code of a file request specifies whether the transfer was successful or not, and why. These codes are defined in RFC 2616, section 6.1.1.
