# Overview Dashboard

This displays key graphs and tables that provide an overview of the entire report. When viewing through the on-demand interface, you can click on the title of a graph or table to navigate to the corresponding page.

**Visits Trend**

**Hits Trend**

**Visitor Summary**

Visitors	48,136
Visitors Who Visited Once	42,792
Visitors Who Visited More Than Once	5,344
Average Visits per Visitor	2.17

**Visit Summary**

Visits	104,405
Average per Day	3,480
Average Visit Duration	00:20:49
Median Visit Duration	00:04:51
International Visits	20.93%
Visits of Unknown Origin	0.00%
Visits from Your Country: United States (US)	79.07%

**Page Views Trend**

**Hit Summary**

Successful Hits for Entire Site	452,756
Average Hits per Day	15,091
Home Page Hits	7,701

**Page View Summary**

Page Views	291,968
Average per Day	9,732
Average Page Views per Visit	2.8

# Activity Dashboard

This displays key graphs and tables that provide an overview of the Activity chapter. When viewing through the on-demand interface, you can click on the title of a graph or table to navigate to the corresponding page.

**Hits by Hour of the Day**

**Hits by Day of the Week**

**Most Active Summary**

Most Active Date	11/6/08
Number of Hits on Most Active Date	26,326
Most Active Day of the Week	Thursday
Most Active Hour of the Day	12:00-12:59

**Least Active Summary**

Least Active Date	11/29/08
Number of Hits on Least Active Date	9,997
Least Active Day of the Week	Friday
Least Active Hour of the Day	03:00-03:59

**Activity on Weekdays Summary**

Total Hits Weekdays	326,421
Total Visits Weekdays	75,157
Average Number of <B>Visits</B> per day on Weekdays	3,757
Average Number of <B>Hits</B> per day on Weekdays	16,321

**Activity on Weekends Summary**

Total Hits Weekend	126,335
Total Visits Weekend	29,248
Average Number of <B>Visits</B> per Weekend	5,849
Average Number of <B>Hits</B> per Weekend	25,267

# Navigation Dashboard

This dashboard summarizes important information related to online navigation.

## Entry Pages

## Single-Page Visits

## Exit Pages

# Pages Dashboard

This displays key graphs and tables that provide an overview of the Pages chapter. When viewing through the on-demand interface, you can click on the title of a graph or table to navigate to the corresponding page.

**Page Views Trend**

**Pages by Visits Trend**

**Content Groups by Visits**

No data is available for this graph.

**Page View Summary**

Page Views	291,968
Average per Day	9,732
Average Page Views per Visit	2.8

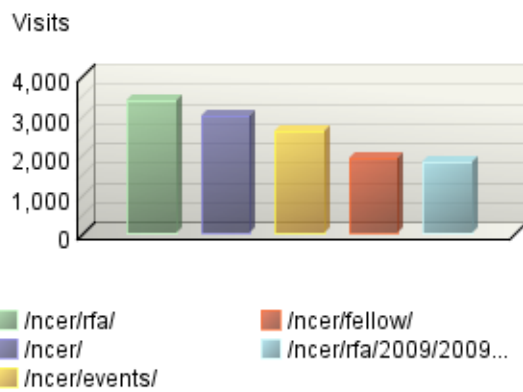

**Entry Pages**

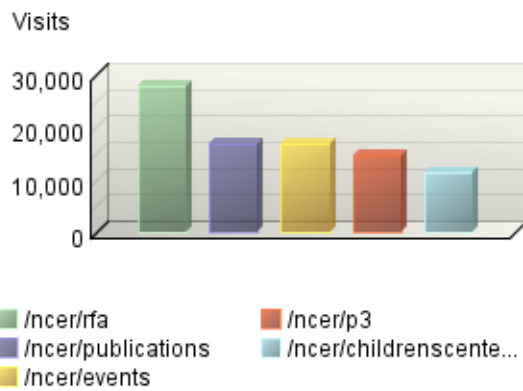

### Pages by Visits

### Exit Pages

### Directories by Visits

# Visitors Dashboard

This displays key graphs and tables that provide an overview of the Visitors chapter. When viewing through the on-demand interface, you can click on the title of a graph or table to navigate to the corresponding page.

**Active Visits Trend**

**Visitor Minutes Trend**

**Visitor Summary**

Visitors	48,136
Visitors Who Visited Once	42,792
Visitors Who Visited More Than Once	5,344
Average Visits per Visitor	2.17

**Average Length of Visit Trend**

**Visit Summary**

Visits	104,405
Average per Day	3,480
Average Visit Duration	00:20:49
Median Visit Duration	00:04:51
International Visits	20.93%
Visits of Unknown Origin	0.00%
Visits from Your Country: United States (US)	79.07%

### New Visitors Trend

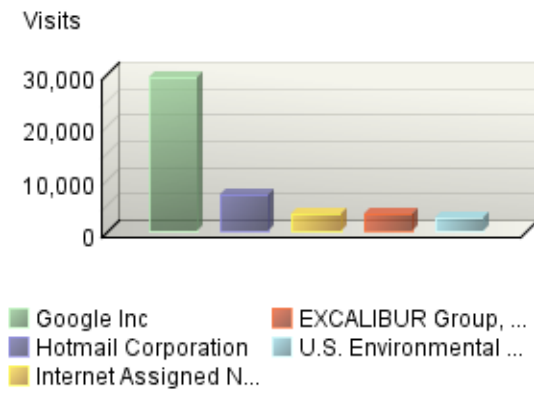

### Authenticated Usernames by Visits

No data is available for this graph.

### Visitors by Number of Visits

### Organizations by Visits

### Top Visitors by Visits

### Countries by Visits

# Referring Site

This report identifies the domain names and IP addresses that refer visitors to your site. This information will be displayed only if your server is logging this information.

**Visits by Referring Site**

**Referring Site**

	Site	Visits	% Visits
1.	Direct Traffic	70,495	67.52%
2.	<a href="http://www.google.com/">http://www.google.com/</a>	11,403	10.92%

## Referring Site - Help Card

### Column Definitions

#### Referring Sites

A web site that refers a visitor to your site by linking to it.

#### Site

The specific referring site being analyzed.

#### Visits

Number of times the specified site referred visitors to your site.

#### %

Percentage of referrals that came from the specified site.

#### Direct Traffic

Represents to the web site with no referrer as one of the following: 1) the visitor typed the domain name directly into their browser, 2) the visitor bookmarked the site, 3) the visitor clicked on an email, shortcut, or other direct link, 4) Firewalls and/or proxies stripped out the referrer and replaced it with a dash "-".

Note: If "Direct Traffic" is 100% of all your traffic, then you are probably not logging the "referrer" field in your log files. Please see your manual or the WebTrends Knowledgebase to enable extended logging on your web servers.

#### Hidden-Referrer

A value indicating that Internet security software such as Zone Alarm Pro, Symantec's Norton Internet Security, or a proxy server modified a web request to mask the referring URL.

### Report Descriptions

You can use this page to determine which sites are referring the most visitors to your site. This can help when considering the most effective ways and places to attract visitors.

# Referring Domain

This report identifies the top-level domains that refer visitors to your site. This information will be displayed only if your server is logging this information.

**Visits by Referring Domain**

**Referring Domain**

	Domain	Visits	% Visits
1.	Direct Traffic	70,495	67.52%

## Referring Domain - Help Card

### Column Definitions

#### Referring Domain

A web site that refers a visitor to your site by linking to it.

#### Domain

Top-level domains to which belong the web sites which refer visitors to your site by linking to it.

#### Visits

Number of times the specified domain referred visitors to your site.

#### %

Percentage of referrals that came from the specified domain.

#### Direct Traffic

Represents to the web site with no referrer as one of the following: 1) the visitor typed the domain name directly into their browser, 2) the visitor bookmarked the site, 3) the visitor clicked on an email, shortcut, or other direct link, 4) Firewalls and/or proxies stripped out the referrer and replaced it with a dash "-".

Note: If "Direct Traffic" is 100% of all your traffic, then you are probably not logging the "referrer" field in your log files. Please see your manual or the WebTrends Knowledgebase to enable extended logging on your web servers.

#### Hidden-Referrer

A value indicating that Internet security software such as Zone Alarm Pro, Symantec's Norton Internet Security, or a proxy server modified a web request to mask the referring URL.

### Report Descriptions

You can use this page to determine which domains are referring the most visitors to your site. This can help when considering the most effective ways and places to attract visitors.

# Referring Page

This report provides the pages from the sites with links to your site. This information will only be displayed if your server is logging the referrer information.

**Visits by Referring Page**

**Referring Page**

	Page	Visits	% Visits
1.	Direct Traffic	70,495	67.52%
2.	<a href="http://www.google.com/search">http://www.google.com/search</a>	11,002	10.54%

## Referring Page - Help Card

### Column Definitions

#### Pages

Any displayed page. You can specify for each profile the types of files that qualify as a page. These settings can be changed by the WebTrends administrator.

#### Visits

Number of visitors referred from the specified URL.

#### %

Percentage of referred visitors who came from the specified site.

#### Direct Traffic

Represents to the web site with no referrer as one of the following: 1) the visitor typed the domain name directly into their browser, 2) the visitor bookmarked the site, 3) the visitor clicked on an email, shortcut, or other direct link, 4) Firewalls and/or proxies stripped out the referrer and replaced it with a dash "-".

Note: If "Direct Traffic" is 100% of all your traffic, then you are probably not logging the "referrer" field in your log files. Please see your manual or the WebTrends Knowledgebase to enable extended logging on your web servers.

#### Hidden-Referrer

A value indicating that Internet security software such as Zone Alarm Pro, Symantec's Norton Internet Security, or a proxy server modified a web request to mask the referring URL.

### Report Descriptions

You can use this information to determine the sites that provide the most referrals to your site. This can help when considering the most effective ways to attract visitors.

# Search Phrases

This report identifies search phrases that led the most visitors to your site, and for each phrase, which search engines led visitors to the site.

## Search Phrases - Help Card

### Column Definitions

#### Phrase

The search phrase a visitor used to find your site.

#### Engines

The specific search engine being analyzed in conjunction with the phrase in the adjacent column.

#### Referrals

The number of visits to your site from visitors, who were referred by using the specified search engine and search phrases.

#### %

Percentage of visitors referred from search engines who used the specified search engine and phrase.

### Report Descriptions

How are people getting to your site? Use this report to find out if your visitors are using the search phrases you expect. Do you need to use different phrases in page titles to make it easier for people to find your site with search engines?

# Search Keywords

This report identifies keywords that led the most visitors to the site and, for each keyword, which search engines led visitors to the site.

## Search Keywords

## Search Keywords - Help Card

### Column Definitions

#### Keywords

The specific keywords being analyzed. To see the entire search strings entered by visitors, see the Search Phrases page.

#### Engines

The specific search engine being analyzed in conjunction with the keyword in the adjacent column.

#### Referrals

The number of hits from visitors referred to your site with the specified keywords.

% Percentage of referred visitors who used the specified search engine and keyword.

### Report Descriptions

At the most basic level, this section tells you which search keywords are being used most frequently to find your site. You also may find that some search engines are referring visitors to your site with the keywords you expect and that other search engines are not.

# Visitors Dashboard

This displays key graphs and tables that provide an overview of the Visitors chapter. When viewing through the on-demand interface, you can click on the title of a graph or table to navigate to the corresponding page.

# Top Visitors

This report identifies the IP address, domain name, or cookie of each visitor, and identifies the visitor's activity level on the site. If you use cookies to track visits, WebTrends can differentiate between hits from different visitors with the same IP address.

## Top Visitors - Help Card

### Column Definitions

#### Visitor

The IP address, domain name, or cookie of the visitor.

#### Visits

Number of times the specified visitor visited your site. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Hits

Number of hits attributed to the specified visitor. Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

### Report Descriptions

Consider the visitors who use the site most, and tailor your site to their interests and needs. If your site is an intranet, notice which employees use the site most, and find out what they like about it. You might also get feedback from those who use it the least and find out what they are looking for.

**Note:** If a visitor has a dynamic IP address, or if a group of visitors are behind a proxy server or firewall, this data might be misleading. In the case of a dynamic IP address, multiple IP addresses could be shown for a single visitor, and in the case of a firewall or proxy server, one IP address could be used by more than one visitor.

# Visitors by Number of Visits

This report shows the distribution of visitors based on how many times each visitor visited your site.

Visitors by Number of Visits

Visitors by Number of Visits

Number of Visits	Visitors	% Visitors
1 visit	42,792	88.90%
2 visits	3,023	6.28%

## Visitors by Number of Visits - Help Card

### Column Definitions

#### Number of Visits

The number of visits by each visitor during the period of the report.

#### Visitors

Number of individuals who came to your site the amount of times specified in the Number of Visits column.

%

Percentage of visitors who came to your site the amount of times specified in the Number of Visits column.

### Report Descriptions

This information can indicate whether or not your site compels visitors to return. Updating web site content is one way to draw return visitors.

# Visitors Trend

This report shows how many times visitors visited your web site and how long they stayed. The information is divided into time slices based on the duration of the log file. Some visits may span more than one time interval, and will be counted in each interval where they appear. The sum of visits for all intervals may therefore exceed the total visits shown in the Overview Dashboard page.

### Visitors Trend - Help Card

#### Column Definitions

##### Time Interval (hour, day, etc.)

A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.

##### Active Visits

Number of active visits to your web site. If a visit spans multiple time intervals, it is counted in each interval. Every visit from a visitor is counted, even if the same visitor came to your web site multiple times. Also included are zero-length visits. A zero-length visit occurs when all hits for that visit are logged with the exact same time stamp.

##### Visitors

Number of individuals who visited your site during the report interval. For a daily report, if someone visits more than once, that person is counted only the first time he or she visits. Values of "N/A" indicate that the detailed data required is not available. This situation occurs when the Top Visitors report has reached its configured limit or when reports for the corresponding period are turned off. For non-daily reports, the visitor measure total is "N/A" since the same visitor can be counted in multiple intervals.

##### New Visitors

Number of visitors who had never visited your web site before.

##### Average Visit Duration

The average amount of time visitors spent at your site within the given time interval. The data is formatted as hh:mm:ss (hours:minutes:seconds). The average visit duration is calculated by dividing the value from the Visitor Minutes column by the value from the Active Visits column.

##### Visitor Minutes

Number of minutes your web site was viewed, regardless of who was viewing it.

### Report Descriptions

Use this page to determine which times your web site is busiest.

Daily averages cut off visits that continue into the next day, whereas weekly averages do not. Therefore, weekly averages may appear a bit longer than daily averages.

**Total** - The total for the column. Visits may span more than one time interval and are counted for each hour in this report. We therefore do not provide a total, which would be misleading.

**Average** - This row gives the average for each column.

# Visits Trend

This report shows how the number of visits to your site changes over the course of the report period.

### Visits Trend - Help Card

#### Column Definitions

##### Time Interval (hour, day, etc.)

A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.

##### Visits

Number of visits to your site during the specified time interval. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

##### %

Percentage of visits to your site during the specified time interval compared with all visits to your site during the report period.

#### Report Descriptions

Periods of less activity can be considered good times for maintenance and content improvement.

# Organizations

If you have enabled the WebTrends GeoTrends Database for this profile, this page will list the most active companies and other organizations visiting your web site.

## Organizations - Help Card

### Column Definitions

#### Organization

The name of the organization, which could be a company, a government agency, a school, or any other type of organization. This name was determined by either of the following methods:

- The visitor's IP address matched an Intranet Domain configuration within the Admin Console.
- Looking up the visitor's IP address in the WebTrends GeoTrends Database.

#### Unknown

The organization could not be determined.

#### Domain Name

The text name (for example, netiq.com) corresponding to the visitor's IP address. The domain name can be determined from any of the following methods:

- The domain was logged by the web server.
- The IP address matched an Intranet Domain configuration within the Admin Console.
- DNS resolution.

IP addresses that do not resolve to a domain by these methods are categorized as follows:

- Reserved IP Address - The IP address falls within a block of reserved addresses. For example, 192.168.x.x and 10.x.x.x addresses are reserved for private networks.
- Unresolved IP Address - Category for IP addresses that did not resolve to a domain (perhaps because DNS resolution was disabled).

The domain name shown is the second-level domain name, such as netiq.com. For example, all visitors from sales.netiq.com, us.sales.netiq.com, and service.netiq.com are combined in the statistics for netiq.com. If the top-level domain name is a country code, then the third-level domain name is shown also (for example, anycompany.com.au).

#### Visits

Number of visits to your site from this organization. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Hits

Number of hits to your site from this organization. Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

### **Report Descriptions**

Use this information when you are interested in an organization as a whole, such as NetIQ Corporation. You can identify the major domain names from each company, such as netiq.com and webtrends.com from NetIQ.

# Domain Names

This report lists the domain name that generates the most activity to your web site.

**Domain Names by Visits**

**Domain Names**

	Domain Name	Visits	% Visits	Hits
1.	<a href="#">googlebot.com</a>	28,866	27.65%	36,568

## Domain Names - Help Card

### Column Definitions

#### Domain Name

The text name (for example, netiq.com) corresponding to the visitor's IP address. The domain name can be determined from any of the following methods:

- The domain was logged by the web server.
- The IP address matched an Intranet Domain configuration within the Admin Console.
- DNS resolution.

IP addresses that do not resolve to a domain by these methods are categorized as follows:

- Reserved IP Address - The IP address falls within a block of reserved addresses. For example, 192.168.x.x and 10.x.x.x addresses are reserved for private networks.
- Unresolved IP Address - Category for IP addresses that did not resolve to a domain (perhaps because DNS resolution was disabled).

The domain name shown is the second-level domain name, such as netiq.com. For example, all visitors from sales.netiq.com, us.sales.netiq.com, and service.netiq.com are combined in the statistics for netiq.com. If the top-level domain name is a country code, then the third-level domain name is shown also (for example, anycompany.com.au).

#### Visits

Number of visits to your site from this domain name. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Hits

Number of hits to your site from this domain name. Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

### Report Descriptions

Use this information when you are interested in high-level domain names of visitors generating the most activity to your web site.

# Top-Level Domain Types

This report provides a breakdown of top-level domain types.

Top-Level Domain Types by Visits

Top-Level Domain Types

Top-Level Domain Types	Visits	% Visits	Hits
Commercial	46,442	44.48%	107,372
Unresolved IP Address	21,729	20.81%	132,102
Network	19,188	18.38%	124,989
Unknown	8,383	8.03%	40,799
Education	6,644	6.36%	31,012
Government	1,005	0.96%	2,876
Organization	609	0.58%	12,239
Military	295	0.28%	1,059
Informational	51	0.05%	128
ARPANET	36	0.03%	80
International	17	0.02%	73
Business	6	0.01%	27
<b>Total</b>	<b>104,405</b>	<b>100.00%</b>	<b>452,756</b>

items 1-12 of 12

## Top-Level Domain Types - Help Card

### Column Definitions

#### Reserved IP Address

The IP address falls within a block of reserved addresses. For example, 192.168.x.x and 10.x.x.x addresses are reserved for private networks.

#### Unresolved IP Address

Category for IP addresses that did not resolve to a domain (perhaps because DNS resolution was disabled).

#### Unknown

The domain suffix did not match any of the top-level domain categories.

#### Top-Level Domain

The suffix of a domain name. A top-level domain can be based on the type of organization (.com, .edu, .museum, .name, etc) or it can be a country code (.uk, .de, .jp, .us, etc.). The top-level domain can be used to identify the type of web site. The following is a partial list of how this report categorizes top-level domains:

- ARPANET: .arpa
- Commercial: .com .co .com.[country code] .co.[country code] .firm.co .firm.ve .ltd.uk .info .biz
- Education: .edu .edu.[country-code] .ed.[country code] .ac.[country code] .school.[country code] .k12.[country code] .re.kr .sch.uk .edunet.tn
- International: .int .int.co .int.ve .intl.tn
- Government: .gov .gov.[country code] .gove.[country code] .go.[country code]
- Military: .mil .mil.[country code]
- Network: .net .ad.jp .ne.kr .net.[country code]
- Organization: .org .or .org.[country code] .or.[country code]
- Personal: .name

#### Visits

Number of visits to your site from the specified top-level domain. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Hits

Number of hits to your site from the specified top-level domain. Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

### **Report Descriptions**

Consider which types of organizations are interested in your site, and consider how you can interest other types of organizations.

**Note:** This information can be displayed only if reverse DNS lookups have been performed. Even when DNS lookups are performed, some IP addresses cannot be resolved to a domain name.

**Total** - This represents the total visits or hits where there was sufficient information to identify the top-level domain. This number may be less than the total activity overall.

# Regions

This report identifies the top geographic regions of the visitors to your site.

**Regions by Visits**

**Regions**

Regions	Visits	% Visits
1. North America	84,345	80.79%
2. Western Europe	7,383	7.07%
3. Asia	6,700	6.42%
4. Middle East	1,279	1.23%
5. Australia	1,141	1.09%
6. Eastern Europe	754	0.72%
7. Northern Europe	725	0.69%
8. South America	662	0.63%
9. Eastern Africa	564	0.54%
10. Northern Africa	246	0.24%
11. Caribbean Islands	227	0.22%
12. Southern Africa	131	0.13%
13. Western Africa	103	0.10%
14. Pacific Islands	74	0.07%
15. Central America	65	0.06%
16. Central Africa	6	0.01%
<b>Total</b>	<b>104,405</b>	<b>100.00%</b>

items 1-16 of 16

## Regions - Help Card

### Column Definitions

#### Regions

The geographic part of the world where visitors to your web site are located. "Region Unspecified" represents visitors whose geographic region could not be determined. "Region Unknown" represents visitors whose country has been determined but not identified with a specific region. If the WebTrends GeoTrends Database is turned on for this profile, the region is determined by looking up the visitor's IP address in this database. If GeoTrends is not enabled, the region will be determined from the domain name.

#### Visits

Number of visits from this geographic region. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

%

Percentage of total visits that were from this geographic region.

---

### Report Descriptions

This information can help you meet the needs of your target audience as well as discover new audiences. Consider how you can make the content comprehensive and relevant to an international audience.

**Note:** Use this information carefully because it is based on Internet registration, and may not always be an accurate identifier of the visitor's actual location.

# Countries

This report identifies the top countries of the visitors to your site.

## Countries - Help Card

### Column Definitions

#### Countries

If the WebTrends GeoTrends Database is turned on for this profile, the country is determined by looking up the visitor's IP address in this database. If GeoTrends is not enabled, the country will be determined from the domain name.

#### Visits

Number of visits from the specified country. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### %

Percentage of total visits from the specified country.

#### Unknown Origin

The country associated with the visitor's domain name could not be determined.

### Report Descriptions

This information can help you meet the needs of your target audience as well as discover new audiences. Consider how you can make the content comprehensive and relevant to an international audience.

**Note:** Use this information carefully because it is based on Internet registration, and may not always be an accurate identifier of the visitor's actual location.

# North American States and Provinces

If you have enabled the WebTrends GeoTrends Database for this profile, this page will list the states and provinces of North America with your most active visitors.

**Pages - Help Card**

### Column Definitions

#### Pages

Any displayed page. You can specify for each profile the types of files that qualify as a page. These settings can be changed by the WebTrends administrator.

#### Visits

Number of visits to this page. A visit is a series of actions that begins when a visitor views the first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Views

Number of times this page was viewed by visitors.

#### Average Time Viewed

Average length of time the specified page was viewed. (The format is hh:mm:ss - hours:minutes:seconds.)

#### Average Time to Serve

Average amount of time (in milliseconds) it took to serve each document during the specified time interval. The time to serve spans from the time the server got a page request until it transmitted all the data.  
**Note:** Zero values in this column probably indicates that your web server is not logging Time to Serve information.

---

### Report Descriptions

Pages with good content and design are more likely to attract visitors and be revisited. Less popular pages on a site can be made more appealing by improving the content or incorporating design elements similar to that on the more important pages. Always remember that people are far more interested in content than in design, and average view times can help determine which content is most important to your visitors.

# Content Groups

This report identifies the most popular groups of web site pages and how often they were visited.

## Content Groups by Visits Trend

No data is available for this graph.

## Content Groups by Visits

No data is available for this graph.

## Content Groups

No data is available for this table.

### Content Groups - Help Card

#### Column Definitions

##### Content Group

A defined group of web pages with specific things in common, such as the same types of products, services, or information.

##### Visits

Number of visits where the visitor viewed at least one page in the specified content group. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

##### Hits

Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

### **Report Descriptions**

The information on this page can show you which content groups were most popular. This will reveal the reasons people visit your web site, and what is most interesting and least interesting to them.

# Directories

This report lists the most commonly accessed directories on your web site. This information can help determine the types of data most often requested.

**Directories by Visits Trend**

## Directories - Help Card

### Column Definitions

#### Path to Directory

The full URL path to the directory being analyzed.

#### Visits

Number of visits to pages within the specified directory. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

#### Hits

Each file requested by a visitor registers as a hit. There can be several hits on each page. While the volume of hits reflects the amount of server traffic, it is not an accurate reflection of the number of pages viewed.

#### Kbytes Transferred

Number of kilobytes of data transferred by the server from the specified directory to your visitors.

### Report Descriptions

This report indicates the content visitors are most interested in. Use this information to determine which content areas to develop further, which areas to focus on less, and how you can arrange your content most effectively. If the table is sorted by kilobytes of data transferred, this page reveals what kind of data the server spends the most time transferring, and may suggest different ways to organize your data, or different ways to distribute the server load if you have more than one server.

# Downloaded Files

This report identifies the most popular files downloaded from your site.

**Downloaded Files Trend**

## Downloaded Files - Help Card

### Column Definitions

#### Files

The path and filename of the file being analyzed.

#### Downloads

Number of times the specified file was downloaded by a visitor. If an error occurred during a transfer, the transfer is not counted. Note that downloaded PDF files may cause an inflated count. See KnowledgeBase article NETIQKB2494 for more information.

#### Visits

Number of visits that accessed the specified files. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

### Report Descriptions

This information shows you the most popular downloadable files on your web site. Files that don't appear on the list, or appear low on the list, may require maintenance such as decreasing the file size, improving link placement, or elimination to make room for more popular content.

# Accessed File Types

This report identifies the types of files accessed on your site and the total number of kilobytes of data transferred for each file type. Cached requests and erred hits are excluded from the totals.

**Accessed File Types - Help Card**

**Column Definitions**

**File Type**  
Identifies types of files by their file extension. For example, a file named graphic.gif is identified as type "gif."

**Files**  
Number of files of the specified type accessed by visitors to your site.

**Kbytes Transferred**  
Number of kilobytes of data transferred for all files of the specified type.

---

**Report Descriptions**

This report provides general statistics for the type of data that visitors access on your site.

# Page Views Trend

This report shows how the number of page views to your site changes over the course of the report period.

### Page Views Trend - Help Card

#### Column Definitions

##### Time Interval (hour, day, etc.)

A one-year report displays monthly time increments. A one-quarter report displays weekly time increments. A one-month report or a one-week report displays daily time increments. A daily report displays hourly time increments. An hour-long interval marked 12:00, for example, includes all activity between 12:00 and 12:59.

##### Page View

A hit to any file classified as a page. In order to view a web page with embedded images, for example, a browser must retrieve multiple files. The page and its embedded files counts as a single page view.

##### %

Percentage of total page views that occurred during the specified time interval.

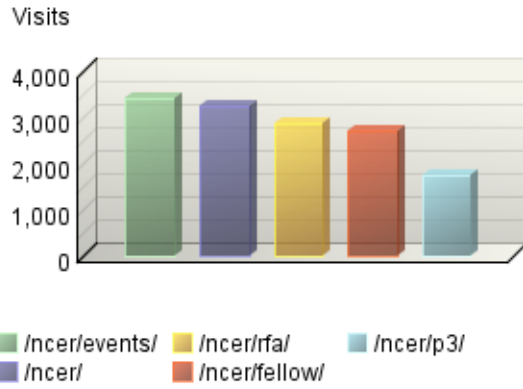

#### Report Descriptions

Periods of less activity can be considered good times for maintenance and content improvement.

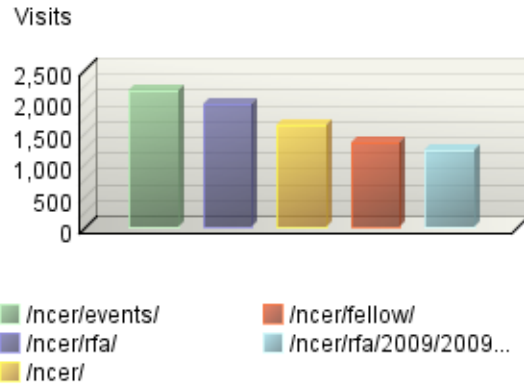

# Navigation Dashboard

This dashboard summarizes important information related to online navigation.

## Entry Pages

## Single-Page Visits

## Exit Pages

# Entry Pages

This report shows the first or "entry" pages viewed in all visits. Every visit has one and only one Entry Page. A visit's entry page may or may not be the "home page." The Entry Page for a visit can depend on how a visitor arrived at your site: they may type an address into a browser, use a bookmark they made on a previous visit, click on a link on another site, click on a search engine results page, click on an on-line ad, or click on a link in an e-mail. Each of these links can point to your home page or any other page on your site

**Entry Pages - Help Card**

 **Column Definitions**

**Entry Page**  
The first page in a given visit. Every visit has one and only one entry page.

**Visits**  
For each entry page, the total number of visits that began with that entry page, during this time period.

**%**  
For each page (row), the percentage of all visits to the site that went to that particular page during the report time period.

---

## Report Descriptions

### Briefly:

A visit can begin on a given page if a visitor:

- types the URL of the page in their browser then clicks on "Go"
- clicks on a bookmark to the page (stored from a previous visit)
- clicks on a link on a different site that points to the file. The link can appear to be text or an image, such as a banner ad.
- clicks on a link to the page in an e-mail. Again, the link can appear to be text or an image.
- clicks on a link on a search engine results page that points to this page
- activates an applet on another site or in a program that transfers them to this page

Finally, a visit can seem to begin on a given page if a visitor was already on the site, but allowed more than 30 minutes to elapse between clicks. When such a pause occurs, WebTrends counts two visits, one before and one after the pause. In other words, WebTrends considers a timeout of more than 30 minutes to be a de facto end of a visit. Consequently, the first page visited after the long pause will appear as an Entry Page for a new visit. Likewise, the last Page Viewed before the long pause will appear in the Exit Pages report. (*Note: the timeout is configurable in WebTrends via Options*)

If your site has more than one URL for a certain page, for example, /home.html and /home.asp, consider combining their statistics to get an accurate picture of how frequently that page's content is seen.

### Uses and Interpretation:

Look at each page on the Entry Pages report and ask yourself whether it is suitable as the first page a visitor sees. For example, it can be argued that entry pages should:

- identify the site and/or brand
- have a clear link to the home page
- show the same navigation bars as the rest of the site

If a page that's frequently an entry page doesn't do all these things, consider modifying it to conform with best practices.

### Other relevant reports and analyses:

1. Referring URLs for these entry pages.
2. Relationship to Exit Pages and Single Page Visits.
3. Correcting for multiple URLs for the same Page View.
