National Center for Education Statistics

Gary W. Phillips
Deputy Commissioner

The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to:

ACKNOWLEDGMENTS

Many people have contributed in one way or another to the development of the *Digest*. Thomas D. Snyder was responsible for the overall development and preparation of this edition of the *Digest*, which was prepared under the general direction of Valena Plisko.

Charlene M. Hoffman provided technical assistance in all phases of its preparation and was responsible for chapter 4, "Federal Programs for Education and Related Activities," and for tables on degrees conferred. William Sonnenberg provided statistical computing consultation on all phases of the report. Celestine Davis provided statistical assistance on a variety of materials. Debra Gerald and William Hussar prepared projections of school enrollment and finance statistics. William Hussar conducted a technical review. Marilyn McMillen, Chief Statistician of the National Center for Education Statistics (NCES), conducted the adjudication.

A number of individuals outside of NCES also expended time and effort on the *Digest*. Ben Young, Gray King, Satoshi Watanabe, Stephen Provasnik, Charmaine Llagas, and Kathryn Hoffman of the American Institutes for Research provided research and statistical analysis. Ellen Harkavy, Thea Kruger,

Mary McLaughlin, David Miller, Michael Planty, Jason Sellers, and Molly Soule of the Education Statistics Services Institute (ESSI) of the American Institutes for Research assisted with the technical review of the document. Linda Darby in Media and Information Services provided editorial assistance. Jerry Fairbanks of ESSI managed the typesetting.

This year's edition of the *Digest* has received extensive reviews by several other individuals within and outside of the U.S. Department of Education. We wish to thank them for their time and expert advice. W. Vance Grant of the Office of Educational Research and Improvement and Rosemary Clark, U.S. Census Bureau, reviewed the entire document. NCES staff who reviewed portions of the manuscript were: Ilona Berkovits, Stephen Broughman, Janis Brown, Patricia Brown, Chris Chapman, Steve Gorman, Kerry Gruber, Frank Johnson, Frank Morgan, Taslima Rahman, John Sietsema, Jeff Williams, and Beth Young. The Office of the Deputy Secretary, Office of Intergovernmental and Interagency Affairs, Office of Vocational and Adult Education, Office for Civil Rights, and the Planning and Evaluation Service conducted agency reviews.

Foreword

The 2001 edition of the *Digest of Education Statistics* is the 37th in a series of publications initiated in 1962. (The *Digest* has been issued annually except for combined editions for the years 1977–78, 1983–84, and 1985–86.) Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from prekindergarten through graduate school. The *Digest* includes a selection of data from many sources, both government and private, and draws especially on the results of surveys and activities carried out by the National Center for Education Statistics (NCES). To qualify for inclusion in the *Digest*, material must be nationwide in scope and of current interest and value. The publication contains information on a variety of subjects in the field of education statistics, including the number of schools and colleges, teachers, enrollments, and graduates, in addition to educational attainment, finances, federal funds for education, libraries, and international education. Supplemental information on population trends, attitudes on education, education characteristics of the labor force, government finances, and economic trends provides background for evaluating education data. Although the *Digest* contains important information on federal education funding, more detailed information on federal activities is available from federal education program offices. For example, the Office of Bilingual Education and Minority Languages Affairs supports the National Clearinghouse on Bilingual Education, which compiles information on students and teachers involved in bilingual education.

The *Digest* contains seven chapters: “All Levels of Education,” “Elementary and Secondary Education,” “Postsecondary Education,” “Federal Programs for Education and Related Activities,” “Outcomes of Education,” “International Comparisons of Education,” and “Libraries and Educational Technology.”

Preceding these chapters is an introduction that provides a brief overview of current trends in American education, which supplements the tabular materials in chapters 1 through 7. The *Digest* concludes with an appendix that is divided into several sections. For example, information on the structure of the statistical tables is contained in the “Guide to Tabular Presentation.” The “Guide to Sources” provides a brief synopsis of the surveys used to generate the tabulations for the *Digest*. Also, a “Definitions” section is included to help readers understand terms. In addition to updating many of the statistics that have appeared in previous years, this edition contains a significant amount of new material, including:

- Use of various instructional approaches by kindergarten teachers, table 50;
- Pupil/teacher ratio in public schools, by level and size of school, table 64;
- Percent distribution of elementary and secondary school children, by average grades, table 139.

Beginning in 2002, updates to some tables from the *Digest of Education Statistics* will appear on the NCES Web Site prior to printing. The *Digest* and other NCES reports can be accessed from <http://nces.ed.gov>. In particular, updates of tables based on the new Schools and Staffing Survey, will be posted to the *Digest* Web Site in the second quarter of 2002.

Figures

1.	The structure of education in the United States	7
2.	Enrollment and total expenditures in current and constant dollars, by level of education: 1960–61 to 2000–01	8
3.	Years of school completed by persons 25 years old and over: 1940 to 2000	9
4.	Years of school completed by persons 25 to 29 years of age: 1940 to 2000	9
5.	Highest level of education attained by persons 25 years and older: March 2000	10
6.	Items most frequently cited by the public as a major problem facing the local public schools: 1980 to 2001	10
7.	Preprimary enrollment of 3- to 5-year-olds, by attendance status: October 1970 to October 2000	44
8.	Enrollment, number of teachers, pupil/teacher ratios, and expenditures in public schools: 1960–61 to 2000–01	45
9.	Percentage change in public elementary and secondary enrollment, by state: Fall 1995 to fall 2000	46
10.	Average annual salary for public elementary and secondary school teachers: 1970–71 to 2000–01	46
11.	Sources of revenue for public elementary and secondary schools: 1970–71 to 1998–99	47
12.	Current expenditure per pupil in average daily attendance in public elementary and secondary schools: 1970–71 to 2000–01	47
13.	Enrollment, degrees conferred, and expenditures in degree-granting institutions: 1960–61 to 2000–01	200
14.	Percentage change in total enrollment in degree-granting institutions, by state: Fall 1990 to fall 1999	201
15.	Enrollment in degree-granting institutions, by age: Fall 1970 to fall 2011	201
16.	Full-time-equivalent students per staff member in public and private degree-granting institutions: 1976 and 1999	202
17.	Trends in bachelor's degrees conferred in selected fields of study: 1989–90, 1994–95, and 1999–2000	202
18.	Sources of current-fund revenue for public degree-granting institutions: 1996–97	203
19.	Sources of total revenue for private not-for-profit degree-granting institutions: 1996–97	203
20.	Federal on-budget funds for education, by agency: Fiscal year 2001	419
21.	Federal on-budget funds for education, by level or other educational purpose: 1965 to 2001	420
22.	Department of Education outlays, by type of recipient: Fiscal year 2001	420
23.	Labor force participation of persons 20 years old and over, by age and highest level of education: 2000	444

24. Unemployment rates of persons 25 years old and over, by highest level of education: 2000	445
25. Labor force status of 1998–99 high school dropouts and graduates not enrolled in college: October 2000	445
26. Median annual income of persons with income 25 years old and over, by highest degree attained and sex: 1999	446
27. Salaries of recent bachelor's degree recipients 1 year after graduation, by field: 1987, 1991, and 1994	446
28. Percent change in enrollment, by area of the world and level of education: 1990 to 1997	463
29. Public direct expenditures for education as a percentage of the gross domestic product: Selected countries, 1998	464
30. Bachelor's degree recipients as a percentage of population of the theoretical age of graduation: Selected countries, 1999	464
31. Average mathematics performance of other countries compared with the United States: 1995	465
32. Average science performance of other countries compared with the United States: 1995	465
33. Percent of all public schools and instructional rooms having Internet access: Fall 1994 to fall 2000	488

Tables

1. All Levels of Education

Enrollment, Teachers, and Schools

1. Estimated number of participants in educational institutions, by level and control of degree-granting institution: Fall 2001	11
2. Enrollment in educational institutions, by level and control of institution: Fall 1980 to fall 2005	11
3. Enrollment in educational institutions, by level and control of institution: 1869–70 to fall 2011	12
4. Teachers in elementary and secondary schools, and senior instructional staff in degree-granting institutions, by control of institution: Fall 1970 to fall 2011	13
5. Educational institutions, by level and control of institution: 1980–81 to 1999–2000	14

Enrollment Rates

6. Percent of the population 3 to 34 years old enrolled in school, by age: April 1940 to October 2000	15
7. Percent of the population 3 to 34 years old enrolled in school, by race/ethnicity, sex, and age: October 1975 to October 2000	16

Educational Attainment

8. Years of school completed by persons age 25 and over and 25 to 29, by race/ethnicity and sex: 1910 to 2000	17
--	----

9.	Highest level of education attained by persons age 18 and over, by age, sex, and race/ethnicity: March 2000	18
10.	Number of persons age 18 and over who hold a bachelor's or higher degree, by field of study, sex, race/ethnicity, and age: 1996	19
11.	Educational attainment of persons 18 years old and over, by state: 1990 to 2000	20
12.	Educational attainment of persons 25 years old and over, by state and race/ethnicity: April 1990	21
13.	Educational attainment of persons 25 years old and over, for the 25 largest states, by sex: March 2000	22
14.	Educational attainment of persons 25 years old and over, for the 15 largest metropolitan areas, by sex: March 2000	22

Population

15.	Estimates of resident population, by age group: July 1, 1970 to July 1, 2000	23
16.	Estimates of school-age resident population, by race and sex: July 1, 1970 to July 1, 2000	23
17.	Estimated total and school-age resident populations, by state: 1970 to 1999	24

Characteristics of Families with Children

18.	Families, by family status and presence of own children under 18: 1970 to 2000	25
19.	Characteristics of families with own children under 18, by family status and race/ethnicity: 2000	26
20.	Household income and poverty rates, by state: 1990 and 1997–99	27
21.	Poverty status of persons, families, and children under 18, by race/ethnicity: 1959 to 1999	28

Opinions on Education

22.	Average grade that the public would give the schools in their community and in the nation at large: 1974 to 2001	29
23.	Items most frequently cited by the general public as a major problem facing the local public schools: 1970 to 2001	29
24.	Public opinion on the difference in education quality and funding within states: 1993 and 2001	30
25.	Percent of elementary and secondary school children whose parents are involved in school activities, by selected child, parent, and school characteristics: 1996 and 1999	30
26.	Percent of elementary school children whose parents are involved in education-related activities, by selected child, parent, and school characteristics: 1996 and 1999	31
27.	Public's level of confidence in various institutions: 1996 and 1998	32

Charitable Contributions

28. Percentage of households contributing to education and other charitable organizations and average annual donation, by type of charity: 1989, 1991, 1993, and 1995 32

Finances

29. Total expenditures of educational institutions related to the gross domestic product, by level of institution: 1929–30 to 2000–01 33
30. Total expenditures of educational institutions, by level and control of institution: 1899–1900 to 2000–01 34
31. Governmental expenditures, by level of government and function: 1970–71 to 1996–97 35
32. Direct general expenditures of state and local governments for all functions and for education, by level and state: 1997–98 36
33. Direct general expenditures per capita of state and local governments for all functions and for education, by level and state: 1997–98 37
34. Gross domestic product, state and local expenditures, personal income, disposable personal income, median family income, and population: 1929 to 2000 38
35. Gross domestic product deflator, Consumer Price Index, education price indexes, and federal budget composite deflator: 1919 to 2001 39

2. Elementary and Secondary Education**Enrollment**

36. Historical summary of public elementary and secondary school statistics: 1869–70 to 1998–99 48
37. Enrollment in public elementary and secondary schools, by level and state: Fall 1986 to fall 2000 50
38. Enrollment in public elementary and secondary schools, by grade and state: Fall 1999 52
39. Enrollment in public elementary and secondary schools, by grade and state: Fall 1998 54
40. Enrollment in public elementary and secondary schools, by grade: Fall 1985 to fall 1999 56
41. Average daily attendance in public elementary and secondary schools, by state: 1969–70 to 1998–99 57
42. Enrollment in public elementary and secondary schools, by race/ethnicity and state: Fall 1986 and fall 1999 58
43. Enrollment of 3-, 4-, and 5-year-old children in preprimary programs, by level and control of program and by attendance status: October 1965 to October 2000 59
44. Percentage distribution of preschool children under 6 years old, by type of primary nonparental care arrangement, and average hours in center-based programs, by child and family characteristics: 1995 60
45. Child care arrangements of preschool children, by age, race/ethnicity, and household income: 1991, 1995, and 1999 61

46.	Children of prekindergarten through second grade age, by enrollment status, maternal characteristics, and household income: 1991, 1995, and 1999	62
47.	Participation of public kindergarten children in selected activities 5 days a week, by length and size of class and teacher preparation: Spring 1993	62
48.	Children's mean reading, mathematics and general knowledge performance in kindergarten and first grade, by child and family characteristics: Fall 1998, spring 1999, fall 1999, and spring 2000	63
49.	Percentage of kindergarten teachers indicating the importance of various factors for kindergarten readiness, by school type: Fall 1998	64
50.	Percentage distribution of kindergarten teachers' time spent on certain instructional approaches, by program and school type: Fall 1998	64
51.	Public school pupils transported at public expense and current expenditures for transportation: 1929–30 to 1998–99	65
52.	Children 0 to 21 years old served in federally supported programs for the disabled, by type of disability: 1976–77 to 1999–2000	66
53.	Percentage distribution of disabled persons 6 to 21 years old receiving education services for the disabled, by age group and educational environment: United States and outlying areas, 1998–99	67
54.	State legislation on gifted and talented programs and number and percent of students receiving services in public elementary and secondary schools, by state: 1993–94 and 1995–96	67
55.	Number of children served under Individuals with Disabilities Education Act and Chapter 1 of the Education Consolidation and Improvement Act, State Operated Programs, by age group and state: 1990–91, 1997–98 to 1999–2000	68
56.	Enrollment in grades 9 to 12 in public and private schools compared with population 14 to 17 years of age: 1889–90 to fall 2000	69
57.	Enrollment in foreign language courses compared with enrollment in grades 9 to 12 in public secondary schools: Fall 1948 to fall 1994	70
58.	Student participation in school programs and services, by control, level of school, and type of community: 1993–94	71
<i>Private Elementary and Secondary Schools</i>		
59.	Private elementary and secondary enrollment, teachers, and schools, by selected characteristics: Fall 1999	71
60.	Private elementary and secondary staff and student/staff ratios, by level and orientation of school: 1993–94	72
61.	Private elementary and secondary enrollment and schools, by amount of tuition, level, and orientation of school: 1993–94	73
62.	Summary statistics on Catholic elementary and secondary schools, by level: 1919–20 to 2000–01	73
63.	Private elementary and secondary schools, enrollment, teachers, and high school graduates, by state: 1991 to 1999	74

Teachers and Other Instructional Staff

64.	Public elementary and secondary pupil/teacher ratios, by level, type, and enrollment size of school: Fall 1987 to fall 1999	75
65.	Public and private elementary and secondary teachers, enrollment, and pupil/teacher ratios: Fall 1955 to fall 2001	76
66.	Public elementary and secondary teachers, by level and state: Fall 1995 to fall 2000	77
67.	Teachers, enrollment, and pupil/teacher ratios in public elementary and secondary schools, by state: Fall 1994 to fall 1999	78
68.	Teachers in public and private elementary and secondary schools, by selected characteristics: 1993–94	79
69.	Highest degree earned, number of years teaching experience, and average class size for teachers in public elementary and secondary schools, by state: 1993–94 ..	80
70.	Selected characteristics of public school teachers: Spring 1961 to spring 1996	81
71.	Public secondary school teachers, by subject taught: Spring 1966 to spring 1996	82
72.	Percent of vocational and nonvocational public school teachers of grades 9 to 12, by selected demographic and educational characteristics: 1993–94	82
73.	Teachers' perceptions about serious problems in their schools, by type and control of school: 1990–91 and 1993–94	83
74.	Teachers' perceptions about teaching and school conditions, by type and control of school: 1993–94	83
75.	Mobility of public and private elementary and secondary teachers, by selected school and teacher characteristics: 1987–88 to 1994–95	84
76.	Average salaries for full-time teachers in public and private elementary and secondary schools, by selected characteristics: 1993–94	85
77.	Estimated average annual salary of teachers in public elementary and secondary school: 1959–60 to 2000–01	86
78.	Estimated average annual salary of teachers in public elementary and secondary schools, by state: 1969–70 to 2000–01	87
79.	Minimum and average teacher salaries, by state: 1990–91, 1998–98, and 1999–2000	88
80.	Average annual salary of instructional staff in public elementary and secondary schools, by state: 1939–40 to 2000–01	89
81.	Estimated average annual salary of instructional staff in public elementary and secondary schools and average annual earnings of full-time employees in all industries: 1929–30 to 2000–01	90
82.	Staff employed in public elementary and secondary school systems, by functional area: 1949–50 to fall 1999	91
83.	Staff employed in public school systems, by type of assignment and state: Fall 1999	92
84.	Staff employed in public school systems, by type of assignment and state: Fall 1998	93

85. Staff and teachers in public elementary and secondary schools, by state:
 Fall 1993 to fall 1999 94

86. Staff, enrollment, and pupil/staff ratios in public elementary and secondary schools,
 by state: Fall 1993 to fall 1999 95

87. Principals in public and private elementary and secondary schools, by selected
 characteristics: 1993–94 96

88. Public elementary and secondary students, schools, pupil/teacher ratios, and
 finances, by type of locale: 1998 and 1999 97

Schools and School Districts

89. Public school districts and public and private elementary and secondary schools:
 1869–70 to 1999–2000 98

90. Public school districts and enrollment, by size of district: 1989–90 to 1999–2000 98

91. Number of public elementary and secondary local education agencies,
 by state and type of agency: 1998–99 and 1999–2000 99

92. Selected statistics on enrollment, teachers, graduates, and dropouts in
 public school districts enrolling more than 15,000 students, by state:
 1990, 1998, and 1999 100

93. Revenues and expenditures of public school districts enrolling more than 15,000
 pupils, by state: 1997–98 109

94. Enrollment, poverty, and federal funds for the 100 largest school districts:
 1996–97, 1997–98, 1999, and 2001–02 118

95. Public elementary and secondary schools, by type of school:
 1967–68 to 1999–2000 120

96. Public elementary and secondary schools, by type and size of school: 1999–2000 120

97. Average size and distribution of enrollment of public elementary and secondary
 schools, by type: 1982–83 to 1999–2000 121

98. Public elementary and secondary school students, by racial/ethnic enrollment
 concentration of school: Fall 1994 and fall 1999 121

99. Public elementary and secondary schools, by type and state:
 1990–91 to 1999–2000 122

100. Public elementary schools, by grade span and average school size, by state:
 1999–2000 123

101. Public secondary schools, by grade span and average school size, by state:
 1999–2000 124

102. Percent of public schools with building deficiencies and renovation plans, by level,
 enrollment size, metropolitan status, and free lunch eligibility: 1999 125

High School Seniors, Completions, and Dropouts

103. High school graduates compared with population 17 years of age, by sex and
 control of school: 1869–70 to 2000–01 126

104. Public high school graduates, by state: 1969–70 to 2000–01 127

105.	High school graduates and dropouts in public elementary and secondary schools, by race/ethnicity and state: 1998–99	128
106.	General Educational Development (GED) credentials issued, and number and age of test takers: United States and outlying areas, 1971 to 2000	129
107.	Distribution of 18- to 29-year-olds, by high school completion status and selected characteristics: 1998 to 2000	129
108.	Percent of high school dropouts (status dropouts) among persons 16 to 24 years old, by sex and race/ethnicity: April 1960 to October 2000	130
109.	Percent of high school dropouts (status dropouts) among persons 16 to 24 years old, by income level, and distribution of dropouts by labor force status and educational attainment: October 1970 to October 2000	131
110.	Students with disabilities exiting the educational system, by age, type of disability, and basis of exit: United States and outlying areas, 1997–98 and 1998–99	132
111.	Postsecondary education and employment status, wages earned, and living arrangements of special education students out of secondary school up to 3 years, by type of disability: 1990	132
<i>Educational Achievement</i>		
112.	Average student proficiency in reading, by age and selected characteristics of students: 1971 to 1999	133
113.	Student proficiency in reading, by percentile, age and sex: 1971 to 1999	134
114.	Student proficiency in reading, by age, amount of time spent on homework, and reading habits: 1984, 1994, 1996, and 1999	135
115.	Percent of students at or above selected reading proficiency levels, by sex, race/ethnicity, and age: 1971 to 1999	136
116.	Average proficiency in reading for 4th-graders in public schools, by selected characteristics, and state: 1994 and 1998	137
117.	Average proficiency in reading for 8th-graders in public schools, by selected characteristics, and state: 1998	138
118.	Percentage distribution of 4th-graders, by time spent on homework and television viewing each day: 1992 to 2000	139
119.	Average writing performance of 4th-, 8th-, and 11th-graders, by selected characteristics of students: 1984 to 1996	140
120.	Student values and attitudes toward writing, by grade level: 1984 to 1994	141
121.	Percent of students at or above selected history proficiency levels, by selected characteristics and grade level: 1994	141
122.	Average student proficiency in geography and U.S. history, by selected characteristics and grade level: 1994	142
123.	Percent of students at or above selected geography proficiency levels, by selected characteristics and grade level: 1994	142
124.	Average mathematics proficiency, by age and by selected characteristics of students: 1973 to 1999	143

125.	Percent of students at or above selected mathematics proficiency levels, by sex, race/ethnicity, control of school, and age: 1978 to 1999	144
126.	Mathematics performance of 17-year-olds, by highest mathematics course taken, sex, and race/ethnicity: 1978 to 1999	145
127.	Mathematics proficiency and selected statistics on mathematics education for 4th-graders in public schools, by region and state: 1996 and 2000	146
128.	Mathematics proficiency of 8th-graders in public schools, by state: 1990 to 2000	147
129.	Length of school year and selected statistics on mathematics education for students in public schools, by region and state: 1998 and 2000	148
130.	Average science proficiency, by age and by selected characteristics of students: 1970 to 1999	149
131.	Percent of students at or above selected science proficiency levels, by sex, race/ethnicity, control of school, and age: 1977 to 1999	150
132.	Average proficiency in science for 8th-graders in public schools, by selected characteristics and state: 1996	151
133.	Performance of 8th-grade students in music, theatre, and visual arts, by selected characteristics of students: 1997	152
134.	Scholastic Assessment Test (SAT) score averages, by race/ethnicity: 1986–87–2000–01	152
135.	Scholastic Assessment Test score averages for college-bound high school seniors, by sex: 1966–67 to 2000–01	153
136.	Scholastic Assessment Test score averages, by selected student characteristics: 1995–96–2000–01	154
137.	Scholastic Assessment Test score averages, by state: 1987–88 to 2000–01	155
138.	American College Testing (ACT) score averages, by sex: 1970 to 2001	156
139.	Distribution of elementary and secondary school children, by average grades, by selected child, parent, and school characteristics: 1996 and 1999	157
140.	Average number of Carnegie units earned by public high school graduates in various subject fields, by student characteristics: 1982 to 1998	158
141.	Average number of Carnegie units earned by public school graduates in vocational education courses, by student characteristics: 1982 to 1998	159
142.	Percentage of public high school graduates taking selected mathematics and science courses in high school, by sex and race/ethnicity: 1982 to 1998	161
143.	Percent of public high school graduates earning minimum credits in selected combinations of academic courses, by sex and race/ethnicity: 1982 to 1998	161
<i>Student Activities and Behavior</i>		
144.	Percentage of 3- to 5-year-olds not yet enrolled in kindergarten, who have participated in home literacy activities with a family member, by selected child and family characteristics: 1993 and 1999	162

145.	Percent of high school seniors who say they engage in various activities, by student characteristics: 1982 and 1992	163
146.	Percent of high school seniors who participate in selected school-sponsored extracurricular activities, by student characteristics: 1980 and 1992	163
147.	Percentage of students in grades 9 through 12 who reported experience with drugs and violence on school property, by race/ethnicity, grade, and sex: 1997 and 1999	164
148.	Percent of 12- to 17-year-olds reporting drug use during the past 30 days and the past year: 1982 to 1999	164
149.	Percent of high school seniors reporting drug use, by type of drug and frequency of use: 1975 to 2000	165
150.	Percent of public schools reporting crime incidents and the seriousness of crime incidents reported, by school characteristics: 1996–97	166
State Regulations		
151.	Ages for compulsory school attendance, special education services for students, policies for year-round schools and kindergarten programs, by state: 1997 and 2000	168
152.	Tenth- and twelfth-graders' attendance patterns, by selected student and school characteristics: 1990 and 1992	169
153.	State requirements for high school graduation, in Carnegie units: 2001	170
154.	States which use criterion-referenced assessments aligned to state standards, by level and subject area: 2001–02	175
155.	States using minimum-competency testing, by grade levels assessed, and expected uses of standards: 1998–99	176
156.	States requiring testing for initial certification of teachers, by authorization, year enacted, year effective, and test used: 1990 and 1999	177
Revenues and Expenditures		
157.	Revenues for public elementary and secondary schools, by source of funds: 1919–20 to 1998–99	178
158.	Revenues for public elementary and secondary schools, by source and state: 1998–99	179
159.	Revenues for public elementary and secondary schools, by source and state: 1997–98	180
160.	Funds and staff for state education agencies, by source of funding and state: 1992–93	181
161.	Current expenditures for public elementary and secondary education, by state: 1969–70 to 2000–01	182
162.	Total expenditures for public elementary and secondary education, by function and state: 1998–99	184
163.	Total expenditures for public elementary and secondary education, by function and state: 1997–98	186

164.	Summary of expenditures for public elementary and secondary education, by purpose: 1919–20 to 1998–99	188
165.	Total expenditures for public elementary and secondary education, by function and subfunction: 1990–91 to 1998–99	189
166.	Expenditures for instruction in public elementary and secondary schools, by subfunction and state: 1997–98 and 1998–99	190
167.	Total and current expenditure per pupil in public elementary and secondary schools: 1919–20 to 2000–01	191
168.	Current expenditure per pupil in average daily attendance in public elementary and secondary schools, by state: 1959–60 to 1998–99	192
169.	Current expenditure per pupil in fall enrollment in public elementary and secondary schools, by state: 1969–70 to 1998–99	194
3–A. Postsecondary Education: College and University Education		
<i>Enrollment</i>		
170.	Enrollment, staff, and degrees conferred in postsecondary institutions participating in Title IV programs, by level and control of institution: Fall 1997 and 1999 and 1999–2000	204
171.	Historical summary of faculty, students, degrees, and finances in degree-granting institutions: 1869–70 to 1999–2000	205
172.	Total fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1947 to 1999	206
173.	Total fall enrollment in degree-granting institutions, by control and type of institution: 1965 to 1999	207
174.	Total fall enrollment in degree-granting institutions, by attendance status, sex, and age: 1970 to 2011	208
175.	Total fall enrollment in degree-granting institutions, by level, sex, age, and attendance status of student: 1999	209
176.	Total fall enrollment in degree-granting institutions, by type and control of institution, and age and attendance status of student: 1999	210
177.	Total fall enrollment in degree-granting institutions, by level of enrollment, sex, attendance status, and type and control of institution: 1999	211
178.	Total fall enrollment in degree-granting institutions, by level of enrollment, sex, attendance status, and type and control of institution: 1998	212
179.	Total fall enrollment in degree-granting institutions, by type and control of institution, attendance status, and sex of student: 1970 to 1999	213
180.	Fall enrollment and number of degree-granting institutions, by affiliation of institution: 1980 to 1999	214
181.	Total fall enrollment in degree-granting institutions, by type and control of institution, attendance status, sex and level of student: 1997 to 1999	216
182.	Total first-time freshmen enrolled in degree-granting institutions, by sex of student, attendance status, and type and control of institution: Fall 1955 to fall 1999	217

183.	Total first-time freshmen enrolled in degree-granting institutions, by attendance status, sex, control of institution, and state: Fall 1994 to fall 1999	218
184.	College enrollment rates of high school graduates, by race/ethnicity: 1960 to 2000 ...	219
185.	College enrollment rates of high school graduates, by sex: 1960 to 2000	220
186.	Graduation, college preparation, and college application rates of high school students, by selected school characteristics: 1993–94	220
187.	Enrollment rates of 18- to 24-year-olds in degree-granting institutions, by race/ethnicity: 1967 to 2000	221
188.	Total undergraduate fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1969 to 1999	222
189.	Total graduate fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1969 to 1999	223
190.	Total first-professional fall enrollment in degree-granting institutions, by attendance status, sex of student, and control of institution: 1969 to 1999	224
191.	Total fall enrollment in degree-granting institutions, by state: 1970 to 1999	225
192.	Total fall enrollment in public degree-granting institutions, by state: 1970 to 1999	226
193.	Total fall enrollment in private degree-granting institutions, by state: 1970 to 1999 ...	227
194.	Total fall enrollment in all degree-granting institutions, by attendance status, sex, and state: 1998 and 1999	228
195.	Total fall enrollment in public degree-granting institutions, by attendance status, sex, and state: 1998 and 1999	229
196.	Total fall enrollment in private degree-granting institutions, by attendance status, sex, and state: 1998 and 1999	230
197.	Total fall enrollment in degree-granting institutions, by control, type of institution, and state: 1998 and 1999	231
198.	Total fall enrollment in degree-granting institutions, by level of enrollment and state: 1998 and 1999	232
199.	Total fall enrollment in degree-granting institutions, by control, level of enrollment, and state: 1999	233
200.	Total fall enrollment in degree-granting institutions, by control, level of enrollment, and state: 1998	234
201.	Full-time-equivalent fall enrollment in degree-granting institutions, by control and type of institution: 1969 to 1999	235
202.	Full-time-equivalent fall enrollment in degree-granting institutions, by control, type of institution, and state: 1997 to 1999	236
203.	Full-time-equivalent fall enrollment in degree-granting institutions, by control and state: 1980 to 1999	237
204.	Residence and migration of all freshmen students in degree-granting institutions, by state: Fall 1999	238
205.	Residence and migration of all freshmen students in degree-granting institutions graduating from high school in the past 12 months, by state: Fall 1998	239

206.	Residence and migration of all freshmen students in 4-year degree-granting institutions graduating from high school in the past 12 months, by state: Fall 1998	240
207.	Total fall enrollment in degree-granting institutions by type and control of institution and race/ethnicity of student: 1976 to 1999	241
208.	Total fall enrollment in degree-granting institutions, by level of study, sex, and race/ethnicity of student: 1976 to 1999	242
209.	Total fall enrollment in degree-granting institutions, by level, attendance status, sex, and race/ethnicity of student: 1998 and 1999	244
210.	Total number of institutions and fall enrollment in degree-granting institutions, by percentage of minority enrollment: 1999	245
211.	Total fall enrollment in degree-granting institutions, by race/ethnicity of student and by state: 1994 to 1999	246
212.	Number and percent of students enrolled in postsecondary institutions, by disability status and selected student characteristics: 1995–96	247
213.	Enrollment in postsecondary education, by major field of study, age, and level of student: 1995–96	248
214.	Graduate enrollment in science and engineering programs in degree-granting institutions, by field of study: United States and outlying areas, fall 1987 to fall 1999	249
215.	Size of enrollment of degree-granting institutions, by type and control of institution: Fall 1999	250
216.	Enrollment of the 120 largest degree-granting college and university campuses: Fall 1999	251
217.	Selected statistics for degree-granting institutions enrolling more than 14,600 students in 1999	252
218.	Enrollment and degrees conferred in women's colleges, by institution: Fall 1999 and 1999–2000	258
219.	Enrollment and degrees conferred in Hispanic serving institutions, by institution: Fall 1999 and 1999–2000	259
220.	Enrollment and degrees conferred in tribally controlled institutions, by institution: Fall 1997, 1998, 1999, 1998–99 and 1999–2000	263
221.	Fall enrollment, degrees conferred, and expenditures in degree-granting historically black colleges and universities by institution: 1999, 1999–2000, and 1998–99	264
222.	Selected statistics on degree-granting historically black colleges and universities: 1980, 1990, 1996–97, 1999, and 1999–2000	266
223.	Fall enrollment in degree-granting historically black colleges and universities, by type and control of institution: 1976 to 1999	267
Staff		
224.	Employees in degree-granting institutions of higher education, by primary occupation, employment status, and control of institution: Fall 1976, fall 1991, and fall 1999	267

225.	Employees in degree-granting institutions, by race/ethnicity, primary occupation, employment status, sex and type and control of institution: Fall 1999	268
226.	Employees in degree-granting institutions, by primary occupation, sex, employment status, and by type and control of institution: Fall 1999	269
227.	Staff and student/staff ratios in degree-granting institutions, by type and control of institution and by state: Fall 1999	270
Faculty		
228.	Full-time and part-time senior instructional faculty in degree-granting institutions, by employment status, control, and type of institution: Fall 1970 to fall 1999	271
229.	Full-time instructional faculty in degree-granting institutions, by race/ethnicity, academic rank, and sex: Fall 1999	271
230.	Full-time and part-time instructional faculty and staff in degree-granting institutions, by selected characteristics and type and control of institution: Fall 1992 and fall 1998	272
231.	Full-time and part-time instructional faculty and staff in degree-granting institutions, by type and control, academic rank, age, salary, race/ethnicity, and sex: Fall 1998	274
232.	Full-time and part-time instructional faculty and staff in degree-granting institutions, by faculty characteristics and field: Fall 1992 and fall 1998	276
233.	Full-time instructional faculty and staff in degree-granting institutions, by instruction activities and type and control of institution: Fall 1998	278
234.	Part-time instructional faculty and staff in degree-granting institutions, by instruction activities and type and control of institution: Fall 1998	279
235.	Percentage distribution of full-time and part-time instructional faculty and staff in degree-granting institutions, by program area, race/ethnicity, and sex: Fall 1992 and fall 1998	280
236.	Average base salaries of full-time instructional faculty and staff in degree-granting institutions, by type and control of institution and by field of instruction: 1987–88, 1992–93, and 1998–99	281
237.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by academic rank, sex, and control and type of institution: 1970–71, to 1998–99	282
238.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by academic rank, sex, and by type and control of institution: 1980–81 to 1998–99	284
239.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by type and control of institution and by state: 1998–99	285
240.	Average salary of full-time instructional faculty on 9-month contracts in degree-granting institutions, by type and control of institution and by state: 1997–98	286
241.	Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting institutions, by type and control of institution and rank of faculty and by state: 1998–99	287
242.	Average salary of full-time instructional faculty on 9-month contracts in 4-year degree-granting institutions, by type and control of institution and rank of faculty and by state: 1997–98	288

243.	Full-time instructional faculty with tenure for degree-granting institutions reporting tenure status, by academic rank, sex, and type and control of institution: 1980–81, to 1998–99	289
Institutions		
244.	Degree-granting institutions, by control and type of institution: 1949–50 to 2000–01	290
245.	Degree-granting institutions and branches, by type, control of institution, and state: 2000–01	291
246.	Degree-granting institutions that have closed their doors, by control and type of institution: 1960–61 to 2000–01	292
Degrees		
247.	Earned degrees conferred by degree-granting institutions, by level of degree and sex of student: 1869–70 to 2010–11	293
248.	Degrees awarded by degree-granting institutions, by control, level of degree, and state: 1999–2000	294
249.	Degrees awarded by degree-granting institutions, by control, level of degree, and state: 1998–99	295
250.	Total bachelor’s and master’s degrees conferred by degree-granting institutions, by field of study and by state: 1999–2000	296
251.	Earned degrees conferred by degree-granting institutions, by level of degree and by state: 1998–99 and 1999–2000	297
252.	Associate degrees conferred by degree-granting institutions, of higher education, by field of study: 1988–89 to 1999–2000	298
253.	Associate degrees and other subbaccalaureate awards conferred by degree-granting institutions, by length of curriculum, sex of student, and field of study: 1999–2000	299
254.	Associate degrees and other subbaccalaureate awards conferred by degree-granting institutions, by length of curriculum, sex of student, and field of study: 1998–99	300
255.	Bachelor’s degrees conferred by degree-granting institutions, by discipline division: 1970–71 to 1999–2000	301
256.	Master’s degrees conferred by degree-granting institutions, by discipline division: 1970–71 to 1999–2000	302
257.	Doctor’s degrees conferred by degree-granting institutions, by discipline division: 1970–71 to 1999–2000	303
258.	Bachelor’s, master’s, and doctor’s degrees conferred by degree-granting institutions, by sex of student and field of study: 1999–2000	304
259.	Bachelor’s, master’s, and doctor’s degrees conferred by degree-granting institutions, by sex of student and field of study: 1998–99	312
260.	Degrees conferred by degree-granting institutions, by control of institution: 1969–70 to 1999–2000	320
261.	Degrees conferred by degree-granting institutions, by control of institution, level of degree, and discipline division: 1999–2000	320

262.	Number of degree-granting institutions conferring degrees, by level of degree and discipline division: 1999–2000	321
263.	First-professional degrees conferred by degree-granting institutions in dentistry, medicine, and law, by sex, and number of institutions conferring degrees: 1949–50 to 1999–2000	322
264.	First-professional degrees conferred by degree-granting institutions, by sex of student, control of institution, and field of study: 1985–86 to 1999–2000	323
265.	Associate degrees conferred by degree-granting institutions, by racial/ethnic group and sex of student: 1976–77 to 1999–2000	324
266.	Associate degrees conferred by degree-granting institutions, by racial/ethnic group, major field of study, and sex of student: 1999–2000	325
267.	Associate degrees conferred by degree-granting institutions, by racial/ethnic group, major field of study, and sex of student: 1998–99	326
268.	Bachelor's degrees conferred by degree-granting institutions, by racial/ethnic group and sex of student: 1976–77 to 1999–2000	327
269.	Bachelor's degrees conferred by degree-granting institutions, by racial/ethnic group, major field of study, and sex of student: 1999–2000	328
270.	Bachelor's degrees conferred by degree-granting institutions, by racial/ethnic group, major field of study, and sex of student: 1998–99	329
271.	Master's degrees conferred by degree-granting institutions, by racial/ethnic group and sex of student: 1976–77 to 1999–2000	330
272.	Master's degrees conferred by degree-granting institutions, by racial/ethnic group, major field of study, and sex of student: 1999–2000	331
273.	Master's degrees conferred by degree-granting institutions, by racial/ethnic group, major field of study, and sex of student: 1998–99	332
274.	Doctor's degrees conferred by degree-granting institutions, by racial/ethnic group and sex of student: 1976–77 to 1999–2000	333
275.	Doctor's degrees conferred by degree-granting institutions, by racial/ethnic group, major field of study, and sex of student: 1999–2000	334
276.	Doctor's degrees conferred by degree-granting institutions, by racial/ethnic group, major field of study, and sex of student: 1998–99	335
277.	First-professional degrees conferred by degree-granting institutions, by racial/ethnic group and sex of student: 1976–77 to 1999–2000	336
278.	First-professional degrees conferred by degree-granting institutions, by racial/ethnic group, major field of study, and sex of student: 1999–2000	337
279.	First-professional degrees conferred by degree-granting institutions, by racial/ethnic group, major field of study, and sex of student: 1998–99	337
280.	Earned degrees in agriculture and natural resources conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 to 1999–2000	338
281.	Earned degrees in architecture and related programs conferred by degree-granting institutions, by level of degree and sex of student: 1949–50 to 1999–2000	338

282.	Earned degrees in the biological/life sciences conferred by degree-granting institutions, by level of degree and sex of student: 1951–52 to 1999–2000	339
283.	Earned degrees in biology, microbiology, and zoology conferred by degree-granting institutions, by level of degree: 1970–71 to 1999–2000	339
284.	Earned degrees in business conferred by degree-granting institutions, by level of degree and sex of student: 1955–56 to 1999–2000	340
285.	Earned degrees in communications conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 to 1999–2000	340
286.	Earned degrees in computer and information sciences conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 to 1999–2000	341
287.	Earned degrees in education conferred by degree-granting institutions by level of degree and sex of student: 1949–50 to 1999–2000	341
288.	Earned degrees in engineering conferred by degree-granting institutions, by level of degree and sex of student: 1949–50 to 1999–2000	342
289.	Earned degrees in chemical, civil, electrical, and mechanical engineering conferred by degree-granting institutions, by level of degree: 1970–71 to 1999–2000	342
290.	Earned degrees in English language and literature/ letters conferred by degree-granting institutions, by level of degree and sex of student: 1949–50 to 1999–2000	343
291.	Earned degrees in modern foreign languages and literatures conferred by degree-granting institutions, by level of degree and sex of student: 1949–50 to 1999–2000	343
292.	Earned degrees in French, German, and Spanish conferred by degree-granting institutions, by level of degree: 1949–50 to 1999–2000	344
293.	Earned degrees in the health professions and related sciences conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 to 1999–2000	344
294.	Earned degrees in mathematics conferred by degree-granting institutions, by level of degree and sex of student: 1949–50 to 1999–2000	345
295.	Earned degrees in the physical sciences conferred by degree-granting institutions, by level of degree and sex of student: 1959–60 to 1999–2000	345
296.	Earned degrees in chemistry, geology, and physics conferred by degree-granting institutions, by level of degree: 1970–71 to 1999–2000	346
297.	Earned degrees in psychology conferred by degree-granting institutions, by level of degree and by sex of student: 1949–50 to 1999–2000	346
298.	Earned degrees in public administration and services conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 to 1999–2000	347
299.	Earned degrees in the social sciences and history conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 to 1999–2000	347
300.	Earned degrees in economics, history, political science and government, and sociology conferred by degree-granting institutions, by level of degree: 1949–50 to 1999–2000	348

301.	Earned degrees in visual and performing arts conferred by degree-granting institutions, by level of degree and sex of student: 1970–71 to 1999–2000	348
302.	Statistical profile of persons receiving doctor's degrees, by field of study: 1998–99 ...	349
303.	Statistical profile of persons receiving doctor's degrees in education: 1979–80 to 1998–99	350
304.	Statistical profile of persons receiving doctor's degrees in engineering: 1979–80 to 1998–99	350
305.	Statistical profile of persons receiving doctor's degrees in the humanities: 1979–80 to 1998–99	351
306.	Statistical profile of persons receiving doctor's degrees in the life sciences: 1979–80 to 1998–99	351
307.	Statistical profile of persons receiving doctor's degrees in the physical sciences: 1979–80 to 1998–99	352
308.	Statistical profile of persons receiving doctor's degrees in the social sciences: 1979–80 to 1998–99	352
309.	Doctor's degrees conferred by 60 large degree-granting institutions: 1990–91 to 1999–2000	353
Outcomes		
310.	Percentage distribution of 1980 high school sophomores, by highest level of education completed through 1992, by selected student characteristics: 1980 to 1992	354
311.	Mean number of semester credits completed by bachelor's degree recipients, by major and course area: 1976, 1984, and 1992–93	355
312.	Percent of colleges and universities using various selection criteria for admission, by type and control of institution: 1990–91 to 1999–2000	356
313.	Percent of degree-granting institutions offering remedial services, by type and control of institution: 1987–88 to 2000–01	356
314.	Percentage distribution of enrollment and completion status of first-time postsecondary students starting during the 1995–96 academic year, by type of institution and other student characteristics: 1998	357
315.	Scores on Graduate Record Examination (GRE) and subject matter tests: 1965 to 1999	358
Student Charges and Student Financial Assistance		
316.	Average undergraduate tuition and fees and room and board rates paid by full-time-equivalent students in degree-granting institutions, by type and control of institution: 1964–65 to 2000–01	359
317.	Average undergraduate tuition and fees and room and board rates paid by full-time-equivalent students in degree-granting institutions, by control of institution and by state: 1999–2000 and 2000–01	361
318.	Average undergraduate tuition and fees and room and board rates in degree-granting institutions, by percentile distribution of students, type and control of institution: 1999–2000 and 2000–01	362

319.	Average graduate and first-professional tuition and required fees in degree-granting institutions, by control of institution: 1987–88 to 1999–2000	362
320.	Percent of undergraduates receiving financial aid, by type and source of aid and selected student characteristics: 1995–96	363
321.	Average amount of financial aid awarded in 1995–96 per student, by type and source of aid and selected student characteristics	364
322.	Undergraduates enrolled full time and part time, by aid status and source of aid during 1995–96, and control and level of institution	365
323.	Percent of undergraduates receiving aid, by type and source of aid received, and by control and level of institution: 1992–93 and 1995–96	366
324.	Undergraduates enrolled full time and part time, by federal aid program and by control and level of institution: 1995–96	367
325.	Postbaccalaureate students enrolled full time and part time, by aid status, source of aid, and by level of study and control and level of institution: 1992–93 and 1995–96	368
326.	Postbaccalaureate students enrolled full time and part time, by type of aid and by level of study, control, and level of institution: 1992–93 and 1995–96	369
327.	Scholarship and fellowship awards of degree-granting institutions, by control of institution: 1959–60 to 1996–97	370
328.	Pell Grant revenue of degree-granting institutions compared to current-fund revenue and tuition, by type and control of institution: 1985–86 to 1996–97	371
329.	State awards for need-based undergraduate scholarship and grant programs, by state: 1987–88 to 1997–98	372
Income		
330.	Current-fund revenue of degree-granting institutions, by source: 1980–81 to 1995–96	373
331.	Current-fund revenue of public degree-granting institutions, by source: 1980–81 to 1996–97	374
332.	Current-fund revenue of private degree-granting institutions, by source: 1980–81 to 1995–96	375
333.	Current-fund revenue of private not-for-profit degree-granting institutions, by source: 1980–81 to 1995–96	376
334.	Current-fund revenue of degree-granting institutions, by source of funds: 1919–20 to 1995–96	377
335.	Current-fund revenue of public degree-granting institutions, by source of funds, and by type of institution: 1996–97	378
336.	Total revenue of private not-for-profit degree-granting institutions, by source of funds and type of institution: 1996–97	379
337.	Current-fund revenue of public degree-granting institutions, by state: 1980–81 to 1996–97	380
338.	Current-fund revenue of public degree-granting institutions, by source of funds and state: 1996–97	381

339.	Appropriations from state and local governments for public degree-granting institutions, by state: 1986–87 to 1996–97	382
340.	Current-fund revenue received from the federal government by the 120 degree-granting institutions receiving the largest amounts: 1995–96	383
Expenditures		
341.	Current-fund expenditures and educational and general expenditures of degree-granting institutions, by purpose and per student: 1929–30 to 1995–96	384
342.	Expenditures of public degree-granting institutions, by purpose and type of institution: 1996–97	386
343.	Current-fund expenditures and expenditures per full-time-equivalent student in institutions of higher education, by type and control of institution: 1970–71 to 1995–96	388
344.	Total expenditures of private not-for-profit degree-granting institutions, by purpose and type of institution: 1980–81 to 1996–97	389
345.	Current-fund expenditures of degree-granting institutions, by purpose: 1980–81 to 1995–96	390
346.	Current-fund expenditures of public degree-granting institutions, by purpose: 1980–81 to 1996–97	391
347.	Current-fund expenditures of private degree-granting institutions, by purpose: 1980–81 to 1995–96	392
348.	Voluntary support for degree-granting institutions, by source and purpose of support: 1959–60 to 1998–99	392
349.	Educational and general expenditures of degree-granting public universities, by purpose: 1976–77 to 1996–97	393
350.	Educational and general expenditures of public degree-granting 4-year colleges, by purpose: 1976–77 to 1996–97	394
351.	Educational and general expenditures of degree-granting public 2-year colleges, by purpose: 1976–77 to 1996–97	395
352.	Current-fund expenditures of public degree-granting institutions, by state: 1980–81 to 1996–97	396
353.	Educational and general expenditures of public degree-granting institutions, by state: 1980–81 to 1996–97	397
354.	Current-fund expenditures and educational and general expenditures of private not-for-profit institutions of higher education, by state: 1985–86 to 1995–96	398
355.	Additions to physical plant value of degree-granting institutions, by type of addition and control of institution: 1969–70 to 1996–97	399
356.	Value of property and liabilities of degree-granting institutions: 1899–1900 to 1995–96	400
357.	Endowment funds of the 120 colleges and universities with the largest amounts: 1999 and 2000	401

3–B. Postsecondary Education: Vocational and Adult Education***Adult Education***

- | | | |
|------|---|-----|
| 358. | Participation of employed persons, 17 years old and over, in adult education during the previous 12 months, by selected characteristics of participants:
1995 and 1999 | 402 |
| 359. | Participation in adult education during the previous 12 months by adults 17 years old and older, by selected characteristics of participants: 1991, 1995, and 1999 | 404 |
| 360. | Participants in adult basic and secondary education programs,
by level of enrollment and state: Fiscal years 1980, 1990, and 1999 | 406 |

Vocational Education

- | | | |
|------|--|-----|
| 361. | Nondegree granting institutions offering postsecondary education,
by control and state: 1998–99, 1999–2000, and 2000–01 | 407 |
|------|--|-----|

4. Federal Programs for Education and Related Activities

- | | | |
|------|---|-----|
| 362. | Federal support and estimated federal tax expenditures for education, by category:
Fiscal years 1965 to 2001 | 421 |
| 363. | Federal on-budget funds for education, by agency: Fiscal years 1965 to 2001 | 422 |
| 364. | Federal on-budget funds for education, by level or other educational purpose,
by agency and program: Fiscal years 1965 to 2001 | 423 |
| 365. | Estimated federal support for education, by agency and type of ultimate recipient:
Fiscal year 2001 | 429 |
| 366. | Federal on-budget funds obligated for programs administered by the
U.S. Department of Education: Fiscal years 1980 to 2001 | 430 |
| 367. | U.S. Department of Education outlays, by level of education and type of recipient:
Fiscal years 1980 to 2001 | 432 |
| 368. | U.S. Department of Education appropriations for major programs,
by state or other area: Fiscal year 2000 | 433 |
| 369. | Appropriations for Title I and Title VI, Elementary and Secondary Education Act
(ESEA) of 1994, by state or other area and type of appropriation:
1999–2000 and 2000–01 | 434 |
| 370. | Federal obligations for research and development and R&D plant,
by state and selected agency: Fiscal year 1999 | 435 |
| 371. | Federal science and engineering obligations to colleges and universities,
by agency and state: Fiscal year 1999 | 436 |
| 372. | Summary of federal funds for research, development, and R&D plant:
Fiscal years 1993 to 2001 | 437 |
| 373. | U.S. Department of Agriculture obligations for child nutrition programs,
by state or other area: Fiscal years 1999 and 2000 | 439 |
| 374. | U.S. Department of Health and Human Services allocations for Head Start and
enrollment in Head Start, by state or other area: Fiscal years 1997 to 2000 | 440 |
| 375. | Public school students approved for federally funded free or reduced price lunches,
by selected school characteristics: School year 1993–94 | 441 |

376. Public and private school students receiving federally funded Title 1 services, by selected school characteristics: School year 1993–94 441

5. Outcomes of Education

Educational Characteristics of the Workforce

377. Percent of 18- to 25-year-olds reporting drug use during the past 30 days and the past year: 1982 to 1999 447
378. Percent of 1972, 1982, and 1992 high school seniors who felt that certain life values were “very important,” by sex: 1972 to 1994 447
379. Labor force participation of persons 16 years old and over, by age, sex, race/ethnicity, and highest level of education: 2000 448
380. Occupation of employed persons 25 to 64 years old, by educational attainment and sex: 2000 448
381. Unemployment rate of persons 16 years old and over, by age, sex, race/ethnicity, and highest degree attained: 1998, 1999, and 2000 449
382. Median annual income of year-round, full-time workers 25 years old and over, by level of education completed and sex: 1989 to 1999 450
383. Total annual money income and median income of persons 25 years old and over, by educational attainment and sex: 1999 451
384. College enrollment and labor force status of 1999 and 2000 high school graduates, by sex and race/ethnicity: October 1999 and October 2000 452

Recent High School and College Graduates

385. Labor force status of 1979–80 to 1999–2000 high school dropouts, by sex and race/ethnicity: October 1980 to October 2000 453
386. Employment of 12th-graders, by selected student characteristics: 1992 454
387. Full-time employment status of bachelor’s degree recipients 1 year after graduation, by field of study: 1976 to 1991 455
388. Employment status of 1992–93 bachelor’s degree recipients 4 years after graduation, by field of study and occupational area: 1997 456
389. Enrollment status of 1992–93 bachelor’s degree recipients, by undergraduate major and highest degree obtained: April 1997 457
390. Average annual salary of bachelor’s degree recipients employed full time 1 year after graduation, by field of study: 1976 to 1994 457
391. Participation of young adults in voluntary or community service activities, by selected characteristics: 1992 to 1994 458
392. Literacy skills of adults, 16 years old and over, by selected characteristics: 1992 459

6. International Comparisons of Education

393. School-age populations as a percent of total population: Selected countries, 1985 to 1999 466
394. Percent of population enrolled in secondary and postsecondary institutions, by age group: Selected countries, 1985, 1990, and 1999 466

395.	Estimated population, school enrollment, and teachers in major areas of the world: 1980 to 1997	467
396.	Selected statistics for countries with populations over 10 million, by continent: 1980, 1990, and 1997	468
397.	Pupils per teacher in public and private elementary and secondary schools, by level of education: Selected countries, 1985 to 1999	470
398.	Geography proficiency of 13-year-olds in educational systems participating in the International Assessment of Educational Progress: 1991	470
399.	Average 8th-grade mathematics scores by content areas, and average time spent studying out of school, by country: 1999	471
400.	Instructional practices and time spent teaching mathematics in 8th-grade, by country: 1999	472
401.	Average 8th-grade science scores by content areas, and average time spent studying out of school, by country: 1999	473
402.	Instructional practices and time spent teaching science in 8th-grade, by country: 1999	474
403.	Average size of 8th-grade mathematics classes, and frequency teachers assign mathematics homework, by country: 1999	475
404.	Eighth-grade students' perceptions about mathematics and hours spent on leisure activities, by country: 1999	476
405.	Average 4th-grade mathematics scores, by content areas, and average time spent studying mathematics out of school, by country: 1994–95	477
406.	Average 4th-grade science scores, by content areas, and average time spent teaching science in school, by country: 1994–95	478
407.	Average mathematics scores, at the end of secondary school, by sex, and average time spent studying mathematics out of school, by country: 1994–95	479
408.	Average science scores, at the end of secondary school, by sex, and average time spent studying science out of school, by country: 1994–95	480
409.	Reading literacy test scores of 9-year-olds: Selected countries, 1992	481
410.	Reading literacy test scores of 14-year-olds: Selected countries, 1992	482
411.	Number of bachelor's degree recipients per 100 persons of the theoretical age of graduation, by sex: Selected countries, 1989 to 1999	483
412.	Percent of bachelor's degrees awarded in science: Selected countries, 1985 to 1999	483
413.	Percent of graduate degrees awarded in science: Selected countries, 1985, 1990, 1996, and 1999	484
414.	Public education expenditures per student, by level of student: Selected countries, 1985 to 1998	484
415.	Total public direct expenditures on education as a percentage of the gross domestic product: 1985 to 1998	485

416.	Foreign students enrolled in institutions of higher education in the United States and outlying areas, by continent, region, and selected countries of origin: 1980–81 to 1999–2000	486
------	---	-----

7. Libraries and Educational Technology

Libraries

417.	Selected statistics on school library/media centers, by control and level of school: 1993–94	489
418.	Selected statistics on public school library/media centers, by level and enrollment size of school: 1993–94	490
419.	Selected statistics on public school library/media centers, by state: 1993–94	491
420.	Percent of public and private schools having access to selected telecommunication capabilities, by location of access site and control of school: 1995 and 1998–99	492
421.	Public schools and school classrooms with access to the Internet, by school characteristics: 1994 to 2000	493
422.	General statistics of college and university libraries: 1975–76 to 1997–98	494
423.	Selected statistics on the collections, staff, and operating expenditures of 60 large college and university libraries: 1998	495
424.	General statistics of public libraries, by population of legal service area: 1998	496
425.	Public libraries, books and serial volumes, library visits, and reference transactions, by state: Fiscal year 1998	496

Computers and Technology

426.	Percent of workers, 18 years old and over, using computers on the job, by selected characteristics and computer activities: October 1993 and October 1997	497
427.	Access to and use of home computers, by selected characteristics of students and other users: October 1997	498
428.	Percent of home computer users using specific applications, by selected characteristics: October 1997	499
429.	Percent of student home computer users using specific applications, by selected characteristics: October 1997	499
430.	Student use of computers, by level of instruction and selected characteristics: 1984 to 1997	500

INTRODUCTION

In the fall of 2001, about 68.5 million persons were enrolled in American schools and colleges (table 1). About 4.3 million were employed as elementary and secondary school teachers and as college faculty. Other professional, administrative, and support staff of educational institutions numbered 4.8 million. Thus about 78 million people were involved, directly or indirectly, in providing or receiving formal education. In a nation with a population of about 281 million, more than 1 out of every 4 persons participated in formal education (table 17).

Elementary/Secondary Enrollment

Enrollment in public elementary and secondary schools rose 20 percent between 1985 and 2001. The fastest public school growth occurred in the elementary grades, where enrollment rose 24 percent over the same period, from 27.0 million to 33.6 million (table 2). Private school enrollment grew more slowly than public school enrollment over this period, rising 7 percent, from 5.6 million in 1985 to 5.9 million in 2001. As a result, the proportion of students enrolled in private schools declined slightly, from 12 percent in 1985 to 11 percent in 2001.

Since the enrollment rates of kindergarten and elementary school age children have not changed much in recent years, increases in elementary school enrollment have been driven primarily by increases in the number of children. Public secondary school enrollments declined 8 percent from 1985 to 1990, but then rose 20 percent from 1990 to 2001, for a net increase of 10 percent.

The National Center for Education Statistics (NCES) forecasts record levels of total elementary and secondary enrollment for the next several years as the school-age population crests. The fall 2001 public school enrollment marks a new record, and new records are expected every year through the early 2000s (table 3). Public elementary school enrollments is projected to decline slowly until the later part of the decade and then increase, so that the fall 2011 projection is slightly lower than the 2001 enrollment. In contrast, public secondary school enrollment is expected to increase 3 percent between 2001 and 2011.

College Enrollment

College enrollment hit a record level of 14.8 million in fall 1999 and another record of 15.3 million is expected for 2001 (table 3). College enrollment is expected to increase by an additional 16 percent between 2001 and 2011. Despite decreases in the traditional college-age population during the 1980s and early 1990s, total enrollment increased because of the high enrollment rate of older women and recent high school graduates (tables 7, 15, 184, and 185). Between 1990 and 1999, the number of full-time students increased by 12 percent compared to no increase in part-time students (table 172).

Teachers

An estimated 3.6 million elementary and secondary school teachers were engaged in classroom instruction in the fall of 2001 (table 4). This number has risen in recent years, up about 29 percent since 1990. The number of public school teachers in 2001 was 3.1 million, and the number of private school teachers was about 0.4 million.

The number of public school teachers has risen slightly faster than the number of students over the past 10 years, resulting in small declines in the pupil/teacher ratio (table 65). In the fall of 2000, there were an estimated 16.0 public school pupils per teacher, compared with 17.2 public school pupils per teacher 10 years earlier. Over the same period, the pupil/teacher ratio in private schools decreased from 14.7 to 13.9. Data from the end of the 1990s suggest a continuation of the historical trend toward lower public school pupil/teacher ratios, which had been stable during the late 1980s and early 1990s.

The salaries of public school teachers, which lost purchasing power to inflation during the 1970s, rose faster than the inflation rate in the 1980s (table 77). Since 1990–91, salaries for teachers have generally maintained pace with inflation. The average salary for teachers in 2000–01 was \$42,898, about the same in constant dollars as at the beginning of the decade.

Faculty and Staff in Postsecondary Education

In the fall of 1999, there were 1,028,000 faculty members in degree-granting institutions (table 228). Making up this figure were 591,000 full-time and 437,000 part-time faculty. In 1998, full-time instructional faculty and staff generally taught more hours and more students than part-time instructors, with 21 percent of full-time instructors teaching 15 or more hours per week and 13 percent teaching 150 or more students (table 233). About 9 percent of part-time instructors taught 15 or more hours per week, and 4 percent taught 150 or more students (table 234).

White males constituted a disproportionate share of full-time college faculty in 1999. Overall, about 54 percent of full-time faculty were white males. However, this distribution varied substantially by rank of faculty. Among full professors, the proportion of white males was 71 percent. The proportion was somewhat lower among the lower ranked faculty, with white males making up 40 percent of the lecturers (table 229).

Student Performance

Most of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs. The main NAEP reports current information for the nation and specific geographic regions of the country. It includes students drawn from both public and non-public schools and reports results for student achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board, and use the latest advances in assessment methodology.

Since 1990, NAEP assessments have also been conducted on the state level. States that choose to participate receive assessment results that report on the performance of students in that state. In its content, the state assessment is identical to the assessment conducted nationally. However, because the national NAEP samples were not, and are not currently designed to support the reporting of accurate and representative state-level results, separate representative samples of students are selected for each participating jurisdiction/state.

NAEP long-term trend assessments are designed to give information on the changes in the basic achievement of America's youth since the early 1970s. They are administered nationally and report student performance at ages 9, 13, and 17 and in grades 4, 8, and 11 in writing. Measuring trends of student achievement or change over time requires the precise replication of past procedures. Therefore, the long-term trend instrument does not evolve

based on changes in curricula or in educational practices.

Reading

Overall achievement scores on the long-term trend reading assessment for the country's 9-, 13-, and 17-year-old students are mixed. Reading performance scores for 9- and 13-year-olds were higher in 1999 than they were in 1971 (table 112). However, the 1999 scores were about the same as the 1984 scores. The reading performance of 17-year-olds was about the same in 1999 as it was in 1971.

Black 9-, 13-, and 17-year-olds exhibited higher reading performance in 1999 than in 1971. However, performance for all three age groups in 1984 was about the same as in 1999. The performance levels of white 9- and 13-year-olds also rose between 1971 and 1999. Separate data for Hispanics were not gathered in 1971, but changes between 1975 and 1999 indicate an increase in performance among 9-, 13-, and 17-year-olds. There was no significant difference between the 1984 and 1999 reading performance of 9-, 13-, and 17-year-old Hispanics.

Mathematics

Results from assessments of mathematics proficiency indicate that scores of 9-, 13-, and 17-year-old students were higher in 1999 than in 1973, but have remained unchanged since 1994. This pattern was similar for white, black, and Hispanic students (table 124).

A 2000 voluntary assessment of the states found that mathematics proficiency varied widely among eighth-graders in the 44 participating jurisdictions (39 states, American Samoa, Guam, Department of Defense overseas and domestic schools, and the District of Columbia) (table 128). Overall, 65 percent of these eighth-grade students performed at or above the Basic level in mathematics, and 26 percent performed at or above the Proficient level. Only four jurisdictions (one state, the District of Columbia, American Samoa, and Guam) had significantly fewer than 50 percent of students performing at least at the Basic level in math.

Science

Long-term changes in science performance have been mixed, though changes over the past 10 years have been generally positive (table 130). In 1999, science performance among 17-year-olds was lower than in 1969, but higher than in 1990. The science performance level of 13-year-olds in 1999 was about the same as the level in 1970 and in 1990. The science performance of 9-year-olds increased between 1970 and 1999, but there was no significant difference between 1990 and 1999.

International Comparisons

The Third International Mathematics and Science Study—Repeat (TIMSS—R), which was conducted in 1999 (4 years after the original TIMSS) focuses on the mathematics and science achievement of eighth-graders in 38 countries. In TIMSS—R, the international average score of the 38 participating countries was 487 in mathematics and 488 in science (tables 399 and 401). In 1999, U.S. eighth-graders on average scored higher in both mathematics and science than the international average of the 38 countries. In mathematics, the average U.S. score was higher than the score in 17 countries, similar to the score in 6 countries, and lower than the score in 14 countries. In science, the average U.S. score was higher than the score in 18 countries, similar to the score in 5 countries, and lower than the score in 14 countries in 1999.

Graduates and Degrees

The estimated number of high school graduates in 2000–01 totaled 2.8 million (table 103). Approximately 2.5 million graduated from public schools, and 0.3 million graduated from private schools. The number of high school graduates has declined from its peak in 1976–77 when 3.2 million people earned their diplomas. In contrast, the number of General Educational Development (GED) credentials issued rose from 331,000 in 1977 to 501,000 in 2000 (table 106). The dropout rate also declined over this period, from 14 percent of all 16- to 24-year-olds in 1977 to 11 percent in 2000 (table 108). Much of the decrease occurred between 1977 and 1990. The number of degrees conferred during the 2000–01 school year by degree level has been projected: 562,000 associate degrees; 1,209,000 bachelor's degrees; 428,000 master's degrees; 81,900 first-professional degrees; and 46,700 doctor's degrees (table 247).

The U.S. Census Bureau collects annual statistics on the educational attainment of the population. Be-

tween 1990 and 2000, the proportion of the adult population 25 years of age and over who had completed a high school rose from 78 percent to 84 percent, and the proportion of adults with a bachelor's degree increased from 21 percent to 26 percent. Over the same period, the proportion of young adults (25- to 29-year-olds) completing high school showed a small increase of about 2 percentage points to 88 percent in 2000, and the proportion completing bachelor's degrees rose from 23 percent to 29 percent (table 8).

Expenditures

Expenditures for public and private education, from kindergarten through graduate school (excluding postsecondary schools not awarding associate or higher degrees), are estimated at \$700 billion for 2000–01 (table 30). The expenditures of elementary and secondary schools are expected to total \$423 billion for 2000–01, while those of colleges and universities are expected to total \$277 billion. The total expenditures for education are expected to amount to 7.1 percent of the gross domestic product in 2000–01, about the same percentage as in the recent past (table 29).

NOTE: Readers should be aware of the limitations of statistics. These limitations vary with the exact nature of a particular survey. For example, estimates based on a sample of institutions will differ somewhat from the figures that would have been obtained if a complete census had been taken using the same survey procedures. Although some of the surveys conducted by NCES are census-type surveys, all surveys are subject to design, reporting, and processing errors and errors due to nonresponse. More information on survey methodologies can be found in the "Guide to Sources" in the appendix. Price indexes for inflation adjustments can be found in table 35.

CHAPTER 1

All Levels of Education

This chapter provides a broad overview of education in the United States. It brings together material from preprimary, elementary, secondary, and postsecondary education, and from the general population to present a composite picture of the American educational system. Tables illustrate the total number of persons enrolled in school, the number of teachers, the number of schools, and total expenditures for education at all levels. This chapter also includes statistics on education-related topics such as educational attainment, family characteristics, population counts, and opinions about schools. Economic indicators and price indexes have been added to facilitate analyses.

Figure 1 shows the structure of education in the United States. It presents the three levels of education (elementary, secondary, and postsecondary) and gives the approximate age range of persons at each level. Pupils ordinarily spend from 6 to 8 years in the elementary grades, which may be preceded by 1 or 2 years in nursery school and kindergarten. The elementary school program is followed by a 4- to 6-year program in secondary school. Pupils normally complete the entire program through grade 12 by age 18.

High school graduates who decide to continue their education may enter a technical or vocational institution, a 2-year college, or a 4-year college or university. A 2-year college normally offers the first 2 years of a standard 4-year college curriculum and a selection of terminal vocational programs. Academic courses completed at a 2-year college are usually transferable for credit at a 4-year college or university. A technical or vocational institution offers postsecondary technical training leading to a specific career.

An associate degree requires at least 2 years of college-level work, and a bachelor's degree normally can be earned in 4 years. At least 1 year beyond the bachelor's is necessary for a master's degree, while a doctor's degree usually requires a minimum of 3 or 4 years beyond the bachelor's.

Professional schools differ widely in admission requirements and in program length. Medical students, for example, generally complete a 4-year program of premedical studies at a college or university before they can enter the 4-year program at a medical

school. Law programs normally require 3 years of coursework beyond the bachelor's degree level.

Many of the statistics in this chapter are derived from the statistical activities of the NCES. In addition, substantial contributions have been drawn from the work of other groups, both government and non-government, as shown in the source notes of the appropriate tables. Information on survey methodologies is contained in the "Guide to Sources" in the appendix and in the publications cited in the source notes.

Enrollment and Teachers

Enrollment in elementary and secondary schools grew rapidly during the 1950s and 1960s and reached a peak in 1971 (table 3). This enrollment rise was caused by what is known as the "baby boom," a dramatic increase in births following World War II. From 1971 to 1984, total elementary and secondary school enrollment decreased every year, reflecting the decline in the school-age population over that period. After these years of decline, enrollment in elementary and secondary schools started increasing in fall 1985, and began hitting record enrollment levels in the mid-1990s (table 3).

Public school enrollment in kindergarten through grade eight rose from 29.9 million in fall 1990 to an estimated 33.6 million in fall 2001. Enrollment in the upper grades rose from 11.3 million in 1990 to 13.6 million in 2001. The growing numbers of young pupils that have been filling the elementary schools will cause some increases at the secondary school level during the next 10 years. Between fall 2001 and fall 2011, public elementary enrollment is expected to remain fairly stable, while public secondary school enrollment is expected to rise by 3 percent. Public school enrollment is projected to set new records every year until 2005.

The proportion of students in private schools has changed little over the past 10 years, remaining around 11 percent. The percentage of college students who attended private colleges and universities ranged between 21 and 23 percent between 1991 and 2001. In 2001, about 5.9 million students were enrolled in private schools at the elementary and secondary levels and 3.5 million students in degree-granting institutions (table 3).

College enrollment decreased from 14.5 million in fall 1992 to 14.3 million in fall 1995, but has increased since then. Total college enrollment is expected to increase for the next 10 years, as increasing numbers of high school graduates pursue post-secondary education.

School attendance rates among 5- to 17-year-olds have remained relatively steady over the past 10 years. The proportion of 20- to 24-year-olds enrolled in school rose from 29 percent to 32 percent during the same time period (table 6). The enrollment rates for the 3- to 34-years-old age group have been more heavily affected by the changing age distribution of the population, than by changes in enrollment rates at specific ages.

Educational attainment has risen in the adult population. In 2000, 84 percent of the population 25 years old and over had completed high school and 26 percent had completed 4 or more years of college. This is higher than in 1990, when 78 percent had completed high school and 21 percent had 4 years of college (table 8). In 2000, about 6 percent of persons 25 years old or over held a master's degree as their highest degree, more than 1 percent held a professional degree (e.g., medicine or law), and 1 percent held a doctor's degree (table 9).

An estimated 3.6 million elementary and secondary school teachers were engaged in classroom instruction in the fall of 2001 (table 4). This number has

risen about 29 percent since 1990. The number of public school teachers in 2001 was about 3.1 million and the number in private schools was estimated at 0.4 million.

Expenditures

Education expenditures rose to an estimated high of \$700 billion in the 2000–01 school year. Elementary and secondary schools spent about 60 percent of this total, and colleges and universities accounted for the remaining 40 percent (table 29). Elementary and secondary schools and colleges and universities spent an estimated 7.1 percent of the gross domestic product in 2000–01.

The proportion of total federal, state, and local government funds spent on education declined between 1980–81 and 1990–91, at least partly as a result of the drop in elementary and secondary enrollment in the early part of the decade and the expansion of other governmental services. Between 1990–91 and 1994–95, the proportion of government funds spent on education rose, from 18.5 to 19.9 percent, as a result of increased state and local government spending on all functions and an increase in federal funds for education (table 31). Of the 1997–98 state and local funds spent on education, about 71 percent went to elementary and secondary schools, 25 percent to colleges and universities, and 4 percent to other education programs (table 32).

Figure 1.—The structure of education in the United States

NOTE—Adult education programs, while not separately delineated above, may provide instruction at the elementary, secondary, or higher education level. Chart reflects typical patterns of progression rather than all possible variations.

Table 1.—Estimated number of participants in educational institutions, by level and control of institution: Fall 2001
[In millions]

Participants	All levels (elementary, secondary, and degree-granting)	Elementary and secondary schools			Degree-granting institutions		
		Total	Public	Private	Total	Public	Private
1	2	3	4	5	6	7	8
Total	77.5	59.9	53.2	6.7	17.7	13.4	4.3
Enrollment	68.5	53.2	47.2	5.9	15.3	11.8	3.5
Teachers and faculty	4.3	3.6	3.1	0.4	0.8	0.5	0.2
Other professional, administrative, and support staff	4.8	3.2	2.9	0.3	1.6	1.1	0.5

NOTE: Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes subcollegiate departments of institutions of higher education, residential schools for exceptional children, and federal schools. Elementary and secondary includes most kindergarten and some nursery school enrollment. Excludes preprimary enrollment in schools that do not offer first grade or above. Degree-granting institutions comprises full-time and part-time students enrolled in degree-credit and nondegree-credit programs in universities, other 4-year colleges,

and 2-year colleges that participated in Title IV federal financial aid programs. Data for teachers and other staff in public and private elementary and secondary schools and colleges and universities are reported in terms of full-time equivalents. Detail may not sum to totals due to rounding.

¹ Public elementary and secondary education are state estimates.

² Includes enrollments in local public school systems and in most private schools (religiously affiliated and nonsectarian). Excludes home-schooled children. Based on the National Household Education Survey, the home-schooled children numbered approximately 850,000 in the spring of 1999. Excludes preprimary pupils in schools that do not offer first grade or above.

³ Estimated.

⁴ Includes kindergarten and some nursery school pupils.

⁵ Enrollment for 1996 through 1999, and the projections are for degree-granting institutions. All other years, are for institutions of higher education.

⁶ Includes unclassified students below the baccalaureate level.

⁷ Includes unclassified postbaccalaureate students.

NOTE: Degree-granting enrollment projections are based on the middle alternative projections published by the National Center for Education Statistics. Data for degree-granting institutions for 1999 imputed using alternative procedures. (See *Guide to Sources* for details.) Detail may not sum to totals due to rounding. Some data have been revised from previously published figures.

—Not available.

¹Beginning in fall 1980, data include estimates for an expanded universe of private schools. Therefore, these totals may differ from figures shown in other tables, and direct comparisons with earlier years should be avoided.

²Data for 1869–70 through 1949–50 include resident degree-credit students enrolled at any time during the academic year. Beginning in 1959, data include all resident and extension students enrolled at the beginning of the fall term.

³Estimated.⁴Projected.

NOTE: Elementary and secondary enrollment includes pupils in local public school systems and in most private schools (religiously affiliated and nonsectarian), but generally excludes pupils in subcollegiate departments of colleges, residential schools for exceptional children, federal schools, and home-schooled children. Based on the National Household Education Survey, the home-schooled children numbered approximately 850,000 in the spring of 1999. Public elementary enrollment includes most

preprimary school pupils. Public elementary and secondary enrollment for 2000 are state estimates. Private elementary enrollment includes some preprimary students. Higher education enrollment includes students in colleges, universities, professional schools, and 2-year colleges. Degree-granting institutions are 2-year and 4-year institutions that were eligible to participate in Title IV federal financial aid programs. Data for degree-granting institutions for 1999 imputed using alternative procedures. (See *Guide to Sources* for details.) Some data have been revised from previously published figures. Detail may not sum to totals due to rounding.

—Not available.

¹ Includes teachers in local public school systems and in most private schools (religiously affiliated and nonsectarian). Teachers are reported in terms of full-time equivalents.² Includes full-time and part-time faculty with the rank of instructor or above in colleges, universities, professional schools, teachers colleges, and 2-year colleges. Excludes teaching assistants.³ Estimated.⁴ Based on actual survey data. Methodology for this year and later years is not consistent with figures for earlier years.⁵ Projected.

NOTE: Detail may not sum to totals due to rounding. Some data have been revised from previously published figures.

—Not available.

¹ Includes special education, alternative, and other schools not classified by grade span. Because of changes in survey definitions, figures for "other" schools are not comparable from year to year.

² Included in other categories.

³ Because of changes in survey procedures, figures are not directly comparable with data for later years.

⁴ Institutions not meeting criteria under (5) were classified as noncollegiate institutions.

⁵ Includes those colleges designated as institutions of higher education by the Higher Education General Information Survey system, even if all their programs are less than 2 years. Includes branch campuses. Beginning in 1980, total includes some schools ac-

credited by the Accrediting Commission of Career Schools and Colleges of Technology. Beginning in 1996–97, data for institutions of higher education are for degree-granting institutions. Degree-granting institutions include those institutions which award degrees at the associate level or higher and were eligible to participate in Title IV federal financial aid programs.

—Not available.

¹ Includes enrollment in any type of graded public, parochial, or other private schools. Includes nursery schools, kindergartens, elementary schools, high schools, colleges, universities, and professional schools. Attendance may be on either a full-time or part-time basis and during the day or night. Enrollments in "special" schools, such as trade schools, business colleges, or correspondence schools, are not included.

² Data are as of April 1940. Data for all other years are as of October.

³ Preprimary enrollment collected using new procedures. May not be comparable to figures for earlier years.

NOTE: Data are based upon sample surveys of the civilian noninstitutional population.

—Not available.

¹ Includes persons of Hispanic origin for years prior to 1980.

² Data for years prior to 1993 include all persons with at least 4 years of high school.

³ Data for 1993 and later years are for persons with a bachelor's or higher degree.

⁴ Estimates based on Bureau of the Census retrojection of 1940 Census data on education by age.

NOTE: Data for 1980 and subsequent years are for the noninstitutional population.

SOURCE: U.S. Department of Commerce, Bureau of the Census, U.S. Census of Population, 1960, Volume 1, part 1; *Current Population Reports*, Series P-20 and unpublished data; and *1960 Census Monograph*, "Education of the American Population," by John K. Folger and Charles B. Nam. (This table was prepared April 2001.)

NOTE: Total population is civilian noninstitutional population. Data are based on a sample survey of the noninstitutional population. Although cells with fewer than 75,000

people are subject to relatively wide sampling variation, they are included in the table to permit various types of aggregations. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Commerce, Bureau of the Census, Current Population Survey, unpublished data. (This table was prepared April 2001.)

¹Preliminary data for elementary and secondary schools and estimates for colleges and universities.²Estimated.

NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Data for private elementary and secondary schools are estimated. Total expenditures for colleges and universities include current-fund expenditures and additions to plant value. Excludes expenditures of non-collegiate postsecondary institutions. Data for 1995–96 and later years are for 4-year and 2-year degree-granting institutions that were eligible to participate in Title IV federal

financial aid programs. Some data revised from previously published figures. Detail may not sum to totals due to rounding.

¹ Based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school year basis.

² Estimated.

³ Data for college and universities are estimated.

⁴ Preliminary data for public elementary and secondary schools and estimates for colleges and universities.

NOTE: Total expenditures for public elementary and secondary schools include current expenditures, interest on school debt, and capital outlay. Data for private elementary and secondary schools are estimated. Total expenditures for colleges and universities include current-fund expenditures and additions to plant value. Excludes expenditures of non-

collegiate postsecondary institutions. College and university education data for 1995–96 and later years are for 4-year and 2-year degree-granting institutions that were eligible to participate in Title IV federal financial aid programs. Some data have been revised from previously published figures. Detail may not sum to totals due to rounding.

¹ Includes state and local government expenditures for education services, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other general expenditures. Includes intergovernmental expenditure to the federal government.

² Includes outlays for "other education."

³ Includes assistance and subsidies to individuals and private elementary and secondary schools, and colleges and universities, as well as miscellaneous education expenditures.

NOTE: Current expenditure data in this table differ from figures appearing in other tables because of slightly varying definitions used in the *Governmental Finances* and Common Core of Data surveys. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Commerce, Bureau of the Census, unpublished data. (This table was prepared August 2001.)

Table 33.—Direct general expenditures per capita of state and local governments for all functions and for education, by level and state: 1997–98

State	Total, all direct general expenditures per capita ¹	Education expenditures							
		Total		Elementary and secondary education		Colleges and universities		Other education ²

—Not available.

¹Includes state and local government expenditures for education services, social services and income maintenance, transportation, public safety, environment and housing, governmental administration, interest on general debt, and other general expenditures. Includes intergovernmental expenditure to the federal government.

²Includes assistance and subsidies to individuals and private elementary and secondary schools, and colleges and universities, as well as miscellaneous education expenditures.

NOTE: Per capita amounts are based on population figures as of July 1, 1998, and are computed on the basis of amounts rounded to the nearest thousand. Detail may not sum to totals due to rounding.

¹Data for years prior to 1963 include expenditures for government fiscal years ending during that particular calendar year. Data for 1963 and later years are the aggregations of expenditures for government fiscal years which ended on June 30 of the stated year. General expenditures exclude expenditures of publicly owned utilities and liquor stores, and of insurance-trust activities. Intergovernmental payments between state and local governments are excluded. Payments to the federal government are included.

²Population of the United States including Armed Forces overseas; includes Alaska and Hawaii beginning 1960. Quarterly data are averages for the period.

³Resident population of the United States; includes Alaska and Hawaii beginning 1958. Includes revisions based on the 1990 Census.

⁴Revised methodology.

NOTE: Gross domestic product data are adjusted by the GDP chained weight price deflator. Personal income data are adjusted by the personal consumption deflator. Some data have been revised from previously published figures.

(This table was prepared August 2001.)

CHAPTER 2

Elementary and Secondary Education

This chapter contains a variety of statistics on public and private elementary and secondary education. Data are presented for enrollments, teachers, schools, student performance, graduates, and expenditures. These data are derived from surveys conducted by the National Center for Education Statistics (NCES) and other public and private organizations. The variety of information ranges from counts of students and schools to opinions of teachers and students concerning the state of education today. New data on charter schools will appear in the 2002 edition of *Digest of Education Statistics*.

Enrollments

Public elementary and secondary school enrollments increased by 6 percent from 1994 to 1999, but when examined separately, enrollment at the elementary and secondary levels exhibited different patterns. Between 1994 and 1999, public elementary enrollment rose by 5 percent, while secondary enrollment increased by 9 percent (table 40).

Preprimary education (nursery and kindergarten schools) enrollment has grown substantially. Preprimary enrollment of 3- to 5-year-olds rose by 14 percent between 1990 and 2000. An important feature of the increasing participation of young children in preprimary schools is the increasing proportion in full-day programs. In 2000, about 53 percent of the children attended preprimary school all day compared with 39 percent in 1990 (table 43).

Slowly increasing numbers and proportions of children are being served in programs for the disabled. During the 1990–91 school year, 11 percent of students were served in these programs compared with 13 percent in 1999–2000. Some of the rise since 1990–91 may be attributed to the increasing proportion of children identified as learning disabled, which rose from 5 percent of enrollment to 6 percent of enrollment in 1999–2000 (table 52).

Teachers and Other School Staff

During the 1970s and early 1980s, public school enrollment decreased, while the number of teachers rose. As a result, the public school pupil/teacher ratio declined from 22.3 in 1970 to 17.9 in 1985. After 1985, the number of pupils per teacher continued

downward, reaching 17.2 in 1990. The pupil/teacher ratio was stable during the early 1990s, but began to decline again during the mid 1990s. By 2000, the pupil/teacher ratio had decreased to an estimated 16.0 (table 65). The pupil/teacher ratio includes teachers for disabled students and other special teachers, who generally are excluded from class size calculations. The average size for public elementary classes in 1993–94 was 24.1 pupils compared to the pupil/teacher ratio for teachers in elementary schools at 18.2 (tables 64 and 69).

In 1993–94, 73 percent of public school teachers were women, 33 percent were under 40, and 47 percent had a master's degree or above. By comparison, about 75 percent of the 378,000 full-time and part-time private school teachers were women. About 42 percent of the private school teachers were under age 40, and 34 percent had a master's or higher degree (table 68). New data from the Schools and Staffing Survey for 1999–2000 will be available through the NCES Web Site during the first half of 2002.

Public school principals tended to be older and have more advanced credentials than teachers. Also, they were more likely to be male. About 7 percent of the public school principals were under age 40 and 99 percent had a master's degree or above. About 35 percent of the principals were women (table 87).

The average salary for public school teachers grew slowly during the 1990s, reaching \$42,898 in 2000–01. After adjustment for inflation, teachers' salaries declined 1 percent between 1990–91 and 2000–01 (table 77).

The number of nonteaching staff employed by public schools grew at a faster rate than the number of pupils and teachers in the 1970s. Between 1970 and 1980, the proportion of total staff who were teachers declined from 60 percent to 52 percent (table 80). From 1980 through 1999, the number of teachers grew at about the same rate as other public school staff. In 1999, there were 8.3 pupils per staff member (total staff) compared with 9.8 pupils per staff member in 1980. In 1993, the number of pupils per staff member at private schools was 9.3 (table 60).

Schools

Over the past several decades, the trend to consolidate small schools has brought a large decline in the total number of public schools in the United States. In 1930, there were more than 247,000 public schools, compared with around 92,000 today. But this number has grown in recent years, with an increase of 7,550 schools between 1990–91 and 1999–2000 (table 89).

The shift in structure of public school systems toward middle schools (grades 4, 5, or 6 to 6, 7, or 8) is continuing. The number of elementary schools rose by 9 percent to approximately 64,000 between 1990–91 and 1999–2000, but middle schools rose by 35 percent. Meanwhile, the number of junior high schools (grades 7 to 8 and 7 to 9) declined by 22 percent (table 95).

Elementary enrollment has risen faster than the number of schools, with the average elementary school size increasing as a result. Elementary schools grew from an average of 449 students in 1990–91 to 477 in 1999–2000 (table 97). During the same time period, the average secondary school size rose from 663 to 706. The rising numbers of alternative schools, which tend to be small, have mitigated the increase in the average size of secondary schools. The average size of regular secondary schools, which exclude alternative schools, special education, and vocational education schools, rose from 684 to 785 between 1990–91 and 1999–2000. Schools tend to be smaller in predominantly rural states, such as South Dakota, Montana, and Nebraska, and larger in states with large urban populations, such as Florida, California, and Hawaii (tables 100 and 101).

Completions and Achievement

The dropout rate among 16- to 24-year-olds (which counts General Education Development recipients as graduates) suggests some decreases over the past twenty years. This dropout rate includes all persons in the 16- to 24-year-old age group regardless of when they dropped out. Between 1980 and 2000, the dropout rate declined from 14.1 percent to 10.9 percent (table 108). The dropout rate statistic is based on the civilian noninstitutionalized population, which excludes persons in prisons and persons not living in households.

Most of the student performance data in the *Digest* are drawn from the National Assessment of Educational Progress (NAEP). The NAEP assessments have been conducted using three basic designs. The main NAEP reports current information for the nation and specific geographic regions of the country. It includes students drawn from both public and non-public schools and reports results for student

achievement at grades 4, 8, and 12. The main NAEP assessments follow the frameworks developed by the National Assessment Governing Board, and uses the latest advances in assessment methodology.

Since 1990, the NAEP assessments have also been conducted on the state level. States that choose to participate receive assessment results that report on the performance of students in that state. In its content, the state assessment is identical to the assessment conducted nationally. However, because the national NAEP samples were not, and are not currently designed to support the reporting of accurate and representative state-level results, separate representative samples of students are selected for each participating jurisdiction/state.

NAEP long-term trend assessments are designed to give information on the changes in the basic achievement of America's youth since the early 1970s. They are administered nationally and report student performance at ages 9, 13, and 17 and in grades 4, 8, and 11 in writing. Measuring trends of student achievement or change over time requires the precise replication of past procedures. Therefore, the long-term trend instrument does not evolve based on changes in curricula or in educational practices.

Long-term trend data on student achievement has improved in a number of areas. An overall increase was seen in reading proficiency scores for 9- and 13-year-olds from 1971, with 17-year-olds scoring about the same in 1999 as in 1971. After significant gains during the 1970s, 9-year-old reading proficiency remained stable, with the 1999 score about the same as 1980. Significant gaps in performance continue to exist between racial/ethnic subgroups and between male and female students. Gender gaps favoring female students in reading at ages 13 and 17 were essentially the same in 1999 as in 1971. The gender gap favoring female 9-year-olds was smaller in 1999 than in 1971 (table 112).

The results of assessments in average writing achievement from 1984 to 1996 reveal a shift at grades 4 and 8. After declining between 1984 and 1990, average performance at grade 8 increased, and by 1996 had again returned to the earlier level. Also, at grade 4 there was an increase in performance between 1990 and 1996, countering downward fluctuations in the 1980s, so that performance was essentially unchanged between 1984 and 1996. Overall grade 11 writing performance declined between 1984 and 1996. Females outperformed males at the 4th-, 8th-, and 11th-grade levels (table 119).

Results from national assessments of mathematics achievement indicate a significant improvement at ages 9, 13, and 17 between 1973 and 1999. For 9-year-olds, a period of stable performance during the 1970s was followed by an 11-point increase in aver-

age scores from 1982 to 1990. For 13-year-olds, an increase in average scores between 1978 and 1982 was followed by additional increases during the 1990s. The average score of 17-year-olds declined between 1973 and 1982. After increasing between 1982 and 1992, scores have remained stable, but the 1999 average mathematics score was higher than 1973. The difference between males' and females' average mathematics scores in 1999 was not statistically significant at any age (table 124).

Average science scores of 9-year-olds declined between 1970 and 1973, then remained stable through 1982. Average scores rose 10 points between 1982 and 1992, but have been stable since then. Science scores for 13-year-olds declined by 8 points from 1970 to 1977. Scores increased by 11 points between 1977 and 1992, but decreased slightly between 1992 and 1999. Science scores for 13-year-olds in 1999 were about the same as in 1970. Science scores for 17-year-olds fell by 22 points between 1969 and 1982, and then increased between 1982 and 1992. On average, 17-year-olds in 1999 had higher science scores than their counterparts in 1990. However, the average science scores of 17-year-olds in 1999 remain 10 points lower than 1969. Gender gaps favoring 17-year-old males in science narrowed so that the gaps in the 1990s were smaller than those in the 1970s and early 1980s. The difference in the performance of male and female 13-year-olds favored males in 1999. There was no significant difference in the performance of male and female 9-year-olds (table 130).

The Scholastic Assessment Test (SAT, formerly known as the Scholastic Aptitude Test) was not designed as an indicator of student achievement, but rather to help predict how well students will do in college. Between 1990–91 and 2000–01, mathematics SAT scores increased by 14 points, while verbal scores rose by 7 points (table 135).

Over the past 12 years, the average number of science and mathematics courses completed by public high school graduates increased substantially. The mean number of mathematics courses (Carnegie units) completed in high school rose from 2.6 in 1982

to 3.4 in 1998, and the number of science courses rose from 2.2 to 3.1. The average number of courses in vocational areas completed by all high school graduates dropped gradually, from 4.6 units in 1982 to 4.0 units in 1998. As a result of the increased academic course load, the proportion of students completing the recommendations of the 1983 National Commission on Excellence (4 units of English, 3 units of social studies, 3 units of science, 3 units of mathematics, 2 units of foreign language, and .5 units of computer science) rose from 2 percent in 1982 to 29 percent in 1998 (tables 140 and 143).

School Violence

About 57 percent of public schools reported a criminal incident to police in 1996–97, including a serious violent crime or a less serious crime such as a fight without weapons, theft, or vandalism. Ten percent of schools reported a serious violent crime to police and 47 percent reported only a less serious or nonviolent crime (table 150).

Revenues and Expenditures

The state share of revenues for public elementary and secondary schools grew steadily for many decades, but this trend stopped in the late 1980s. Since then, the balance of revenues from state and local governments has fluctuated. Between 1988–89 and 1993–94, the state share fell from 47.8 to 45.2 percent while the local share rose. Between 1993–94 and 1998–99, the state share rose to 48.7 percent while the local share decreased. The federal share was 7.1 percent in 1998–99 (table 157).

The expenditure per student in public schools rose during the late 1980s, and again in the late 1990s after remaining stable during the first part of the 1990s. Between 1985–86 and 1990–91, current expenditures per student in fall enrollment grew 14 percent, after adjustment for inflation. From 1990–91 to 1995–96, expenditures per student increased by less than 1 percent. Between 1995–96 and 2000–01 expenditure per student in fall enrollment rose 10 percent to \$7,079 (table 167).

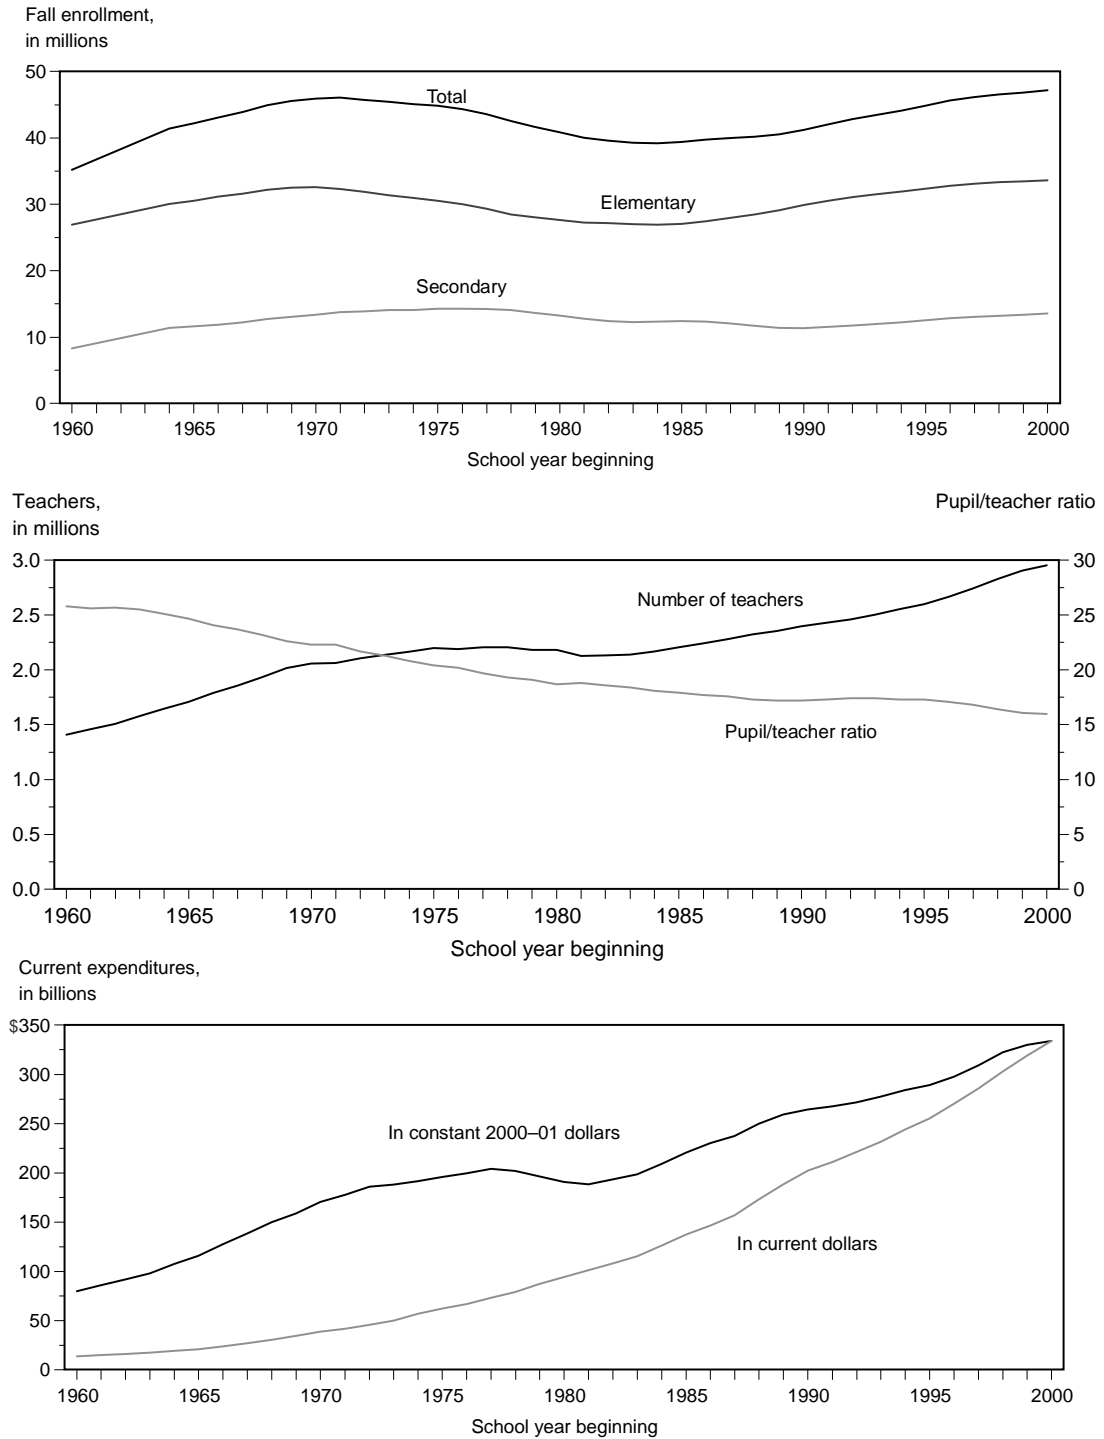

Figure 7.—Preprimary enrollment of 3- to 5-year-olds, by attendance status: October 1970 to October 2000

NOTE: Data for 1994 and later years were collected using new procedures and may not be comparable with figures for earlier years.

—Not available.
¹ Data on population and labor force are from the Bureau of the Census, and data on personal income and national income are from the Bureau of Economic Analysis, U.S. Department of Commerce. Population data through 1900 are based on total population from the decennial census. From 1909–10 to 1959–60, population data are total population, including armed forces overseas, as of July 1. Data for later years are for resident population that excludes armed forces overseas.
² Data for 1869–70 through 1959–60 are school year enrollment. Data for later years are fall enrollment.
³ Data for 1870–71.
⁴ Estimated by the National Center for Education Statistics.
⁵ Prior to 1919–20, data are for the number of different persons employed rather than number of positions.
⁶ Prior to 1919–20, includes interest on school debt.
⁷ Because of the modification of the scope of "current expenditures for elementary and secondary schools," data for 1959–60 and later years are not entirely comparable with prior years.
⁸ Beginning in 1969–70, includes capital outlay by state and local school building authorities.
⁹ Includes summer schools, community colleges, and adult education. Beginning in 1959–60, also includes community services, formerly classified with "current expenditures for elementary and secondary schools."
¹⁰ Excludes community colleges and adult education.
¹¹ Average includes supervisors, principals, teachers, and other nonsupervisory instructional staff.
¹² Estimated by the National Education Association.
¹³ Excludes current expenditures not allocable to pupil costs.
¹⁴ "ADA" means average daily attendance in elementary and secondary schools.
¹⁵ Expenditure figure is the sum of current expenditures allocable to pupil costs, capital outlay, and interest on school debt.
¹⁶ Per-day rates derived by dividing annual rates by average length of term.
 NOTE: Kindergarten enrollment includes a relatively small number of nursery school pupils. Some data have been revised from previously published figures. Beginning in 1959–60, data include Alaska and Hawaii. Detail may not sum to totals due to rounding.

¹Data estimated by state education agencies. Data differ from projections appearing in other tables.²Includes a number of prekindergarten students.³Data imputed by the National Center for Education Statistics based on previous year's data.⁴Actual data reported by state.⁵Data beginning in 1986, include state vocational/technical schools.⁶Early estimate number reported by state, adjusted by the National Center for Education Statistics.⁷The Department of Defense dependents schools includes only overseas schools through 1998. Data for 1999 includes both overseas and domestic schools.

NOTE: Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data surveys. (This table was prepared March 2001.)

NOTE: Because of changes in reporting practices and imputation of data for non-respondents in later years, data for prekindergarten enrollment are not comparable over time. Some data revised from previously published figures. Detail may not sum to totals due to rounding.

—Not available.

NOTE: Data for California are not strictly comparable with those for other states because California's attendance figures through 1990–91 include excused absences. Some data have been revised from previously published figures.

—Not available.

¹ Data collected using new procedures. May not be comparable with figures prior to 1994.

² Enrollment data include only those students in preprimary programs.

NOTE: Data are based on sample surveys of the civilian noninstitutional population. Although cells with fewer than 75,000 children are subject to wide sampling variation,

they are included in the table to permit various types of aggregations. Detail may not sum to totals due to rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Preprimary Enrollment*, various years; and U.S. Department of Commerce, Bureau of the Census, Current Population Survey, unpublished data. (This table was prepared July 2001.)

—Not available.

¹ Mean hours per week in nonparental care among preschool children enrolled in nonparental care arrangements.² Excludes children who have entered kindergarten.³ Excludes data for households with no mother present in household.⁴ Excludes children living apart from their parents.

NOTE: A child's "primary arrangement" was defined as the regular nonparental care arrangement or early childhood education program in which the child spent the most

time per week. Detail may not sum to totals due to rounding. Standard errors appear in parentheses.

¹ Estimates are based only on children 3 to 5 years old who have not entered kindergarten.

² Rows do not add up to 100.0 because some children participated in more than one type of nonparental arrangement.

³ Center based programs include day care centers, nursery schools, prekindergarten, preschools and Head Start programs.

NOTE: Some data have been revised from previously published figures. Detail may not sum to totals due to rounding.

¹ Performance estimates are mean scale scores. Scale scores range as follows: General knowledge, 0–51; Reading, 0–92; and Mathematics, 0–64.

² Student was assumed to have mastered a particular skill if at least three of the four items in the subject cluster were answered correctly.

³ Less than .05 percent

NOTE: Estimates based on children who entered kindergarten for the first time in the fall of 1998 and were assessed in English for all four rounds of data collection. Approximately 67 percent of Hispanic children and 82 percent of Asian children were assessed in English in all four rounds of data collection. First grade estimates include children promoted to first grade on time and also include the scores of the small percentage of children (i.e., 5 percent) who repeated kindergarten in 1999–2000.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Early Childhood Longitudinal Study, Kindergarten Class of 1998–99, First Grade, Restricted-Use Files. (This table was prepared September 2001.)

Table 49.—Percentage of kindergarten teachers and parents indicating the importance of various factors for kindergarten readiness, by school type: Fall 1998

Teacher and parent perception of student skills	Perception of importance for public school children					Perception of importance for private school children				
	Not important	Not very important	Somewhat important	Very important	Essential	Not important	Not very important	Somewhat important	Very important	Essential

¹ Estimates pertaining to teachers are based on the responses of a nationally representative sample of kindergarten teachers.

² Less than .5 percent.

³ Estimates pertaining to parents are based on the responses of a nationally representative sample of kindergarten children's parents.

NOTE: Standard errors appear in parentheses. Detail may not sum to totals due to rounding.

¹ Excludes capital outlay for years through 1979–80, and 1989–90 to the latest year.

From 1980–81 to 1988–89 total transportation figures include capital outlay.

² Estimate based on data appearing in January issues of *School Bus Fleet*.

NOTE: Constant dollars are adjusted for inflation using the Consumer Price Index computed on a school year basis. Some data have been revised from previously published figures.

¹ Includes students served under Chapter I and Individuals with Disabilities Education Act (IDEA), formerly the Education of the Handicapped Act. Prior to October 1994, children and youth with disabilities were served under the Individuals with Disabilities Education Act, Part B, and Chapter 1 of the Elementary and Secondary Education Act. In October 1994, Congress passed the Improving America's Schools Act in which funding for children and youth with disabilities was consolidated under IDEA, Part B. Data reported in this table for years prior to 1993–94 include children ages 0–21 served under Chapter 1. Data reported in this table for years after 1993–94 reflect children ages 3–21 served under IDEA, Part B.

² Includes preschool children 3–5 years served under Chapter I and IDEA, Part B. Prior to 1987–88, these students were included in the counts by disability condition. Beginning in 1987–88, states were no longer required to report preschool children (0–5 years) by disability condition.

³ Less than 0.05 percent.

⁴ Based on the enrollment in public schools, kindergarten through 12th grade, including a relatively small number of prekindergarten students.

⁵ Less than .005 percent.

NOTE: Counts are based on reports from the 50 states and District of Columbia only (i.e., figures from outlying areas are not included). Increases since 1987–88 are due in part to new legislation enacted fall 1986, which mandates public school special education services for all disabled children ages 3 through 5. Some data have been revised from previously published figures. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Education, Office of Special Education and Rehabilitation Services, *Annual Report to Congress on the Implementation of The Individuals with Disabilities Education Act*, various years, and unpublished tabulations; and National Center for Education Statistics, Common Core of Data survey. (This table was prepared April 2001.)

for years prior to 1994 include children served under Chapter 1. Some data revised from previously published figures.

NOTE: Percent of students that are disabled are based on the enrollment in public schools, prekindergarten through 12th grade. Prior to 1994, children and youth with disabilities were served under the Individuals with Disabilities Education Act (IDEA), Part B, and Chapter 1 of the Elementary and Secondary Education Act. In October 1994, Congress passed the Improving America's Schools Act in which funding for children and youth with disabilities was consolidated under IDEA, Part B. Data reported in this table

SOURCE: U.S. Department of Education, Office of Special Education and Rehabilitative Services, *Annual Report to Congress on the Implementation of The Individuals with Disabilities Education Act*, various years, and unpublished tabulations. (This table was prepared April 2001.)

¹Includes a relatively small number of secondary ungraded and postgraduate students.

²Data for most years are partly estimated.

³Data for 1890 through 1950 are from the decennial censuses of population. The other figures are Bureau of the Census estimates as of July 1 preceding the opening of the school year.

⁴Gross enrollment ratio based on school enrollment of all ages in grades 9 to 12 divided by the 14- to 17-year-old population. Differs from enrollment rates in other tables which are based on the enrollment of persons in the given age group only.

⁵Data are for 1927–28.

⁶Data are for 1940–41.

⁷Estimated.

NOTE: Includes enrollment in public schools that are a part of state and local school systems and also in most private schools, both religiously affiliated and nonsectarian. Some data have been revised from previously published figures. Detail may not sum to totals due to rounding.

—Not available.

¹ Estimated.² Includes enrollment in ancient Greek (not shown separately). Fewer than 1,000 students were enrolled in this language in each of the years shown.³ Less than 0.05 percent.⁴ Until 1990, student enrollment in Japanese courses was included in the Other modern foreign languages category.⁵ Includes students enrolled in unspecified modern foreign languages. In 1978, a relatively large number of students were not identified by field of study. Since 1990, enrollment in Japanese courses is reported as a separate category.SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data survey; and American Council on the Teaching of Foreign Languages, *Foreign Language Enrollments in Public Secondary Schools, Fall 1989, Fall 1990, and Fall 1994*. (This table was prepared February 1999.)

¹ Includes schools beginning with grade 6 or below and with no grade higher than 8.
² Schools have no grade lower than 7.
³ Schools have grades lower than 7 and higher than 8.
⁴ Includes student support services professional staff, such as school psychologists, social workers, occupational therapists, speech therapists, and nurses.
⁵ Includes cafeteria workers and maintenance staff.

NOTE: Data are based upon a sample survey and may not be strictly comparable with data reported elsewhere. Includes only schools that offer first grade or above.

—Not available.
¹ Only includes kindergarten students who attend schools that offer first grade or above.
² Tuition weighted by the number of students enrolled in schools.
³ Too few sample cases (fewer than 30 schools) for reliable estimates.
 NOTE: Data are based upon a sample survey and may not be strictly comparable with data reported elsewhere. Elementary schools have grade 6 or lower and no grade higher than 8. Secondary schools have no grade lower than 7. Combined schools have grades lower than 7 and higher than 8. Excludes prekindergarten students. Detail may not sum to totals due to rounding and missing values in cells with too few sample sizes.

¹ Includes special education, vocational/technical education, and alternative schools. Excludes prekindergarten enrollment.

² The estimates for 1999 were computed using a different procedure from that used prior to 1997–98.

³ NCES employed an area frame sample to account for noninclusion of schools at the national level. However, caution should be exercised in interpreting state by state characteristics since the samples were not designed to produce such numbers.

⁴ Insufficient data to compute a standard error.

NOTE: Standard errors for states are root mean squared errors to correct for bias in model based estimates. Tabulation includes only schools that offer first grade or above. Some data have been revised from previously published figures.

¹ Data have been revised from previously published figures.² Unless otherwise indicated, data were estimated by state education agencies.³ Includes imputations for underreporting of prekindergarten teachers.⁴ Data imputed by the National Center for Education Statistics based on previous year's data.⁵ Actual preliminary count by state.⁶ Early estimate number reported by state, adjusted by the National Center for Education Statistics.⁷ Includes overseas schools only through 1998. Data for 1999 includes both overseas and domestic schools.

NOTE: Distribution of elementary and secondary teachers determined by reporting units. Teachers reported in full-time equivalents.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data surveys. (This table was prepared March 2001.)

Table 67.—Teachers, enrollment, and pupil/teacher ratios in public elementary and secondary schools, by state: Fall 1994 to fall 1999

¹Data are based upon a sample survey and may not be strictly comparable with data reported elsewhere.

²Less than .05 percent.

NOTE: Excludes prekindergarten teachers. Data are based on a head count of all teachers rather than on the number of full-time-equivalent teachers reported in other tables. Detail may not sum to totals due to survey item nonresponse and rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, "Schools and Staffing Survey, 1993–94." (This table was prepared June 1997, new data forthcoming in 2002.)

Table 69.—Highest degree earned, number of years teaching experience, and average class size for teachers in public elementary and secondary schools, by state: 1993–94

¹ Data are based on a head count of all teachers rather than on the number of full-time-equivalent teachers appearing in other tables.² Teachers with less than a bachelor's degree are not shown.³ Elementary teachers are those who taught self-contained classes at the elementary level and secondary teachers are those who taught departmentalized classes (e.g., science, art, social science, or other course subjects) at the secondary level. Excludes special education teachers. Teachers were classified as elementary or secondary on the

basis of the grades they taught, rather than on the level of the school in which they taught.

NOTE: Excludes prekindergarten teachers. Standard errors appear in parentheses. Detail may not sum to totals due to rounding.

Table 74.—Teachers’ perceptions about teaching and school conditions, by type and control of school: 1993–94

Statement	Percent of teachers somewhat agreeing or strongly agreeing with statement							
	Public school teachers				Private school teachers			
	Total	Elementary schools	Secondary schools	Combined schools	Total	Elementary schools	Secondary schools	Combined schools
1	2	3	4	5	6	7	8	9
The school administration’s behavior toward the staff is supportive	79.2	80.7	76.8	77.0	88.2	89.4	83.3	88.7
My principal enforces school rules for student conduct and backs me up when I need it	80.8	82.0	78.6	81.4	88.4	89.3	84.4	88.5
The principal lets staff members know what is expected of them	85.6	86.9	83.5	82.1	88.2	89.1	86.6	88.2
Principal talks to me frequently about my instructional practices	44.3	49.0	35.6	45.7	54.0	58.3	41.2	53.7
Goals and priorities for the school are clear	82.8	85.4	78.1	79.3	90.2	90.9	88.3	90.2
Teachers in this school are evaluated fairly	87.9	88.6	86.6	85.3	89.8	90.4	87.3	90.3
In this school, staff members are recognized for a job well done	67.9	71.7	61.7	62.6	81.1	82.4	74.7	82.1
Principal knows what kind of school he/she wants and has communicated it to the staff	80.5	82.8	76.7	77.1	88.6	89.1	85.5	89.9
Principal does a poor job in getting resources for this school	16.1	15.1	18.1	19.6	10.5	10.6	12.9	8.7
Most of my colleagues share my beliefs and values about what the central mission of the school should be	84.2	87.3	79.1	81.4	93.2	95.0	88.4	93.7
Teachers participate in making most of the important education decisions in this school	58.3	62.8	50.3	58.4	74.0	75.1	66.1	75.3
There is a great deal of cooperative effort among staff	77.5	80.9	71.8	76.3	90.5	90.3	86.2	93.0
I receive a great deal of support from parents for the work I do	52.5	58.4	43.2	47.4	84.6	87.3	77.7	83.1
I make a conscious effort to coordinate the content of my courses with that of other teachers	85.0	88.0	79.8	82.9	85.2	86.6	78.5	86.1
Routine duties and paperwork interfere with my job of teaching	70.8	70.9	71.4	65.7	40.1	40.5	45.2	36.2
I have to follow rules in this school that conflict with my best professional judgement	24.2	22.0	27.4	26.4	15.0	15.1	19.1	13.0
Level of student misbehavior in this school interferes with my teaching	44.1	42.9	45.5	43.9	22.4	22.7	20.2	25.1
Amount of student tardiness and class cutting in this school interferes with my teaching	27.9	18.4	45.3	24.6	8.6	6.4	13.4	9.2
Rules for student behavior are consistently enforced by teachers in this school, even for students who are not in their classes	61.8	70.9	45.8	59.5	77.6	83.1	63.6	77.0
I am satisfied with my class sizes	64.9	62.9	68.2	78.1	84.4	82.2	84.0	89.3
I am satisfied with my teaching salary	44.9	44.1	47.2	43.1	41.6	35.5	43.6	49.5
I sometimes feel it is a waste of time to try to do my best as a teacher	26.8	23.4	32.6	30.8	13.4	12.1	16.5	13.7
I plan with the librarian/media specialist for the integration of services into my teaching	66.9	67.8	65.8	64.5	60.6	58.6	65.4	61.2
Library/media materials are adequate to support my instructional objectives	65.6	64.9	67.7	59.9	61.0	56.4	67.2	63.4
Necessary materials are available as needed by staff	73.1	73.7	73.0	72.3	85.7	84.5	85.3	87.3

¹ Based on the Consumer Price Index prepared by the Bureau of Labor Statistics, U.S. Department of Labor. Price index does not account for different rates of change in the cost of living among states.

² Estimated by the American Federation of Teachers. See NOTE.

³ Preliminary or state estimate.

⁴ Excludes state-paid health insurance.

⁵ Includes pay for extra duties.

⁶ Includes employer pick-up of employee pension contribution.

⁷ Includes pension and extra-duty pay where applicable.

⁸ Estimated to exclude fringe benefits.

⁹ Median salary.

¹⁰ Includes estimated \$1,000 in local supplements.

NOTE: Data in this table reflect results of surveys conducted by the American Federation of Teachers. Because of differing survey and estimation methods, these data are not entirely comparable with figures appearing in other tables. Some data have been revised from previously published figures.

SOURCE: American Federation of Teachers, *Survey and Analysis of Teacher Salary Trends*, various years. (This table was prepared June 2001.)

Table 80.—Average annual salary of instructional staff in public elementary and secondary schools, by state: 1939–40 to 2000–01

¹ Based on the Consumer Price Index prepared by the Bureau of Labor Statistics, U.S. Department of Labor. Price index does not account for different rates of change in the cost of living among states.² Estimated by National Education Association.³ Excludes kindergarten teachers.⁴ Includes administrators.⁵ Includes clerical assistants to instructional personnel.⁶ Includes attendance personnel.⁷ Excludes vocational schools not operated as part of the regular public school system.⁸ Median salary.

NOTE: Instructional staff includes supervisors, principals, classroom teachers, and other instructional staff. Some data have been revised from previously published figures.

¹ Based on the Consumer Price Index prepared by the Bureau of Labor Statistics, U.S. Department of Labor.² Includes supervisors, principals, classroom teachers, and other instructional staff.³ Calendar-year data from the U.S. Department of Commerce have been converted to a school-year basis by averaging the two appropriate calendar years in each case. Beginning in 1992–93, data are wage and salary accruals per full-time-equivalent employee. Data for years 1987–88 and after may not be directly comparable to earlier years.

NOTE: Some data have been revised from previously published figures.

—Not available.
 1 Data included in column 5.
 2 Data included in column 10.
 3 Data included in column 22.
 4 Data not comparable with figures for years prior to 1985.
 5 Data included in column 16.
 6 Because of classification revisions, data are not directly comparable with figures for prior years.
 7 Data included in column 6.

NOTE: Some data have been revised from previously published figures. Because of variations in data collection instruments, some categories are only roughly comparable over time. Detail may not sum to totals due to rounding.

¹Data revised from previously published data.

²U.S. totals include imputations for underreporting and nonreporting states.

³Includes imputations for underreporting.

⁴The Department of Defense dependents schools includes overseas schools only through 1998. Data for 1999 includes both overseas and domestic schools.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data survey; and unpublished estimates. (This table was prepared February 2001.)

**Table 86.—Staff, enrollment, and pupil/staff ratios in public elementary and secondary schools, by state:
Fall 1993 to fall 1999**

¹Total differs from data appearing in other tables because of varying survey processing procedures and time period coverages.

²Percentages for those with less than a bachelor's degree are not shown.

³Excludes principals reporting a salary of \$0. About 7.4 percent of private school principals had \$0 salary. If these principals are included in the average annual salary calculations, the average for all private school principals is \$29,714.

⁴Too few cases for reliable estimate.

NOTE: Detail may not sum to totals due to rounding and survey item nonresponse.

¹ Central city of metropolitan statistical area (MSA) with population of 400,000 or more or a population density of 6,000 or more persons per square mile.

² Central city of an MSA but not designated as a large central city.

³ Place within the MSA of a large central city.

⁴ Place within the MSA of a midsize central city.

⁵ Place not within an MSA but with population of 25,000 or more and defined as urban.

⁶ Place not within an MSA with a population of at least 2,500, but less than 25,000.

⁷ Place with a population of less than 2,500 outside an MSA.

⁸ Place with a population of less than 2,500 within an MSA.

⁹ Average for schools reporting enrollment.

¹⁰ Ratio for schools reporting both full-time-equivalent teachers and fall enrollment data.

¹¹ Property tax and parent government contributions are determined on the basis of independence or dependence of the local school system and are mutually exclusive.

NOTE: The enrollment of schools within a school district was used to determine the locale classification of a district. The predominant locale of enrollment within a district was used for the entire district. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data survey; and U.S. Department of Commerce, Bureau of the Census, *Survey of Local Government Finances*, unpublished data. (This table was prepared October 2001.)

—Not available.

¹ Includes operating and nonoperating districts.

² Schools with both elementary and secondary programs are included under elementary schools and also under secondary schools.

³ Data for most years are partly estimated.

⁴ Includes regular schools and special schools not classified by grade span.

⁵ Includes elementary, secondary, and combined elementary/secondary schools.

⁶ These data are from sample surveys and should not be compared directly with the data for earlier years.

⁷ Because of expanded survey coverage, data are not directly comparable with figures prior to 1986.

—Not available.

¹ Data exclude teachers reported as working in school district offices rather than in schools.

² Alaska, Arizona, Colorado, Idaho, Illinois, Maryland, New Jersey, South Dakota, Tennessee, Virginia, Vermont, and Wisconsin reported data on an alternative July through June cycle, rather than the specified October through September cycle.

³ Includes regular and other high school diplomas.

SB=School board.

SC=School corporation.

ISD=Independent school district.

—Not available.

¹ Includes schools beginning with grade 6 or below and with no grade higher than 8.

² Includes schools with grade spans beginning with 4, 5, or 6 and ending with grade 6, 7, or 8.

³ Includes schools with no grade lower than 7.

⁴ Includes schools with grades 7 and 8 or grades 7 through 9.

⁵ Includes schools beginning with grade 6 or lower and ending with grade 9 or above.

⁶ Includes special education, alternative, and other schools not classified by grade span.

⁷ Because of revision in data collection procedures, figures not comparable to data for other years.

NOTE: Some data have been revised from previously published figures.

¹ Excludes vocational, special education, and alternative schools.² Vocational schools are also included under appropriate grade span.³ Average for schools reporting enrollment data.

NOTE: Includes schools with no grade lower than 7. Excludes schools not reported by level, such as special education schools for the disabled.

¹ Combined elementary/secondary schools not shown separately, but included in total and in other categories.
² Excludes special education, vocational, and alternative schools, as well as those schools offering only primary education.
³ Functional age is defined as the age of the school based on the year of the most recent renovation or the year of construction of the main instructional building(s) if no renovation has occurred.

NOTE: Data are derived from sample surveys and are subject to sampling error. Standard errors appear in parentheses.

¹ Derived from *Current Population Reports*, Series P-25. 17-year-old population adjusted to reflect October 17-year-old population.² Includes graduates of public and private schools.³ Data for 1929–30 and preceding years are from *Statistics of Public High Schools* and exclude graduates of high schools which failed to report to the Office of Education.⁴ For most years, private school data have been estimated based on periodic private school surveys.⁵ Public high school graduates based on state estimates.

NOTE: Includes graduates of regular day school programs. Excludes graduates of other programs, when separately reported, and recipients of high school equivalency certificates. Some data have been revised from previously published figures. Detail may not sum to totals due to rounding.

—Not available.

¹ Revised from previously published data.² National total includes estimates for nonreporting states.³ Actual count.⁴ Data imputed by the National Center for Education Statistics based on previous year's data.⁵ Beginning in 1985–86, graduates from adult programs are excluded.⁶ Early estimate number reported by state, adjusted by the National Center for Education Statistics.⁷ Includes foreign schools only through 1997–98. Data for 1998–99 include overseas and domestic schools.⁸ Data are for 1970–71.

NOTE: Data include graduates of regular day school programs, but exclude graduates of other programs and persons receiving high school equivalency certificates. Some data have been revised from previously published figures. All 1999–2000 and 2000–01 data are state estimates unless otherwise indicated.

¹Alabama, Arizona, Idaho, Illinois, Maryland, New Jersey, Oklahoma, South Dakota, Tennessee, Vermont, Virginia, and Puerto Rico reported data on an alternative July through June cycle, rather than the specified October through September cycle for drop-out data.

²U.S. total includes estimates for nonreporting states, based on 1998 12th-grade enrollment racial/ethnic distribution reported by state.

³Data differ slightly from figures reported in other tables due to varying reporting practices for racial/ethnic survey data.

⁴Racial/ethnic distribution estimated by NCES based on 1998 12th-grade enrollment racial/ethnic distribution reported by state.

⁵Estimates provided by state education agency after Common Core of Data file was closed.

⁶Includes overseas and domestic schools.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data survey; and unpublished data. (This table was prepared November 2001.)

—Not available.

¹Based on the April 1960 decennial census.²White and black include persons of Hispanic origin.³Because of changes in data collection procedures, data may not be comparable with figures for earlier years.

NOTE: "Status" dropouts are 16- to 24-year-olds who are not enrolled in school and who have not completed a high school program regardless of when they left school. People who have received GED credentials are counted as high school completers. All

data except for 1960 are based on October counts. Data are based upon sample surveys of the civilian noninstitutionalized population. Standard errors appear in parentheses.

¹ Living independently includes living alone, with a spouse or roommate, in a college dormitory, or in military housing not as a dependent.

² All conditions includes youth in each of the 11 federal special education disability categories. Percentages are reported separately only for categories with at least 25 youth in the sample.

NOTE: Data based on students who had been out of school up to 3 years and had attended special and regular schools in the 1985–86 or 1986–87 school years.

—Not available.

¹ Excludes persons not enrolled in school.

² Test scores of Hispanics were not tabulated separately.

NOTE: These test scores are from the National Assessment of Educational Progress (NAEP). The NAEP scores have been evaluated at certain performance levels. A score of 300 implies an ability to find, understand, summarize, and explain relatively complicated literary and informational material. A score of 250 implies an ability to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. A score of 200 implies an ability to understand,

combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. A score of 150 implies an ability to follow brief written directions and carry out simple, discrete reading tasks. Scale ranges from 0 to 500. Some data have been revised from previously published figures. Standard errors appear in parentheses.

NOTE: All age groups exclude persons not enrolled in school. These test scores are from the National Assessment of Educational Progress (NAEP). The NAEP scores have been evaluated at certain performance levels. A score of 300 implies an ability to find, understand, summarize, and explain relatively complicated literary and informational material. A score of 250 implies an ability to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. A score of 200 implies an ability to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. A score of 150 implies an ability to follow brief written directions and carry out simple, discrete reading tasks. Scale ranges from 0 to 500. Some data revised from previously published figures. Standard errors appear in parentheses.

—Not available.

NOTE: All age groups exclude persons not enrolled in school. These test scores are from the National Assessment of Educational Progress (NAEP). The NAEP scores have been evaluated at certain performance levels. A score of 300 implies an ability to find, understand, summarize and explain relatively complicated literary and informational material. A score of 250 implies an ability to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. A score of 200 implies an ability to understand, combine ideas, and make inferences

based on short uncomplicated passages about specific or sequentially related information. A score of 150 implies an ability to follow brief written directions and carry out simple, discrete reading tasks. Scale ranges from 0 to 500. Detail may not sum to totals due to rounding. Standard errors appear in parentheses.

—Not available.

¹As measured by the National Assessment of Educational Progress (NAEP). Forty-one states and Guam participated in the test in 1994, and forty-four jurisdictions (state, territory, Dept. of Defense overseas schools) participated in 1998. Due to sample size and school participation guidelines, some states are not shown.

²Sample size is insufficient to permit a reliable estimate.

³Did not satisfy one or more of the guidelines for school sample participation rates in 1998. Data are subject to appreciable nonresponse bias.

⁴Did not satisfy one or more of the guidelines for school sample participation rates in 1994. Data are subject to appreciable nonresponse bias.

NOTE: These test scores are from the National Assessment of Educational Progress (NAEP). The NAEP scores have been evaluated at certain performance levels. A score of 300 implies an ability to find, understand, summarize, and explain relatively com-

plated literary and informational material. A score of 250 implies an ability to search for specific information, interrelate ideas, and make generalizations about literature, science, and social studies materials. A score of 200 implies an ability to understand, combine ideas, and make inferences based on short uncomplicated passages about specific or sequentially related information. A score of 150 implies an ability to follow brief written directions and carry out simple, discrete reading tasks. Scale ranges from 0 to 500. Excludes states not participating in the survey. Standard errors appear in parentheses.

NOTE: These test scores are from the National Assessment of Educational Progress (NAEP). The writing scale score ranges from 0 to 500 and is defined as the average of a respondent's estimated scores on specific writing tasks. The average response method is used to estimate average writing achievement for each participant as if each had performed all 11 writing tasks. Standard errors appear in parentheses.

NOTE: These test scores are from the National Assessment of Educational Progress (NAEP). As with the NAEP reading scale, these scales range from 0 to 500. However, the distribution of scores varies by subject. Therefore, direct score comparisons among the subjects should be avoided. Detail may not sum to totals due to rounding. Standard errors appear in parentheses.

—Not available.

NOTE: All age groups exclude persons not enrolled in school. These test scores are from the National Assessment of Educational Progress (NAEP). Performers at the 150 level know some basic addition and subtraction facts, and most can add 2-digit numbers without regrouping. They recognize simple situations in which addition and subtraction apply. Performers at the 200 level have considerable understanding of 2-digit numbers and know some basic multiplication and division facts. Performers at the 250 level have an initial understanding of the four basic operations. They can also compare information from graphs and charts, and are developing an ability to analyze simple logical relations. Performers at the 300 level can compute decimals, simple fractions and percents. They

can identify geometric figures, measure lengths and angles, and calculate areas of rectangles. They are developing the skills to operate with signed numbers, exponents, and square roots. Performers at the 350 level can apply a range of reasoning skills to solve multistep problems. They can solve routine problems involving fractions and percents, recognize properties of basic geometric figures, and work with exponents and square roots. Scale ranges from 0 to 500. Standard errors appear in parentheses.

- ¹ Indicates ability to perform simple additive reasoning and problem solving.
- ² Indicates ability to perform simple multiplicative reasoning and 2-step problem solving.
- ³ Indicates ability to perform reasoning and problem solving involving fractions, decimals, percents, elementary geometry, and simple algebra.
- ⁴ Indicates ability to perform reasoning and problem solving involving geometry, algebra, and beginning statistics and probability.

⁵ Includes Asian/Pacific Islanders and American Indians/Alaskan Natives.

NOTE: These test scores are from the National Assessment of Educational Progress (NAEP). Scale ranges from 0 to 500. Standard errors appear in parentheses.

¹ Achievement levels are in developmental status.² This level denotes partial mastery of prerequisite knowledge and skills that are fundamental for proficient work at the 4th grade.³ This level represents solid academic mastery for 4th-graders. Students reaching this level have demonstrated competency over challenging subject matter, including subject-matter knowledge, application of such knowledge to real-world situations, and analytical skills appropriate to the subject matter.⁴ This level signifies superior performance.⁵ Percent of students who report spending 30 minutes, 45 minutes, 1 hour, and over 1 hour on mathematics homework each day.⁶ Did not meet one or more of the guidelines for school participation.⁷ Percentage between 0.0 and 0.5.

NOTE: These test scores are from the National Assessment of Educational Progress (NAEP). Forty states, the District of Columbia, and three outlying areas participated in the 2000 State Assessment of 4th-graders and met student and school participation criteria for reporting results. Scale ranges from 0 to 500. Standard errors appear in parentheses.

¹ Percent of students who report spending 30 minutes, 45 minutes, 1 hour, and over 1 hour on mathematics homework each day. No standard errors are reported here for aggregated data.
² Percent of students agreeing or strongly agreeing with this statement: "Mathematics is useful for solving everyday problems." No standard errors are reported here for aggregated data.
³ Policy under development or requirements to take effect after 2000.
⁴ Not a participating jurisdiction in the NAEP 2000 state assessment program in mathematics.
⁵ 1994 data.
⁶ Local board determines policy.
⁷ No statewide policy.
⁸ 1996 data.
⁹ 1998 data.
¹⁰ Standards-based reform.

¹¹ Varies by district.
¹² Includes math and science courses.
¹³ Standard error estimates cannot be accurately determined.
¹⁴ No policy beyond course credits.
 NOTE: Data are for 2000 unless otherwise specified. Standard errors appear in parentheses.

—Not available.

¹ Data for 17-year-olds are for 1969.

NOTE: All age groups exclude persons not enrolled in school. These test scores are from the National Assessment of Educational Progress (NAEP). Performers at the 150 level know some general scientific facts of the type that could be learned from everyday experiences. Performers at the 200 level are developing some understanding of simple scientific principles, particularly in the life sciences. Performers at the 250 level can interpret data from simple tables and make inferences about the outcomes of experimental procedures. They exhibit knowledge and understanding of the life sciences and also demonstrate some knowledge of basic information from the physical sciences. Performers at the 300 level can evaluate the appropriateness of the design of an experiment

and have the skill to apply their scientific knowledge in interpreting information from text and graphs. These students also exhibit a growing understanding of principles from the physical sciences. Performers at the 350 level can infer relationships and draw conclusions using detailed scientific knowledge from the physical sciences, particularly chemistry. They also can apply basic principles of genetics and interpret the societal implications of research in this field. Scale ranges from 0 to 500. Standard errors appear in parentheses.

¹ Parents' highest level of education. Data not shown for students who did not know parents' level of education.

² Sample size is insufficient to permit a reliable estimate.

³ Did not satisfy one or more of the guidelines for school sample participation rates. Data are subject to appreciable nonresponse bias.

NOTE: These test scores are from the National Assessment of Educational Progress (NAEP). The NAEP scores have been evaluated at certain performance levels. Scale

ranges from 0 to 300. Excludes states not participating in the survey. Some data have been revised from previously published figures. Standard errors appear in parentheses.

—Not available.

NOTE: Creating refers to expressing ideas and feelings in the form of an original work of art, for example, a dance, a piece of music, a dramatic improvisation, or a sculpture. Performing refers to performing an existing work, a process that calls upon the interpre-

tive or recreative skills of the student. Responding refers to observing, describing, analyzing, and evaluating works of art. Standard errors appear in parentheses.

¹ Formerly known as the Scholastic Aptitude Test.² Data for 1967 to 1986 were converted to the recentered scale by using a formula applied to the original mean and standard deviation. For 1987 to 1995, individual student scores were converted to the recentered scale and recomputed. For 1996 to 2001, most students received scores on the recentered scale score. Any score on the original scale was converted to the recentered scale prior to recomputing the mean.

NOTE: Possible scores on each part of the SAT range from 200 to 800. Data for the years 1966–67 through 1970–71 are estimates derived from the test scores of all participants.

NOTE: Scholastic Assessment Test was formerly known as the Scholastic Aptitude Test. Percentage of graduates taking the SAT is based on the projection of high school graduates by the Western Interstate Commission for Higher Education, and number of students in the graduating class who took the SAT I: Reasoning Test. Possible scores on each part of the SAT range from 200 to 800. Rankings of states based on SAT

scores alone are invalid because of the varying proportions of students in each state taking the tests.

—Not available.

¹ Test scores for 1990 and later data are not comparable with previous years because a new version of the ACT was introduced. Estimated average composite scores for the new version for prior years were: 1989, 20.6; 1988, 19.8; and 1986, 20.8; and 1982, 20.3.

² Beginning in 1985, data are for seniors who graduated in year shown and had taken the ACT in their junior or senior years.

³ Minimum score, 1; maximum score, 36.

⁴ Prior to 1990, reading was called social studies.

⁵ Prior to 1990, science reasoning was called natural science.

⁶ Beginning in 1997, data are for scores of 28 or higher.

⁷ Beginning in 1997, data are for scores of 17 or lower.

⁸ Includes political and persuasive (e.g., sales) fields for 1970. From 1975 through 1990, includes business and commerce. Thereafter, includes business and management, business and office, and marketing and distribution.

⁹ Beginning in 1990, includes engineering and engineering related technologies.

¹⁰ Includes social science and philosophy, religion, and theology except from 1975 through 1989.

¹¹ Includes education and teacher education.

NOTE: Standard errors appear in parentheses.

¹ These data only report the percentage of students who earned credit in each mathematics course while in high school and do not count those students who took these courses prior to entering high school.

² Excludes prealgebra.

³ Includes algebra/trigonometry and algebra/geometry.

NOTE: Data differ slightly from figures appearing in other NCES reports because of differences in taxonomies and case exclusion criteria.

¹ Socioeconomic status was measured by a composite score on parental education and occupations, and family income. The "low" SES group is the lowest quartile; the middle SES group is the middle two quartiles; and the "high" SES group is the upper quartile.

² Program as reported by student.

NOTE: Marijuana includes hashish usage for 1996 and later years. Due to changes in the survey instrument and administration and to improve comparability with new data, estimates for 1982 through 1993 have been adjusted and may differ from those reported in previous years. Data for 1999 gathered using Computer Assisted Interviewing (CAI) and may not be directly comparable to previous years.

¹Survey question changed in 1993; data are not comparable to figures for earlier years.
²Other illicit drugs include any use of marijuana, LSD, other hallucinogens, crack, other cocaine, or heroin, or any use of other narcotics, amphetamines, barbiturates, or tranquilizers not under a doctor's orders.
 NOTE: A revised questionnaire was used in 1982 and later years to reduce the inappropriate reporting of non-prescription stimulants. This slightly reduced the positive responses for some types of drug abuse.

NOTE: Serious violent crime means that at least one of the following crimes occurred at the school and police were contacted: murder, rape or other type of sexual battery, suicide, physical attack or fight with weapon, or robbery. Less serious or nonviolent crime means that no serious violent crimes occurred and the police were called: physical attack or fight without weapon, theft/larceny, or vandalism. No incidents means that the school reporting did not contact the police for any of the specified crimes. Specified

crimes may have occurred but police were not contacted, or other, nonspecified crimes may have occurred at the school. Detail may not sum to totals due to rounding.

—Not available.

¹ Most states have an upper age limit whereby education is provided up to a certain age or completion of secondary school, whichever comes first.

² Ages 6 to 16 or 10th grade completion.

³ Must have turned 17 by October 1.

⁴ At least 16 and have graduated high school or passed California High School Proficiency Exam (CHSPE) and obtained parental permission.

⁵ Under 21 or until child graduates from high school.

⁶ Must have turned 5 by August 31.

⁷ State requires either half-day or full-day program.

⁸ Must have turned 16 by September 15.

⁹ Eligible for waiver at 16.

¹⁰ School age, to be determined in accordance with rules and regulations adopted by the state board.

¹¹ Must have turned 6 by October 1.

¹² Must be 5 before October 1, and not 20 before start of school year, assistance in providing coordination of services from birth to age 6.

¹³ Eligible for waiver.

¹⁴ Age 16 and completion of eighth grade.

¹⁵ School-age unless otherwise provided by law

¹⁶ Age 16 and completion of school year.

¹⁷ Must not be 21 by September 1.

¹⁸ State requires both half-day and full-day program.

¹⁹ Children from birth through two are eligible for additional services. Eligibility for special education services cease upon completion of a secondary education program, no age limit.

²⁰ For visually and auditorily impaired individuals under 21.

²¹ Student may complete school year if 21st birthday occurs while attending school.

NOTE: The Education of the Handicapped Act (EHA) Amendments of 1986 make it mandatory for all states receiving EHA funds to serve all 3- to 18-year-old disabled children.

Table 153.—State requirements for high school graduation, in Carnegie units: 2001

State	All courses	Subject areas										First grad- uating class to which these re- quire- ments apply	Minimum com- pleteness test is re- quired to graduate	Notes
		English/ lan- guage arts	Social studies	Mathe- matics	Science	Physical education/ health	Arts/ voca- tion	Tech- nology	Elec- tives	Other courses				
1	2	3	4	5	6	7	8	9	10	11	12	13	14	
Alabama	24	4	4	4	4	4	1.5	0.5	0.5	—	2000	Yes	Social studies requirement consists of 1 unit of world history/geography, 2 units of U.S. history/geography, .5 units of economics and .5 units of government. Math requirement includes algebra I and geometry. Science includes 1 unit of biology and 1 unit of physical science. Physical education requirement consists of 1 unit of PE and .5 units of health. 6 levels of diploma offered. Numbers given are for basic academic program.	
Alaska	21	4	3	2	2	1	0	0	9	—	1978	Yes (class of 2004)	PE requirement includes health or PE.	
Arizona	20	4	2.5	2	2	0	1	0	8.5	—	1996	Yes (class of 2002)	English requirement includes .5 credits of the principles of speech and debate. Social studies requirement consists of 1 unit of world history/geography and 1.5 units of U.S./Arizona history and constitutions.	
Arkansas	21	4	3	3	3	1	0.5	0	6	.5 (oral communication)	2004	No	Information is for College Preparatory diploma. 4th unit of mathematics for students seeking unconditional college admission will be required in 2004.	
California	13	3	3	2	2	2	1	0	0	—	1989	Yes (class of 2004)	Social studies requirement consists of 1 unit of U.S. history/geography, 1 unit of world history, culture and geography; .5 units of American government and .5 units of economics. Science includes biological and physical sciences. Foreign language or American Sign Language may be substituted for visual/performing art credit.	
Colorado ¹	—	—	—	—	—	—	—	—	—	—	—	No	—	
Connecticut	20	4	3	3	2	1	1	0	6	—	2004	Yes	Social studies requirement includes .5 units of civics and American government. By September 1, 2002, each local and regional board of education must specify basic skills required for graduation for the graduating class of 2006 and thereafter. Plans must include criteria for assessing student competencies. The results of the 10th grade Connecticut Academic Performance Test cannot be used as the sole basis for the graduation criteria but must be included as one alternative.	
Delaware	22	4	3	3	3	1.5	0	1	3.5	3 (career pathway)	2000	Yes	PE requirement includes .5 units of health and 1 unit in PE. Level of diploma (basic, standard, or distinguished) partially determined by students' score on Delaware Student Testing Program (DSTP).	
District of Columbia	23.5	4	3.5	3	3	1.5	2	0	4.5	2 (foreign language)	1995	No	Social studies requirement consists of 1 unit of U.S. history, 1 unit of world history, .5 units of U.S. government, .5 units of world geography and .5 units of D.C. history/government. Math requirement includes algebra. Science requirement includes 1 unit of laboratory science. Students must complete 100 hours of community service in order to graduate.	
Florida	24	4	3	3	3	1.5	1	0	8.5	—	2003	Yes (class of 2003)	Social studies requirement includes 1 unit of American history, 1 unit of world history, .5 units of economics and .5 units of American government. Two science units must have a laboratory component. Math requirement includes successful completion of algebra I. The PE requirement includes .5 units of life management skills and 1 unit of PE. Students must achieve a 2.0 GPA to graduate.	
Georgia ^{2,3}	22	4	3	4	3	1	0	0	4	3 (2 units of foreign language; plus 1 unit of the following: computer technology, fine arts, technology/career preparatory, or 1 additional unit of foreign language)	2001	Yes	College Preparatory Plus Diploma requires 2 more academic electives.	

Table 153.—State requirements for high school graduation, in Carnegie units: 2001—Continued

State	All courses	Subject areas										First grad- uating class to which these re- quire- ments apply	Minimum com- petency test is re- quired to graduate	Notes
		English/ lan- guage arts	Social studies	Mathe- matics	Science	Physical education/ health	Arts/ voca- tion	Tech- nology	Elec- tives	Other courses				
1	2	3	4	5	6	7	8	9	10	11	12	13	14	
Hawaii	22	4	4	3	3	1.5	0	0	6	.5 (guidance)	1997	No	Social studies requires 1 unit of U.S. history and government, 1 unit of world history and culture, .5 unit of world geography, .5 unit of modern history of Hawaii, and 1 unit of social studies elective. PE requirement includes .5 units of health and 1 unit in PE.	
Idaho	21	4.5	2.5	2	2	0.5	0	0	8.5	1 (humanities)	2001	No	Social studies requirement includes 1 unit of U.S. history, 1 unit of government and .5 units of economics. Science requirement includes 1 unit of laboratory science.	
Illinois	16	3	2	2	1	0.5	0	0	7.5	1 (music, art, foreign language, American sign language, or vocational education)	1988	Yes	Social studies requirement includes 1 unit of U.S. history or a combination of U.S. history and American government. Physical education must be provided daily, and PE credit assignments are to be determined locally. Students must take .5 unit or equivalent of health education. Local school district must provide the following: 9 weeks, 50 minutes a day, of consumer education; conservation of natural resources; driver and safety education with 30 hours of classroom instruction and 6 hours of behind the wheel. Elective requirements are determined locally, but must fulfill .16 total credit minimum.	
Indiana	20	4	2	2	2	1	0	0	8	1 (language arts, science, mathematics, social studies, or technology competency)	2004	Yes	1 unit of English/language arts may be from business studies, technology, family and consumer sciences, technology education, or vocational-technical courses. PE requirement includes health and PE. Students who successfully complete a Level III foreign language course may have 1 unit of the language arts requirement waived.	
Iowa ¹	21	4	3	2	2	1	0	0	9	.5 (Kansas history; taken between 7th and 12th grades)	2001	No	Social studies requirement includes 1 unit of U.S. history and .5 units of U.S. government. Science includes 1 unit of laboratory course. PE requirement may include .5 units of health. Kansas also requires .5 units of Kansas history taken between the 7th and 12th grades.	
Kansas	22	4	3	3	3	1	1	0	7	—	2002	No	Social studies includes world civilizations, world geography, U.S. history, government, and economics. Mathematics includes algebra I, geometry and one elective. Science includes life science, physical science, and earth and space science. PE requirement includes .5 unit of health and .5 unit of PE. A local board of education may substitute an integrated, applied, interdisciplinary or higher level course for a required course.	
Kentucky	23	4	3	3	3	2	0	0	8	—	2003	Yes	Social studies requirement consists of 1 unit of American history, 1 unit of world history or geography or civilization, .5 units of civics, and .5 units of free enterprise. Math includes a maximum of 2 entry level courses. Science requirement consists of 1 unit of biology I, 1 unit of physical science and 1 unit from any other course not already taken from physical science. PE includes .5 units of health and 1.5 units in PE.	
Louisiana	16	4	2	2	2	1.5	1	0	3.5	—	1989	No	Social studies requirement includes 1 unit of American history, and .5 unit of Maine studies (if not taken between grades 6-8). Science requirement includes 1 unit of laboratory study. PE includes .5 units of health and 1 unit in PE. Student must pass computer proficiency standards.	

Table 153.—State requirements for high school graduation, in Carnegie units: 2001—Continued

State	All courses	Subject areas										First grad- uating class to which these re- quire- ments apply	Minimum com- ple- test is re- quired to graduate	Notes
		English/ lan- guage arts	Social studies	Mathe- matics	Science	Physical education/ health	Arts/ voca- tion	Tech- nology	Elec- tives	Other courses				
1	2	3	4	5	6	7	8	9	10	11	12	13	14	
Maryland	21	4	3	3	3	3	1	1	3	2 (foreign language or advanced tech- nology)	1997	Yes (class of 2007)	Social studies requirement consists of 1 unit of U.S. history, 1 unit of world history, and 1 unit of government. Math requirement includes 1 unit of algebra and 1 unit of geometry. Science requirement includes laboratory experience. PE requirement includes .5 unit of health and .5 unit of PE. American history and civics and PE required.	
Massachusetts ¹	—	—	—	—	—	—	—	—	—	—	—	Yes (class of 2003)	Students must complete one course in government/civics. Although not required for graduation, state law requires health and physical education to be provided for all students.	
Michigan ¹	—	—	—	—	—	—	—	—	—	—	—	No	and physical education to be provided for all students.	
Minnesota	24	5	4	3	2	3	0	0	3	4 (2 units of inquiry, 2 units of re- source management)	(⁴)	Yes	Social studies requirement includes U.S. history, U.S. citizen- ship, diverse perspectives, and human geography. Science requirement includes biology, chemistry, earth and space systems, physics, and environmental systems.	
Mississippi	20	4	3	3	3	0.5	1	1	4.5	—	2002	Yes (class of 2002)	Social studies requirement consists of 1 unit of world history, 1 unit of U.S. history, .5 units of U.S. government, and .5 units of Mississippi studies. Math requirement includes algebra I and geometry. Science must include biology I. There is no PE requirement, only .5 units of health.	
Missouri	22	3	2	2	2	1	2	0	10	—	1988	No	Social studies requirement includes 1 unit of American history and .5 units of government. Arts education includes 1 unit of fine arts and 1 unit of practical arts (vocational/technical skills).	
Montana	20	4	2	2	2	1	2	0	7	—	1993	No	In accordance with the policies of the local board of trustees, students may be graduated from high school with less than four years enrollment. Arts education includes 1 unit of fine arts and 1 unit of practical arts (vocational/technical skills).	
Nebraska	—	—	—	—	—	—	—	—	—	—	1991	No	Nebraska requires a minimum of 200 high school credit hours (at least 80% of which must be taken in language arts, social studies, mathematics, science, PE/health, visual/per- forming arts, and foreign language).	
Nevada ⁴	22.5	4	2	3	2	2.5	1	0.5	7.5	—	2003	Yes	Social studies requirement includes 1 unit of American gov- ernment and 1 unit of American history. PE requirement in- cludes .5 units of health and 2 units of PE. Computer lit- eracy requirement may be waived by demonstration of com- petency. Data are for standard diploma.	
New Hampshire	19.75	4	2	2	2	1.25	0.5	0.5	7	.5 (business/economic education)	1989	No	Social studies requirement includes 1 unit of U.S. and New Hampshire history and government. Science requirement is 1 unit of physical science and 1 unit of biological science. PE requirement includes .25 units of health and 1 unit of PE. Computer education requirement may be met through examination or course prior to high school.	
New Jersey	22	4	3	3	3	0.75	2	0	6.25	2 (foreign language)	2005	Yes (class of 2004)	—	
New Mexico	23	4	3	3	2	1	0	0	9	1 (communication skills or foreign lan- guage)	1990	Yes	Social studies includes U.S. history/geography, world history/ geography, and government/ economics. Science require- ment includes 1 lab component. With the approval of the local school board, participation on an athletic team or in an athletic sport during the school day may count toward fulfill- ment of the physical education required unit.	

Table 153.—State requirements for high school graduation, in Carnegie units: 2001—Continued

State	All courses	Subject areas										First grad- uating class to which these re- quire- ments apply	Minimum com- petency test is re- quired to graduate	Notes
		English/ lan- guage arts	Social studies	Mathe- matics	Science	Physical education/ health	Arts/ voca- tion	Tech- nology	Elec- tives	Other courses				
1	2	3	4	5	6	7	8	9	10	11	12	13	14	
New York	22	4	4	3	3	2.5	1	0	3.5	1 (foreign language)	2005	Yes	Social studies requirement includes 1 unit of U.S. history and government, .5 units of government and .5 units of economics. Students may meet the learning standards in technology, either through a course in technology education or through an integrated course combining technology with mathematics and/or science. A commencement-level course in technology education may be used as the third unit of credit in science or mathematics, but not both. Data are for Regents diploma. Advanced Regents diploma available.	
North Carolina ²	20	4	3	4	3	1	(³)	0	3	2 (foreign language)	2004	Yes (class of 2005)	4th mathematics credit required for 9th graders in the College/University Prep course of study entering high school in 2002–03. An Occupational Course of study with different requirements is available starting in 2000–01 for students with individualized Education Plans. Students must demonstrate computer proficiency through state testing. Data are state minimums, but actual requirements are determined locally. N.D. Department of Education recommends 20 credits in order to graduate.	
North Dakota ¹	17	4	3	2	2	1	0	0	5	—	N/A	No	Science studies requirement includes .5 units of U.S. history and .5 units of U.S. government. Science requirement includes 1 unit of biology and 1 unit of physical science. PE requirement consists of .5 units of PE and .5 units of health. Starting 9/15/01 one elective unit or 2 half-units must include business/technology, fine arts, or foreign language.	
Ohio	21	4	3	3	3	1	0	0	7	—	2004	Yes (class of 2005)	Social studies requirement includes 1 unit of grammar/English/language arts requirement includes 1 unit of composition. Social studies requirement includes 1 unit of U.S. history, .5 units of Oklahoma history, a minimum of .5 units of U.S. government. Math requirement includes 1 unit of algebra I. Science requirement includes 1 unit of biology I. State strongly encourages students to complete 2 units of a foreign language.	
Oklahoma	23	4	3	3	3	0	2	0	8	—	2003	Yes	English/language arts requirement includes 1 unit of writing composition. Arts/vocation requirement may be met by earning 1 unit in any one or a combination of applied arts, fine arts or foreign language.	
Oregon	22	3	3	2	2	2	1	0	9	—	2001	No	Beginning in 2002–03, in order to graduate, students shall demonstrate proficiency in reading, writing and mathematics on either state or local assessments in grade 11 or 12. Students must take 100 minutes per week of PE/health.	
Pennsylvania ⁵	—	—	—	—	—	—	—	—	—	—	N/A	Yes (class of 2003)	Social studies requirement includes 1 unit of U.S. history, .5 units of U.S. government and .5 units of economics. PE requirement may be met through participation in JROTC program. For students in a Tech Prep Program, 1 unit must be earned in occupation education instead of a foreign language. Demonstration of computer literacy before graduation also required.	
Rhode Island ²	18	4	2	3	2	0	0.5	0.5	4	2 (foreign language)	1990	No	English/language arts requirement includes 1.5 units of writing, 1.5 units of literature, .5 units of American literature and .5 units of speech. Social studies requirement includes 1 unit of U.S. history, .5 units of U.S. government and .5 units of geography.	
South Carolina ²	24	4	3	4	3	1	0	1	7	1 (foreign language)	2001	Yes	Science requirement includes 1 unit of life science and 1 unit of physical science. All science courses must incorporate lab experiences. One full year of computer education required at some time during high school career, no credit value assigned.	
South Dakota	22	4	3	2	2	0	1	0.5	8.5	1 (additional unit of either mathematics or science)	2004	No		
Tennessee	20	4	3	3	3	1	0	0	6	—	1998	Yes		

Table 153.—State requirements for high school graduation, in Carnegie units: 2001—Continued

State	All courses	Subject areas										First graduating class to which these requirements apply	Minimum competency test is required to graduate	Notes
		English/language arts	Social studies	Mathematics	Science	Physical education/health	Arts/vocation	Technology	Electives	Other courses				
1	2	3	4	5	6	7	8	9	10	11	12	13	14	
Texas	22	4	3	3	2	2	0	1	5.5	1 (World History Studies, Geography Studies, or any science course approved by the State Board of Education)	2001	Yes	Social studies requirement includes 1 unit of world history or world geography, 1 unit of U.S. history, .5 units of U.S. government, and .5 units of economics. Math requirement includes algebra I. Science requirement must include 1 unit from biology, chemistry, or physics. PE requirement includes .5 units of health and 1.5 units of PE. Required elective areas are divided into college entry or applied technology/job entry clusters. Information technology requirement optional. Library media skills integrated into subject areas.	
Utah	24	3	3	2	2	2	1.5	1	9.5	—	1997	Yes (class of 2005)	Beginning in 2005 local school districts will have the option of fulfilling current Carnegie requirements with field of knowledge assessment. Field of knowledge assessment is part of Vermont's system of standards, which includes arts, language, and literature, history and social sciences, and science, mathematics, and technology.	
Vermont	20	4	3	3	3	1.5	1	0	4.5	—	2002	No	Beginning in 2005 local school districts will have the option of fulfilling current Carnegie requirements with field of knowledge assessment. Field of knowledge assessment is part of Vermont's system of standards, which includes arts, language, and literature, history and social sciences, and science, mathematics, and technology.	
Virginia	22	4	3	3	3	2	1	0	6	—	2002	Yes (class of 2004)	Data are for Standard Diploma. Beginning in 2004, Standard of Learning tests must be passed in 5 subjects areas.	
Washington	19	3	2.5	2	2	2	1	0	5.5	1 (occupational education)	2008	Yes (class of 2008)	Social studies requirement consists of 1 unit of U.S. history/government, .5 units of Washington state history/government, and 1 unit of world history/geography. Science requires 1 unit of laboratory science. Each student shall complete a culminating project for graduation.	
West Virginia	24	4	3	3	3	2	1	0	4	4 (career majors)	2003	No	Math requirement includes algebra I and 1 higher math. Science includes coordinated and thematic science and 1 higher science. PE requirement includes 1 unit of health and 1 unit of PE. Work-based learning experience (determined by local school district) required.	
Wisconsin	13	4	3	2	2	2	0	0	0	—	2004	Yes (class of 2004)	PE consists of 1.5 units of PE and .5 units of health. State strongly encourages school boards to require additional 8.5 elective units. School boards may also require community service as a graduation criterion.	
Wyoming	13	4	3	3	3	0	0	0	0	—	2003	Yes (class of 2003)	Social studies requirement includes history, American government and economic systems and institutions. Exit exam covers principles of the Constitutions of the U.S. and Wyoming.	

—Not available or not applicable.
 1 Graduation requirements are determined locally.
 2 Data for College Preparatory Diploma.
 3 Career Preparatory Diploma also available.
 4 Graduation requirements are currently being phased in by local school districts. However, as of yet, no statewide deadline exists dictating when this should occur.
 5 State minimum credit requirements have been phased out in Pennsylvania. Each school district (including charter schools) shall specify requirements for graduation in a strategic plan requiring state approval. To graduate, students must demonstrate proficiency in reading, writing, and mathematics on either state or local assessments aligned with state guidelines.

NOTE: Local school districts frequently have other graduation requirements in addition to state requirements. English language arts—can include English, Reading, Literature, Creative Writing, etc. Mathematics—can include Basic Math, Algebra I and II, Geometry, Pre-Calculus, Calculus, Statistics, etc. Social studies—can include World History, U.S. History, Geography, Economics, Government, etc. Science—can include Biology, Chemistry, Physics, Anatomy, Earth Science, etc. Arts/vocation—can include Fine Arts, Practical Arts, Vocational, or Career Preparatory credits. Technology—can include Computer Literacy, Computer Technology, Technology Competency, etc.

¹ For admission to teacher education program.
² Institution's exit exam.
³ Subject matter exam or completion of an approved subject matter program.
⁴ Fingerprint check is required for employment.
⁵ In 1990, test required for foreign language, bilingual, and English as a Second Language. In 1999, two-part exam covers communication and literacy skills and the subject matter knowledge for the certificate.
⁶ Elementary certificate exam (subject-area exam).
⁷ For elementary education.
⁸ Test requirements in 1990 set by school districts.
⁹ For Oregon graduates.
¹⁰ Screening for admission to a teacher preparation program includes college level skills in reading, oral and written communication, critical thinking, and mathematics.
¹¹ Required for individuals entering West Virginia-approved education programs as of fall 1985.

¹ Includes a relatively small amount from nongovernmental private sources (gifts and tuition and transportation fees from patrons). These sources accounted for 2.5 percent of total revenues in 1998–99.

² Revised from previously published figures.

NOTE: Beginning in 1980–81, revenues for state education agencies are excluded. Beginning in 1988–89, data reflect new survey collection procedures and may not be en-

tirely comparable with figures for earlier years. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems; Revenues and Expenditures for Public Elementary and Secondary Education*; and Common Core of Data surveys. (This table was prepared May 2001.)

—Not available.

¹ Data revised from previously published figures.² Data estimated by state education agencies unless otherwise indicated.³ U.S. total includes National Center for Education Statistics estimates for nonreporting states.⁴ Estimated by the National Center for Education Statistics.⁵ Data include imputations by National Center for Education Statistics for food services and/or enterprise operations.⁶ Actual preliminary count.

NOTE: Beginning in 1980–81, expenditures for state administration are excluded. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems*; and Common Core of Data surveys. (This table was prepared November 2001.)

¹ Includes expenditures for adult education, community colleges, private school programs funded by local and state education agencies, and community services.

² Includes expenditures for property and for building and alterations completed by school district staff or contractors.

³ Includes expenditures for operations funded by sales of products or services (e.g., school bookstore or computer time). Also, includes small amounts for direct program support made by state education agencies for local school districts.

⁴ Includes expenditures for health, attendance, and speech pathology services.

⁵ Includes expenditures for curriculum development, staff training, libraries, and media and computer centers.

NOTE: Excludes expenditures for state education agencies. Revised from previously published figures. Detail may not sum to totals due to rounding.

—Not available.

¹ Revised from previously published data.

² Data not comparable to figures prior to 1989–90.

³ Plant operation also includes plant maintenance.

⁴ Prior to 1959–60, items included under "other school services" were listed under "auxiliary services," a more comprehensive classification that also included community services.

⁵ Prior to 1959–60, data shown for adult education represent combined expenditures for adult education, summer schools, and community colleges.

⁶ Prior to 1969–70, excludes capital outlay by state and local school housing authorities.

⁷ Less than 0.05 percent.

NOTE: Beginning in 1959–60, includes Alaska and Hawaii. Beginning in 1989–90, state administration expenditures were excluded from both "total" and "current" expenditures. Beginning in 1989–90, extensive changes were made in the data collection procedures. Detail may not sum to totals due to rounding.

—Not available.
¹ Some data have been revised from previously published figures.
² Includes purchased professional services of teachers or others who provide instruction for students and travel for instructional staff.
 NOTE: Excludes expenditures for state education agencies. Detail may not sum to totals due to rounding.

¹Data for 1919–20 to 1953–54 are based on school-year enrollment.²Based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.³Estimated.

NOTE: Beginning in 1980–81, state administration expenditures are excluded from both "total" and "current" expenditures. Beginning in 1988–89, extensive changes were

made in the data collection procedures. Some data have been revised from previously published figures.

—Not available.

¹Based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis. These data do not reflect differences in inflation rates from state to state.

²Estimated by the National Center for Education Statistics.

NOTE: Beginning in 1980–81, state administration expenditures are excluded. Beginning in 1988–89, extensive changes were made in the data collection procedures. There

are discrepancies in average daily attendance reporting practices from state to state. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Statistics of State School Systems*; and Common Core of Data surveys. (This table was prepared November 2001.)

NOTE: Constant 1998–99 dollars based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school year basis. These data do not reflect differences in inflation rates from state to state. Beginning in 1980–81, expenditures for state administration are excluded. Beginning in 1988–

89, survey was expanded and coverage of state expenditures for public school districts was improved. Some data have been revised from previously published figures.

CHAPTER 3

Postsecondary Education

Postsecondary education includes an array of diverse educational experiences, including a wide range of programs offered by American colleges and universities. For example, a community college may offer vocational training or the first 2 years of training at the college level. A university typically offers a full undergraduate course of study leading to a bachelor's degree as well as first-professional and graduate programs leading to advanced degrees. Vocational and technical institutions offer training programs that are designed to prepare students for specific careers. Community groups, religious organizations, libraries, and businesses provide other types of educational opportunities for adults.

This chapter provides an overview of the latest statistics on postsecondary education, which includes academic, vocational, and continuing professional education programs after high school. However, to maintain comparability over time, most of the data in the *Digest* are for degree-granting institutions, which include 2- and 4-year colleges and universities and exclude most vocational and continuing education programs. This chapter highlights historical data that enable the reader to observe long-range trends in college education in America.

Other chapters provide related information on postsecondary education. Data on price indexes and on the number of degrees held by the general population are shown in chapter 1. Chapter 4 contains tabulations on federal funding for postsecondary education. Information on employment outcomes for college graduates is shown in chapter 5. Chapter 7 contains data on college libraries and use of computers by young adults. Further information on survey methodologies is presented in the "Guide to Sources" in the appendix and in the publications cited in the source notes.

Enrollment

Enrollment in degree-granting institutions increased by 17 percent between 1979 and 1989. Between 1989 and 1999, enrollment increased at a slightly slower rate (9 percent), from 13.5 million to 14.8 million. There was a slight decline in enrollment from 1992 to 1995, but it was overshadowed by large increases in the late 1990s. Much of this growth was in female enrollment (table 172). Between 1989 and

1999, the number of men enrolled rose 5 percent, while the number of women increased by 13 percent. Part-time enrollment rose by 2 percent compared to an increase of 15 percent in full-time enrollment. In addition to the enrollment in accredited 2-year colleges, 4-year colleges, and universities, about 414,000 students attended non degree-granting, Title IV eligible,* postsecondary institutions in fall 1999 (table 170).

The number of young students has been growing more rapidly than the number of older students, and this pattern is expected to continue. Between 1990 and 1999, the enrollment of students under age 25 increased by 12 percent. Enrollment of persons 25 and over rose by less than 1 percent during the same period. From 1999 to 2010, NCES projects a rise of 21 percent in enrollments of persons under 25 and an increase of 14 percent in the number 25 and over (table 174).

Enrollment trends have differed at the undergraduate, graduate, and first-professional levels. Undergraduate enrollment generally increased during the 1970s, but dipped slightly between 1983 and 1985. From 1985 to 1992, undergraduate enrollment increased each year, rising 18 percent before declining slightly and stabilizing between 1993 and 1998. Undergraduate enrollment rose 2 percent between 1998 and 1999 (table 188). Graduate enrollment had been steady at about 1.3 million in the late 1970s and early 1980s, but rose about 31 percent between 1985 and 1999 (table 189). After rising very rapidly during the 1970s, enrollment in first-professional programs stabilized in the 1980s. First-professional enrollment began rising again in the 1990s and showed an increase of 11 percent between 1990 and 1999 (table 190).

Since 1984, the number of women in graduate schools has exceeded the number of men. Between 1989 and 1999, the number of male full-time graduate students increased by 18 percent, compared to 59 percent for full-time women. Among part-time graduate students, the number of men increased by less than 1 percent compared to a 14 percent increase for women (table 189).

* Title IV programs, which are administered by the U.S. Department of Education, provide financial aid to postsecondary students.

The proportion of American college students who are minorities has been increasing. In 1976, 16 percent were minorities, compared with 28 percent in 1999. Much of the change can be attributed to rising numbers of Hispanic and Asian students. The proportion of Asian and Pacific Islander students rose from 2 percent to 6 percent, and the Hispanic proportion rose from 4 percent to 9 percent during that time period. The proportion of black students fluctuated during most of the early part of the period, before rising slightly to 11 percent in 1999. These percentages exclude foreign students enrolled in U.S. colleges and universities (table 207).

Despite the sizable numbers of small degree-granting colleges, most students attend the larger colleges and universities. In fall 1999, 40 percent of institutions had fewer than 1,000 students; however, these campuses enrolled 4 percent of college students. While 10 percent of the campuses enrolled 10,000 or more students, they accounted for 50 percent of total college enrollment (table 214).

Faculty, Staff, and Salaries

The student/staff ratio at colleges and universities dropped from 5.4 in 1976 to 4.8 in 1999. During the same time period, the student/faculty ratio dropped from 16.6 to 14.9. The proportion of administrative staff and other nonteaching professional staff rose from 15 percent in 1976 to 24 percent in 1999, while the proportion of nonprofessional staff declined from 42 percent to 32 percent (table 224).

Approximately 2.9 million people were employed in colleges and universities in the fall of 1999, including 2.0 million professional and .9 million nonprofessional staff. About 44 percent of the staff were faculty or teaching assistants, 6 percent were managerial, 18 percent were other nonteaching professionals, and 32 percent were nonprofessional staff (table 226).

Colleges differ in their practices of employing part-time and full-time staff. In fall 1999, 50 percent of the employees at public 2-year colleges were employed full-time compared with 70 percent at public 4-year colleges and 71 percent at private 4-year colleges. A higher proportion of the faculty at public 4-year colleges were employed full-time (73 percent) than at private 4-year colleges (59 percent) or public 2-year colleges (35 percent) (table 226).

The proportion of time that full-time instructional faculty and staff spent teaching averaged 57 percent in 1998. For the remaining faculty time, research and scholarship accounted for 15 percent of the time; professional growth, 5 percent; administration, 14 percent; outside consulting, 3 percent; service and nonteaching activities, 7 percent (table 233).

About 14 percent of U.S. faculty in colleges and universities were minorities in 1999 (based on a total excluding nonresident aliens and persons whose

race/ethnicity was unknown). Five percent of the faculty were black; 5 percent, Asian/Pacific Islanders; 3 percent, Hispanic; and .5 percent, American Indian/Alaskan Native. Half of college faculty (50 percent) were white males, while 35 percent were white females. About 15 percent of executive, managerial, and administrative staff were minorities in 1999, compared to about 30 percent of the nonprofessional staff. The proportion of minority staff at public 4-year colleges (22 percent) was similar to the proportion at private 4-year colleges (20 percent) (table 225).

College faculty generally suffered losses in the purchasing power of their salaries from 1972–73 to 1980–81, when average salaries fell 17 percent after adjustment for inflation. During the 1980s, average salaries rose and recouped most of the losses. Between 1992–93 and 1998–99, there was a slight increase in average faculty salaries, reaching about 2 percent higher than in 1972–73. Average salaries for men in 1998–99 (\$58,048) were considerably higher than the average for women (\$47,421), but women's salaries have increased at a slightly faster rate since 1990–91 (table 237).

The proportion of faculty with tenure has remained relatively stable in recent years. About 64 percent of full-time faculty had tenure in 1998–99, but a large difference existed between the proportion of men and women with tenure. Seventy-one percent of men compared with 52 percent of women had tenure in 1998–99. About 66 percent of the faculty at public institutions had tenure, compared with 58 percent of faculty at private institutions (table 243).

Degrees

During the 2000–01 academic year, 4,182 accredited institutions offered degrees at the associate degree level or above. These included 2,450 4-year colleges and universities, and 1,732 2-year colleges (table 245). Institutions awarding various degrees in 1999–2000 numbered 2,546 for associate degrees, 1,995 for bachelor's degrees, 1,499 for master's degrees, and 535 for doctor's degrees (table 262).

More people are completing college. Between 1989–90 and 1999–2000, the number of associate, bachelor's, master's, and doctor's degrees rose. Associate degrees increased 24 percent, bachelor's degrees increased 18 percent, master's degrees increased 41 percent, and doctor's degrees increased 17 percent during this period. The number of first-professional degrees was 13 percent higher in 1999–2000 than it was in 1989–90 (table 247).

More women than men earn associate, bachelor's, and master's degrees. Also, the number of women receiving all types of degrees has increased at a faster rate than for men. Between 1989–90 and 1999–2000 the number of bachelor's degrees award-

ed to men increased by 8 percent, while those awarded to women rose by 26 percent (table 247).

Of the 1,238,000 bachelor's degrees conferred in 1999–2000, the largest numbers of degrees were conferred in the fields of business (258,000), social sciences (127,000), and education (108,000) (table 255). At the master's degree level, the largest fields were education (124,000) and business (112,000) (table 256). The largest fields at the doctor's degree level were education (6,800), engineering (5,400), biological and life sciences (4,900) and psychology (4,300) (table 257).

The pattern of bachelor's degrees by field of study has shifted significantly in recent years. Declines are significant in some fields such as engineering and mathematics. Engineering and engineering technologies declined 4 percent between 1989–90 and 1994–95, and then posted a further 7 percent decline between 1994–95 and 1999–2000. The number of mathematics degrees declined by 10 percent between 1989–90 and 1994–95 and posted a further 12 percent decline between 1994–95 and 1999–2000. In contrast, some technical fields have increased. After declining by 10 percent between 1989–90 and 1994–95, the number of degrees in computer and information sciences grew 48 percent between 1994–95 and 1999–2000. Other sizable fields with increases over 20 percent between 1994–95 and 1999–2000 included: parks, recreation, and leisure studies; agriculture and natural sciences; theological professions; and visual and performing arts (table 255).

About three-quarters (77 percent) of the students who enrolled in a 4-year college in 1995–96 were still working on their degrees in spring 1998. About 4 percent of students had completed a certificate or

degree and 18 percent were no longer working towards a bachelor's degree (table 314).

Finances

For the 2000–01 academic year, annual prices for undergraduate tuition, room, and board were estimated to be \$7,621 at public colleges and \$21,423 at private colleges. Between 1990–91 and 2000–01, prices at public colleges rose by 23 percent, and prices at private colleges increased by 27 percent, after adjustment for inflation (tables 35 and 316).

Trend data show increases in the expenditures per student at colleges and universities through the late 1980s and further increases after 1991–92. After an adjustment for inflation at colleges and universities, current-fund expenditures per student rose about 5 percent between 1985–86 and 1990–91, and another 7 percent between 1990–91 and 1995–96 (table 343).

Scholarships and fellowships rose more rapidly at public institutions than most other types of college expenditures. At public universities, between 1986–87 and 1996–97, inflation adjusted scholarship and fellowship expenditures per full-time-equivalent student rose 85 percent compared with 8 percent for instruction expenditures per student (table 349). At other public 4-year institutions during the same period, scholarship and fellowship costs per student rose 109 percent, and the instruction costs rose by 2 percent (table 350). Another rapidly rising expenditure for public colleges during the decade was research, which rose by 26 percent per student at public universities, and by 36 percent at other public 4-year colleges (tables 349 and 350).

¹ Includes nondegree-granting institutions with nonaccredited degree programs.

² Preliminary data are for 4-year and 2-year degree-granting institutions that were participating in Title IV federal financial aid programs.

³ Preliminary data are for institutions that did not offer accredited 4-year or 2-year degree programs, but were participating in Title IV federal financial aid programs. Includes some schools with nonaccredited degree programs.

—Not available.
¹ Prior to 1979–80, excludes branch campuses.
² Total number of different individuals (not reduced to full-time equivalent). Beginning in 1959–60, data are for the first term of the academic year. Beginning in 1969–70, data include only instructional faculty with the rank of instructor or above.
³ Estimated.
⁴ Estimated number of senior instructional staff. Excludes graduate assistants.
⁵ Because of revised survey procedures, data may not be directly comparable with figures prior to 1989–90.
⁶ Data for 1869–70 to 1949–50 are for resident degree-credit students who enrolled at any time during the academic year.
⁷ From 1869–70 to 1959–60, first-professional degrees included under bachelor's degrees.
⁸ Figures for years prior to 1969–70 are not precisely comparable with later data.
⁹ Includes unexpended plant funds.
¹⁰ Book value. Includes other nonexpendable funds.

NOTE: Data for 1869–70 to 1989–90 are for institutions of higher education. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award associate or higher degrees. Detail may not sum to totals due to rounding.

—Not available.
¹Institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education.
²Degree-credit enrollment only.
³Includes part-time resident students and all extension students.
⁴Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.
⁵Because of imputation techniques, data are not consistent with figures for other years.
⁶Data are for 4-year and 2-year degree-granting institutions that were participating in Title IV federal financial aid programs.
⁷Data revised from previously published figures.
⁸Data imputed using alternative methods. (See *Guide to Sources* for details.)

NOTE: Trend tabulations of institutions of higher education data are based on institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. As of 1996, the Department has been collecting data from Title IV participants. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award associate or higher degrees.

¹ Institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education.

² Four-year and 2-year degree-granting institutions that were participating in Title IV federal financial aid programs. Some data have been revised from previously published figures.

NOTE: Distributions by age are estimates based on samples of the civilian noninstitutional population. Data for 1999 imputed using alternative methods. (See *Guide to*

Sources for details.) Some data have been revised from previously published figures. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Fall Enrollment in Institutions of Higher Education*; Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment" surveys; *Projections of Education Statistics to 2011*; and U.S. Department of Commerce, Bureau of the Census, *Current Population Reports*, "Social and Economic Characteristics of Students," various years. (This table was prepared July 2001.)

Table 175.—Total fall enrollment in degree-granting institutions, by level, sex, age, and attendance status of student: 1999

—Not available.
¹ Religious affiliation as reported by institution.
² Institutions that were accredited by an agency or association that was recognized directly by the U.S. Department of Education, or recognized directly by the Secretary of Education. The Department of Education no longer distinguishes between those institutions and other institutions that participated in Title IV programs. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award degrees. Data for 1999 imputed using alternative methods. (See *Guide to Sources* for details.)
³ Data are for 4-year and 2-year degree-granting institutions that participated in Title IV federal financial aid programs.
⁴ Because data are derived from the "Fall Enrollment" survey, counts of institutions may differ from counts in other tables.
⁵ Data revised from previously published figures.
⁶ Included under "Other public."

NOTE: Trend tabulations of institutions of higher education data are based on institutions that were accredited by an agency or association that was recognized directly by the U.S. Department of Education, or recognized directly by the Secretary of Education. The Department of Education no longer distinguishes between those institutions and other institutions that participated in Title IV programs. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award degrees. Data for 1999 imputed using alternative methods. (See *Guide to Sources* for details.)

NOTE: Data for 1998 revised from previously published figures. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few

higher education institutions that did not award degrees. Data for 1999 imputed using alternative methods. (See *Guide to Sources* for details.)

—Not available.

¹ Excludes first-time freshmen in occupational programs not creditable towards a bachelor's degree.² Data for 2-year branches of 4-year college systems are aggregated with the 4-year institutions.³ Because of imputation techniques, data are not consistent with figures for other years.⁴ Data not comparable with pre-1990 figures because of a change in reporting procedures.⁵ Data revised from previously published figures.⁶ Data imputed using alternative methods. (See *Guide to Sources* for details.)

NOTE: Trend tabulations of institutions of higher education data are based on institutions that were accredited by an agency or association that was recognized by the U.S.

Department of Education, or recognized directly by the Secretary of Education. The Department of Education no longer distinguishes between those institutions and other institutions that participated in Title IV programs. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award associate or higher degrees. Alaska and Hawaii are included in all years. Detail may not sum to totals due to rounding.

NOTE: Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not

award associate or higher degrees. Data for 1998 revised from previously published figures. Data for 1999 imputed using alternative methods. (See *Guide to Sources* for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System, "Fall Enrollment" surveys. (This table was prepared April 2001.)

Table 184.—College enrollment rates of high school graduates, by race/ethnicity: 1960 to 2000
 [Numbers in thousands]

Year	High school graduates ¹				Enrolled in college ²						Hispanic ⁴			
	Total	White ³	Black ^{3,4}	Hispanic ⁴	Total		White ³		Black ^{3,4}		Number	Percent		
					Number	Percent	Number	Percent	Number	Percent		Annual	3-year moving average

—Not available.
¹ Individuals age 16 to 24 who graduated from high school or completed a GED during the preceding 12 months.
² Enrollment in college as of October of each year for individuals age 16 to 24 who graduated from high school during the preceding 12 months.
³ Includes persons of Hispanic origin.
⁴ Due to the small sample size, data are subject to relatively large sampling errors.

NOTE: Data are based upon sample surveys of the civilian population. High school graduate data in this table differ from figures appearing in other tables because of varying survey procedures and coverage. High school graduates include GED recipients. Standard errors appear in parentheses.

SOURCE: American College Testing Program, unpublished tabulations, derived from statistics collected by the U.S. Bureau of the Census; and U.S. Department of Labor, *College Enrollment of High School Graduates*, various years. (This table was prepared May 2001.)

Table 185.—College enrollment rates of high school graduates, by sex: 1960 to 2000

[Numbers in thousands]

Year	Total high school graduates ¹			Enrolled in college ²					
	Total	Males	Females	Total		Males		Females

—Not available.

¹ Includes students who were enrolled in college, but did not report high school completion.² Data for white and black enrollment include persons of Hispanic origin.

NOTE: Data are based upon sample surveys of the civilian noninstitutional population. Percents based on 18- to 24-year-old high school graduates for 1992 and later years

use a slightly different definition of graduation and may not be directly comparable with figures for other years. All college students are counted as high school graduates. Standard errors appear in parentheses. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Commerce, Bureau of the Census, Current Population Survey, unpublished data. (This table was prepared July 2001.)

NOTE: Data for 1998 revised from previously published figures. Data include unclassified undergraduate students. Trend tabulations of institutions of higher education data are based on institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award de-

grees. Data for 1999 imputed using alternative methods. (See *Guide to Sources* for details.) Detail may not sum to totals due to rounding.

NOTE: Data for 1995 and 1998 revised from previously published figures. Data include unclassified graduate students. Trend tabulations of institutions of higher education data are based on institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award de-

grees. Data for 1999 imputed using alternative methods. (See *Guide to Sources* for details.) Detail may not sum to totals due to rounding.

¹ Institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education.² Data are for 4-year and 2-year degree-granting higher education institutions that participated in Title IV federal financial aid programs.³ Data revised from previously published figures.⁴ Data imputed using alternative methods. (See *Guide to Sources* for details.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Fall Enrollment in Colleges and Universities" surveys; and Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment" surveys. (This table was prepared March 2001.)

Table 194.—Total fall enrollment in all degree-granting institutions, by attendance status, sex, and state: 1998 and 1999

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment" survey. (This table was prepared March 2001.)

NOTE: Data for 1998 revised from previously published figures. Data for U.S. Service Schools reflect substantial changes in survey coverage. Data are for 4-year and 2-year degree-granting institutions that participated in Title IV federal financial aid programs. Data for 1999 imputed using alternative methods. (See *Guide to Sources* for details.)

¹ Institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education.

² Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology in 1980 and 1981.

³ Because of imputation techniques, data are not consistent with figures for other years.

⁴ Data are for 4-year and 2-year degree-granting institutions that participated in Title IV federal financial aid programs.

⁵ Data revised from previously published figures.

⁶ Data imputed using alternative methods. (See *Guide to Sources* for details.)

¹ Institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education.² Data are for 4-year and 2-year degree-granting institutions that participated in Title IV federal financial aid programs.³ Data imputed using alternative methods. (See *Guide to Sources* for details.)⁴ Data for 1999 reflect substantial change in survey coverage.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment" surveys. (This table was prepared March 2001.)

Table 204.—Residence and migration of all freshmen students in degree-granting institutions, by state: Fall 1998

¹All of the new students reported by the institutions in that state; i.e., all in-migrants and "remaining" students.²All students living in a particular state when admitted to an institution in any state. Students may be enrolled in any state.³Students who attend institutions in their home state.⁴Includes students coming to U.S. colleges from foreign countries and the outlying areas.⁵Students are reported in "state unknown" when an institution is unable to determine the student's home state.

NOTE: Data revised from previously published figures. Includes all students who are enrolled at the reporting institution for the first time. Data are for 4-year and 2-year degree-granting institutions that participated in Title IV federal financial aid programs.

¹All of the new students reported by the institutions in that state; i.e., all in-migrants and "remaining" students.²All students living in a particular state when admitted to an institution in any state. Students may be enrolled in any state.³Students who attend institutions in their home state.⁴Includes students coming to U.S. colleges from foreign countries and the outlying areas.⁵Students are reported in "state unknown" when an institution is unable to determine the student's home state.

NOTE: Data revised from previously published figures. Includes all students who are enrolled at the reporting institution for the first time. Data are for 4-year and 2-year degree-granting institutions that participated in Title IV federal financial aid programs.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment" survey, 1998. (This table was prepared June 2001.)

Table 206.—Residence and migration of all freshmen students in 4-year degree-granting institutions graduating from high school in the past 12 months, by state: Fall 1998

State or other area	Students enrolled in institutions located in the jurisdiction ¹	Student residents of state		Ratio of students remaining to—		Migration of students		
		Attending college in any jurisdiction ²	Attending college in home jurisdiction ³	Students enrolled (col.4/col.2)	Student residents (col.4/col.3)	Out of (col. 3–col. 4)	Into (col. 2–col. 4)	Net (col. 8–col. 7)

NOTE: Minority students includes black, Hispanic, Asian or Pacific Islander, and American Indian/Alaskan Native students. Some institutions do not report separate enrollment data for each branch campus. For this reason, counts of institutions in this table are somewhat lower than figures appearing in other tables. Includes data for 4-year and 2-year degree-granting institutions that were participating in Title IV federal financial aid programs. Data imputed using alternative methods. (See *Guide to Sources* for details.)

NOTE: Percent minority based on U.S. citizen enrollment (total enrollment less enrollment of nonresident aliens). Data for 1994 are based on institutions of higher education. Data for 1996 through 1999 are for degree-granting institutions. Data for 1994 are based on higher education institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or directly recognized by the Secretary of Education. The Department of Education no longer distinguishes between those institutions and other institutions that participated in Title IV programs. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few

higher education institutions that did not award degrees. Data for 1999 imputed using alternative methods. (See *Guide to Sources* for details.)

¹ Includes chiropractic medicine, medicine, dentistry, optometry, osteopathic medicine, pharmacy, podiatry, and veterinary medicine.

² Disabled students are those who reported that they had one or more of the following conditions: a specific learning disability, a visual handicap, hard of hearing, deafness, a speech disability, an orthopedic handicap, or a health impairment.

³ Sample size too small for a reliable estimate.

NOTE: Detail may not sum to totals due to survey item nonresponse and rounding.

—Not available.
¹ Includes less-than-2-year schools.
² Too few sample cases for a reliable estimate.
³ Includes students whose classification is unknown.
 NOTE: Because of different survey editing and processing procedures, enrollment data in this table may differ from those appearing in other tables. Includes students who enrolled at any time during the 1995–96 academic year. Detail may not sum to totals due to rounding.
 SOURCE: U.S. Department of Education, National Center for Education Statistics. "The 1995–96 National Postsecondary Student Aid Study," unpublished data. (This table was prepared November 1997).

¹ Research institutions are committed to graduate education through the doctorate, and give high priority to research. Research I institutions receive \$40 million or more annually in federal support. Research II institutions receive between \$15.5 million and \$40 million annually.

² Includes tribally controlled 2-year institutions. Tribally controlled colleges are located on reservations. They are members of the American Indian Higher Education Consortium.

³ Specialized institutions award baccalaureate or higher level degrees in specific fields of study. Also includes tribally controlled 4-year institutions. Tribally controlled colleges

are located on reservations. They are members of the American Indian Higher Education Consortium.

¹ Publicly controlled institutions are identified by a "1," and private, not-for-profit, by a "2," and private, for-profit, by a "3."

² The types of institutions are identified as follows: "1" for 4-year institutions; and "2" for 2-year institutions.

³ College and university campuses ranked by fall 1999 enrollment data.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment, 1999" survey. (This table was prepared September 2001.)

—Not applicable.
¹ Publicly controlled institutions are identified by a "1;" private, not-for-profit, by a "2;" and private, for-profit, by a "3."
² The types of institutions are identified as follows: "1" for 4-year institutions; and "2" for 2-year institutions.
³ Proportion based on enrollment of U.S. citizens.
⁴ Due to changes in survey instruments, public colleges are to report data on current-fund expenditures and educational and general expenditures, and private colleges are to report data on total expenditures.
⁵ Data for totals of enrollment in 1990 and 1995 are for institutions of higher education, rather than degree-granting institutions.

¹Data are for colleges and universities identified by the Women's College Coalition as women's colleges. Excludes women's colleges whose IPEDS data are reported together with a coed institution or coordinate men's college. The following institutions were excluded for this reason: The Women's College at the University of Denver; Hartford College for Women; Newcomb College; Douglass College; Hobart-William Smith College;

Stern College for Women; Russell Sage College; Radcliffe College; and Westhampton College.

²1=public, 4-year; 3=private not-for-profit, 4-year; and 4=private, not-for-profit, 2-year.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment," and "Completions," surveys. (This table was prepared September 2001.)

**Land-grant institution.

¹ 1=public 4-year; 2=public 2-year; 3=private 4-year; and 4=private 2-year.² In 1998, this school became a historically black college. It opened in 1960 as Gadsden Vocational Trade School, a private training facility.³ Formerly included in the University of the District of Columbia. In 1999–2000, the law school was reported separately.

NOTE: Excludes historically black colleges and universities that are not participating in Title IV participating programs.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment, 1999," "Completions, 1999–2000," and "Finance, 1998–99" surveys. (This table was prepared September 2001.)

NOTE: Historically black colleges and universities are degree-granting institutions established prior to 1964 with the principal mission of educating black Americans. Federal regulations, 20 U.S. Code, Section 1061 (2), allow for certain exceptions to the founding date. Most institutions are in the southern and border states and were established prior to 1954. Federal, state, and local governments revenue includes appropriations, grants, contracts, and independent operations. Detail may not sum to totals due to rounding.

NOTE: Data for 1976 to 1995 are for institutions of higher education. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges,

and excludes a few higher education institutions that did not award associate or higher degrees.

—Not available.

¹ Includes faculty members with the title of professor, associate professor, assistant professor, instructor, lecturer, assisting professor, adjunct professor, or interim professor (or the equivalent). Excluded are graduate students with titles such as graduate or teaching fellow who assist senior faculty.

² Estimated on the basis of enrollment.

³ Because of revised survey methods, data are not directly comparable with figures for years prior to 1987.

⁴ Data are for 4-year and 2-year degree-granting institutions that were participating in Title IV federal financial aid programs.

NOTE: Data exclude faculty employed by system offices. Data for 1970 through 1995 are for 4-year and 2-year institutions that were accredited by an agency or organization that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. For methodological details on estimates, see National Center for Education Statistics, *Projections of Education Statistics to 2000*. Detail may not sum to totals due to rounding.

¹ Distribution of student classroom contact hours per week by percent are the contact hours that faculty and instructional staff spend each week with students during classroom instruction multiplied by the number of students taught.

NOTE: Totals may differ from figures reported in other tables because of varying survey methodologies. Detail may not sum to totals due to rounding. Standard errors appear in parentheses.

—Not applicable.

¹ Distribution of student classroom contact hours per week by percent are the contact hours that faculty and instructional staff spend each week with students during classroom instruction multiplied by the number of students taught.

² Too few sample cases for a reliable estimate.

NOTE: Totals may differ from figures reported in other tables because of varying survey methodologies. Detail may not sum to totals due to rounding. Standard errors appear in parentheses.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Study of Postsecondary Faculty (NSOPF), 1999. (This table was prepared September 2001.)

¹ Based on the Consumer Price Index, prepared by the Bureau of Labor Statistics, U.S. Department of Labor, adjusted to a school-year basis.

² Too few sample cases (fewer than 30) for a reliable estimate.

NOTE: Totals may differ from figures reported in other tables because of varying survey methodologies. Standard errors appear in parentheses. Detail may not sum to totals due to rounding.

—Not available.

NOTE: Data for 1980–81 to 1995–96 are for institutions of higher education. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-

year colleges, and excludes a few higher education institutions that did not award associate or higher degrees.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), *Faculty Salaries, Tenure, and Fringe Benefits, 1980–81*; and Integrated Postsecondary Education Data System (IPEDS), "Salaries, Tenure, and Fringe Benefits of Full-Time Instructional Faculty" surveys. (This table was prepared August 2000.)

NOTE: Data for 1980–81 and 1990–91 are for institutions of higher education. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-

year colleges, and excludes a few higher education institutions that did not award associate or higher degrees.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Faculty Salaries, Tenure, and Fringe Benefits;" and Integrated Postsecondary Education Data System (IPEDS), "Salaries, Tenure, and Fringe Benefits of Full-Time Instructional Faculty" surveys. (This table was prepared August 2000.)

¹ Institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education.

² Large increases are due to the addition of schools accredited by the Accrediting Commission of Career Schools and Colleges of Technology.

³ Because of revised survey procedures, data are not entirely comparable with figures for earlier years. The number of branch campuses reporting separately has increased since 1986–87.

⁴ Data revised from previously published figures.

¹ Doctoral, extensive institutions are committed to graduate education through the doctorate, and award 50 or more doctoral degrees per year across at least 15 disciplines.

² Doctoral, intensive institutions are committed to education through the doctorate and award at least 10 doctoral degrees per year across 3 or more disciplines or at least 20 doctoral degrees overall.

³ Master's institutions offer a full range of baccalaureate programs and are committed to education through the master's degree. They award at least 40 master's degrees per year, across 3 or more disciplines.

⁴ Baccalaureate institutions primarily emphasize undergraduate education.

⁵ Other specialized 4-year institutions award degrees primarily in single fields of study, such as medicine, business, fine arts, theology and engineering. Also, includes some in-

stitutions which have 4-year programs, but have not reported sufficient data to identify program category.

NOTE: New institutions which do not have sufficient data to report by detailed level are included under "other 4-year" or 2-year depending on the level reported by the institution.

—Not available or not applicable.

NOTE: This table indicates the year in which the institution closed. Data for 1960–61 to 1995–96 are for institutions of higher education. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few

higher education institutions that did not award associate or higher degrees. Some data revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Education Directory, Higher Education, 1960–61 to 1974–75; Education Directory, Colleges and Universities, 1975–76 to 1983–84; 1982–83 Supplement to the Education Directory, Colleges and Universities*; and Integrated Postsecondary Education Data System, "Institutional Characteristics" surveys, unpublished data. (This table was prepared August 2001.)

 NOTE: The new Classification of Instructional Programs was initiated in 1991-92. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonomy. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey: "Agriculture and natural resources" includes Agricultural business and production, Agricultural business, and Conservation and renewable natural resources; "Business" includes Business management and administrative services; Marketing operations/marketing and distribution, and Consumer and personal services; and "Engineering-related technologies" includes Engineering-related technologies, Mechanics and repairers, and Construction trades. Data for 1998-99 imputed using alternative procedures. (See Guide to Sources for details.)

NOTE: The new Classification of Instructional Programs was initiated in 1991–92. The figures for earlier years have been reclassified when necessary to make them conform to the new taxonomy. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey. "Agriculture and natural resources" includes Agricultural business and production, Agricultural sciences, and Conservation and renewable natural resources; "Business" includes Business management and administrative services, Marketing operations/marketing and distribution, and Consumer and personal services; and "Engineering-related technologies" includes Engineering-related technologies, Mechanics and repairers, and Construction trades. Data for 1998–99 imputed using alternative procedures. (See *Guide to Sources* for details.)

¹ Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first-professional degrees, such as M.D., D.D.S., and law degrees.
² Includes degrees which require at least 6 years of college work for completion (including at least 2 years of preprofessional training).
³ Data are approximations. Some data have been revised from previously published figures.

⁴ Data imputed using alternative procedures. (See *Guide to Sources* for details.)

¹ Excludes 1,170 men and 251 women whose racial/ethnic group was not available.
² Excludes 4,807 men and 1,150 women whose racial/ethnic group was not available.
³ Excludes 4,819 men and 1,384 women whose racial/ethnic group was not available.
⁴ Excludes 1,033 men and 1,512 women whose racial/ethnic group was not available.
⁵ Excludes 2,353 men and 2,267 women whose racial/ethnic group was not available.
⁶ Excludes 2,564 men and 2,275 women whose racial/ethnic group was not available.
⁷ Excludes 8,413 men and 11,277 women whose racial/ethnic group was not available.
⁸ Excludes 4,673 men and 5,171 women whose racial/ethnic group was not available.
⁹ Excludes 2,913 men and 3,689 women whose racial/ethnic group was not available.
¹⁰ Excludes 799 men and 727 women whose racial/ethnic group was not available.
¹¹ Excludes 622 men and 524 women whose racial/ethnic group was not available.
¹² Excludes 537 men and 1,054 women whose racial/ethnic group was not available.

¹³ Excludes 3,226 men and 4,380 women whose racial/ethnic group was not available.
¹⁴ Excludes 1,173 men and 1,844 women whose racial/ethnic group was not available.
 NOTE: For years 1984–85 to 1999–2000, reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Data for 1998–99 imputed using alternative procedures. (See *Guide to Sources* for details.) Detail may not sum to totals due to rounding.

NOTE: Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey: "Agriculture and natural resources" includes Agricultural business and production, Agricultural sciences, and Conservation and renewable natural resources; and "Business" includes Business management and administrative services, Marketing operations/marketing and distribution, and Consumer and personal services.

NOTE: Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey: "Agriculture and natural resources" includes Agricultural business and production, Agricultural sciences, and Conservation and renewable natural resources; and "Business" includes Business management and administrative services, Marketing operations/marketing and distribution, and Consumer and personal services. Data imputed using alternative procedures. (See Guide to Sources for details.)

NOTE: Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey: "Agriculture and natural resources" includes Agricultural business and production, Agricultural sciences, and Conservation and renewable natural resources; and "Business" includes Business management and administrative services, Marketing operations/marketing and distribution, and Consumer and personal services.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Completions" survey. (This table was prepared July 2001.)

¹ Excludes 387 men and 175 women whose racial/ethnic group was not available.

² Excludes 733 men and 91 women whose racial/ethnic group was not available.

³ Excludes 1,377 men and 179 women whose racial/ethnic group was not available.

⁴ Excludes 3,973 men and 1,857 women whose racial/ethnic group was not available.

⁵ Excludes 482 men and 369 women whose racial/ethnic group was not available.

⁶ Excludes 727 men and 1,109 women whose racial/ethnic group was not available.

⁷ Excludes 4,686 men and 3,837 women whose racial/ethnic group was not available.

⁸ Excludes 2,299 men and 1,857 women whose racial/ethnic group was not available.

⁹ Excludes 504 men and 380 women whose racial/ethnic group was not available.

¹⁰ Excludes 730 men and 921 women whose racial/ethnic group was not available.

¹¹ Excludes 475 men and 102 women whose racial/ethnic group was not available.

¹² Excludes 420 men and 360 women whose racial/ethnic group was not available.

¹³ Excludes 2,782 men and 1,737 women whose racial/ethnic group was not available.

¹⁴ Excludes 393 men and 475 women whose racial/ethnic group was not available.

NOTE: For years 1984–85 to 1999–2000, reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Data for 1998–99 imputed using alternative procedures. (See *Guide to Sources* for details.) Detail may not sum to totals due to rounding.

NOTE: Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey: "Agriculture and natural resources" includes Agricultural business and production, Agricultural sciences, and Conservation and renewable natural resources; and "Business" includes Business management and administrative services, Marketing operations/marketing and distribution, and Consumer and personal services.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Completions" survey. (This table was prepared July 2001.)

NOTE: Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey: "Agriculture and natural resources" includes Agricultural business and production, Agricultural sciences, and Conservation and renewable natural resources; and "Business" includes Business management and administrative services, Marketing operations/mar-

keting and distribution, and Consumer and personal services. Data imputed using alternative procedures. (See Guide to Sources for details.)

¹ Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first-professional degrees, such as M.D., D.D.S., and law degrees.

² Excludes 106 men whose racial/ethnic group was not available.

³ Excludes 53 men and 2 women whose racial/ethnic group was not available.

⁴ Excludes 116 men and 3 women whose racial/ethnic group was not available.

⁵ Excludes 404 men and 232 women whose racial/ethnic group was not available.

⁶ Excludes 51 men and 10 women whose racial/ethnic group was not available.

⁷ Excludes 153 men and 105 women whose racial/ethnic group was not available.

⁸ Excludes 423 men and 324 women whose racial/ethnic group was not available.

⁹ Excludes 389 men and 180 women whose racial/ethnic group was not available.

¹⁰ Excludes 93 men and 18 women whose racial/ethnic group was not available.

¹¹ Excludes 21 men and 15 women whose racial/ethnic group was not available.

¹² Excludes 18 men and 1 woman whose racial/ethnic group was not available.

¹³ Excludes 5 men and 2 women whose racial/ethnic group was not available.

¹⁴ Excludes 320 men and 162 women whose racial/ethnic group was not available.

¹⁵ Excludes 50 men and 35 women whose racial/ethnic group was not available.

NOTE: For years 1984–85 to 1999–2000, reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. Data for 1998–99 imputed using alternative procedures. (See *Guide to Sources* for details.) Detail may not sum to totals due to rounding.

NOTE: Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first-professional degrees, such as M.D., D.D.S., and law degrees. Reported racial/ethnic distributions of students by level of degree, field of degree, and sex were used to estimate race/ethnicity for students whose race/ethnicity was not reported. To facilitate trend comparisons, certain aggregations have been made of the degree fields as reported in the IPEDS "Completions" survey. "Agriculture and natural resources" includes Agricultural business and production, Agricultural sciences, and Conservation and renewable natural resources; and "Business" includes Business management and administrative services, Marketing operations/marketing and distribution, and Consumer and personal services.

NOTE: Prior to 1969–70, includes degrees in architecture. Beginning in 1969–70, includes degrees in architecture; city/urban, community, and regional planning; architectural environmental design; interior architecture; landscape architecture; architectural urban design and planning; and architecture and related programs, other. Data for 1998–99 imputed using alternative procedures. (See *Guide to Sources* for details.)

¹ Includes mathematics, computer science, physics and astronomy, chemistry, and earth, atmospheric, and marine sciences.

² Distribution by race/ethnicity based on U.S. citizens and those with permanent visas only.

³ Includes 2-year, 4-year, and foreign colleges and universities, medical schools, and elementary/secondary schools.

⁴ Includes only recipients with definite employment plans.

NOTE: The above classification of degrees by field differs somewhat from that in most publications of the National Center for Education Statistics (NCES). The major differences are that history is included under humanities rather than social sciences and

that psychology is included under social sciences. Includes Ph.D., Ed.D., and comparable degrees at the doctoral level. Excludes first-professional degrees, such as M.D., D.D.S., and D.V.M. The number of degrees also differs slightly from that reported in the NCES "Completions" survey. The above tabulation excludes some non-research doctorate degrees such as doctor's degrees in theology. Total includes a small number of graduates not reported by field of study. Detail may not sum to totals due to rounding.

NOTE: Longitudinal comparisons by race/ethnicity should be done with extreme care, due to periodic changes in the survey. In particular, large numbers of Asians converted from temporary visas to permanent visas in the mid 1990s. Distribution by race/ethnicity based on U.S. citizens and those with permanent visas only. The National Research Council’s classification of degrees by field differs somewhat from that in most publications of the National Center for Education Statistics (NCES). Includes physics, astronomy, chemistry, and earth, atmospheric, and marine sciences. Excludes mathematics

and computer science. The number of degrees also differs slightly from that reported in the NCES “Completions” survey. Detail may not sum to totals due to rounding.

NOTE: Longitudinal comparisons by race/ethnicity should be done with extreme care, due to periodic changes in the survey. In particular, large numbers of Asians converted from temporary visas to permanent visas in the mid 1990s. Distribution by race/ethnicity based on U.S. citizens and those with permanent visas only. The National Research Council’s classification of degrees by field differs somewhat from that in most publications of the National Center for Education Statistics (NCES). The major differences are that history is included under humanities rather than social sciences and that psychology is included under social sciences. Includes anthropology, area studies, criminology, de-

mographic/population studies, economics, econometrics, geography, international relations/affairs, political science, public policy, psychology, sociology, statistics, and urban affairs/studies. The number of degrees also differs slightly from that reported in the NCES “Completions” survey. Detail may not sum to totals due to rounding.

NOTE: Data for 1990–91 and 1995–96 are for institutions of higher education. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-

year colleges, and excludes a few higher education institutions that did not award associate or higher degrees.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Institutional Characteristics" surveys. (This table was prepared September 2000.)

NOTE: Data for 1987–88 to 1996–97 are for institutions of higher education. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award associate or higher degrees.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Institutional Characteristics" surveys. (This table was prepared September 2001.)

Table 314.—Percentage distribution of enrollment and completion status of first-time postsecondary students starting during the 1995–96 academic year, by type of institution and other student characteristics: 1998

Student and institution characteristics	Students starting in less than 4-year institutions						Students starting in 4-year institutions					
	Highest degree attained				No degree, still enrolled	No degree, not enrolled	Highest degree attained				No degree, still enrolled	No degree, not enrolled

¹ Includes a small percent of students who have attained a degree and are still enrolled. Includes recipients of degrees not shown separately.

² Includes students with a standard high school diploma who enrolled in postsecondary education in the same year as their graduation.

³ Includes students whose goal is to transfer to a 4-year institution.

NOTE: Data reflect completion and enrollment status by spring 1998 of first-time postsecondary students starting in academic year 1995–96. Some cells in this table have

relatively large sampling errors. Detail may not sum to totals due to rounding. Standard errors appear in parentheses.

—Not available.
¹Total includes examinees who received no score on one or more General Test measures.
²Data reported for 1994 through 1998 are from the revised education test.
³The education subject test was administered for the final time in April 1998.
 NOTE: GRE scores for the verbal, quantitative, and analytical sections range from 200 to 800. Subject matter test scores range from 200 to 990. Some data have been revised from previously published figures.
 SOURCE: Graduate Record Examination Board, *Examinee and Score Trends for the GRE General Test*, various years; and *A Summary of Data Collected From Graduate Record Examinations Test-Takers During 1986-87: Guide to the Use of Scores, 2000-01*; unpublished data; and U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Degrees and Other Formal Awards Conferred" surveys, and Integrated Postsecondary Education Data System (IPEDS), "Completions" surveys. (This table was prepared May 2001.)

Table 317.—Average undergraduate tuition and fees and room and board rates paid by full-time-equivalent students in degree-granting institutions, by control of institution and by state: 1999–2000 and 2000–01

¹ Preliminary data based on fall 1999 enrollments.² Not applicable.

NOTE: Data are for the entire academic year and are average charges. Tuition and fees were weighted by the number of full-time-equivalent undergraduates in 1999, but are not adjusted to reflect student residency. Room and board are based on full-time students. Data for 1999 imputed using alternative procedures. (See *Guide to Sources*

for details.) Data revised from previously published figures. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Fall Enrollment" and "Institutional Characteristics" surveys. (This table was prepared August 2001.)

—Not available.

¹ Preliminary first-professional figures based on 1997–98 graduates.

² Preliminary graduate figures based on fall 1998 data and first-professional figures based on 1997–98 graduates.

³ Data are based on in-state tuition only.

NOTE: Average graduate student tuition weighted by fall full-time-equivalent graduate enrollment. Average first-professional tuition weighted by number of degrees conferred during the academic year. Some year-to-year fluctuations in tuition data may reflect non-reporting by individual institutions. Excludes institutions not reporting degrees conferred and institutions not reporting tuition. Data for 1987–88 to 1997–98 are for institutions of higher education. Institutions of higher education were accredited by an agency or asso-

ciation that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award associate or higher degrees. Detail may not sum to totals due to rounding. Some data have been revised from previously published figures.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Institutional Characteristics," "Fall Enrollment," and "Degrees Conferred" surveys. (This table was prepared September 2000.)

¹ Numbers of undergraduates may not equal figures reported in other tables, since these data are based on a sample survey. Includes all postsecondary institutions.

² Includes students who reported they were awarded aid, but did not specify the source or type of aid.

³ Details on federal and nonfederal work study participants are not available.

⁴ Includes students who were single, divorced, or widowed.

NOTE: Row may not sum to totals due to rounding and/or the fact that some students receive aid from multiple sources. Because of rounding and survey item nonresponse, enrollment data may not add to totals. Data include undergraduates in degree-granting and non-degree-granting institutions.

—Not available.
¹ Numbers of undergraduates may not equal figures reported in other tables, since these data are based on a sample survey of students who enrolled at any time during the academic year. Includes all postsecondary institutions.
² Includes students who reported they were awarded aid, but did not specify the source or type of aid.
³ Details on federal and nonfederal work study participants are not available.
⁴ Includes students who were single, divorced, or widowed.

NOTE: Row may not sum to totals due to rounding and/or the fact that some students receive aid from multiple sources. Because of rounding and survey item nonresponse, enrollment data may not add to totals. Data include undergraduates in degree-granting and non-degree-granting institutions.

¹ Numbers of undergraduates may not equal figures reported in other tables, since these data are based on a sample survey. Includes students who enrolled at any time during the academic year.

² Includes students who reported they were awarded aid but did not specify the source of aid.

³ Details on nonfederal work study participants are not available.

⁴ Full-time students are students who attend full-time for the entire academic year. All other students, including those who attend full-time for part of the academic year, are counted as part-time students.

NOTE: Excludes students whose attendance status was not reported. Because some students receive multiple types and sources of aid and rounding, details may not add to totals.

¹ Excludes Pell Grants. Federally supported student aid that is received through students is included under tuition and auxiliary enterprises.
² Generally includes only those revenues associated with major federally funded research and development centers (FFRDC).
³ Less than 0.05 percent.

Education. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award associate or higher degrees. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Financial Statistics of Institutions of Higher Education" surveys; and Integrated Postsecondary Education Data System (IPEDS), "Finance" surveys. (This table was prepared October 1998.)

NOTE: Data for 1980–81 to 1994–95 are for institutions of higher education. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of

¹ Preliminary data.

² Excludes Pell Grants. Federally supported student aid that is received through students is included under tuition and auxiliary enterprises.

³ Generally includes only those revenues associated with major federally funded research and development centers (FFRDC).

⁴ Less than 0.05 percent.

NOTE: Data for 1980–81 to 1994–95 are for institutions of higher education. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of

Education. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award associate or higher degrees. Detail may not sum to totals due to rounding.

¹ Excludes Pell Grants. Federally supported student aid that is received through students is included under tuition and auxiliary enterprises.
² Generally includes only those revenues associated with major federally funded research and development centers (FFRDC).
³ Less than 0.05 percent.

Education. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award associate or higher degrees. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Financial Statistics of Institutions of Higher Education" surveys; and Integrated Postsecondary Education Data System (IPEDS), "Finance" surveys. (This table was prepared January 1999.)

NOTE: Data for 1980–81 to 1994–95 are for institutions of higher education. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of

Degree-granting institutions ⁸											

¹ Not available.
² Tuition and fees received from veterans under Public Law 550 are reported under student fees and are not under income from the federal government.
³ Federally supported student aid that is received through students is included under tuition and auxiliary enterprises.
⁴ Includes federal aid received through state channels and regional compacts, through 1959–60.
⁵ Beginning in 1969–70, the private grants represent nongovernmental revenue for sponsored research, student aid, and other sponsored programs.
⁶ Prior to 1959–60, data for hospitals are included under sales and services of educational activities.
⁷ Institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education.
⁸ Data are for 4-year and 2-year degree-granting institutions that were participating in Title IV federal financial aid programs.
 NOTE: Data for years prior to 1969–70 are not entirely comparable with data for later years. Also, some details for 1969–70 are not directly comparable with data for later years. Detail may not sum to totals due to rounding.

¹ Includes federally supported aid received through students.

² Includes appropriations, grants, contracts, and revenues associated with major federally funded research and development centers (FFRDC). Excludes Pell Grants.

³ Preliminary data.

⁴ Research institutions are committed to graduate education through the doctorate, and give high priority to research. Research I institutions receive \$40 million or more annually in federal support. Research II institutions receive between \$15.5 million and \$40 million annually.

⁵ Specialized institutions award baccalaureate or higher level degrees in specific fields of study.

⁶ Tribally controlled colleges are located on reservations and are members of the American Indian Higher Education Consortium.

NOTE: Detail may not sum to totals due to rounding.

¹Includes federal appropriations, unrestricted and restricted federal contracts and grants, and revenue for independent operations. Independent operations generally include only the revenues associated with major federally funded research and development centers. Excludes Pell Grants. Federally supported student aid that is received through students is excluded.

²Not applicable.

—Not available.

¹ Academic support excluding expenditures for libraries.

² Includes all separately budgeted programs, other than research, which are supported by sponsors outside the institution. Examples are training programs, workshops, and training and instructional institutes. For years not shown, most expenditures for these programs are included under "Extension and public service."

³ Generally includes only those expenditures associated with federally funded research and development centers (FFRDCs).

⁴ Data for 1929–30 to 1945–46 are based on school year enrollment.

⁵ Data adjusted by the Consumer Price Index computed on a school year basis.

⁶ Institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education.

⁷ Expenditures for federally funded research and development centers are included under "Organized research."

⁸ Included under "Other current expenditures."

⁹ Expenditures for hospitals included under "Organized activities related to instructional departments."

¹⁰ Expenditures were for federal contract courses.

¹¹ Includes current expenditures for physical plant assets. In later years, the educational and general expenditures for physical plant assets are included under "Other general expenditures."

¹² Data are for 4-year and 2-year degree-granting institutions that were participating in Title IV federal financial aid programs.

NOTE: The data in this table reflect limitations of data availability and comparability. Major changes in data collection forms in 1965–66 and 1974–75 cause significant data comparability problems among the three mostly consistent time periods, 1929–30 to 1963–64, 1965–66 to 1973–74, and 1974–75 to the present. The largest problems affect Hospitals, Independent operations, Organized research, Other sponsored programs, Extension and public service, and Scholarships and fellowships.

¹ Generally includes only those expenditures associated with major federally funded research and development centers (FFRDC).

² Preliminary data.

³ Research institutions are committed to graduate education through the doctorate, and give high priority to research. Research I institutions receive \$40 million or more annually in federal support. Research II institutions receive between \$15.5 million and \$40 million annually.

⁴ Specialized institutions award baccalaureate or higher level degrees in specific fields of study.

⁵ Tribally controlled colleges are located on reservations. They are members of the American Indian Higher Education Consortium.

¹ Preliminary data.

² Research institutions are committed to graduate education through the doctorate, and give high priority to research. Research I institutions receive \$40 million or more annually in federal support. Research II institutions receive between \$15.5 million and \$40 million annually.

³ Specialized institutions award baccalaureate or higher level degrees in specific fields of study.

⁴ Tribally controlled colleges are located on reservations. They are members of the American Indian Higher Education Consortium.

NOTE: Detail may not sum to totals due to rounding.

¹ Excludes Pell Grants.

² Generally includes only those expenditures associated with major federally funded research and development centers (FFRDC).

³ Less than 0.05 percent.

NOTE: Data for 1980–81 to 1994–95 are for institutions of higher education. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The new degree-granting classification is very similar to the earlier higher

education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award associate or higher degrees. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Financial Statistics of Institutions of Higher Education" surveys; and Integrated Postsecondary Education Data System (IPEDS), "Finance" surveys. (This table was prepared October 1998.)

¹ Excludes Pell Grants.

² Generally includes only those expenditures associated with major federally funded research and development centers (FFRDC).

³ Less than 0.05 percent.

NOTE: Data for 1980–81 to 1994–95 are for institutions of higher education. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The new degree-granting classification is very similar to the earlier higher

education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award associate or higher degrees. Detail may not sum to totals due to rounding.

¹ Includes institutional and academic support less libraries.² Preliminary data.

NOTE: Data in this table may differ slightly from data appearing in other tables. Data for 1976–77 through 1985–86 include only institutions which provided both enrollment and finance data. The Higher Education Price Index was used to convert the per student figures to constant dollars. Data for 1976–77 to 1995–96 are for institutions of higher education. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The new degree-granting classification is very similar to the ear-

lier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award associate or higher degrees. Detail may not sum to totals due to rounding.

¹ Includes institutional and academic support less libraries.² Preliminary data.

NOTE: This table excludes universities. See preceding table. Data in this table may differ slightly from data appearing in other tables. Data for 1976–77 through 1985–86 include only institutions which provided both enrollment and finance data. Data for 1976–77 to 1995–96 are for institutions of higher education. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The Higher Education Price Index was used to convert the per student figures to constant dollars. The new degree-granting classification is very similar to the earlier higher education clas-

sification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award associate or higher degrees. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Financial Statistics of Institutions of Higher Education" surveys; Integrated Postsecondary Education Data System (IPEDS), "Finance" surveys; and Research Associates of Washington, unpublished data. (This table was prepared June 2000.)

¹ Preliminary data.

NOTE: Data for 1969–70 to 1994–95 are for institutions of higher education. Institutions of higher education were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education. The new degree-granting classification is very similar to the earlier higher education classification, except that it includes some additional institutions, primarily 2-year colleges, and excludes a few higher education institutions that did not award asso-

ciate or higher degrees. Data for 1995–96 and 1996–97 are for 4-year and 2-year degree-granting institutions that were participating in Title IV federal financial aid programs. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Higher Education General Information Survey (HEGIS), "Financial Statistics of Institutions of Higher Education" surveys; and Integrated Postsecondary Education Data System (IPEDS), "Finance" surveys. (This table was prepared June 2000.)

¹ Includes funds functioning as endowment.² Institutions that were accredited by an agency or association that was recognized by the U.S. Department of Education, or recognized directly by the Secretary of Education.³ Includes annuity funds.⁴ Includes improvements to land and equipment. These funds are included under appropriate categories after 1967–68.⁵ Data are for 4-year and 2-year degree-granting institutions that were participating in Title IV federal financial aid programs.

NOTE: Detail may not sum to totals due to rounding.

¹ Institutions ranked by size of endowment in 2000.² Change in market value of endowment. Includes growth from gifts and returns on investments, as well as reductions from expenditures and withdrawals.³ As of August 31.⁴ Includes foundations.⁵ As of September 30.⁶ As of January 31.⁷ As of May 31.

NOTE: Data include institutions participating in the comparative research study by the National Association of College and University Business Officers. Endowment values for 1999 are from the Association's February 2000 study.

SOURCE: National Association of College and University Business Officers, *NACUBO Endowment Study, 2000*. (This table was prepared May 2001.)

Table 358.—Participation of employed persons, 17 years old and over, in adult education during the previous 12 months, by selected characteristics of participants: 1995 and 1999

Characteristics of employed persons	1995								1999					Number of career or job-related courses taken, per employee	Number of career or job-related courses taken, per employee			
	Adult education participants, in thousands				Percent of adults participating				Number of career or job-related courses taken, per employee	Percent of career or job-related courses provided by businesses	Em-ployed persons, in thousands	Percent of adults participating						
	In any programs	Other personal courses	In career or job-related courses	In part-time higher education	In any programs	Other personal courses	In career or job-related courses	In part-time higher education				In any programs	In career or job-related courses			In part-time higher education	In career or job-related courses	In part-time higher education

—Not available.

NOTE: Percent of career or job-related courses provided by businesses are based on the respondent's reports of the first six work-related courses taken. Adult education is defined as all education activities, except full-time enrollment in higher education credential programs. Examples of adult education activities include part-time college attendance, classes or seminars given by employers, and classes taken for adult literacy purposes, or for recreation and enjoyment.

Includes adult basic education and English as a second language classes. Data are based upon a sample survey of the civilian noninstitutional population. Data revised from previously published figures. Detail may not sum to totals due to rounding and survey item nonresponse.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Household Education Survey, "Participation in Adult Education," unpublished data. (This table was prepared June 2001.)

¹ Adult education is defined as all education activities, except full-time enrollment in higher education credential programs. Examples of adult education activities include part-time college attendance, classes or seminars given by employers, and classes taken for adult literacy purposes, or for recreation and enjoyment.
² Any participation includes adult basic education, English as a second language, and apprentice programs not shown separately.
 NOTE: Data are based upon a sample survey of the civilian noninstitutional population. Data revised from previously published figures. Detail may not sum to totals due to rounding and survey item nonresponse.
 SOURCE: U.S. Department of Education, National Center for Education Statistics, "Participation in Adult Education," unpublished data. (This table was prepared June 2001.)

NOTE: Includes all institutions that did not grant degrees at the associate or higher level, or were not eligible for Title IV federal financial aid.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS), "Institutional Characteristics" surveys. (This table was prepared August 2001.)

CHAPTER 4

Federal Programs for Education and Related Activities

This chapter provides a summary of federal funds for education to help describe the magnitude of the federal fiscal effort and give some indication of the scope and variety of the education programs. Data in this chapter reflect outlays and obligations of federal agencies. These tabulations differ from federal receipts reported in other chapters because of numerous variations in the data collection systems. Federal dollars are not necessarily spent by recipient institutions in the same year they are appropriated. In some cases, institutions cannot identify the source of federal revenues because they flow through state agencies. Some types of revenues, such as tuition and fees, are reported as revenues from students even though they may be supported by federal student aid programs. Some institutions that receive federal education funds are not included in regular surveys conducted by the National Center for Education Statistics. Thus, the revenue data tabulated in this chapter are not comparable with figures reported in other chapters. Readers should be careful about comparing data on obligations shown in some tables with data on outlays and appropriations appearing in others.

Federal on-budget funding for education showed sizable growth between fiscal years (FYs) 1965 and 2001, after adjustment for inflation. Particularly large increases occurred between 1965 and 1975. After a slight increase from 1975 to 1980, there was a substantial decrease from 1980 to 1985 (16 percent). Thereafter, federal on-budget funding for education generally increased, showing a rise of 56 percent from 1985 to 2001, after adjustment for inflation (table 362).

During the 1965 to 1975 period, after adjustment for inflation, federal funds for elementary and secondary education rose by 207 percent, postsecondary education by 259 percent, other education by 141 percent, and research at educational institutions by 6 percent. Between 1975 and 1980, federal funding for elementary and secondary education increased by 2 percent and research by 15 percent, but postsecondary education decreased slightly by 2 percent and other education decreased by 35 percent. After declining 21 percent between 1980 and 1985, federal funding for elementary and secondary education programs rose by 89 percent between

1985 and 2001. Postsecondary education decreased by 25 percent between 1980 and 1985 and then declined 10 percent between 1985 and 2001. Between 1985 and 2001, other education rose by 86 percent, and research by 69 percent, after adjustment for inflation (table 362).

Off-budget support and nonfederal funds generated by federal legislation showed an increase in real dollars between FY 1980 and FY 2001 (256 percent), but there were significant fluctuations throughout the period. These amounts tend to fluctuate because of changes in interest rates and program legislation which affect the number and volume of student loans. Between FY 1990 and FY 2001, these same funds showed an increase of 141 percent (table 362).

According to FY 2001 estimates, \$36.8 billion or about 40 percent of the \$92.8 billion spent by the federal government on education came from the U.S. Department of Education. Large amounts of money also came from the U.S. Department of Health and Human Services (\$19.5 billion), the U.S. Department of Agriculture (\$11.0 billion), the U.S. Department of Labor (\$5.6 billion), the U.S. Department of Defense (\$4.5 billion), and the U.S. Department of Energy (\$3.5 billion) (table 363).

Fiscal year 2001 estimates call for federal program funds for elementary and secondary education to be \$48.7 billion; for postsecondary education, \$15.3 billion; for research at universities and related institutions, \$22.8 billion; and for other programs, \$6.0 billion (table 364).

Almost 60 percent of total federal education support, excluding estimated federal tax expenditures, went to educational institutions in FY 2001. Another 20 percent was used for student support. Banks and other lending agencies received 6 percent, and all other recipients, including libraries, museums, and federal institutions, received almost 15 percent (table 365).

Between FYs 1990 and 2001, U.S. Department of Education obligations rose 46 percent, after adjustment for inflation. Funds for student financial assistance increased by \$2.0 billion in 2001, a rise of 13 percent since 1990. Funds for elementary and secondary education were an estimated \$16.4 billion in 2001, an increase of 74 percent since 1990, after ad-

justment for inflation. Funds for the handicapped increased by 101 percent, to \$9.2 billion, and funds for vocational and adult education increased 22 percent, after adjustment for inflation (table 37 in chapter 1 and table 366).

Of the \$36.8 billion spent by the U.S. Department of Education in FY 2001, about \$17.6 billion went to school districts, \$6.1 billion to institutions of higher education, \$6.2 billion to college students, and \$4.9 billion to state education agencies. A portion of the remaining \$1.9 billion went to banks to subsidize student loans (table 367).

Thirty-three percent of public elementary and secondary school students received publicly funded free or reduced-price lunches in 1993–94. At public elementary schools, the participation rate was 39 percent compared with 22 percent for public secondary schools (table 375).

About 13 percent of all elementary and secondary school children received Title I services in 1993–94. Federally sponsored Title I programs are designed to improve student achievement, particularly for children in schools with high concentrations of poverty. Children in rural areas (13 percent) and central cities (17 percent) were more likely to receive services than those in suburban areas (9 percent) (table 376).

Federal Education Legislation

A capsule view of the history of federal education activities is provided in the following list of selected legislation:

- 1787** *Northwest Ordinance* authorized land grants for the establishment of educational institutions.
- 1802** *An Act Fixing the Military Peace Establishment of the United States* established the U.S. Military Academy. (The U.S. Naval Academy was established in 1845 by the Secretary of the Navy.)
- 1862** *First Morrill Act* authorized public land grants to the states for the establishment and maintenance of agricultural and mechanical colleges.
- 1867** *Department of Education Act* authorized the establishment of the U.S. Department of Education.*
- 1876** *Appropriation Act*, U.S. Department of the Treasury, established the U.S. Coast Guard Academy.

*The U.S. Department of Education as established in 1867 was later known as the Office of Education. In 1980, under Public Law 96–88, it became a cabinet-level department. Therefore, for purposes of consistency, it is referred to as the “U.S. Department of Education” even in those tables covering years when it was officially the Office of Education.

- 1890** *Second Morrill Act* provided for money grants for support of instruction in the agricultural and mechanical colleges.
- 1911** *State Marine School Act* authorized federal funds to be used for the benefit of any nautical school in any of 11 specified state seaport cities.
- 1917** *Smith-Hughes Act* provided for grants to states for support of vocational education.
- 1918** *Vocational Rehabilitation Act* provided for grants for rehabilitation through training of World War I veterans.
- 1919** *An Act to Provide for Further Educational Facilities* authorized the sale by the federal government of surplus machine tools to educational institutions at 15 percent of acquisition cost.
- 1920** *Smith-Bankhead Act* authorized grants to states for vocational rehabilitation programs.
- 1935** *Bankhead-Jones Act* (Public Law 74–182) authorized grants to states for agricultural experiment stations.

Agricultural Adjustment Act (Public Law 74–320) authorized 30 percent of the annual customs receipts to be used to encourage the exportation and domestic consumption of agricultural commodities. Commodities purchased under this authorization began to be used in school lunch programs in 1936. The National School Lunch Act of 1946 continued and expanded this assistance.

- 1936** *An Act to Further the Development and Maintenance of an Adequate and Well-Balanced American Merchant Marine* (Public Law 74–415) established the U.S. Merchant Marine Academy.
- 1937** *National Cancer Institute Act* established the Public Health Service fellowship program.
- 1941** *Amendment to Lanham Act of 1940* authorized federal aid for construction, maintenance, and operation of schools in federally impacted areas. Such assistance was continued under Public Law 815 and Public Law 874, 81st Congress, in 1950.
- 1943** *Vocational Rehabilitation Act* (Public Law 78–16) provided assistance to disabled veterans.

School Lunch Indemnity Plan (Public Law 78–129) provided funds for local lunch food purchases.

1944 *Servicemen's Readjustment Act* (Public Law 78-346) known as the GI Bill, provided assistance for the education of veterans.

Surplus Property Act (Public Law 78-457) authorized transfer of surplus property to educational institutions.

1946 *National School Lunch Act* (Public Law 79-396) authorized assistance through grants-in-aid and other means to states to assist in providing adequate foods and facilities for the establishment, maintenance, operation, and expansion of nonprofit school lunch programs.

George-Barden Act (Public Law 80-402) expanded federal support of vocational education.

1948 *United States Information and Educational Exchange Act* (Public Law 80-402) provided for the interchange of persons, knowledge, and skills between the United States and other countries.

1949 *Federal Property and Administrative Services Act* (Public Law 81-152) provided for donation of surplus property to educational institutions and for other public purposes.

1950 *Financial Assistance for Local Educational Agencies Affected by Federal Activities* (Public Law 81-815 and Public Law 81-874) provided assistance for construction (Public Law 815) and operation (Public Law 874) of schools in federally affected areas.

Housing Act (Public Law 81-475) authorized loans for construction of college housing facilities.

1954 *An Act for the Establishment of the United States Air Force Academy and Other Purposes* (Public Law 83-325) established the U.S. Air Force Academy.

Educational Research Act (Public Law 83-531) authorized cooperative arrangements with universities, colleges, and state educational agencies for educational research.

School Milk Program Act (Public Law 83-597) provided funds for purchase of milk for school lunch programs.

1956 *Library Services Act* (Public Law 84-597) provided grants to states for extension and improvement of rural public library services.

1957 *Practical Nurse Training Act* (Public Law 84-911) provided grants to states for practical nurse training.

1958 *National Defense Education Act* (Public Law 85-864) provided assistance to state and local school systems for strengthening instruction in science, mathematics, modern foreign languages, and other critical subjects; improvement of state statistical services; guidance, counseling, and testing services and training institutes; higher education student loans and fellowships; foreign language study and training provided by colleges and universities; experimentation and dissemination of information on more effective utilization of television, motion pictures, and related media for educational purposes; and vocational education for technical occupations necessary to the national defense.

Education of Mentally Retarded Children Act (Public Law 85-926) authorized federal assistance for training teachers of the handicapped.

Captioned Films for the Deaf Act (Public Law 85-905) authorized a loan service of captioned films for the deaf.

1961 *Area Redevelopment Act* (Public Law 87-27) included provisions for training or retraining of persons in redevelopment areas.

1962 *Manpower Development and Training Act* (Public Law 87-415) provided training in new and improved skills for the unemployed and underemployed.

Migration and Refugee Assistance Act of 1962 (Public Law 87-510) authorized loans, advances, and grants for education and training of refugees.

1963 *Health Professions Educational Assistance Act of 1963* (Public Law 88-129) provided funds to expand teaching facilities and for loans to students in the health professions.

Vocational Education Act of 1963 (Part of Public Law 88-210) increased federal support of vocational education schools; vocational work-study programs; and research, training, and demonstrations in vocational education.

Higher Education Facilities Act of 1963 (Public Law 88-204) authorized grants and loans for classrooms, libraries, and laboratories in public community colleges and technical institutes, as well as undergraduate and graduate facilities in other institutions of higher education.

1964 *Civil Rights Act of 1964* (Public Law 88-352) authorized the Commissioner of Education to arrange for support for institutions of higher

education and school districts to provide in-service programs for assisting instructional staff in dealing with problems caused by de-segregation.

Economic Opportunity Act of 1964 (Public Law 88–452) authorized grants for college work-study programs for students from low-income families; established a Job Corps program and authorized support for work-training programs to provide education and vocational training and work experience opportunities in welfare programs; authorized support of education and training activities and of community action programs, including Head Start, Follow Through, and Upward Bound; and authorized the establishment of Volunteers in Service to America (VISTA).

1965 *Elementary and Secondary Education Act of 1965* (Public Law 89–10) authorized grants for elementary and secondary school programs for children of low-income families; school library resources, textbooks, and other instructional materials for school children; supplementary educational centers and services; strengthening state education agencies; and educational research and research training.

Health Professions Educational Assistance Amendments of 1965 (Public Law 89–290) authorized scholarships to aid needy students in the health professions.

Higher Education Act of 1965 (Public Law 89–329) provided grants for university community service programs, college library assistance, library training and research, strengthening developing institutions, teacher training programs, and undergraduate instructional equipment. Authorized insured student loans, established a National Teacher Corps, and provided for graduate teacher training fellowships.

National Foundation on the Arts and the Humanities Act (Public Law 89–209) authorized grants and loans for projects in the creative and performing arts and for research, training, and scholarly publications in the humanities.

National Technical Institute for the Deaf Act (Public Law 89–36) provided for the establishment, construction, equipping, and operation of a residential school for postsecondary education and technical training of the deaf.

School Assistance in Disaster Areas Act (Public Law 89–313) provided for assistance to local education agencies to help meet exceptional costs resulting from a major disaster.

1966 *International Education Act* (Public Law 89–698) provided grants to institutions of higher education for the establishment, strengthening, and operation of centers for research and training in international studies and the international aspects of other fields of study.

National Sea Grant College and Program Act (Public Law 89–688) authorized the establishment and operation of Sea Grant Colleges and programs by initiating and supporting programs of education and research in the various fields relating to the development of marine resources.

Adult Education Act (Public Law 89–750) authorized grants to states for the encouragement and expansion of educational programs for adults, including training of teachers of adults and demonstrations in adult education (previously part of Economic Opportunity Act of 1964).

Model Secondary School for the Deaf Act (Public Law 89–694) authorized the establishment and operation, by Gallaudet College, of a model secondary school for the deaf.

1967 *Education Professions Development Act* (Public Law 90–35) amended the Higher Education Act of 1965 for the purpose of improving the quality of teaching and to help meet critical shortages of adequately trained educational personnel.

Public Broadcasting Act of 1967 (Public Law 90–129) established a Corporation for Public Broadcasting to assume major responsibility in channeling federal funds to noncommercial radio and television stations, program production groups, and ETV networks; conduct research, demonstration, or training in matters related to noncommercial broadcasting; and award grants for construction of educational radio and television facilities.

1968 *Elementary and Secondary Education Amendments of 1968* (Public Law 90–247) modified existing programs, authorized support of regional centers for education of handicapped children, model centers and services for deaf-blind children, recruitment of personnel and dissemination of information on education of the handicapped; technical assistance in education to rural areas; support of dropout pre-

vention projects; and support of bilingual education programs.

Handicapped Children's Early Education Assistance Act (Public Law 90-538) authorized pre-school and early education programs for handicapped children.

Vocational Education Amendments of 1968 (Public Law 90-576) modified existing programs and provided for a National Advisory Council on Vocational Education and collection and dissemination of information for programs administered by the Commissioner of Education.

1970 *Elementary and Secondary Education Assistance Programs, Extension* (Public Law 91-230) authorized comprehensive planning and evaluation grants to state and local education agencies; provided for the establishment of a National Commission on School Finance.

National Commission on Libraries and Information Services Act (Public Law 91-345) established a National Commission on Libraries and Information Science to effectively utilize the nation's educational resources.

Office of Education Appropriation Act (Public Law 91-380) provided emergency school assistance to desegregating local education agencies.

Environmental Education Act (Public Law 91-516) established an Office of Environmental Education to develop curriculum and initiate and maintain environmental education programs at the elementary-secondary levels; disseminate information; provide training programs for teachers and other educational, public, community, labor, and industrial leaders and employees; provide community education programs; and distribute material dealing with the environment and ecology.

Drug Abuse Education Act of 1970 (Public Law 91-527) provided for development, demonstration, and evaluation of curricula on the problems of drug abuse.

1971 *Comprehensive Health Manpower Training Act of 1971* (Public Law 92-257) amended Title VII of the Public Health Service Act, increasing and expanding provisions for health manpower training and training facilities.

1972 *Drug Abuse Office and Treatment Act of 1972* (Public Law 92-255) established a Special Action Office for Drug Abuse Prevention to provide overall planning and policy for all federal drug-abuse prevention functions; a Na-

tional Advisory Council for Drug Abuse Prevention; community assistance grants for community mental health centers for treatment and rehabilitation of persons with drug-abuse problems, and, in December 1974, a National Institute on Drug Abuse.

Education Amendments of 1972 (Public Law 92-318) established the Education Division in the U.S. Department of Health, Education, and Welfare and the National Institute of Education; general aid for institutions of higher education; federal matching grants for state Student Incentive Grants; a National Commission on Financing Postsecondary Education; State Advisory Councils on Community Colleges; a Bureau of Occupational and Adult Education and State Grants for the design, establishment, and conduct of postsecondary occupational education; and a bureau-level Office of Indian Education. Amended current U.S. Department of Education programs to increase their effectiveness and better meet special needs. Prohibited sex bias in admission to vocational, professional, and graduate schools, and public institutions of undergraduate higher education.

1973 *Older Americans Comprehensive Services Amendment of 1973* (Public Law 93-29) made available to older citizens comprehensive programs of health, education, and social services.

Comprehensive Employment and Training Act of 1973 (Public Law 93-203) provided for opportunities for employment and training to unemployed and underemployed persons. Extended and expanded provisions in the Manpower Development and Training Act of 1962, Title I of the Economic Opportunity Act of 1964, and the Emergency Employment Act of 1971 as in effect prior to June 30, 1973.

1974 *Education Amendments of 1974* (Public Law 93-380) provided for the consolidation of certain programs; and established a National Center for Education Statistics.

Juvenile Justice and Delinquency Prevention Act of 1974 (Public Law 93-415) provided for technical assistance, staff training, centralized research, and resources to develop and implement programs to keep students in elementary and secondary schools; and established, in the U.S. Department of Justice, a

National Institute for Juvenile Justice and Delinquency Prevention.

- 1975** *Indian Self-Determination and Education Assistance Act* (Public Law 93–638) provided for increased participation of Indians in the establishment and conduct of their education programs and services.

Harry S Truman Memorial Scholarship Act (Public Law 93–642) established the Harry S Truman Scholarship Foundation and created a perpetual education scholarship fund for young Americans to prepare and pursue careers in public service.

Indochina Migration and Refugee Assistance Act of 1975 (Public Law 94–23) authorized funds to be used for education and training of aliens who have fled from Cambodia or Vietnam.

Education for All Handicapped Children Act (Public Law 94–142) provided that all handicapped children have available to them a free appropriate education designed to meet their unique needs.

- 1976** *Educational Broadcasting Facilities and Telecommunications Demonstration Act of 1976* (Public Law 94–309) established a telecommunications demonstration program to promote the development of nonbroadcast telecommunications facilities and services for the transmission, distribution, and delivery of health, education, and public or social service information.

- 1977** *Youth Employment and Demonstration Projects Act of 1977* (Public Law 95–93) established a youth employment training program that includes, among other activities, promoting education-to-work transition, literacy training and bilingual training, and attainment of certificates of high school equivalency.

Career Education Incentive Act (Public Law 95–207) authorized the establishment of a career education program for elementary and secondary schools.

- 1978** *Tribally Controlled Community College Assistance Act of 1978* (Public Law 95–471) provided federal funds for the operation and improvement of tribally controlled community colleges for Indian students.

Education Amendments of 1978 (Public Law 95–561) established a comprehensive basic skills program aimed at improving pupil achievement (replaced the existing National Reading Improvement program); and estab-

lished a community schools program to provide for the use of public buildings.

Middle Income Student Assistance Act (Public Law 95–566) modified the provisions for student financial assistance programs to allow middle-income as well as low-income students attending college or other postsecondary institutions to qualify for federal education assistance.

- 1979** *Department of Education Organization Act* (Public Law 96–88) established a U.S. Department of Education containing functions from the Education Division of the U.S. Department of Health, Education, and Welfare along with other selected education programs from HEW, the U.S. Department of Justice, U.S. Department of Labor, and the National Science Foundation.

- 1980** *Asbestos School Hazard Detection and Control Act of 1980* (Public Law 96–270) established a program for inspection of schools for detection of hazardous asbestos materials and provided loans to assist educational agencies to contain or remove and replace such materials.

- 1981** *Education Consolidation and Improvement Act of 1981* (Part of Public Law 97–35) consolidated 42 programs into 7 programs to be funded under the elementary and secondary block grant authority.

- 1983** *Student Loan Consolidation and Technical Amendments Act of 1983* (Public Law 98–79) established an 8 percent interest rate for Guaranteed Student Loans and extended Family Contribution Schedule.

Challenge Grant Amendments of 1983 (Public Law 98–95) amended Title III, Higher Education Act, and added authorization of Challenge Grant program. The Challenge Grant program provides funds to eligible institutions on a matching basis as an incentive to seek alternative sources of funding.

Education of the Handicapped Act Amendments of 1983 (Public Law 98–199) added the Architectural Barrier amendment and clarified participation of handicapped children in private schools.

- 1984** *Education for Economic Security Act* (Public Law 98–377) added new science and mathematics programs for elementary, secondary, and postsecondary education. The new programs included magnet schools, excellence in education, and equal access.

Carl D. Perkins Vocational Education Act (Public Law 98–524) continued federal assistance for vocational education through FY 1989. The act replaced the Vocational Education Act of 1963. It provided aid to the states to make vocational education programs accessible to all persons, including handicapped and disadvantaged, single parents and homemakers, and the incarcerated.

Human Services Reauthorization Act (Public Law 98–558) created a Carl D. Perkins scholarship program, a National Talented Teachers Fellowship program, a Federal Merit Scholarships program, and a Leadership in Educational Administration program.

1985 *Montgomery GI Bill—Active Duty* (Public Law 98–525), brought about a new GI Bill for individuals who initially entered active military duty on or after July 1, 1985.

Montgomery GI Bill—Selected Reserve (Public Law 98–525), is an education program for members of the Selected Reserve (which includes the National Guard) who enlist, reenlist, or extend an enlistment after June 30, 1985, for a 6-year period.

1986 *Handicapped Children's Protection Act of 1986* (Public Law 99–372) allowed parents of handicapped children to collect attorneys' fees in cases brought under the Education of the Handicapped Act and provided that the Education of the Handicapped Act does not preempt other laws, such as Section 504 of the Rehabilitation Act.

Drug-Free Schools and Communities Act of 1986 (Part of Public Law 99–570), part of the Anti-Drug Abuse Act of 1986, authorized funding for FYs 1987–89. Established programs for drug abuse education and prevention, coordinated with related community efforts and resources, through the use of federal financial assistance.

1987 *Higher Education Act Amendments of 1987* (Public Law 100–50) made technical corrections, clarifications, or conforming amendments related to the enactment of the Higher Education Amendments of 1986.

1988 *Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988* (Public Law 100–297) reauthorized through 1993 major elementary and secondary education programs including: Chapter 1, Chapter 2, Bilingual Education, Math-Science Education, Magnet Schools,

Impact Aid, Indian Education, Adult Education, and other smaller education programs.

Technology-Related Assistance for Individuals with Disabilities Act of 1988 (Public Law 100–407) provided financial assistance to states to develop and implement consumer-responsive statewide programs of technology-related assistance for persons of all ages with disabilities.

Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (Public Law 100–628) extended for two additional years programs providing assistance to the homeless, including literacy training for homeless adults and education for homeless youths.

Tax Reform Technical Amendments (Public Law 100–647) authorized an Education Savings Bond for the purpose of postsecondary educational expenses. The bill grants tax exclusion for interest earned on regular series EE savings bonds.

1989 *Children with Disabilities Temporary Care Reauthorization Act of 1989* (Public Law 101–127) revised and extended the programs established in the Temporary Child Care for Handicapped Children and Crises Nurseries Act of 1986.

Childhood Education and Development Act of 1989 (Part of Public Law 101–239) authorized the appropriations to expand Head Start Programs and programs carried out under the Elementary and Secondary Education Act of 1965 to include child care services.

1990 *Excellence in Mathematics, Science and Engineering Education Act of 1990* (Public Law 101–589) was intended to promote excellence in American mathematics, science, and engineering education by creating a national mathematics and science clearinghouse, and creating several other mathematics, science, and engineering education programs.

Student Right-To-Know and Campus Security Act (Public Law 101–542) requires institutions of higher education receiving federal financial assistance to provide certain information with respect to the graduation rates of student-athletes at such institutions. The act also requires the institution to certify that it has a campus security policy and will annually submit a uniform crime report to the Federal Bureau of Investigation (FBI).

Americans with Disabilities Act of 1990 (Public Law 101–336) prohibits discrimination against persons with disabilities.

National and Community Service Act of 1990 (Public Law 101–610) increased school and college-based community service opportunities and authorized the President's Points of Light Foundation.

School Dropout Prevention and Basic Skills Improvement Act of 1990 (Public Law 101–600) was intended to improve secondary school programs for basic skills improvements and dropout reduction.

Asbestos School Hazard Abatement Reauthorization Act of 1990 (Public Law 101–637) reauthorized the Asbestos School Hazard Abatement Act of 1984, which provided financial support to elementary and secondary schools to inspect for asbestos and to develop and implement an asbestos management plan.

Eisenhower Exchange Fellowship Act of 1990 (Public Law 101–454) provided a permanent endowment for the Eisenhower Exchange Fellowship Program.

Omnibus Budget Reconciliation Act of 1990 (Public Law 101–508) included a set of student aid provisions that were estimated to yield a savings of \$2 billion over 5 years. These provisions included delayed Guaranteed Student Loan disbursements, tightened ability-to-benefit eligibility, and expanded pro rata refund policy and the elimination of student aid eligibility at high default schools.

1991 *National Literacy Act of 1991* (Public Law 102–73) established the National Institute for Literacy, the National Institute Board, and the Interagency Task Force on Literacy. Amended various federal laws to establish and extend various literacy programs.

High-Performance Computing Act of 1991 (Public Law 102–194) directed the President to implement a National High-Performance Computing Program. Provided for: (1) establishment of a National Research and Education Network; (2) standards and guidelines for high performance networks; and (3) the responsibility of certain federal departments and agencies with regard to the Network.

Veterans' Educational Assistance Amendments of 1991 (Public Law 102–127) restored certain educational benefits available to reserve and active-duty personnel under the Mont-

gomery GI Bill to students whose course studies were interrupted by the Persian Gulf War.

Civil Rights Act of 1991 (Public Law 102–166) amended the Civil Rights Act of 1964, the Age Discrimination in Employment Act of 1967, and the Americans with Disabilities Act of 1990, with regard to employment discrimination. Established the Technical Assistance Training Institute.

1992 *Higher Education Amendments of 1992* (Public Law 102–325) amended the Higher Education Act of 1965 to revise and reauthorize funding for its various programs.

Ready-To-Learn Act (Public Law 102–545) amended the General Education Provisions Act to establish Ready-To-Learn Television programs to support educational programming and support materials for preschool and elementary school children and their parents, child care providers, and educators.

National Commission on Time and Learning, Extension (Public Law 102–359) amended the National Education Commission on Time and Learning Act to extend the authorization of appropriations for such Commission, amended the Elementary and Secondary Education Act of 1965 to revise provisions for (1) a specified civic education program; and (2) schoolwide projects for educationally disadvantaged children, and provided for additional Assistant Secretaries of Education.

1993 *Student Loan Reform Act* (Public Law 103–66) reformed the student aid process by phasing in a system of direct lending designed to provide savings for taxpayers and students. Allows students to choose among a variety of repayment options, including income contingency.

National Service Trust Act (Public Law 103–82) amended the National and Community Service Act of 1990 to establish a Corporation for National Service and enhance opportunities for national service. In addition, the Act provided education grants up to \$4,725 per year for 2 years to people age 17 years or older who perform community service before, during, or after postsecondary education.

NAEP Assessment Authorization (Public Law 103–33) authorizes the use of NAEP for state-by-state comparisons.

1994 *Goals 2000: Educate America Act* (Public Law 103–227) established a new federal partner-

ship through a system of grants to states and local communities to reform the nation's education system. The Act formalized the national education goals and established the National Education Goals Panel. It also created a National Education Standards and Improvement Council (NESIC) to provide voluntary national certification of state and local education standards and assessments and established the National Skill Standards Board to develop voluntary national skill standards.

School-To-Work Opportunities Act of 1994 (Public Law 103-239) established a national framework within which states and communities can develop School-To-Work Opportunities systems to prepare young people for first jobs and continuing education. The Act also provided money to states and communities to develop a system of programs that include work-based learning, school-based learning, and connecting activities components. School-To-Work programs will provide students with a high school diploma (or its equivalent), a nationally recognized skill certificate, or an associate degree (if appropriate) and may lead to a first job or further education.

Safe Schools Act of 1994 (Part of Public Law 103-227) authorized the award of competitive grants to local educational agencies with serious crime to implement violence prevention activities such as conflict resolution and peer mediation.

Educational Research, Development, Dissemination, and Improvement Act of 1994 (Part of Public Law 103-227) authorized the educational research and dissemination activities of the Office of Educational Research and Improvement. The regional educational laboratories and university-based research and development centers are authorized under this act.

Student Loan Default Exemption Extension (Public Law 103-235) amended the Higher Education Act of 1965 to extend until July 1, 1998, the effective date for cohort default rate extension for Historically Black Colleges and Universities, tribally controlled community colleges, and Navajo community colleges.

Improving America's Schools Act (Public Law 103-382) reauthorized and revamped the Elementary and Secondary Education Act. The legislation includes Title I, the federal govern-

ment's largest program providing educational assistance to disadvantaged children; professional development and technical assistance programs; a safe and drug-free schools and communities provision; and provisions promoting school equity.

1995 *Amendment to the Elementary and Secondary Education Act of 1965* (Public Law 104-5) amended a provision of Part A of Title IX of the Elementary and Secondary Education Act of 1965 relating to Indian education, to provide a technical amendment and for other purposes.

1996 *Contract With America: Unfunded Mandates* (Public Law 104-4) a bill to curb the practice of imposing unfunded federal mandates on states and local governments; to strengthen the partnership between the federal government and state, local, and tribal governments; to end the imposition, in the absence of full consideration by Congress, of federal mandates on state, local, and tribal governments without adequate funding, in a manner that may displace other essential governmental priorities and to ensure that the federal government pays the costs incurred by those governments in complying with certain requirements under federal statutes and regulations; and for other purposes.

Developmental Disabilities Assistance and Bill of Rights Act Amendments of 1996 (Public Law 104-1834) amended the Developmental Disabilities Assistance and Bill of Rights Act to extend the act, and for other purposes.

Remove Grant Limits on Historically Black Colleges (Public Law 104-141) amended section 326 of the Higher Education Act of 1965 to permit continued participation by historically black graduate and professional schools in the grant program authorized by that section.

Correct Impact-Aid Payments (Public Law 104-195) amends the Impact Aid Program to provide for a hold-harmless with respect to amounts for payments relating to the federal acquisition of real property, and for other purposes.

Human Rights, Refugee, and Other Foreign Relations Provisions Act of 1996 (Public Law 104-319) made certain provisions with respect to internationally recognized human rights, refugees, and foreign relations to revise U.S. human rights policy.

1997 *Need-Based Educational Aid Antitrust Protection Act of 1997* (Public Law 105-43) amends

the Improving America's Schools Act of 1994 to clarify the financial information exchanged between institutions of higher education.

The Taxpayer Relief Act of 1997 (Public Law 105–34) enacted the Hope Scholarship and Life-Long Learning Tax Credit provisions into law.

Individuals with Disabilities Education Act Amendments of 1997 (Public Law 105–17) amended the Individuals with Disabilities Education Act (IDEA) to revise its provisions and extend through fiscal year 2002 the authorization of appropriations for IDEA programs.

Emergency Student Loan Consolidation Act of 1997 (Public Law 105–78) amends the Higher Education Act to provide for improved student loan consolidation services.

1998 *Workforce Investment Act of 1998* (Public Law 105–220) enacted the Adult Education and Family Literacy Act, and substantially revised and extended, through fiscal year 2003, the Rehabilitation Act of 1973.

Higher Education Amendments of 1998 (Public Law 105–244) substantially amended, and reauthorized, through fiscal year 2003, the Higher Education Act of 1965.

Omnibus Consolidated and Emergency Supplemental Appropriations Act, 1999 (Public Law 105–277) enacted the Reading Excellence Act, to promote the ability of children to read independently by the 3rd grade; earmarked funds to help states and school districts reduce class sizes in the early grades.

Charter School Expansion Act (Public Law 105–278) amended the charter school program, enacted in 1994 as Title X, Part C of the Elementary and Secondary Education Act of 1965.

Carl D. Perkins Vocational and Applied Technology Education Amendments of 1998 (Public Law 105–332) revised, in its entirety, the Carl D. Perkins Vocational and Applied Technology Education Act, and reauthorized the Act through fiscal year 2003.

Assistive Technology Act of 1998 (Public Law 105–394) replaced the Technology-Related Assistance for Individuals with Disabilities Act

of 1988 with a new Act, authorized through fiscal year 2004, to address the assistive-technology needs of individuals with disabilities.

1999 *Education Flexibility Partnership Act of 1999* (Public Law 106–25) authorizes the Secretary of Education to allow all states to participate in the Education Flexibility Partnership program.

District of Columbia College Access Act of 1999 (Public Law 106–98) establishes a program to afford high school graduates from the District of Columbia the benefits of in-state tuition at state colleges and universities outside the District of Columbia.

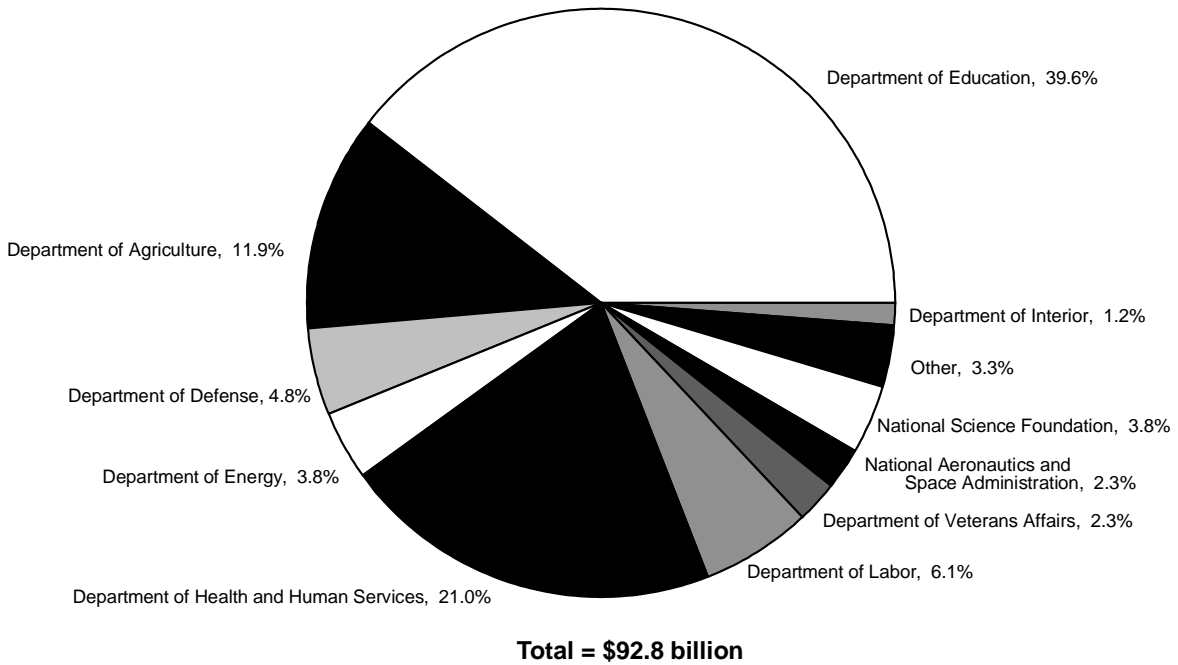

Ticket to Work and Work Incentives Improvement Act of 1999 (Public Law 106–170) amends the Social Security Act to expand the availability of health care coverage for working individuals with disabilities and establishes a Ticket to Work and Self-Sufficiency Program in the Social Security Administration to provide such individuals with meaningful opportunities to work.

2000 *The National Defense Authorization Act for Fiscal Year 2001* (Public Law 106–398) includes, as Title XVIII, the Impact Aid Reauthorization Act of 2000, which extends the Impact Aid programs through fiscal year 2003.

College Scholarship Fraud Prevention Act of 2000 (Public Law 106–420) enhanced federal penalties for offenses involving scholarship fraud, requires an annual scholarship fraud report by the Attorney General, the Secretary of Education, and the Federal Trade Commission (FTC), and requires the Secretary of Education, in conjunction with the FTC, to maintain a scholarship fraud awareness Web site.

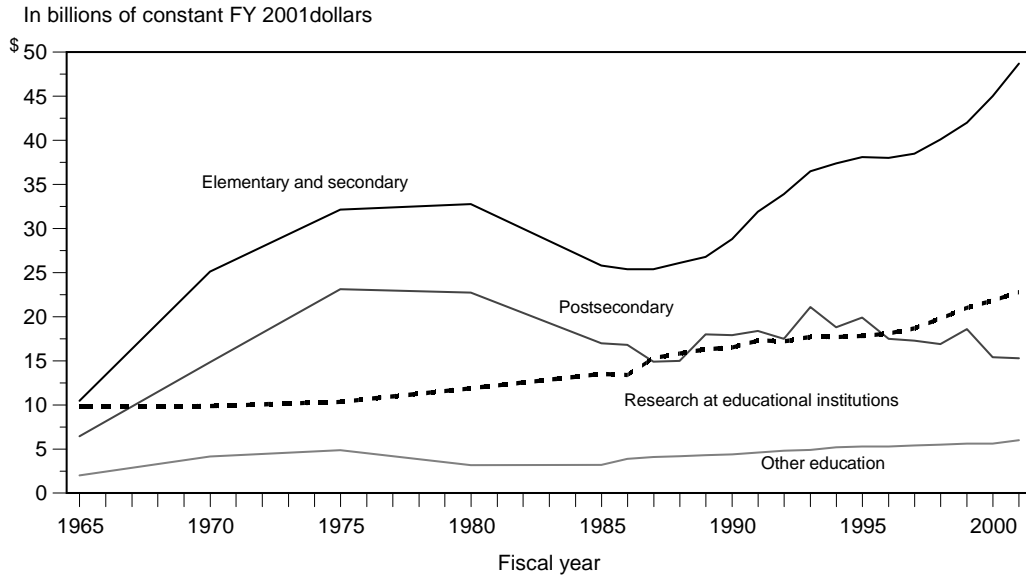

Consolidated Appropriations Act 2001 (Public Law 106–554) created a new program of assistance for school repair and renovation, and amended the Elementary and Secondary Education Act of 1965 to authorize credit enhancement initiatives to help charter schools obtain, construct, or repair facilities; to reauthorize the Even Start program; and enacted the "Children's Internet Protection Act."

¹Not available or applicable.
²On-budget support includes federal funds for education programs tied to appropriations.
³The Federal Direct Student Loan (FDSL) program, renamed the William D. Ford Direct Loan program, provides students with the same benefits they are currently eligible to receive under the Federal Family Education Loan (FFEL) program but provides loans to students through federal capital rather than through private lenders. This program is an off-budget support program.
⁴Formerly the Guaranteed Student Loan program. New student loans guaranteed by the federal government and disbursed to borrowers.
⁵Student loans created from institutional matching funds (since 1993 1/3 of federal capital contributions). Excludes repayments of outstanding loans.
⁶Student loans created from institutional matching funds (1/9 of the federal contribution). This was a demonstration project that involved only 10 institutions and had unsubsidized interest rates. Program repeated in FY 1992.
⁷Formerly the State Student Incentive Grant program. Provides dollar-for-dollar required state matching contributions. Starting in fiscal year 2000, under \$30.0 million was also dollar-for-dollar required state matching contributions, and over \$30.0 million, the state matching is two-to-one.
⁸Employer contributions to student earnings is generally 1/3 of federal allocation.
⁹Losses of tax revenue attributable to provisions of the federal income tax laws that allow a special exclusion, exemption, or deduction from gross income or provide a special credit, preferential rate of tax, or a deferral of tax liability affecting individual or corporate income tax liabilities.
¹⁰Estimated.
¹¹Data adjusted by the federal funds composite deflator prepared by the U.S. Office of Management and Budget. NOTE: To the extent possible, federal education funds data represent outlays rather than obligations. Some data have been revised from previously published figures. Detail may not sum to totals due to rounding.

—Not available or applicable.

NOTE: Data for fiscal year 2001 are estimated. Negative amounts occur when program receipts exceed outlays. To the extent possible, amounts reported represent outlays, rather than obligations. Some data have been revised from previously published data. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, compiled from data appearing in U.S. Office of Management and Budget, *Budget of the U.S. Government, Appendix*, fiscal years 1967 to 2002; National Science Foundation, *Federal Funds for Research and Development*, fiscal years 1965 to 2001; and unpublished data obtained from various federal agencies. (This table was prepared April 2001.)

—Not available or applicable.

¹ Excludes \$4,440,000,000 for federal support for medical education benefits under Medicare in the U.S. Department of Health and Human Services. Is not included in the total because data before fiscal year 1990 are not available. This program has existed since Medicare began, but was not available as a separate budget item until FY 90.

² Excludes \$7,510,000,000 for federal support for medical education benefits under Medicare. See footnote 1.

³ Excludes \$10,290,000,000 for federal support for medical education benefits under Medicare. See footnote 1.

⁴ Excludes \$8,020,000,000 for federal support for medical education benefits under Medicare. See footnote 1.

⁵ Estimated. Excludes \$8,030,000,000 for federal support for medical education benefits under Medicare. See footnote 1.

⁶ The U.S. Department of Education was created in May 1980. It formerly was the Office of Education in the U.S. Department of Health, Education, and Welfare.

⁷ Section 6 of public law 81–874 (the former Impact Aid statute) was funded and administered by the U.S. Department of Education during 1951–1981. This program allowed the Secretary to make arrangements for the education of children who reside on federal property when no suitable local school district could or would provide for the education of these children. Since 1981, the provision was funded by the Department of Defense and in 1994, when public law 81–874 was repealed, the Department of Defense was authorized to fund and administer similar provisions.

⁸ This program creates a national framework for education reform and meeting the National Education Goals. This program includes the School-To-Work Opportunities program administered jointly by the U.S. Departments of Education and Labor. This program helps states create statewide systems to help youth acquire the knowledge, skills, abilities, and labor market information they need to make an effective transition from school to work or to further their education or training.

⁹ Starting in FY 94, the Special Milk program was included in the Child Nutrition program.

¹⁰ These commodities are purchased under Section 32 of the Act of August 24, 1935, for use in the child nutrition programs.

¹¹ This program assisted in the construction of public facilities, such as vocational schools, through grants or loans. No funds have been appropriated for this account since FY 77, and it was completely phased out in FY 84.

¹² The U.S. Department of Energy was created in 1977. It formerly was the Energy Research and Development Administration and before that the Atomic Energy Commission. No funds were designated for any of the education programs listed on this table in FYs 96 and 97.

¹³ This program was established in 1979. Funds were first appropriated for this program in FY 80.

¹⁴ The U.S. Department of Health and Human Services was part of the U.S. Department of Health, Education, and Welfare until May 1980.

¹⁵ The Head Start program was formerly in the Office of Economic Opportunity, and funds were appropriated to the U.S. Department of Health, Education, and Welfare, Office of Child Development, beginning in 1972.

¹⁶ This program was created by the Family Support Act of 1988. It provides funds for the Job Opportunities and Basic Skills Training program. This activity is being replaced by Temporary Assistance for Needy Families program.

¹⁷ After age 18, benefits terminate at the end of the school term or in 3 months, whichever is less.

¹⁸ This program provides funding for supplemental programs for eligible American Indian students in public schools.

¹⁹ This program finances the cost of academic, social, and occupational education courses for inmates in federal prisons.

²⁰ The Job Corps program was formerly in the Office of Economic Opportunity, and funds were appropriated to the U.S. Department of Labor beginning in 1971 and 1972.

²¹ Some of the work and training programs included in this program were in the Office of Economic Opportunity and were transferred to the U.S. Department of Labor in 1971 and 1972. Beginning in FY 94, the School-to-Work Opportunities program is included. This program is administered jointly by the U.S. Departments of Education and Labor.

²² The U.S. Department of Transportation was created in 1967.

²³ This program was transferred from the U.S. Department of the Treasury to the U.S. Department of Transportation in 1967.

²⁴ This program was established in FY 72 and closed in FY 86.

²⁵ The states' share of revenue-sharing funds could not be spent on education in FYs 81–86.

²⁶ The U.S. Department of Veterans Affairs, formerly the Veterans Administration, was created in March 1989.

²⁷ This program provides educational assistance allowances in order to restore lost educational opportunities to those individuals whose careers were interrupted or impeded by reason of active military service between January 31, 1955, and January 1, 1977. Includes "Readjustment Benefits," Chapter 34, for education other than college and also includes the Veterans Job Training program for service persons and veterans. The Chapter 34 program closed December 31, 1989. The Veterans Job Training Program was put in the program Payments to State Education Agencies. Veterans who were still eligible to receive benefits under Chapter 34 were covered by Chapter 30 (The All-Volunteer-Force Educational Assistance program).

²⁸ This program is in "Readjustment Benefits" program, Chapter 31, and covers the costs of subsistence, tuition, books, supplies, and equipment for disabled veterans requiring vocational rehabilitation.

²⁹ This program is in the "Readjustment Benefits" program, Chapter 35, and provides benefits to children and spouses of veterans.

³⁰ The purpose of this program is to provide stable and permanent employment to those men and women who have served on active duty on or after August 2, 1990, and are unemployed. Program expired in 1997.

³¹ This agency was established March 9, 1965. Its first year of appropriations was 1966. The outlays were larger in the years 1970 and 1975 for elementary and secondary education because of the construction of facilities for vocational schools.

³² This agency was established in 1965. In 1970, \$900,000 was appropriated through the Office of Education, U.S. Department of Health, Education, and Welfare, for the National Endowment for the Arts, Arts in Education program.

³³ This agency was established in 1965. First year of appropriations was 1966.

³⁴ The Economic Opportunity Act of 1964 authorized 10 major action programs, including Job Corps, Neighborhood Youth Corps, Adult Literacy, Work Experience, College Work-Study, and Community Action programs, including Head Start, Follow Through, and Upward Bound, and authorized the establishment of Volunteers in Service to America (VISTA). These programs were transferred to the U.S. Department of Health, Education, and Welfare, U.S. Department of Labor, and the Action Agency in the 1970s. An act on January 4, 1975 established the Community Services Administration as the successor agency to the Office of Economic Opportunity.

³⁵ Head Start program funds were transferred to the U.S. Department of Health, Education, and Welfare, Office of Child Development, in 1972.

³⁶ Most of these programs were transferred to the U.S. Department of Health, Education, and Welfare, Office of Education, in 1972.

³⁷ The Job Corps programs were transferred to the U.S. Department of Labor in 1971 and 1972.

³⁸ These programs were transferred to the U.S. Department of Labor in 1971 and 1972.

³⁹ These programs were transferred to the Action Agency in 1972.

⁴⁰ Similar programs were included in the "higher education" program in 1965 through 1975.

⁴¹ The Student Loan Reform Act of 1993 authorized a new Federal Direct Student Loan (FDSL) program, renamed the William D. Ford Direct Loan program. This program is a new streamlined lending system that simplifies the process of obtaining and repaying loans for student and parent borrowers and provides borrowers with greater choice in repayment plans.

⁴² Negative amounts occur when program receipts exceed outlays.

⁴³ Similar programs were included in the "higher education" program in 1965 through 1975, formerly called the "Guaranteed Student Loan" program.

⁴⁴ This program was transferred from the U.S. Department of Housing and Urban Development to the U.S. Department of Health, Education, and Welfare, Office of Education, in FY 79.

⁴⁵ The Historically Black Colleges and Universities (HBCUs) Capital Financing program was authorized by the Higher Education Act Amendments of 1992 to provide HBCUs with private funds for repair, renovation, and construction projects.

⁴⁶ First year of appropriations for this program was 1967.

⁴⁷ Program funds were first appropriated for Tuskegee Institute in 1972.

⁴⁸ The Sea Grant College Program Act of 1966 established a matching fund grant program that provides for the establishment of a network of programs in fields related to development and preservation of the nation's coastal and marine resources. This program was transferred from the National Science Foundation to the U.S. Department of Commerce, October 1970.

⁴⁹ This program was transferred to the U.S. Department of Transportation in FY 81 by Public Law 97–31, from the U.S. Department of Commerce.

⁵⁰ The U.S. Department of Defense funds for FYs 90 to 96 exclude military pay and reserve accounts which were included in previous years. FY 65 data are not available except for service academies.

⁵¹ Included in total above.

⁵² Instructional costs only are included. These include academics, audiovisual, academic computing center, faculty training, military training, physical education, and libraries.

⁵³ Includes special education programs (military and civilian); legal education program; flight training; advanced degree program; college degree program (officers); and "Armed Forces Health Professions Scholarship" program.

⁵⁴ No funds have been appropriated since FY 82.

⁵⁵ This program receives funds periodically.

⁵⁶ Appropriations began in FY 84.

⁵⁷ Appropriations began in FY 89.

⁵⁸ Does not include higher education assistance loans.

⁵⁹ Appropriations began in FY 78.

⁶⁰ Alcohol, drug abuse, and mental health training programs are included starting in fiscal year 1992.

⁶¹ Beginning in fiscal year 1992, data were included in the National Institutes of Health training grants program.

⁶² Postsecondary student benefits were ended by the Omnibus Budget Reconciliation Act of 1981 (Public Law 97–35) and were completely phased out by August 1985.

⁶³ Includes adult education, tribally-controlled community colleges, postsecondary instruction, and other education.

⁶⁴ This program was transferred from the U.S. Department of State to the International Communication Agency (I.C.A.) in 1977, which consolidated the functions of the U.S. Information Agency and the U.S. Department of State's Bureau of Educational and Cultural Affairs. In FY 82 the I.C.A. became the U.S.I.A. In FY 98 pursuant to the Foreign Affairs Reform and Restructuring Act of 1998, this program from the United States Information Agency was transferred to the U.S. Department of State.

⁶⁵ This program provides funds for advanced study and research projects of the Russian, Eurasian, and Eastern European countries by American institutions of higher education and private research firms. Appropriations began in FY 88.

⁶⁶ This program was transferred to the U.S. Department of Transportation in FY 81 by Public Law 97-31 from the U.S. Department of Commerce.

⁶⁷ Includes flight training. This program was in the U.S. Department of the Treasury in 1965 and was transferred to the U.S. Department of Transportation in 1967.

⁶⁸ Includes benefits for Vietnam-era veterans under Chapter 34 (GI Bill) of the "Readjustment Benefits" education and training program. This program provides educational assistance allowances, primarily on a monthly basis, in order to restore lost educational opportunities to those individuals whose careers were interrupted or impeded by reason of active military service between January 31, 1955, and January 1, 1977. This program closed December 31, 1989. Some veterans who were still eligible were put in Chapter 30 (the All-Volunteer-Force Educational Assistance program).

⁶⁹ Includes service persons under Chapter 34 (GI Bill) of the "Readjustment Benefits" education and training program. Service persons with over 180 days of active duty, any part of which was before January 1, 1977, are eligible to participate in this program.

⁷⁰ Includes post-Vietnam-era veterans, under Chapter 32, of the post-Vietnam-era "Veterans Education Account." Provides education and training assistance payments to veterans and service persons with no active duty time before January 1, 1977. Funding is provided through participants' contributions while on active duty and through transfers from the U.S. Department of Defense (DOD). The U.S. Department of Veterans Affairs funds are not appropriated for this program, so these data represent obligations, which are funded through other agencies' appropriations.

⁷¹ Public Law 98-525, enacted October 19, 1984 (New GI Bill), established two new peacetime educational programs: an assistance program for veterans who entered active duty during the period beginning July 1, 1985, to June 30, 1988, and an assistance program for certain members of the Selected Reserve.

⁷² Chapter 30, also called the Montgomery Bill, and the new GI Bill are for eligible veterans who have agreed to have their military pay reduced \$100 per month for their first 12 months of active duty. The "Readjustment Benefits" account under the U.S. Department of Veterans Affairs pays only the basic allowance, up to a maximum of \$536 per month, for full-time training. "Supplemental Benefits" are paid by the U.S. Department of Defense (DOD).

⁷³ Chapter 106 is for members of the Selected Reserve. The reserve components include the Army, Navy, Air Force, Marine Corps Reserve, Army National Guard and Air National Guard under the U.S. Department of Defense (DOD), and the Coast Guard Reserve, which is under the U.S. Department of Transportation (DOT) when it is not operating as a service in the Navy. Eligible persons can receive up to \$255 per month for full-time training. The DOD and DOT pay for this program, and the U.S. Department of Veterans Affairs administers it.

⁷⁴ Includes dependents of veterans under Chapter 35, the "Readjustment Benefits" education and training program. Provides education and training benefits to dependents of veterans who died of a service-connected disability or whose service-connected disability is rated permanent and total.

⁷⁵ Payments have been made to state education agencies for a number of years but were not listed separately until FY 88.

⁷⁶ The U.S.I.A. was called the "International Communication Agency" in FYs 80 and 81. This program was transferred from the U.S. Department of State to the International Communication Agency (I.C.A.) in 1977, which consolidated the functions of the U.S. Information Agency and the U.S. Department of State's Bureau of Educational and Cultural Affairs. In FY 82 the I.C.A. became the U.S.I.A. In FY 98 pursuant to the Foreign Affairs Reform and Restructuring Act of 1998, this program from the United States Information Agency was transferred to the U.S. Department of State and the newly created Broadcasting Board of Governors.

⁷⁷ This program was in the "Educational and Cultural Affairs" program in FYs 80-83, and became an independent program in FY 84.

⁷⁸ This program was combined with the "Educational and Cultural Affairs" program in FY 77.

⁷⁹ Public Law 99-661 established this program to operate the Foundation which awards scholarships and fellowships to outstanding graduate and undergraduate students who intend to pursue careers or advanced degrees in science or mathematics. It may also award honoraria to outstanding individuals who have made significant contributions to improve the instruction of science and mathematics in secondary schools.

⁸⁰ Appropriations for this program began in FY 76.

⁸¹ Public Law 99-498 established this Institute as an independent non-profit corporation to provide Native Americans with an opportunity to obtain a postsecondary education in various fields of Indian art and culture.

⁸² Public Laws 99-500 and 99-591 established the James Madison Memorial Fellowship Foundation to operate a fellowship program to encourage graduate study of the American Constitution. First year of appropriations was FY 88.

⁸³ This program was transferred to the Institute of Museum and Library Services in fiscal year 1997. Program was formerly in the U.S. Department of Education.

⁸⁴ This program was transferred to the U.S. Department of Transportation in FY 68 from the U.S. Department of Housing and Urban Development.

⁸⁵ This program was established by the Juvenile Justice and Delinquency Prevention Act of 1974 to provide education and training and to provide leadership in improving correctional programs and practices in prisons. This program was transferred in 1997 to the Federal Prison System, Salaries and Expenses, budget in the Contract Confinement program.

⁸⁶ Appropriations for this program began in FY 70.

⁸⁷ The Federal Aviation Administration, an independent agency, was transferred to the U.S. Department of Transportation in FY 67.

⁸⁸ Appropriations began in FY 72.

⁸⁹ First year of appropriations was FY 70.

⁹⁰ The National Service Trust Act of 1993 established the Corporation for National and Community Service. In 1993, ACTION became part of this agency.

⁹¹ These programs included the Service Learning programs, University Year for ACTION, Volunteers in Service to America, Youth Challenge program, and the National Student Volunteer program in FY 1975. In FY 80, programs included were the University Year for ACTION, Young Volunteers for ACTION, and National Service Learning programs, and in FYs 89 to 94, programs included were the Literacy Corps and the Student Community Services program. In FYs 94 through 98 the AmeriCorps program was included. This program provides education grants to help pay for college or to repay student loans for people who perform community service before, during or after postsecondary education.

⁹² The Federal Emergency Management Agency was created in 1979, representing a combination of five existing agencies. The two largest were the Defense Civil Preparedness Agency in the U.S. Department of Defense and the Federal Preparedness Agency in the General Services Administration. The funds for the Federal Emergency Management Agency in FY 70 to FY 75 were in the other agencies.

⁹³ First year of appropriations was FY 68.

⁹⁴ First appropriations for the "other training programs" were in the late 1960s. These programs include the Fall-Out Shelter Analysis, Blast Protection Design through 1992. Starting in FY 1993, earthquake training and safety for teachers and administrators for grades 1 through 12 are included.

⁹⁵ The disaster relief program repairs and replaces damaged and destroyed school buildings. In FY 94 and FY 95 funds were for repairs due to the Northridge Earthquake in California. In FY 94, \$37.2 million was spent on school districts; \$4.2 million was spent on community colleges and \$43.8 million spent on universities. In FY 95, \$74.4 million was spent on school districts; \$8.4 million on community colleges and \$87.6 million on colleges and universities.

⁹⁶ This program was transferred from the General Services Administration to the National Archives and Records Administration in April 1985.

⁹⁷ This program makes grants for the promotion of scholarly, cultural, and artistic exchanges between Japan and the United States. Appropriations began in FY 76.

⁹⁸ The National Archives and Records Administration became an independent agency in April 1985.

⁹⁹ This program was established by the act of July 20, 1970, Public Law 91-345.

¹⁰⁰ This program was established by Congress to conduct and support research and scholarships in the fields of peace, arms control, and conflict resolution.

¹⁰¹ Includes federal obligations for research and development centers administered by colleges and universities. FY 2000 and FY 2001 are estimated.

¹⁰² Total outlays for FYs 65 and 70 include the "Research and Training" program. FY 75 includes the "National Institute of Education" program. FYs 80 to FY 2001 include outlays for the Office of Educational Research and Improvement.

NOTE: Some data have been revised from previously published figures. To the extent possible, amounts reported represent outlays rather than obligations. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, compiled from data appearing in U.S. Office of Management and Budget, *Budget of the U.S. Government, Appendix* fiscal years 1967 to 2002; National Science Foundation, *Federal Funds for Research and Development*, fiscal years 1965 to 2001; and unpublished data obtained from various federal agencies. (This table was prepared April 2001.)

Table 365.—Estimated federal support for education, by agency and type of ultimate recipient: Fiscal year 2001

—Not available or applicable.

¹ Other recipients include Indian tribes, private nonprofit agencies, and banks.

² Includes on-budget support, off-budget support, and nonfederal funds generated by federal legislation. Excludes federal tax expenditures.

³ This agency's education funds were transferred to the U.S. Department of State.

SOURCE: U.S. Department of Education, Office of the Under Secretary, unpublished tabulations; U.S. Office of Management and Budget, *Budget of the U.S. Government, Fiscal Year 2002*; National Science Foundation, *Federal Funds for Research and Development, Fiscal Years 1999, 2000, and 2001*; and unpublished data obtained from various federal agencies. (This table was prepared April 2001.)

NOTE: Outlays by type of recipient are estimated based on obligation data. Negative amounts occur when program receipts exceed outlays. Detail may not sum to totals due to rounding.

¹ Data adjusted by the federal funds composite deflator prepared by the U.S. Office of Management and Budget.

² Revised from previously published data.

³ Estimated.

⁴ Includes preschool incentive grants.

⁵ Includes programs of national significance and special programs for the disadvantaged.

⁶ Includes national programs for research, demonstrations, evaluation and technical assistance, literacy training for homeless adults, and some other small programs.

⁷ Includes Pell Grants; Supplemental Education Opportunity Grants; Leveraging Educational Assistance Partnership Program, formerly the State Student Incentive Grants; and Income Contingent Loans.

⁸ Formerly the Guaranteed Student Loan program.

⁹ Includes Federal Direct Student Loan program starting in fiscal year 1994. Other programs include teacher quality enhancement and community scholarship mobilization.

¹⁰ Starting in fiscal year 1994, this program is included under the program, "Funds for Improvement of Postsecondary Education."

¹¹ International education and foreign languages are included under this program starting in fiscal year 1994.

¹² This program is included under the "Special programs for the disadvantaged" program.

¹³ This program was transferred to the Institute of Museum and Library Services in fiscal year 1997.

NOTE: Data presented in this tabulation are obligations, which differ from outlay figures reported in other tables in this chapter. Detail may not sum to totals due to rounding.

¹ Title I, formerly called Chapter 1, Education Consolidation and Improvement Act of 1981, includes Grants to Local Education Agencies, Title I Accountability grants, Migrant Education—Basic State Grants, Program for Neglected and Delinquent Children, Capital Expenses for Private School Children, Demonstrations of Comprehensive School Reform, and Even Start—State Educational Agencies.

² Title VI, formerly called Chapter 2, Education Consolidation and Improvement Act of 1981, includes Eisenhower Professional Development Grants, Safe and Drug-Free Schools and Communities—State Grants, Education for Homeless Children and Youth, Class Size Reduction, School Renovation, and Innovative Education Program Strategies.

³ Impact Aid—Basic Support Payments and Impact Aid—Payments for Children with Disabilities.

⁴ Includes Vocational Education State Grants, State Grants for Incarcerated Youth Offenders, English Literacy and Civics Education State Grants, Tech-Prep Education, and Adult Education State Grant Program.

⁵ Includes Special Education—Grants to States, Preschool Grants, and Grants for Infants and Families with Disabilities.

⁶ Includes Immigrant Education Grants, Foreign Language Assistance Grants, and Bilingual Education State Grants.

⁷ Includes Institutional Aid to Strengthen Higher Education Institutions serving significant numbers of low-income students, Other Special Programs for the Disadvantaged,

Cooperative Education, Fund for the Improvement of Postsecondary Education, Fellowships and Scholarships, and annual interest subsidy grants for facilities construction.

⁸ Includes Pell Grants, Leveraging Educational Assistance Partnership, formerly the State Student Incentive Grants, Federal Supplemental Educational Opportunity Grants, Federal Work-Study, and Federal Perkins Loans—Capital Contributions, and Guaranteed Student Loan interest subsidies.

⁹ Includes Rehabilitation Services—Vocational Rehabilitation Grants to States, Supported Employment State Grants, Client Assistance State Grants, and Independent Living State Grants, Services for Older Blind Individuals, Protection and Advocacy for Assistive Technology, and Protection and Advocacy of Individual Rights.

¹⁰ Includes State and Local Education Systemic Improvement Grants and Technology Literacy Challenge Fund Grants.

NOTE: Data reflect revisions to figures in the *Budget of the United States Government*, Fiscal Year 2002. To the extent possible, data represent appropriations rather than outlays. Because of the exclusion of certain programs, totals in this table are lower than those reported in other tables. Detail may not sum to totals due to rounding.

SOURCE: U.S. Department of Education, National Center for Education Statistics, based on unpublished tabulations from the Office of Management and Budget; and U.S. Department of Commerce, Bureau of the Census, *Federal Expenditures by State for Fiscal Year 2000*. (This table was prepared July 2001.)

Table 369.—Appropriations for Title I and Title VI, Elementary and Secondary Education Act (ESEA) of 1994, by state or other area and type of appropriation: 1999–2000 and 2000–01

NOTE: Only the following 10 agencies are required to report to this section of the survey: the Departments of Agriculture, Commerce, Defense, Energy, Interior, Transportation, and Health and Human Services; the Environmental Protection Agency; the National Aeronautics and Space Administration; and the National Science Foundation. The obligations of the 10 major R&D supporting agencies included in this table represent ap-

proximately 98 percent of total Federal R&D obligations in fiscal year 1999. Detail may not sum to totals due to rounding.

SOURCE: National Science Foundation, *Federal Funds for Research and Development: Fiscal Years 1998, 1999, and 2000*. (This table was prepared March 2001.)

¹ Includes U.S. Department of Commerce, U.S. Department of Housing and Urban Development, U.S. Department of the Interior, Agency for International Development, U.S. Department of Labor, U.S. Department of State, U.S. Department of Transportation, Bureau of Engraving and Printing, General Services Administration, Office of Justice Programs, Social Security Administration, and Nuclear Regulatory Commission.

² Dollars reflect actual obligations during the fiscal year regardless of when the funds were actually spent by a recipient institution.

NOTE: Data are not comparable with previous years because starting in fiscal year 1999, data no longer include obligations to federally funded research and development centers administered by colleges and universities. Detail may not sum to totals due to rounding.

¹Special Meal Assistance program is combined with "School Lunch" program.

²Commodities are based on preliminary food orders for fiscal year 2000.

³Undistributed amount reflects the difference between preliminary state earnings reports and federal obligations as of September 30, 2000. Undistributed amount under school lunch includes obligations for American Samoa and the Northern Mariana Islands.

NOTE: Data are based on obligations as reported September 30, 2000. Detail may not sum to totals due to rounding.

NOTE: Standard errors appear in parentheses.

CHAPTER 5

Outcomes of Education

This chapter contains tables comparing educational attainment and workforce characteristics. The data show labor force participation and income levels of high school dropouts and high school and college graduates. Population characteristics are provided for many of the measures to help provide comparisons among various demographic groups. Tables 379 to 385 contain data from the Bureau of the Census on educational attainment and income of the labor force, and data from the Bureau of Labor Statistics on employment and unemployment. These tables provide information on the educational attainment of the labor force, by occupation, sex, and race/ethnicity; income, by level of education attained; and unemployment rates, by level of education attained, sex, and race/ethnicity.

Tables 384 and 385 were compiled from Bureau of Labor Statistics data on high school dropouts and graduates. These data show the labor force participation and college enrollment of high school students within the year after they leave school. The tabulations also provide comparative labor force participation and unemployment rates for graduates and dropouts. Additional information on college enrollment rates by race/ethnicity and sex have been included to help form a more complete picture of high school outcomes. Tables 382, 383, and 387 to 390 were prepared from a Bureau of the Census survey on earnings and education and from the Recent College Graduates and Baccalaureate and Beyond surveys by the National Center for Education Statistics. These tables provide data on employment outcomes for college graduates. Table 382 provides a salary comparison by education level and sex for the entire population. Trends in salaries received by all college graduates also are featured in this section. The last two tables in this chapter deal with community service and literacy skills.

Statistics related to outcomes of education appear in other sections of the *Digest*. For example, statistics on educational attainment of the entire population are in Chapter 1. More detailed data on the numbers of high school and college graduates are contained in Chapters 2 and 3. Chapter 3 contains trend data on the proportion of high school graduates going to college. Additional data on the income of persons by educational attainment may be obtained

from the Bureau of the Census in the *Current Population Reports*, Series P-60. The Bureau of Labor Statistics has a series of publications dealing with the educational characteristics of the labor force. Further information on survey methodologies is in the "Guide to Sources" in the appendix and in the publications cited in the source notes.

Labor Force

Adults with higher levels of education were more likely to participate in the labor force (including those who were employed and those actively seeking employment) than those with less education. About 80 percent of adults, 25 years old and over with a bachelor's or higher degree, participated in the labor force in 2000 compared with 65 percent of persons who were high school graduates. In contrast, 43 percent of those 25 and older, who were not high school graduates, were in the labor force. The labor force participation rates for blacks and Hispanics age 25 and older with high school diplomas were higher than the average for all people with similar levels of education (table 379). The labor force participation rate for blacks age 25 and over with a bachelor's degree was also higher than the average for whites.

Persons with lower levels of educational attainment were more likely to be unemployed than those who had higher levels of educational attainment. The 2000 unemployment rate for adults (25 years old and over) who had not completed high school was 6.4 percent compared with 3.5 percent for those with 4 years of high school and 1.7 percent for those with a bachelor's degree or higher. Younger people with high school diplomas tended to have higher unemployment rates than persons 25 and over with similar levels of education (table 381).

Four years after graduating from college in 1992-93, 89 percent of those receiving bachelor's degrees were employed (81 percent full time and 8 percent part time), 2.7 percent were unemployed, and 8.1 percent were not in the labor force (table 388).

Income

Between 1996 and 1999, the median annual income of male full-time year-round workers, when adjusted for inflation, increased by 7 percent and the in-

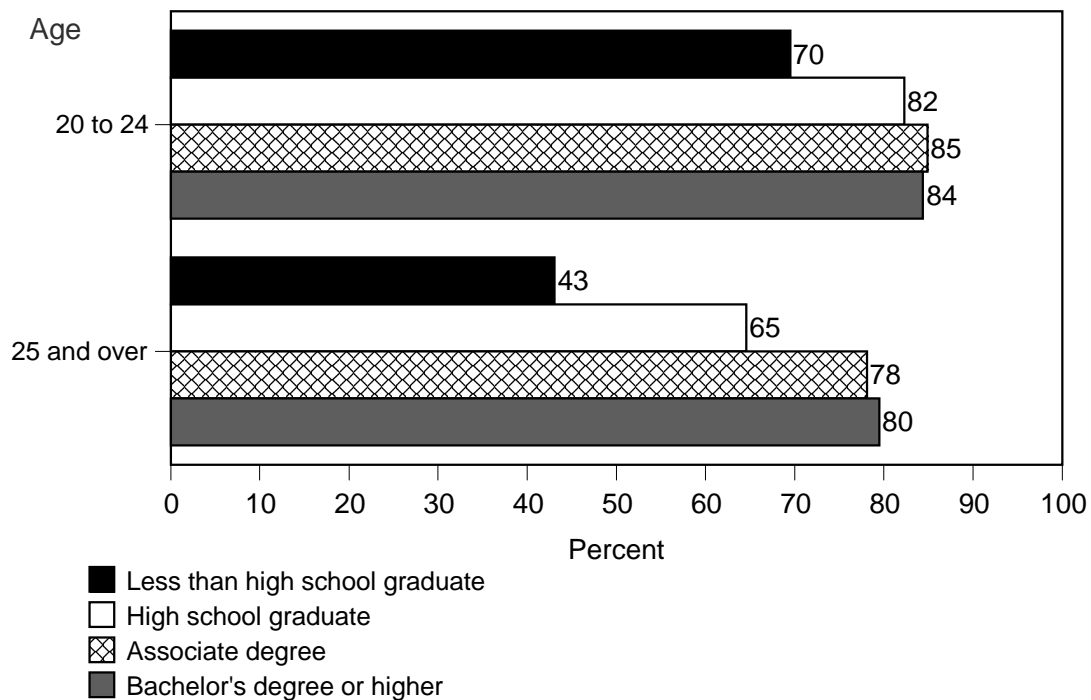

come for females rose by 5 percent. Women's incomes remain lower than men's incomes, even after adjusting for level of education. The average 1999 incomes for full-time year-round workers with a bachelor's degree were \$52,985 for men and \$37,993 for women (table 382).

Dropouts and Graduates

The difficulties in entering the job market for dropouts, and youth in general, are highlighted by exam-

ining their labor force and unemployment status. About 68 percent of 1999–2000 dropouts were in the labor force (employed or looking for work), and 28 percent of those were unemployed. Of the 2000 high school graduates who were not in college, 80 percent were in the labor force, and 13 percent of those in the labor force were unemployed (tables 384 and 385).

—Not available.

¹ The unemployment rate is the percent of individuals in the labor force who are not working and who made specific efforts to find employment sometime during the prior 4 weeks. The labor force includes both employed and unemployed persons.

² Excludes persons enrolled in school.

³ Includes persons of Hispanic origin.

⁴ Persons of Hispanic origin may be of any race.

¹The labor force includes all employed persons plus those seeking employment. The labor force participation rate is the percentage of persons either employed or seeking employment.

²Includes 16- to 24-year-olds who graduated from high school between January and October 1999.

³Includes persons of Hispanic origin.

⁴Persons of Hispanic origin may be of any race.

⁵Includes 16- to 24-year-olds who graduated from high school between January and October 2000.

⁶Data not shown where base is less than 75,000.

NOTE: Data are based upon sample surveys of the civilian noninstitutional population. Percents are only shown when the base is 75,000 or greater. Even though the standard errors are large, smaller estimates are shown to permit users to combine categories in various ways. Detail may not sum to totals due to rounding. Detail for the above race and Hispanic-origin groups will not sum to totals because data for the "other races" groups are not presented and Hispanics are included in both the white and black population groups.

¹ The labor force includes all employed persons plus those seeking employment. The labor force participation rate is the percentage of persons either employed or seeking employment. The unemployment rate is the percent of persons in the labor force who are seeking employment.

² Persons 16 to 24 years old who dropped out of school in the 12-month period ending in October of years shown.

³ Includes persons of Hispanic origin.

⁴ Data not shown where base is less than 75,000.

⁵ Persons of Hispanic origin may be of any race.

NOTE: Data are based upon sample surveys of the civilian noninstitutional population. Includes dropouts from any grade, including a small number from elementary and middle schools. Percents are only shown when the base is 75,000 or greater. Even though the standard errors are large, smaller estimates are shown to permit users to combine categories in various ways. Detail for the above race and Hispanic-origin groups will not sum to totals because data for the "other races" group are not presented and Hispanics are included in both the white and black population groups. Some data have been revised from previously published figures. Detail may not sum to totals due to rounding.

—Not available.
¹ Includes those not working in technical, managerial, or administrative types of jobs who reported that they did not need a college degree to obtain their job.
² Includes those who have not finished all requirements for teaching certification or were previously qualified to teach.
³ Includes computer sciences.
 NOTE: Data are from sample surveys of recent college graduates. Notes on methodology are included in the *Guide to Sources*. Data exclude bachelor's recipients from U.S. Service Schools. Deceased graduates and graduates living at foreign addresses at the time of the survey are not included.

¹ Data from 1994 "First Follow-up" survey.
² Percent not working, but looking for work.
³ Percent not working.
⁴ Excluding those not in the labor force.
⁵ Less than 0.05 percent.
⁶ All other professional occupations excluding business, teaching, engineering, and health.
⁷ Salaries for those employed full time in April 1997.
⁸ Respondents reporting salaries less than \$1,000 were excluded, those reporting salaries greater than \$500,000 were reset to \$500,000.

Table 389.— Enrollment status of 1992–93 bachelor’s degree recipients, by undergraduate major and highest degree obtained: April 1997

Undergraduate major field of study	Ever enrolled since graduation	Enrolled full-time	Enrolled part-time	Enrolled and employed	Enrolled and not employed
1	2	3	4	5	6

—Not available.

¹ Reported salaries of full-time workers under \$2,600 in 1976, \$4,200 in 1981, \$5,000 in 1985, and \$1,000 in 1994 were excluded from the tabulations. Also, those with salaries over \$500,000 in 1994 were excluded.

² Most educators work 9- to 10-month contracts.

³ In 1994, data were not collected on Communications as a separate field of study.

NOTE: Data exclude bachelor’s recipients from U.S. Service Schools and graduates living at foreign addresses at the time of the survey. Constant dollar adjustments based on the Consumer Price Index.

¹ Prose literacy is the ability to understand and use information contained in various kinds of textual material. A level 1 task rated 0 to 225 requires the reader to locate a single piece of information in a short text. A level 2 task rated 226 to 275 requires the reader to locate a single piece of information in the text with several distractors or to make low-level inferences. A level 3 task rated 276 to 325 requires the reader to make literal or synonymous matches between the text and information given in the task, or to make low-level inferences. A level 4 task rated 326 to 375 requires the reader to perform multiple-feature matches and to integrate or synthesize information from complex passages. A level 5 task rated 376 to 500 requires the reader to search for information in dense text which contains a number of distractors.

² Document literacy reflects the knowledge and skills used to process information from documents. A level 1 task rated 0 to 225 requires the reader to locate pieces of information based on a literal match. A level 2 task rated 226 to 275 requires the reader to match a single piece of information among several distractors. A level 3 task rated 276 to 325 requires the reader to integrate multiple pieces of information from one or more documents. A level 4 task rated 326 to 375 requires the performance of multiple-feature matches, cycling through documents, and integrating information from multiple operations sequentially. They must extract the features of the problem from text or rely on background knowledge to determine the quantities or operations needed.

³ Quantitative literacy is the ability to perform numerical operations in everyday life. A level 1 task rated 0 to 225 requires the reader to perform a single, relatively simple, arithmetic operation. A level 2 task rated 226 to 275 requires the reader to perform a single operation using numbers that are either stated in the task or easily located in the material. A level 3 task rated 276 to 325 requires the reader to use two or more numbers to solve the problem. A level 4 task rated 326 to 375 requires the reader to perform two or more sequential operations or a single operation in which the quantities are found in different types of displays. A level 5 task rated 376 to 500 requires the reader to perform multiple operations sequentially. They must extract the features of the problem from text or rely on background knowledge to determine the quantities or operations needed.

⁴ Less than .5 percent.

NOTE: Detail may not sum to totals due to rounding.

CHAPTER 6

International Comparisons of Education

This chapter offers a broad perspective on education across the nations of the world. It also provides an international context for examining the condition of education in the United States. Insights into the educational practices and outcomes of the United States are obtained by comparing them with those of other countries. The National Center for Education Statistics (NCES) carries out a variety of these activities to provide statistical data for international comparisons of education.

In the early 1990s, the NCES expanded its role in collecting international data by serving as the national research center for the International Association for the Evaluation of Educational Achievement (IEA) Reading Literacy Study. In addition, NCES has provided funding for international research studies comparing mathematics and science education, including the Third International Mathematics and Science Study (TIMSS). NCES is also cooperating with international agencies in the compilation of statistics and the development of education indicators.

Some of the data in this chapter were drawn from materials prepared by the United Nations Educational, Scientific, and Cultural Organization (UNESCO), the Institute of International Education, the Organization for Economic Cooperation and Development (OECD), and the International Assessment of Educational Progress (IAEP). The basic summary data on enrollments, teachers, enrollment ratios, and finances were synthesized from information appearing in *Education at a Glance* published by OECD. Even though OECD tabulations are very carefully prepared, international data users should be cautioned about the many problems of definition and reporting involved in the collection of data about the educational systems in the world.

This chapter provides information from TIMSS and TIMSS–R, carried out by the IEA. Data in 1995 were collected for the two adjacent grades containing the most 9-year-olds (Population 1) and the two adjacent grades containing the most 13-year-olds (Population 2). Data are reported for the higher grade for each population, which was 4th-grade in most nations for Population 1 and 8th-grade in most nations for Population 2. The mathematics and science performance of 4th-grade students in 26 countries, and 8th-grade students in 41 countries, was studied through as-

sessments administered during 1994–95. The mathematics and science performance of students at the end of secondary schooling (12th-grade in the United States) was also assessed at the same time in 21 countries. The 1999 Third International Mathematics and Science Study–Repeat (TIMSS–R) is a successor to the 1995 TIMSS and focuses on the mathematics and science achievement of 8th-grade students in participating nations. It provides a second data point in a regular cycle of international assessments of mathematics and science that are planned to chart trends in achievement over time.

The role that the United States plays in the world of higher education is illuminated by data on foreign students enrolled in U.S. institutions of higher education. The Institute of International Education provides estimates of the number of foreign students and their countries of origin.

Further information on survey methodologies is in the “Guide to Sources” in the appendix and in the publications cited in the source notes.

Population

The percent of young people in a population can influence the proportion of national income spent per student. Countries with a greater proportion of young people set aside larger proportions of domestic product for their education to have the same expenditure per student as a country with a lower proportion of young people. Among the OECD countries, Turkey had the largest percentage of young people ages 5 to 14—at 21 percent in 1999. The closest followers were Iceland (16), New Zealand (15), the United States (15), and Ireland (15). Countries with relatively small numbers of persons in this age group included Spain, Italy, and Japan at 10 percent (table 393).

Enrollments

In 1997, 1.2 billion students were enrolled in schools around the world. Of these students, 668 million were in elementary-level programs, 398 million were in secondary programs, and 88 million were in higher education programs (table 392). Between 1990 and 1997, enrollment changes varied from region to region. Elementary enrollment changes ranged from increases of 24 percent in Afri-

ca and 12 percent in Central and South America to a 5 percent decrease in Europe. Enrollment increases at the secondary level outpaced increases at the primary (elementary) level, especially in Africa (38 percent), Oceania (68 percent), Asia (31 percent), and Central and South America (31 percent). Secondary-level enrollment increased in Europe by 10 percent. Enrollment in Northern America (defined in Unesco tabulations as including United States, Canada, and Greenland) rose by 15 percent (table 395).

At the postsecondary level, developing areas of the world had substantial increases in enrollment between 1990 and 1997. Postsecondary enrollment rose by 68 percent in Africa and by 49 percent in Asia. Postsecondary enrollment in Oceania increased by 99 percent, Central and South America increased by 30 percent, followed by Europe at 15 percent and Northern America at 3 percent. These increases are due to growth both in the proportion of the people attending postsecondary institutions and increases in the populations (tables 395 and 396).

Postsecondary enrollment varied among countries partially due to differing definitions of postsecondary education and at what age it begins. In 1999, among the OECD countries, Greece reported the highest proportion of 18- to 21-year-olds enrolled in postsecondary education at 54 percent, followed by Korea (51 percent), Belgium (42 percent), the United States (36 percent), and France (35 percent). In the 22 to 25 age group, Finland's enrollment rate was highest at 35 percent, with Norway following at 28 percent, Denmark at 27 percent, Korea at 26 percent, and Sweden at 25 percent (table 394).

In 1999–2000, there were about 515,000 foreign students studying at U.S. colleges and universities. Approximately 54 percent of these students were from Asian countries (table 416). Between 1990 and 1999, the proportion of students at U.S. colleges who were nonresident aliens, rose from 2.8 to 3.5 percent (table 208).

Achievement

The 1995 TIMSS assessed the mathematics and science performance of U.S. students in comparison to their peers in other nations at three different grade levels. The 1995 TIMSS assessments revealed that U.S. 4th-graders performed well in both mathematics and science in comparison to students in other nations and U.S. 12th-graders scored below the international average and among the lowest of the TIMSS nations in mathematics and science general knowledge (tables 405, 406, 407, and 408).

In 1999, U.S. 8th-graders exceeded the international average of 38 nations in mathematics and science. In mathematics, U.S. 8th-grade students outperformed their peers in 17 nations, performed

similarly to their peers in 6 nations, and performed lower than their peers in 14 nations in 1999 (table 399). In science, U.S. 8th-grade students outperformed their peers in 18 nations, performed similarly to their peers in 5 nations, and performed lower than their peers in 14 nations in 1999 (table 401).

Degrees

Ratios of bachelor's degrees conferred per hundred persons at the typical year of graduation in 1999 ranged from 10 in Turkey and 11 in the Czech Republic and Mexico to 37 in the United Kingdom and New Zealand. The ratio for the United States was 33. In 1996, women had higher bachelor's degree ratios than men in 14 out of 19 countries reporting data (table 411).

The percentage of undergraduate degrees awarded in science fields (including natural sciences, mathematics and computer science, and engineering) reported by OECD countries ranged from 13 to 37 percent for 1999. Korea, Germany, and Finland were over 30 percent, while Canada, Australia, Japan, New Zealand, the United States, Hungary, Poland, the Netherlands, Iceland, and Norway were 20 percent or less (table 412). The proportion of graduate degrees awarded in science fields also ranged widely across countries in 1999. Among the countries with the highest proportions were Korea (48 percent), and Japan, Switzerland, and Sweden with 42 percent. Among the countries with the lowest proportions were Poland (3 percent), Italy (13 percent), Hungary (14 percent) and the United States (14 percent) (table 413).

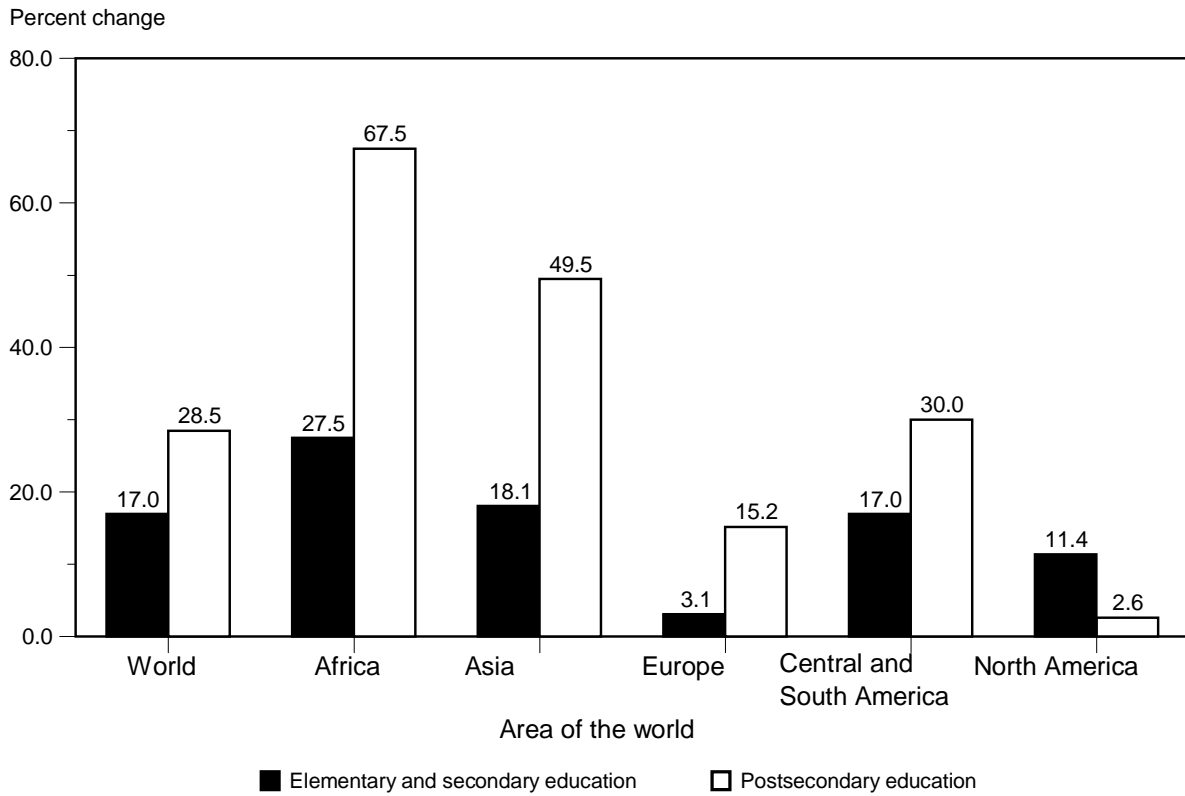

Finances

In general, higher income countries spend more public funds per student than lower income countries. At the primary level of education, Denmark, Switzerland, Austria, and the United States ranked at the upper end of public per pupil expenditures in 1998. For primary education per student, Denmark spent about \$6,713 per student, Switzerland spent \$6,470, Austria spent \$6,065, and the United States spent \$6,043 per student. At the secondary level, Switzerland, Austria, the United States, Norway, and Denmark had expenditures over \$7,000 per student. The governments of the United States, Switzerland, Canada and Sweden spent relatively large amounts per student in higher education. The United States spent \$19,802, Switzerland spent \$16,563, Canada spent \$14,579, and Sweden spent \$13,224 (table 414). These expenditures were adjusted to U.S. dollars using the purchasing-power-parity (PPP) Index. This index is considered more stable and comparable than using currency exchange rates.

A comparison of public expenditures on education as a percent of gross domestic product (GDP) in OECD countries shows that national investment in

education in 1998 ranged from 3.0 percent of GDP in Turkey to 5.1 percent in the United States to 8.3 percent in Denmark (table 415).

¹ Enrollment and teacher data exclude the Democratic People's Republic of Korea.² Excludes Rodrigues and other small islands.³ Includes 5 countries of the former U.S.S.R., the Democratic People's Republic of Korea, Arab states, and both the Asian and the European portions of Turkey.⁴ Includes all countries of the former U.S.S.R. except Kazakhstan, Uzbekistan, Kyrgyzstan, Tajikistan, and Turkmenistan.⁵ Northern America includes Bermuda, Canada, Greenland, St. Pierre and Miquelon, and the United States of America. Hawaii is included in Northern America rather than Oceania. Central and South America includes Latin America and the Caribbean.⁶ Includes American Samoa, Australia, Cook Islands, Fiji, French Polynesia, Guam, Kiribati, Marshall Islands, Nauru, New Caledonia, New Zealand, Niue, Norfolk Island, Pacific Islands, Papua New Guinea, Samoa, Solomon Islands, Tokelau, Tonga, Tuvalu, and the Republic of Vanuatu.⁷ Estimate of midyear population.⁸ First level enrollment generally consists of elementary school, grades 1–6.⁹ Second level enrollment includes general education, teacher training (at the second level), and technical and vocational education. This level generally corresponds to secondary education in the United States, grades 7–12.¹⁰ Third level enrollment includes college and university enrollment, and technical and vocational education beyond the high school level. There is considerable variation in reporting from country to country.¹¹ This figure is for Europe, not including the former U.S.S.R.

NOTE: Detail may not sum to totals due to rounding.

—Not available.

¹ Selection based on total population for midyear 1997.

² First level enrollment generally consists of elementary school, grades 1–6.

³ Second level enrollment includes general education, teacher training (at the second level), and technical and vocational education. This level generally corresponds to secondary education in the United States, grades 7–12.

⁴ Third level enrollment includes college and university enrollment, and technical and vocational education beyond the high school level. There is considerable variation in reporting from country to country.

⁵ Data represent the total enrollment of all ages in the school level divided by the population of the specific age groups that correspond to the school level. Adjustments have been made for the varying lengths of first and second level programs. Ratios may exceed 100 because some countries have many students from outside the normal age range.

⁶ Enrollment totals and ratios exclude Democratic People's Republic of Korea. Data do not include adult education or special education provided outside regular schools.

⁷ Classification or data coverage of levels have been revised. Data by level may not be comparable over time.

⁸ Data for 1996–97.

⁹ Data for 1995–96.

¹⁰ Data for 1994–95.

¹¹ Data for 1991–92.

¹² Excludes private institutions.

¹³ Data refer to universities and exclude Al Azhar.

¹⁴ Excludes non-university institutions (such as teacher training colleges and technical colleges) and excludes distance-learning universities.

¹⁵ Estimated.

Table 396.—Selected statistics for countries with populations over 10 million, by continent: 1980, 1990, and 1997—Continued

¹⁶ General education enrollment only. Excludes teacher training and vocational education enrollments.

¹⁷ Data for 1981-82.

¹⁸ Does not include professional schools.

¹⁹ Includes initiation classes where students learn Portuguese.

²⁰ Data for 1992-93.

²¹ Data for 1993-94.

²² Not including the former Independent States of Transke, Bophuthatswana, Venda, and Ciskei.

²³ Data refer to government aided and maintained schools only.

²⁴ Not including private non-university institutions.

²⁵ Day schools only.

²⁶ Data for 1985-86.

²⁷ Does not include medical science.

²⁸ Includes preprimary education.

²⁹ Excludes some non-university institutions.

³⁰ Includes full-time students only.

³¹ Data include both former East and West Germany.

³² Data refer to the end of school year.

³³ Not including part-time students at community colleges.

³⁴ Not including ISCED level 7.

³⁵ Including vocational education.

³⁶ Data do not include Vocational Education and Training Institutes (VETS).

NOTE: Some data have been revised from previously published figures. Detail may not sum to totals due to rounding.

—Not available.
 1 Teacher response data available for 70 to 84 percent of students.
 2 Teacher response data available for 50 to 69 percent of students.
 3 Lithuania tested the same cohort of students as other countries, but later in 1999, at the beginning of the next school year.
 4 Student response rate 70–84 percent.

NOTE: Data are for 8th grade or equivalent in most countries. Detail may not sum to totals due to rounding. Standard errors appear in parentheses.

—Not available.

¹ Teacher response data on hours taught weekly available for 70 to 84 percent of students.

² Teacher response data on hours taught weekly available for 50 to 69 percent of students.

³ Students were asked about "natural science;" data pertain to grade 8 physics/chemistry

⁴ Students were asked about "IPA science;" data pertain to the composite course taught by biology and physics teachers

NOTE: Data are for 8th grade or equivalent in most countries. Standard errors appear in parentheses. In the 23 countries shown science is taught as a single subject. In other countries separate courses are offered in the different science subjects (earth science, biology, physics, and chemistry). Detail may not sum to totals due to rounding.

¹ Narrative prose is continuous text in which the writer's aim is to tell a story.

² Expository prose is continuous text designed to describe, explain, or otherwise convey factual information or opinion to the reader.

³ Documents are structured information presented in the form of charts, tables, maps, graphs, lists, or sets of instructions.

⁴ Iceland tested all students, therefore standard errors are not applicable.

⁵ Only French-speaking students were tested.

⁶ British Columbia only.

NOTE: Standard errors appear in parentheses.

¹ Data for Flemish Belgium only.² Data for 1989 are for the former West Germany.

NOTE: The graduation rate relates the number of people with bachelor's degrees to the number of people in the population at typical age of graduation. Data for 1999 reflect a reclassification of degree levels and may not be comparable to figures for earlier years.

¹ Includes preprimary and other expenditures not classified by level.

² Due to the implementation of a new classification system post-1996 data are not comparable with earlier data.

³ Flemish Belgium data only.

⁴ Data for 1985 refer to West Germany (Federal Republic of Germany before unification).

NOTE: Direct public expenditure on educational services includes both amounts spent directly by governments to hire educational personnel and to procure other resources,

and amounts provided by governments to public or private institutions. Figures for 1998 include public subsidies to households attributable for educational institutions and direct expenditures from international sources, and are not directly comparable with other years. Figures for 1985 also include transfers and payments to private entities, and thus are not strictly comparable with later figures.

CHAPTER 7

Libraries and Educational Technology

This chapter contains statistics on libraries and on the use of information technologies. These data show the extent of America's access to information technologies outside of formal classroom activities. The data also provide a capsule description of the magnitude and availability of library resources. Access to information has been widely cited as the key to success in a growing number of endeavors. Thus, how information is made available and to whom are matters of concern.

The first section of the chapter (tables 417 to 419 and 422 to 425) deals with public libraries, public and private school libraries, and college and university libraries. It contains data on collections, population served, staff, and expenditures. Two tables provide institutional-level information for the largest public libraries and the largest college libraries in the country.

The second half of the chapter (tables 421, 422, and 426 to 430) provides information on the availability and use of technology. For example, the proportion of children using computers at school is shown over time. Also included are data on the use of home computers by adults and school children, with comparisons among various demographic groups.

Related data may be found in various sections of this report. For example, statistics on the number of degrees conferred in computer and information sciences and library sciences are in chapter 3. Further information on survey methodologies is in the "Guide to Sources" in the Appendix and in the publications cited in the source notes.

Libraries

In 1993–94, there were 77 school library visits each week per 100 public school students. Elementary school students were more likely to visit their school libraries (86 visits per 100 students each week) than secondary school students (61 per 100). Private school students were slightly less likely to visit their libraries (75 per 100). The average number of library staff per school was 1.8 at public schools, and 1.2 at private schools. Public school libraries generally had smaller numbers of books on a per student basis than private school libraries. In 1993–94, public school libraries held an average of 1,832

books per 100 students compared to an average of 2,689 per 100 students at private schools. Public elementary school libraries had larger holdings than public secondary schools on a per student basis, and elementary school students checked out three times as many books on a per student basis (1.3 per week compared to .4 per week) (table 417).

The increase in college library resources kept pace with increases in enrollment between 1987–88 and 1997–98. The library staff to student ratio rose from 137 students per staff member to 150 students per staff member. The average library operating expenditure per student rose 7 percent in constant dollars from \$419 in 1987–88 to \$450 in 1997–98 (table 422).

In 1998, there were 8,964 public libraries in the United States with 739 million books and serial volumes. The annual attendance per capita was 4.2 and the reference transactions per capita was 1.1 (table 425).

Educational Technology

There has been widespread introduction of computers into the schools in recent years. In 2000, the average public school contained 110 computers. One important technological advance that has come to schools following the introduction of computers has been connections to the Internet. The proportion of instructional rooms with Internet access increased from 51 percent in 1998 to 77 percent in 2000. About 98 percent of schools had access to the Internet in 2000 (table 421).

The total computer usage rate of students at school increased from 59 percent in 1993 to 69 percent in 1997. The rate for grades 1 to 8 increased from 69 percent in 1993 to 79 percent in 1997. The school computer usage rate in 1997 was 70 percent for students in high school and 65 percent for undergraduate students in college. At that time, sizable percentages of students used computers at home, though fewer actually used them for schoolwork. About 43 percent of elementary school children used computers at home and about 24 percent used them for schoolwork. Students at the high school and undergraduate levels were more likely than elementary school children to use home computers for schoolwork. In general, students in higher income families

were much more likely to use computers at home and use them for schoolwork than students from lower income families. About 13 percent of the high school students in the \$15,000 to \$19,999 household income group used computers at home for school work compared to 66 percent in the \$75,000 and over income group (table 430).

The use of computers has become widespread in the workplace. In 1997, 50 percent of all workers used computers on the job. More frequent use of computers was associated with higher levels of education and higher incomes. Thirty-six percent of high school graduates and 12 percent of high school dropouts used computers at work compared to 79

percent of those with master's degrees. Among those who did use computers, the master's degree recipients were the most likely to use the computers for a wide variety of applications. Among the most common applications for all employees using computers on the job were: bookkeeping/invoicing (66 percent), word processing (57 percent), communications (47 percent), analysis/spreadsheets (41 percent), and calendar/schedule (38 percent). Workers in the 25- to 59-year-old age range were more likely to use computers than younger or older workers. Elementary and secondary teachers were less likely to use computers than persons employed in other managerial or professional fields (table 426).

Figure 33.- Percent of all public schools and instructional rooms having Internet access: Fall 1994 to fall 2000

¹ Includes professional and nonprofessional staff.

² During the most recent full week of school.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Schools and Staffing Survey, 1993–94*, unpublished data. (This table was prepared November 2001.)

NOTE: Percentages are based on schools that have library/media centers. In school year 1990–91, 96 percent of public schools had library/media centers. Data have been revised from previously published figures. Standard errors appear in parentheses.

Table 420.—Percent of public and private schools having access to selected telecommunication capabilities, by location of access site and control of school: 1995 and 1998–99

Telecommunications capabilities	Percent of schools having access	Percent of schools with telecommunication access, by location					
		Administrative offices	Teacher workrooms	Classrooms	Computer labs	Library/media centers	Other instructional rooms
1	2	3	4	5	6	7	8
All public schools, 1995							
Computer with any telecommunication capabilities via local area network	77	73	20	45	71	64	—
Computer with any telecommunication capabilities via modem	76	61	10	30	41	64	—
Computer with any telecommunication capabilities via wide area network	61	58	14	35	41	68	—
Broadcast television	71	35	28	82	47	88	—
Cable television	76	33	25	72	42	91	—
Closed circuit television	28	50	32	91	60	89	—
Two-way video with two-way audio	13	24	17	57	37	69	—
One-way video with two-way audio or computer link	7	26	15	63	41	54	—
All private schools, 1998–99							
Computer connected to a local area network	49	79	—	51	68	45	31
Computer with modem	73	81	—	41	50	31	18
Computer with connection or access to the Internet	67	79	—	44	56	41	21
Computer with connection or access to the Intranet	19	86	—	61	75	54	30
Stand-alone computer (i.e., not connected to any network)	85	68	—	83	52	42	39
Computer with multimedia capabilities (e.g., CD-ROM, speakers)	81	83	—	69	70	48	35
Interactive television/computer with two-way audio/visual	12	12	—	54	65	38	28

—Not available.

NOTE: Location estimates are based on those schools having access to each type of telecommunication capability. Percents of schools reporting telecommunication locations do not sum to 100 because many schools have access in more than one location. Data are derived from a sample survey and are subject to sampling error.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Fast Response Survey System, *Advanced Telecommunications in U.S. Public Elementary and Secondary Schools, 1995*; and *Advanced Telecommunications in U.S. Private Schools: 1998–99*. (This table was prepared May 2001.)

Table 421.—Public schools and school classrooms with access to the Internet, by school characteristics: 1994 to 2000

Schools, computers, instruction rooms, and access	All public schools	Instructional level ¹		Size of school enrollment			Metropolitan status				Percent of students eligible for free or reduced-price lunch ²			
		Elementary	Secondary	Less than 300	300 to 999	1,000 or more	City	Urban fringe	Town	Rural	Less than 35 percent	35 to 49 percent	50 to 74 percent	75 percent or more

¹ Excludes combined elementary/secondary schools because of small sample size.
² Excludes schools missing data for free and reduced price lunch participation.
³ This estimate fell between 99.5 percent and 100.0 percent and therefore was rounded to 100 percent.
⁴ Includes computers used for instructional or administrative purposes.
⁵ Includes all classrooms, computer labs, and library/media centers.
 NOTE: Data are derived from sample surveys and are subject to sampling error. Detail may not sum to totals because of rounding of weighted estimates. Standard errors appear in parentheses.

Other	9.0	20.2	9.6	8.3	7.0	6.5	9.5

¹ Some data are different from other tables due to a different population base.
² ALA-MLS=A master's degree from a graduate library education program accredited by the American Library Association (ALA).
³ Excludes some federal funds received through state library agencies.
 NOTE: Detail may not sum to totals due to rounding. Totals may be underestimated due to nonresponse on item or legal service area. In three states (Michigan, Pennsylvania, and Texas), some public libraries reported data for fiscal year 1997. Most of West Virginia's data are for fiscal year 1997.

NOTE: Data are based on a sample survey of households and are subject to sampling and nonsampling error. Standard errors appear in parentheses.

Guide to Tabular Presentation

This section is intended to assist the reader in following the basic structure of the *Digest* tables and to provide a legend for some of the common symbols and indexes used throughout the book. Unless otherwise noted, all data are for the 50 states and the District of Columbia.

Table Components

Title Describes the table content concisely.

Unit Indicator Informs the reader of the measurement unit in the table—"In thousands," "In millions of dollars," etc. Noted below the title unless several units are used, in which case the unit indicators are generally given in the spanner or individual column heads.

Spanner Describes a group of two or more columns.

Column head Describes specific column.

Stub Describes a row or a group of rows. Each stub is followed by a number of dots (leaders) or by a semi-colon if no data appears in the data fields.

Field The area of the table which contains the data elements.

Rules in the field

Single horizontal rules indicate

- that the data below the line add to the figure immediately above the line, or
- in the case of derived figures (e.g., percents, medians) that the datum above the line represents a cumulative figure.

Double horizontal rules demarcate groups of related rows.

Single vertical rules delineate columns.

Double vertical rules divide the table into sections with unique stubs.

Example of Table Structure

Table 0.—Total enrollment in institutions of higher education, by type and control of institution: Fall 1979 to fall 1985

[In thousands]

Type and control of institution	Year					Percent change, 1979 to 1985
	1979	1981	1983	1985		
1	2	3	4	5	6	
All institutions	11,570	12,372	12,465	12,247	5.85	
Universities	2,840	2,901	2,889	2,871	1.10	
Other 4-year institutions	4,514	4,754	4,852	4,845	7.35	
2-year institutions	4,217	4,716	4,723	4,531	7.46	
Public institutions	9,037	9,647	9,683	9,479	4.90	
Universities	2,100	2,152	2,155	2,141	1.98	
Other 4-year institutions	2,880	3,014	3,069	3,068	6.52	
2-year institutions	4,057	4,481	4,459	4,270	5.25	
Private institutions	2,533	2,725	2,782	2,768	9.27	
Universities	740	749	734	730	-1.42	
Other 4-year institutions	1,633	1,740	1,784	1,777	8.80	
2-year institutions	160	236	264	261	163.49	

Footnote → *Large percentage increase is due primarily to the addition of colleges accredited by the National Association of Trade and Technical Schools in 1980 and 1981.

Note → NOTE.—Includes undergraduate, graduate, first-professional, and unclassified students.

Source → SOURCE: U.S. Department of Education, Center for Education Statistics, "Fall Enrollment in Colleges and Universities" surveys. (This table was prepared July 1986.)

Footnote Describes a unique circumstance relating to a specific item within the table. Usually listed below the bottom rule of the table.

Note Furnishes general information that relates to the entire table.

Source The document or reference from which the data are drawn. This note may also include the organizational unit responsible for preparing the data.

Descriptive Terms

Average A number that is used to represent the “typical value” of a group of numbers. It is regarded as a measure of “location” or “central tendency” of a group of numbers.

Arithmetic mean is the most commonly used average. It is derived by summing the individual item values of a particular group and dividing that sum by the number of items. This value is often referred to simply as the “mean” or “average.”

Median is the measure of central tendency that occupies the middle position in a rank order of values. It generally has the same number of items above it as below it. If there is an even number of items in the group, the median is the average of the middle two items.

Per capita, or per person, figure represents an average computed for every person in a specified group, or population. It is derived by dividing the total for an item (such as income or expenditures) by the number of persons in the specified population.

Index number A value that provides a means of measuring, summarizing, and communicating the nature of changes that occur from time to time or from place to place. An index is used to express changes in prices over periods of time, but may also be used to express differences between related subjects at a single point in time.

The *Digest* most often uses the Consumer Price Index to compare purchasing power over time.

To compute a price index, a base year or period is selected. The base year price is then designated as the base or reference price to which the prices for other years or periods are related.

A method of expressing the price relationship is:

Index number =

$$\frac{\text{Price of a set of one or more items for related year}}{\text{Price of the same set of items for base year}} \times 100$$

When 100 is subtracted from the index number, the result equals the percent change in price from the base year.

Current and constant dollars are used in a number of tables to express finance data. Unless otherwise noted, all figures are in current dollars, not adjusted for inflation. Constant dollars provide a measure of the impact of inflation on the current dollars.

Current dollar figures reflect actual prices or costs prevailing during the specified year(s).

Constant dollar figures attempt to remove the effects of price changes (inflation) from statistical series reported in dollar terms.

The constant dollar value for an item is derived by dividing the base year price index (for example, the Consumer Price Index for 1999) by the price index for the year of data to be adjusted and multiplying by the item to be adjusted. The result is an adjusted dollar value as it would presumably exist if prices were the same as the base year—in other words, as if the dollar had constant purchasing power. Any changes in the constant dollar amounts would reflect only changes in the real values.

NOTE: Tables may not include data for all years implied in table titles.

Guide to Sources

Sources and Comparability of Data

The information presented in this report was obtained from many sources, including federal and state agencies, private research organizations, and professional associations. The data were collected using many research methods, including surveys of a universe (such as all colleges) or of a sample, compilations of administrative records, and statistical projections. *Digest* users should take particular care when comparing data from different sources. Differences in procedures, timing, phrasing of questions, interviewer training, and so forth mean that the results from the different sources may not be strictly comparable. Following the general discussion of data accuracy below, descriptions of the information sources and data collection methods are presented, grouped by sponsoring organization. More extensive documentation of a particular survey's procedures does not imply more problems with the data, only that more information is available.

Accuracy of Data

The accuracy of any statistic is determined by the joint effects of "sampling" and "nonsampling" errors. Estimates based on a sample will differ somewhat from the figures that would have been obtained if a complete census had been taken using the same survey instruments, instructions, and procedures. In addition to such sampling errors, all surveys, both universe and sample, are subject to design, reporting, and processing errors and errors due to non-response. To the extent possible, these nonsampling errors are kept to a minimum by methods built into the survey procedures. In general, however, the effects of nonsampling errors are more difficult to gauge than those produced by sampling variability.

Sampling Errors

The samples used in surveys are selected from a large number of possible samples of the same size that could have been selected using the same sample design. Estimates derived from the different samples would differ from each other. The difference between a sample estimate and the average of all possible samples is called the sampling deviation. The standard or sampling error of a survey estimate is a measure of the variation among the estimates from

all possible samples and, thus, is a measure of the precision with which an estimate from a particular sample approximates the average result of all possible samples.

The sample estimate and an estimate of its standard error permit us to construct interval estimates with prescribed confidence that the interval includes the average result of all possible samples. If all possible samples were selected under essentially the same conditions and an estimate and its estimated standard error were calculated from each sample, then: (1) approximately 66.7 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average value of all possible samples; and (2) approximately 95.0 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average value of all possible samples. We call an interval from two standard errors below the estimate to two standard errors above the estimate a 95 percent confidence interval.

To illustrate this concept, consider the data and standard errors appearing on table 108. For the 2000 estimate that 10.9 percent of 16- to 24-year-olds were high school dropouts, the table shows that the standard error is 0.3 percent. Therefore, we can create a 95 percent confidence interval which is approximately 10.3 to 11.5 (10.9 percent \pm 2 times 0.3 percent).

Analysis of standard errors can help assess how valid a comparison between two estimates might be. The **standard error of a difference** between two independent sample estimates is equal to the square root of the sum of the squared standard errors of the estimates. The standard error (se) of the difference between independent sample estimates "a" and "b" is:

$$se_{a,b} = (se_a^2 + se_b^2)^{1/2}$$

It should be noted that most of the standard error estimates presented in subsequent sections and in the original documents are approximations. That is, to derive estimates of standard errors that would be applicable to a wide variety of items and could be

prepared at a moderate cost, a number of approximations were required. As a result, the standard error estimates provide a general order of magnitude rather than the exact standard error for any specific item. The preceding discussion on sampling variability was directed toward a situation concerning one or two estimates. Determining the accuracy of statistical projections is more difficult. In general, the further away the projection date is from the date of the actual data being used for the projection, the greater the probable error in the projections. If, for instance, annual data from 1970 to 1999 are being used to project enrollment in institutions of higher education, the further beyond 1999 one projects, the more variability in the projection. One will be less sure of the 2011 enrollment projection than of the 2000 projection. A detailed discussion of the projections methodology is contained in *Projections of Education Statistics to 2011* (National Center for Education Statistics, 2001).

Nonsampling Errors

Universe and sample surveys are subject to nonsampling errors. Nonsampling errors may arise when respondents or interviewers interpret questions differently, when respondents must estimate values, or when coders, keyers, and other processors handle answers differently, when persons who should be included in the universe are not, or when persons fail to respond (completely or partially). Nonsampling errors usually, but not always, result in an understatement of total survey error and thus an overstatement of the precision of survey estimates. Since estimating the magnitude of nonsampling errors often would require special experiments or access to independent data, these nonsampling errors are seldom available.

To compensate for nonresponse, adjustments of the sample estimates are often made. An adjustment made for either type of nonresponse, total or partial, is often referred to as an imputation, which is often a substitution of the "average" questionnaire response for the nonresponse. Imputations are usually made separately within various groups of sample members which have similar survey characteristics. Imputation for item nonresponse is usually made by substituting for a missing item, the response to that item of a respondent having characteristics that are similar to those of the nonrespondent.

Although the magnitude of nonsampling error in the data compiled in this *Digest* is frequently unknown, idiosyncrasies that have been identified are noted on the appropriate tables.

Department of Education National Center for Education Statistics (NCES)

Baccalaureate and Beyond Longitudinal Study

The Baccalaureate and Beyond Longitudinal Study (B&B) is based on the National Postsecondary Student Aid Study (NPSAS) and provides information concerning education and work experience after completing the bachelor's degree. B&B provides cross-sectional information 1 year after bachelor's degree completion (comparable to the Recent College Graduates study), while at the same time providing longitudinal data concerning entry into and progress through graduate level education and the workforce. It also provides information on entry into, persistence and progress through, and completion of graduate level education. This information is difficult to gather through followups involving high school cohorts or even college entry cohorts, both of which are restricted in the number who actually complete a bachelor's degree and continue their education.

B&B will follow NPSAS baccalaureate degree completers for a 12-year period after completion, beginning with NPSAS:93. About 11,000 students who completed their degrees in the 1992–93 academic year were included in the first B&B (B&B:93/94). In addition to the student data, B&B collected postsecondary transcripts covering the undergraduate period, providing complete information on progress and persistence at both the undergraduate and graduate levels. The second B&B followup took place in spring 1997 (B&B:93/97), and gathered information on employment history, family formation, and enrollment in graduate programs. New B&B cohorts will alternate with BPS in using NPSAS as their base.

Further information on B&B may be obtained from:

Beginning Postsecondary Students Longitudinal Study

The Beginning Postsecondary Students Longitudinal Study (BPS) provides information on persistence, progress, and attainment from initial time of entry into postsecondary education through leaving and entering the workforce. BPS includes traditional

and nontraditional (e.g., older) students and is representative of all beginning students in postsecondary education. BPS follows first-time, beginning students for at least 5 years at approximately 2-year intervals, collecting student data, and financial aid reports. By starting with a cohort that has already entered postsecondary education, and following it for 5 years, BPS will be able to determine to what extent, students who start postsecondary education at various ages differ in their progress, persistence, and attainment. The first BPS study was conducted in 1989–90, with follow up surveys in 1992 and 1994. The second BPS cohort of students began with a survey in 1995–96 and a follow-up in 1998.

Further information on BPS may be obtained from:

Common Core of Data

NCES uses the Common Core of Data (CCD) survey to acquire and maintain statistical data from each of the 50 states, the District of Columbia, the Bureau of Indian Affairs, Department of Defense Dependents' Schools (overseas and domestic) and the outlying areas. Information about staff and students is collected annually at the school, local education agency or school district (LEA), and state levels. Information about revenues and expenditures is also collected at the state and LEA levels.

Data are collected for a particular school year (October 1 through September 30) via survey instruments sent to the state education agencies during the school year. States have one year in which to modify the data originally submitted.

Since the CCD is a universe survey, the CCD information presented in this edition of the *Digest* is not subject to sampling errors. However, nonsampling errors could come from two sources—nonreturn and inaccurate reporting. Almost all of the states submit the six CCD survey instruments each year, but submissions are sometimes incomplete or too late for publication.

Understandably, when 58 education agencies compile and submit data for approximately 92,000 public schools and 16,000 local school districts, misreporting can occur. Typically, this results from varying interpretations of NCES definitions and differing recordkeeping systems. NCES attempts to minimize these errors by working closely with the

state education agencies through the National Forum on Education Statistics.

The state education agencies report data to NCES from data collected and edited in their regular reporting cycles. NCES encourages the agencies to incorporate into their own survey systems the NCES items they do not already collect so that those items will also be available for the subsequent CCD survey. Over time, this has meant fewer missing data cells in each state's response, reducing the need to impute data.

NCES subjects data from the education agencies to a comprehensive edit. Where data are determined to be inconsistent, missing, or out of range, NCES contacts the education agencies for verification. NCES-prepared state summary forms are returned to the state education agencies for verification. States are also given an opportunity to revise their state-level aggregates from the previous survey cycle.

Condition of America's Public School Facilities: 1999

This report provides national data about the condition of public schools in 1999 based on a survey conducted by the National Center for Education Statistics (NCES) using its Fast Response Survey System (FRSS). Specifically, this report provides information about the condition of school facilities and the costs to bring them into good condition; school plans for repairs, renovations, and replacements; the age of public schools; and overcrowding and practices used to address overcrowding. The results presented in this report are based on questionnaire data for 903 public elementary and secondary schools in the United States. The responses were weighted to produce national estimates that represent all regular public schools in the United States.

**Early Childhood Longitudinal Study,
Kindergarten Class of 1998–99**

The Early Childhood Longitudinal Study, Kindergarten Class of 1998–99 (ECLS–K) was designed to provide detailed information on children’s early school experiences. The study began in the fall 1998. A nationally representative sample of 22,782 children enrolled in 1,277 kindergarten programs during the 1998–99 school year was selected to participate in the ECLS–K. The children attended both public and private kindergartens, and full-day and part-day programs. The sample included children from different racial/ethnic and socioeconomic backgrounds, and oversamples of Asian and Pacific Island children, private kindergartens, and private kindergartners. Base year data were collected in the fall and spring of the kindergarten year and again in fall first grade (30 percent subsample) and spring first grade. The children participating in the ECLS–K will be followed longitudinally through the 5th-grade.

The ECLS–K includes a direct child cognitive assessment that is administered one-on-one with each child in the study. The assessment uses a computer-assisted personal interview (CAPI) approach and a two-stage adaptive testing methodology. The direct assessment includes three cognitive domains (reading, mathematics, and general knowledge). Children’s height and weight is measured at each data collection point and a direct measure of children’s psychomotor development was administered in the fall of the kindergarten year only. In addition to these measures, the ECLS–K collects information about children’s social skills and academic achievement through teacher reports.

A computer-assisted telephone interview with the children’s parents/guardians is conducted at each wave. Parents/guardians are asked to provide key information about their children on subjects, such as family demographics (e.g., age, family members, relation to child, race/ethnicity), family structure (household members and composition), parent involvement, home educational activities (e.g., reading to the child), child health, parental education and employment status, and child’s social skills and behaviors.

Data on the schools children attend and their classrooms are collected by self-administered questionnaires completed by school administrators and classroom teachers. Administrators provide information about the school population, programs, and policies. At the classroom level, data are collected on the composition of the classroom, teaching practices, curriculum, and teacher qualifications and experience. Teachers in the ECLS–K sampled schools are asked to complete the teacher questionnaires, not just those who teach ECLS–K children.

Further information on the ECLS–K may be obtained from:

Federal Support for Education

NCES prepares an annual compilation of federal funds for education. Data for U.S. Department of Education programs come from the *Budget of the United States Government*. Budget offices of other federal agencies provide information for all other federal program support except for research funds, which are obligations reported by the National Science Foundation in *Federal Funds for Research and Development*. Some data are estimated, based on reports from the federal agencies contacted and the *Budget of the United States Government*.

Except for money spent on research, outlays were used to report program funds to the extent possible. Some tables are obligations as noted in the title of the table. Some federal program funds not commonly recognized as education assistance are also included in the totals reported. For example, portions of federal funds paid to some states and counties as shared revenues resulting from the sale of timber and minerals from public lands have been estimated as funds used for education purposes. Parts of the funds received by states (in 1980) and localities (throughout the period) under the General Revenue Sharing Program are also included, as are portions of federal funds received by the District of Columbia. The share of these funds allocated to education was assumed to be equal to the share of general funds expended for elementary and secondary education by states and localities in the same year as reported by the U.S. Bureau of the Census in its annual publication, *Governmental Finances*.

All state intergovernmental expenditures for education were assumed to be earmarked for elementary/secondary education. Contributions of parent governments of dependent school systems to their public schools amounted to approximately 9 percent of local government revenues and local government revenue sharing in each year. Therefore, 9 percent of local government revenue-sharing funds were assumed allocated each fiscal year to elementary and secondary education. Parent government contributions to public school systems were obtained from *Finances of Public School Systems* published by the U.S. Bureau of the Census. The amount of state rev-

enue-sharing funds allocated for postsecondary education in 1980 was assumed to be 13 percent, the proportion of direct state expenditures for institutions of higher education reported in *Governmental Finances* for that year.

The share of federal funds for the District of Columbia assigned to education was assumed to be equal to the share of the city's general fund expenditures for each level of education.

For the job training programs conducted by the Department of Labor, only estimated sums spent on classroom training have been reported as educational program support.

During the 1970s, The Office of Management and Budget (OMB) prepared annual reports on federal education program support. These were published in the *Budget of the United States Government [Special Analyses]*. The information presented in this report is not, however, a continuation of the OMB series. A number of differences in the two series should be noted. OMB required all federal agencies to report outlays for education-related programs using a standardized form, thereby assuring agency compliance in reporting. The scope of education programs reported here differs from OMB. Off-budget items such as the annual volume of guaranteed student loans were not included in OMB's reports. Finally, while some mention is made of an annual estimate of federal tax expenditures, OMB did not include them in its annual analysis of federal education support. Estimated federal tax expenditures for education are the difference between current federal tax receipts and what these receipts would be without existing education deductions to income allowed by federal tax provisions.

Recipients' data are estimated based on *Estimating Federal Funds for Education: A New Approach Applied to Fiscal Year 1980*, "Federal Support for Education, Fiscal Years 1980 to 1984," and *Catalog of Federal Domestic Assistance*. The recipients' data are estimated and tend to undercount institutions of higher education (IHEs), students, and local education agencies (LEAs). This is because some of the federal programs have more than one recipient receiving funds. In these cases, the recipients were put into a "mixed recipients" category, because there was no way to disaggregate the amount each recipient received.

High School and Beyond

High School and Beyond (HS&B) is a national longitudinal survey of 1980 high school sophomores and seniors. The base-year survey was a probability sample of 1,015 high schools with a target number of 36 sophomores and 36 seniors in each of the schools. A total of 58,270 students participated in the base-year survey. Substitutions were made for non-participating schools—but not for students—in those strata where it was possible. Overall, 1,122 schools were selected in the original sample and 811 of these schools participated in the survey. An additional 204 schools were drawn in a replacement sample. Student refusals and absences resulted in an 82 percent completion rate for the survey.

Several small groups in the population were over-sampled to allow for special study of certain types of schools and students. Students completed questionnaires and took a battery of cognitive tests. In addition, a sample of parents of sophomores and seniors (about 3,600 for each cohort) was surveyed.

HS&B first followup activities took place in the spring of 1982. The sample design of the first followup survey called for the selection of approximately 30,000 persons who were sophomores in 1980. The completion rate for sophomores eligible for on-campus survey administration was about 96 percent. About 89 percent of the students who left school between the base year and first followup surveys (dropouts, transfer students, and early graduates) completed the first followup sophomore questionnaire.

As part of the first followup survey of HS&B, transcripts were requested in fall 1982 for an 18,152 member subsample of the sophomore cohort. Of the 15,941 transcripts actually obtained, 1,969 were excluded because the students had dropped out of school before graduation, 799 were excluded because they were incomplete, and 1,057 were excluded because the student graduated before 1982 or the transcript indicated neither a dropout status nor graduation. Thus 12,116 transcripts were utilized for the overall curriculum analysis presented in this publication. All courses in each transcript were assigned a 6-digit code based on *A Classification of Secondary School Courses* (developed by Evaluation Technologies, Inc. under contract with NCES). Credits earned in each course were expressed in Carnegie units. (The Carnegie unit is a standard of measurement that represents one credit for the completion of a 1-year course. To receive credit for a course, the student must have received a passing grade—"pass," "D," or higher.) Students who transferred from public to private schools or from private to public schools between their sophomore and sen-

ior years were eliminated from public/private analyses.

In designing the senior cohort first followup survey, one of the goals was to reduce the size of the retained sample, while still keeping sufficient numbers of minorities to allow important policy analyses. A total of 11,227 (94 percent) of the 11,995 persons subsampled completed the questionnaire. Information was obtained about the respondents' school and employment experiences, family status, and attitudes and plans.

The sample for the second followup, which took place in the spring 1984, consisted of about 12,000 members of the senior cohort and about 15,000 members of the sophomore cohort. The completion rate for the senior cohort was 91 percent, and the completion rate for the sophomore cohort was 92 percent.

HS&B third followup data collection activities were performed in spring of 1986. Both the sophomore and senior cohort samples for this round of data collection were the same as those used for the second followup survey. The completion rates for the sophomore and senior cohort samples were 91 percent and 88 percent, respectively.

Table A1 contains the maximum number of cases that are available for the tabulations of the specific classification variables used throughout this publication.

The standard error (se) of an individual percentage (p) based on HS&B data can be approximated by the formula:

$$se_p = DEFT [p(100 - p)/n]^{1/2}$$

where n is the sample size and DEFT, the square root of the design effect, is a factor used to adjust for the particular sample design used in HS&B. Table A2 provides the DEFT factors for different HS&B samples and subsamples.

In evaluating a difference between two independent percentages, the standard error of the difference may be conservatively approximated by taking the square root of the sum of the squared standard errors of the two percentages. For example, in the 1986 followup of 1980 sophomores, 84.0 percent of the men and 77.2 percent of the women felt that being successful in work was "very important," a difference of 6.8 percentage points. Using the formula and the sample sizes from table A1 and the DEFT factors from table A2, the standard errors of the two percentages being compared are calculated to be:

$$1.43[(84.0)(16.0)/(5,391)]^{1/2} = .714$$

$$1.43[(77.2)(22.8)/(5,857)]^{1/2} = .784$$

The standard error of the difference is therefore

$$(.714^2 + .784^2)^{1/2} = (.510 + .615)^{1/2} = 1.06$$

The sampling error (95 chances in 100) of the difference is approximately double the standard error, or approximately 2.1 percentage points, and the 95 percent confidence interval for the difference is 6.8 ± 2.1 , or 4.7 to 8.9 percentage points.

The standard error estimation procedure outlined above does not compensate for survey item nonresponse, which is a source of nonsampling error. (Table A1 reflects the maximum number of responses that could be tabulated by demographic characteristics.) For example, of the 10,925 respondents in the 1984 followup survey of 1980 high school graduates, 372, or 3.4 percent, did not respond to the particular question on whether they had ever used a pocket calculator. Item nonresponse varied considerably. A very low nonresponse rate of 0.1 percent was obtained for a question asking whether the respondent had attended a postsecondary institution. A much higher item nonresponse rate of 12.2 percent was obtained for a question asking if the respondent had used a micro or minicomputer in high school. Typical item nonresponse rates ranged from 3 to 4 percent.

The Hispanic analyses presented in this report relied on students' self-identification as members of one of four Hispanic subgroups: Mexican, Mexican-American, Chicano; Cuban; Puerto-Rican, Puertorriqueno, or Boricua; or other Latin American, Latino, Hispanic, or Spanish descent.

An NCES series of technical reports and data file users manuals, available electronically, provides additional information on the survey methodology.

High School Transcript Study Tabulations

The most recent transcript study was in 1998 and was based on a survey conducted as part of the National Assessment of Educational Progress (NAEP). The 1998 study involved analysis of transcripts of approximately 25,000 high school graduates from 264 schools. The study collected information such as course lists, graduation requirements, and the defini-

tion of units of credit and grades, on a school-level basis.

Similar studies were conducted of course-taking patterns of 1982, 1987, 1990, 1992, and 1994. The 1987 data are based on approximately 22,799 transcripts from 433 schools obtained as part of the 1987 High School Transcript Study. The 1982 data are based on approximately 12,000 transcripts collected by the High School and Beyond (HS&B) survey.

Because the 1982 HS&B survey used a different method for identifying handicapped students than did the 1987 and 1990 transcript studies, and in order to make the statistical summaries as comparable as possible, all the counts and percentages in this report are restricted to students whose records indicate that they had not participated in a special education program. This restriction lowers the number of 1990 graduates represented in the tables to 20,866.

Further information on high school transcript studies may be obtained from:

Integrated Postsecondary Education Data System

The Integrated Postsecondary Education Data System (IPEDS) surveys approximately 10,000 postsecondary institutions, including universities and colleges, as well as institutions offering technical and vocational education beyond the high school level. This survey, which began in 1986, replaced the Higher Education General Information Survey (HEGIS).

IPEDS consists of eight integrated components that obtain information on who provides postsecondary education (institutions), who participates in it and completes it (students), what programs are offered and what programs are completed, and both the human and financial resources involved in the provision of institutionally based postsecondary education. Specifically, these components include: Institutional Characteristics, including instructional activity; Fall Enrollment, including age and residence; Enrollment in Occupationally Specific Programs; Completions; Finance; Staff; Salaries of Full-Time Instructional Faculty; and Academic Libraries.

The degree-granting institutions portion of this survey is a census of colleges awarding associate or higher degrees, that were eligible to participate in Title IV financial aid programs. Prior to 1993, data from the technical and vocational institutions were collected through a sample survey. Beginning in

1993, all data are gathered in a census of all postsecondary institutions. The tabulations on "Institutional Characteristics" developed for this edition of the *Digest* are based on lists of all institutions and are not subject to sampling errors.

The definition of institutions generally thought of as offering college and university education has been changed in recent years. The old standard for higher education institutions included those institutions that had courses that led to an associate degree or higher, or were accepted for credit towards those degrees. The higher education institutions were accredited by an agency or association that was recognized by the U.S. Department of Education or recognized directly by the Secretary of Education. Tables that use only this standard are titled "higher education" in the *Digest*. The current category includes institutions which award associate or higher level degrees that are eligible to participate in Title IV federal financial aid programs. Tables that contain any data according to this standard are titled as "degree-granting" institutions. Time-series tables may contain data from both series, and they are labeled accordingly. The impact of this change has generally not been large. For example, tables on faculty salaries and benefits were only affected to a very small extent. Also, degrees awarded at the bachelor's level or higher were not heavily affected. The largest impact has been on private 2-year college enrollment. In contrast, most of the data on public 4-year colleges has been affected only to a minimal extent. The impact on enrollment in public 2-year colleges was noticeable in certain states, but relatively small at the national level. Overall, enrollment for all institutions was about one-half a percent higher for degree-granting institutions compared to the total for higher education institutions.

Prior to the establishment of IPEDS in 1986, HEGIS acquired and maintained statistical data on the characteristics and operations of institutions of higher education. Implemented in 1966, HEGIS was an annual universe survey of institutions accredited at the college level by an agency recognized by the Secretary of the U.S. Department of Education. These institutions were listed in NCES's *Education Directory, Colleges and Universities*.

HEGIS surveys solicited information concerning institutional characteristics, faculty salaries, finances, enrollment, and degrees. Since these surveys were distributed to all higher education institutions, the data presented are not subject to sampling error. However, they are subject to nonsampling error, the sources of which varied with the survey instrument. Information concerning the nonsampling error of the enrollment and degrees surveys draws extensively on the *HEGIS Post-Survey Validation Study* conducted in 1979.

 Washington, DC 20006
 Susan.Broyles@ed.gov
<http://nces.ed.gov/ipeds/>

Institutional Characteristics This survey provides the basis for the universe of institutions presented in the *Directory of Postsecondary Institutions*. The survey collects basic information necessary to classify the institutions including control, level, and kinds of programs; and information on tuition, fees, and room and board charges. Beginning in 2000, the survey collected institutional pricing data from institutions with first-time, full-time, degree/certificate-seeking undergraduate students. Unduplicated full-year enrollment counts and instructional activity are now collected on the Fall enrollment survey. The overall response rate was 95.5 percent for 2001.

 Postsecondary Institutional Studies Program (PSD)
 National Center for Education Statistics
 1990 K Street NW
 Washington, DC 20006
 Patricia.Brown@ed.gov
<http://nces.ed.gov/ipeds/>

Fall Enrollment This survey has been part of the HEGIS and IPEDS series since 1966. The enrollment survey response rate is relatively high. The 1999 overall response rate was 96.9 percent for degree-granting institutions. The imputation method differed for 1999 compared to earlier surveys. For all institutions that did not report in 1999, data from the previous year were used as 1999 estimates. Major sources of nonsampling error for this survey as identified in the 1979 report were classification problems, the unavailability of needed data, interpretation of definitions, the survey due date, and operational errors. Of these, the classification of students appears to have been the main source of error. Institutions had problems in correctly classifying first-time freshmen and other first-time students for both full-time and part-time categories. These problems occurred most often at 2-year institutions (private and public) and private 4-year institutions. In the 1977–78 HEGIS validation studies, the classification problem led to an estimated overcount of 11,000 full-time students and an undercount of 19,000 part-time students. Although the ratio of error to the grand total

was quite small (less than 1 percent), the percentage of errors was as high as 5 percent for detailed student levels and even higher at certain aggregation levels.

Beginning with fall 1986, the survey system was redesigned with the introduction of IPEDS (see above). The survey allows (in alternating years) for the collection of age and residence data. In 2000, the Enrollment survey collected the instructional activity and unduplicated headcount data, which are needed to compute a standardized, full-time equivalent (FTE) enrollment statistic for the entire academic year. Starting in 2001, unduplicated headcount by level of student, and by race/ethnicity and gender of student will also be requested, as will total number of students in the entering class.

Frank Morgan
 Postsecondary Institutional Studies Program (PSD)
 National Center for Education Statistics
 1990 K Street NW
 Washington, DC 20006
 Frank.Morgan@ed.gov
<http://nces.ed.gov/ipeds/>

Salaries, Tenure, and Fringe Benefits of Full-Time Instructional Faculty This institutional survey has been conducted for most years from 1966–67 to 1987–88, and annually since 1989–90. Although the survey form changed a number of times during those years, only comparable data are presented in this report.

Between 1966–67 and 1985–86 this survey differed from other HEGIS surveys in that imputations were not made for nonrespondents. Thus, there is some possibility that the salary averages presented in this report may differ from the results of a complete enumeration of all colleges and universities. Beginning with the surveys for 1987–88, the IPEDS data tabulation procedures included imputations for survey nonrespondents. The response rate for the 1998–99 survey was 95.5 percent for degree-granting institutions. Because of the higher response rate for public colleges, it is probable that the public colleges' salary data are more accurate than the data for private colleges. Although data from these surveys are not subject to sampling error, sources of nonsampling error may include computational errors and misclassification in reporting and processing. NCES reviews individual colleges' data for internal and longitudinal consistency and contacts the colleges to check inconsistent data.

Further information may be obtained from:

Susan Broyles
 Postsecondary Institutional Studies Program (PSD)
 National Center for Education Statistics
 1990 K Street NW
 Washington, DC 20006
 Susan.Broyles@ed.gov
<http://nces.ed.gov/ipeds/>

Completions This survey was part of the HEGIS series throughout its existence. However, the degree classification taxonomy was revised in 1970–71, 1982–83, and 1991–92. Collection of degree data has been maintained through the IPEDS system.

Though information from survey years 1970–71 through 1981–82 is directly comparable, care must be taken if information before or after that period is included in any comparison. Degrees-conferred trend tables arranged by the 1991–92 classification are included in the *Digest* to provide consistent data from 1970–71 to the most recent year. Data in this edition on associate and other formal awards below the baccalaureate, by field of study, cannot be made comparable with figures prior to 1982–83. The non-response rate did not appear to be a significant source of nonsampling error for this survey. The return rate over the years has been high, with the degree-granting institutions response rate for the 1999–2000 survey at 96.7 percent. The overall response rate for the nondegree granting institutions was 84.4 percent in 1999–2000. Because of the high return rate for the degree-granting institutions, nonsampling error caused by imputation is also minimal.

The major sources of nonsampling error for this survey were differences between the NCES program taxonomy and taxonomies used by the colleges, classification of double majors, operational problems, and survey timing. In the 1979 HEGIS validation study, these sources of nonsampling contributed to an error rate of 0.3 percent overreporting of bachelor's degrees and 1.3 percent overreporting of master's degrees. The differences, however, varied greatly among fields. Over 50 percent of the fields selected for the validation study had no errors identified. Categories of fields that had large differences were business and management, education, engineering, letters, and psychology. It was also shown that differences in proportion to the published figures were less than 1 percent for most of the selected fields that had some errors. Exceptions to these were: master's and Ph.D. programs in labor and industrial relations (20 percent and 8 percent); bachelor's and master's programs in art education (3 percent and 4 percent); bachelor's and Ph.D. programs in business and commerce, and in distributive education (5 percent and 9 percent); master's programs

in philosophy (8 percent); and Ph.D. programs in psychology (11 percent).

 National Center for Education Statistics
 1990 K Street NW
 Washington, DC 20006
 Frank.Morgan@ed.gov
<http://nces.ed.gov/ipeds/>

Financial Statistics This survey was part of the HEGIS series and has been continued under the IPEDS system. Changes were made in the financial survey instruments in fiscal years (FY) 1976, 1982, and 1987. The FY 76 survey instrument contained numerous revisions to earlier survey forms and made direct comparisons of line items very difficult. Beginning in FY 82, Pell Grant data were collected in the categories of federal restricted grants and contracts revenues and restricted scholarships and fellowships expenditures. The introduction of IPEDS in the FY 87 survey included several important changes to the survey instrument and data processing procedures. While these changes were significant, considerable effort has been made to present only comparable information on trends in this report and to note inconsistencies. Finance tables for this publication have been adjusted by subtracting the largely duplicative Pell Grant amounts from the later data to maintain comparability with pre-FY 82 data.

Possible sources of nonsampling error in the financial statistics include nonresponse, imputation, and misclassification. The response rate has been about 85 to 90 percent for most of the years. The response rate for the FY 97 survey was 95.1 percent for degree-granting institutions

Two general methods of imputation were used in HEGIS. If the prior year's data were available for a nonresponding institution, these data were inflated using the Higher Education Price Index and adjusted according to changes in enrollments. If no previous year's data were available, current data were used from peer institutions selected for location (state or region), control, level, and enrollment size of institution. In most cases estimates for nonreporting institutions in IPEDS were made using data from peer institutions.

Beginning with FY 87, the IPEDS survey system included all postsecondary institutions, but maintained comparability with earlier surveys by allowing 2- and 4-year institutions to be tabulated separately. For FY 87 through FY 91, in order to maintain comparability with the historical time series of HEGIS institutions, data were combined from two of the three different survey forms that make up the IPEDS sur-

vey system. The vast majority of the data were tabulated from form 1, which was used to collect information from public and private not-for-profit 2- and 4-year colleges. Form 2, a condensed form, was used to gather data for the 2-year for-profit institutions. Because of the differences in the data requested on the two forms, several assumptions were made about the form 2 reports so that their figures could be included in the degree-granting institutions totals.

In IPEDS, the form 2 institutions were not asked to separate appropriations from grants and contracts, nor state from local sources of funding. For the form 2 institutions, all the federal revenues were assumed to be federal grants and contracts, and all of the state and local revenues were assumed to be restricted state grants and contracts. All other form 2 sources of revenue, except for tuition and fees and sales and services of educational activities, were included under "other." Similar adjustments were made to the expenditure accounts. The form 2 institutions reported instruction and scholarship and fellowship expenditures only. All other educational and general expenditures were allocated to academic support.

To reduce reporting error, NCES uses national standards for reporting finance statistics. These standards are contained in *College and University Business Administration: Administrative Services (1974 Edition)*, and the *Financial Accounting and Reporting Manual for Higher Education (1990 Education)*, published by the National Association of College and University Business Officers; *Audits of Colleges and Universities* (as amended August 31, 1974), by the American Institute of Certified Public Accountants; and *HEGIS Financial Reporting Guide (1980)*, by NCES. Wherever possible, definitions and formats in the survey form are consistent with those in these four accounting texts.

Further information on IPEDS Financial Statistics surveys may be obtained from:

Postsecondary Institutional Studies Program (PSD)
National Center for Education Statistics
1990 K Street NW
Washington, DC 20006
Sabrina.Ratchford@ed.gov
<http://nces.ed.gov/ipeds/>

Staff The fall staff data presented in this publication were collected by NCES, through the IPEDS system, which collected data from postsecondary institutions, including all 2- and 4-year degree-granting education institutions. The NCES collects staff data biennially in odd numbered years from institutions of postsecondary education.

The "Fall Staff" questionnaires were mailed out by NCES in August; the respondents reported the em-

ployment statistics in their institution that cover the payroll period in the fall of the survey year. The "Fall Staff, 1999" survey had an overall response rate of 94.8 percent for degree-granting institutions. Imputations for 1999 differed from earlier methods. For all institutions that did not respond to the survey, data from the 1997 survey were used as estimates for fall 1999.

Internet Access in Public Schools and Classrooms

The Internet Access in Public Schools and Classrooms study is part of the National Center for Education Statistics Fast Response Survey System (FRSS). The FRSS was established in 1985 to collect issue-oriented data quickly with minimum response burden. It was designed to meet the data needs of the U.S. Department of Education analysts, planners, and decisionmakers when information could not be collected quickly enough through traditional NCES surveys.

The Internet survey was designed to assess the federal government's commitment to assist every school and classroom in connecting to the Internet by the year 2000. In 1994, NCES began surveying approximately 1,000 public schools each year about their access to the Internet, access in classrooms, and since 1996, their type of Internet connections. In 2000, questions were asked about access to the Internet at times outside of regular school hours and on "acceptable use policies." All estimates are based on samples and are subject to sampling variability.

Further information on Internet access in public schools and classrooms may be obtained from:

Edith McArthur
Data Development Program (ECICSD)

Library Statistics Program

Nationwide, public library statistics are collected using the Public Libraries Survey and disseminated annually through the Federal-State Cooperative System for public library data (FSCS). Descriptive statis-

tics are produced for nearly 9,000 public libraries. The Public Libraries Survey includes information about staffing; operating income and expenditures; type of governance; type of administrative structure; size of collection; and service measures, such as, reference transactions, public service hours, inter-library loans, circulation, and library visits. In FSCS, respondents supply the information electronically, and data are edited and tabulated in machine-readable form.

The respondents are 8,946 public libraries identified in the 50 states and the District of Columbia by state library agencies. At the state level, FSCS is administered by State Data Coordinators, appointed by the Chief Officer of each State Library Agency. The State Data Coordinator collects the requested data from local public libraries and submits these data to NCES. An annual training conference sponsored by NCES is provided for the State Data Coordinators. A steering committee representing State Data Coordinators and other public library constituents is active in the development of FSCS data elements and software. Technical assistance to states is provided by phone and in person by the FSCS steering committee and by NCES staff and contractors. All 50 states and the District of Columbia have submitted data that are available for individual public libraries and are also aggregated to state and national levels.

Since 1990, data have been collected electronically. The most recent software is called DECPLUS. It includes identifying information on all known public libraries and their outlets, some state libraries, and some library systems and cooperatives. Beginning in 1994, this resource was available for drawing samples for special surveys on such topics as literacy, access for the disabled, and library construction.

Under the Academic Libraries Survey (ALS), NCES surveyed academic libraries on a 3-year cycle between 1966 and 1988. Since 1988, ALS has been a component of the Integrated Postsecondary Education Data System and is on a 2-year cycle. ALS provides data on about 3,500 academic libraries. In aggregate, these data provide an overview of the status of academic libraries nationally and statewide. Beginning in 1996, libraries were asked about electronic services including, electronic catalogs that include the libraries' holdings, Internet access, and electronic full-text periodicals. The survey collects data on the libraries in the entire universe of degree-granting institutions. ALS produces descriptive statistics on academic libraries in postsecondary institutions in the 50 states, the District of Columbia, and the outlying areas.

The School Library Statistics Survey collected data on school libraries/media centers in 1990–91 and 1993–94. This survey asked questions on libraries in public and private schools as part of the Schools and

Staffing Survey (SASS). These questionnaires were revised and a sample survey of about 7,600 schools was conducted during school year 1993–94. The library components of the 1990–91 SASS include: number of students served and number of professional staff and aides; at the district level, number of full-time equivalent librarians/media specialists, vacant positions, positions abolished, and approved positions; and amount of librarian input in establishing curriculum. The 1993–94 survey was much more extensive and added questions concerning media centers and collections of libraries.

National Adult Literacy Survey

The National Adult Literacy Survey (NALS) was created as a new measure of literacy and funded by the U.S. Department of Education and by 12 states. It is the third and largest assessment of adult literacy funded by the federal government. The aim of the survey is to profile the English literacy of adults in the United States based on their performance across a wide array of tasks that reflect the types of materials and demands they encounter in their daily lives.

To gather the information on adults' literacy skills, trained staff interviewed nearly 13,600 individuals aged 16 and older during the first 8 months of 1992. These participants had been randomly selected to represent the adult population in the country as a whole. Black and Hispanic households were oversampled to ensure reliable estimates of literacy proficiencies, and to permit analyses of the performance of these subpopulations. In addition, some 1,100 inmates from 80 federal and state prisons were interviewed to gather information on the proficiencies of the prison population. In total, over 26,000 adults were surveyed.

Each survey participant was asked to spend approximately an hour responding to a series of diverse literacy tasks, as well as questions about his or her demographic characteristics, educational background, reading practices, and other areas related to literacy. Based on their responses to the survey tasks, adults received proficiency scores along three scales which reflect varying degrees of skill in prose, document, and quantitative literacy. The results of

the survey were published in a report, *Adult Literacy in America*, in September 1993.

National Assessment of Educational Progress

The National Assessment of Educational Progress (NAEP) is a series of cross-sectional studies designed and initially implemented in 1969. NAEP has gathered information about selected levels of educational achievement across the country. NAEP has surveyed the educational attainments by age and grade (9-, 13-, and 17-year-olds, and 4th-, 8th-, and 12th-graders), and young adults (ages 25 to 35), in 10 learning areas. NAEP administers two different types of tests, national and state NAEP. At the national level, NAEP is divided into two assessments: the main NAEP and the long-term trend NAEP.

NAEP long-term trend assessments are designed to give information on the changes in the basic achievement of America's youth. Nationally representative samples of students have been assessed in science, mathematics, and reading at ages 9, 13, and 17 since the early 1970s. Students have been assessed in writing at grades 4, 8, and 11 since 1984. To measure trends accurately, assessment items (mostly multiple choice) and procedures have remained unchanged since the first assessment in each subject. Recent trend assessments were conducted in 1994, 1996, and 1999. About 30,000 students took part in the 1996 trend assessment. Results are reported as average scores for the nation, regions, and for various subgroups of the population such as race and ethnic groups. Data from the trend assessments are available in the most recent report, *NAEP 1999 Trends in Academic Progress*.

In the main national NAEP, a nationally representative sample of students is assessed at grades 4, 8, and 12 in various academic subjects. The assessments change periodically and are based on frameworks developed by the National Assessment Governing Board (NAGB). Items include both multiple-choice and "constructed-response" (requiring written answers). Results are reported in two ways. Average scores are reported for the nation, participating states and jurisdictions, and for subgroups of the population. In addition, the percent of students at or above the basic, proficient, and advanced achieve-

ment levels are reported for these same groups. The achievement levels are developed by NAGB.

Since 1990, main NAEP has also been conducted for states and other jurisdictions that choose to participate (47 participated in 1996). Because the national NAEP samples were not, and are not currently, designed to support the reporting of accurate and representative state-level results, separate representative samples of students are selected for each participating jurisdiction. State data are usually available at grades 4 and/or 8, and may not include all subjects assessed in the national-level assessment. In 1994, for example, NAEP assessed reading, geography, and history at the national level at grades 4, 8, and 12 (only reading at grade 4 was assessed at the state level, however). In 1996, mathematics and science were assessed nationally at grades 4, 8, 12. In the states, mathematics was assessed at grades 4 and 8, and science was assessed at grade 8 only. In 1997, the arts were assessed at the national level at grade 8. Reading and writing were assessed in 1998 at the national level for grades 4, 8, and 12, and state levels for grades 4 and 8. Civics was assessed at the national level, as well. These assessments generally involve about 130,000 students at the national and state levels.

The assessment data presented in this publication were derived from tests designed and conducted by the Education Commission of the States (1969–1983) and by the Educational Testing Service (1983 to present). Three-stage probability samples have been used. The primary sampling units have been stratified by region and, within region, by state, size of community, and, for the two smaller sizes of community strata, by socioeconomic level. The first stage of sampling entails defining and selecting primary sampling units (PSUs). For each age/grade level (grades 4, 8, and 12) the second stage entails enumerating, stratifying, and randomly selecting schools, both public and private, within each PSU selected at the first stage. The third stage involves randomly selecting students within a school for participation in NAEP. Assessment exercises have been administered either to individuals or to small groups of students by specially trained personnel.

Sample sizes for the reading proficiency portion of the 1999 NAEP long-term trends study were: 5,793 for the 9-year-olds, 5,933 for the 13-year-olds, and 5,288 for the 17-year-olds. Response rates were 94 percent, 92 percent, and 80 percent, respectively. Response rates for earlier years (1970–71, 1974–75, and 1979–80) were generally lower. For example, the lowest response rate for the 9-year-olds was 88 percent in 1974–75, and the lowest response rate overall was 70 percent for the 17-year-olds in 1974–75.

Sample sizes in math and science portions of the 1999 long-term trends were: 6,032 9-year-olds, 5,941 13-year-olds, and 3,795 17-year-olds. Response rates were 94, 93, and 81 percent, respectively.

Assessments focusing on particular subject areas are conducted separately from long-term assessments. The 2000 mathematics assessment was administered to 13,511 4th-graders, 15,694 8th-graders, and 13,432 12th-graders. The response rates were: 96 percent for 4th-graders, 92 percent for 8th-graders, and 77 percent for 12th-graders.

The 2000 reading assessment was administered to 7,914 4th-graders. The response rate was 96 percent.

The 1997–98 writing assessment was administered to 19,816 4th-graders, 20,586 8th-graders, and 19,505 12th-graders. Student response rates for the 1997–98 writing assessment were 95 percent for the 4th-graders, 92 percent for the 8th-graders, and 80 percent for the 12th-graders.

In 1995–96, a science assessment was administered to 7,305 4th-graders, 7,774 8th-graders, and 7,537 12th-graders. The response rates were 94 percent for the 4th-graders, 94 percent for the 8th-graders, and 93 percent for the 12th-graders.

The 1993–94 geography assessment was administered to 5,507 4th-graders, 6,878 8th-graders, and 6,234 12th-graders. The response rates for the assessment were 93 percent for the 4th-graders, 93 percent for the 8th-graders, and 90 percent for the 12th-graders.

In 1990, representative state-level data were produced for mathematics at the 8th-grade level. This was the first time NAEP had produced data on a state-by-state level. In 2000, state-level assessments were conducted in 4th- and 8th-grade mathematics and science.

Information from NAEP is subject to both nonsampling and sampling error. Two possible sources of nonsampling error are nonparticipation and instrumentation. Certain populations have been oversampled to assure samples of sufficient size for analysis. Instrumentation nonsampling error could result from failure of the test instruments to measure what is being taught and, in turn, what is being learned by the students.

National Education Longitudinal Study of 1988

The National Education Longitudinal Study of 1988 (NELS:88) is the third major secondary school student longitudinal study sponsored by the National Center for Education Statistics. The two studies that preceded NELS:88, the National Longitudinal Study of the High School Class of 1972 (NLS-72) and High School and Beyond (HS&B) in 1980, surveyed high school seniors (and sophomores in HS&B) through high school, postsecondary education, and work and family formation experiences. Unlike its predecessors, NELS:88 begins with a cohort of 8th-grade students. In 1988, some 25,000 8th-graders, their parents, their teachers, and their school principals were surveyed. Followups were conducted in 1990, 1992, and 1994, when a majority of these students were in 10th and 12th grades, and then 2 years after their scheduled high school graduation. A fourth followup was conducted in 2000.

NELS:88 is designed to provide trend data about critical transitions experienced by young people as they develop, attend school, and embark on their careers. It complements and strengthens state and local efforts by furnishing new information on how school policies, teacher practices, and family involvement affect student educational outcomes (i.e., academic achievement, persistence in school, and participation in postsecondary education). For the base year, NELS:88 includes a multifaceted student questionnaire, four cognitive tests, a parent questionnaire, a teacher questionnaire, and a school questionnaire.

In 1990, when the students were in 10th grade, the students, school dropouts, their teachers, and their school principals were surveyed. The 1988 survey of parents was not a part of the 1990 followup. In 1992, when most of the students were in 12th grade, the second followup conducted surveys of students, dropouts, parents, teachers, and school principals. Also, information from the students' transcripts were collected. Tables A3 and A4 present the respondent counts and design effects of NELS:88 and the 1990 and 1992 followups.

Further information on NELS:88 may be obtained from:

National Household Education Survey

The National Household Education Survey (NHES) is a data collection system that is designed to ad-

dress a wide range of education-related issues. Surveys were conducted in 1991, 1993, 1995, 1996, 1999, and 2001.

NHES targets specific populations for detailed data collection. It is intended to provide more detailed data on the topics and populations of interest than are collected through supplements to other household surveys.

The topics addressed by NHES:91 were early childhood education and adult education. About 60,000 households were screened for NHES:91. In the Early Childhood Education component, about 14,000 parents/guardians of 3- to 8-year olds completed interviews about their children's early educational experiences. Included in this component were participation in nonparental care/education, care arrangements and school, and family, household, and child characteristics. In the NHES:91 Adult Education component, about 9,800 persons 16 years of age and older, identified as having participated in an adult education activity in the previous 12 months, were questioned about their activities. Data were collected on programs and up to four courses, including the subject matter duration, sponsorship, purpose, and cost. Information on the household and the adult's background and current employment also was collected. In the NHES:95 survey, 23,969 adults were sampled for the adult education component and 80 percent (19,722) completed the interview.

In NHES:93, nearly 64,000 households were screened. Approximately 11,000 parents of 3- to 7-year-olds completed interviews for the School Readiness component. Topics included were the developmental characteristics of preschoolers, school adjustment and teacher feedback to parents for kindergartners and primary students, center-based program participation, early school experiences, home activities with family members, and health status. In the School Safety and Discipline component, about 12,700 parents of children in grades 3 through 12, and about 6,500 youth in grades 6 through 12, were interviewed about their school experiences. Topics included the school learning environment, discipline policy, safety at school, victimization, the availability and use of alcohol/drugs, and alcohol/drug education. Peer norms for behavior in school and substance use were also included in this topical component. Extensive family and household background information was collected, as well as characteristics of the school attended by the child.

In NHES:95 survey, the Early Childhood Program participation component and the Adult Education component were similar to those in 1991. In the Early Childhood component, about 14,000 parents of children from birth to third grade were interviewed. For the Adult Education component, about 19,500 civilian adults were interviewed.

In the spring of 1996, Parent and Family Involvement in education and Civic Involvement were covered. For the Parent and Family Involvement component, nearly 21,000 parents of children grades 3 to 12 were interviewed. For the Civic Involvement component, about 8,000 youth grades 6 to 12, about 9,000 parents, and about 2,000 adults were interviewed. The 1996 survey also addressed public library use. Adults in almost 55,000 households were interviewed to support state-level estimates of household public library use.

NHES:99 collected end-of-decade estimates of key indicators from the surveys conducted throughout the 1990s. Approximately 60,000 households were screened for a total of about 40,000 interviews with parents of children from birth through 12th grade, and adults aged 16 or older not enrolled in grade 12 or below. Key indicators included participation of children in nonparental care and early childhood programs, school experiences, parent/family involvement in education at home and at school, youth community service activities, plans for future education, and adult participation in educational activities and community service.

NHES:2001 repeated data collection of prior surveys on Early Childhood Program Participation and Adult Education. The Before- and After School Program and Activities survey was a new collection focusing on children from kindergarten to 8th-grade.

National Longitudinal Study of the High School Class of 1972

The National Longitudinal Study of the high school class of 1972 (NLS:72) began with the collection of base-year survey data from a sample of about 19,000 high school seniors in the spring of 1972. Five more followup surveys of these students were conducted in 1973, 1974, 1976, 1979, and 1986. NLS:72 was designed to provide the education community with information on the transitions of young adults from high school through postsecondary education and the workplace.

In addition to the followups, a number of supplemental data collection efforts were undertaken. For example, a Postsecondary Education Transcript Study (PETS) was undertaken in 1984, and the fifth

followup survey in 1986 included a supplement for those who became teachers.

The sample design for the NLS:72 was a stratified, two-stage probability sample of 12th-grade students from all schools, public and private, in the 50 states and the District of Columbia during the 1971–72 school year. During the first stage of sampling, about 1,070 schools were selected for participation in the base-year survey. As many as 18 students were selected at random from each of the sample schools. The size of both the school and student samples were increased during the first followup survey. Beginning with the first followup and continuing through the fourth followup, about 1,300 schools participated in the survey and slightly under 23,500 students were sampled. The response rates for each of the different rounds of data collection have been 80 percent or higher.

Sample retention rates across the survey years have been quite high. For example, of the individuals responding to the base-year questionnaire, the percentages who responded to the first, second, third, and fourth followup questionnaires were about 94, 93, 89, and 83 percent, respectively.

Further information on NLS:72 may be obtained from:

National Postsecondary Student Aid Study

The National Postsecondary Student Aid Study (NPSAS) is a comprehensive nationwide study of how students and their families pay for postsecondary education. It covers national representative samples of undergraduates, graduates, and first-professional students, including students attending less than 2-year institutions, 2- to 3-year schools, 4-year colleges, and major universities. Participants included students who do not receive aid and their parents, as well as students who do receive financial aid and their parents. Study results are used to help determine future federal policy regarding student financial aid. The study was conducted every 3 years. Beginning in 1999–2000, the survey will be conducted every 4 years.

The first NPSAS was conducted during the 1986–87 school year. Data were gathered from about 1,074 colleges, universities, and other postsecondary institutions; 60,000 students; and 14,000 parents. These data provided information on the cost of post-

secondary education, the distribution of financial aid, and the characteristics of both aided and nonaided students and their families.

As a part of NPSAS:93, information on 77,000 undergraduates and graduate students enrolled during the school year was collected at 1,000 postsecondary institutions. The sample included students enrolled at any time between July 1, 1992 and June 30, 1993. About 66,000 students and a subsample of their parents were interviewed by telephone. NPSAS:96 contains information on more than 48,000 undergraduate and graduate students from 973 postsecondary institutions. Students were enrolled at any time during the 1995–96 school year.

Further information on NPSAS may be obtained from:

National Study of Postsecondary Faculty

This study is in response to a continuing need for data on faculty and instructors—persons who directly affect the quality of education in postsecondary institutions. They often determine curriculum content, student performance standards, and the quality of students' preparation for careers. Faculty members perform important research and development work and perform public service activities. The National Study of Postsecondary Faculty (NSOPF) was designed to provide data about faculty to postsecondary researchers, planners, and policymakers. NSOPF is the most comprehensive study of faculty in postsecondary educational institutions ever undertaken.

The first cycle of NSOPF was conducted by the National Center for Education Statistics (NCES) with support from the National Endowment for the Humanities (NEH) in 1987–88 (NSOPF:88) with a sample of 480 colleges and universities, over 3,000 department chairpersons, and over 11,000 instructional faculty. The second cycle of NSOPF was conducted by NCES with support from NEH and the National Science Foundation (NSF) in 1992–93 (NSOPF:93). NSOPF:93 was limited to surveys of institutions and faculty, but with a substantially expanded sample of 974 colleges and universities, and 31,354 faculty and instructional staff. NSOPF:99 included 960 degree-granting postsecondary institutions and approximately 18,000 faculty and instructional staff questionnaires were completed.

Further information on NSOPF may be obtained from:

Projections of Education Statistics

Since 1964, NCES has published projections of key statistics for elementary and secondary schools and institutions of higher education. These projections include statistics such as enrollments, instructional staff, graduates, earned degrees, and expenditures. The *Projections* reports include several alternative projection series and a methodology section describing the techniques and assumptions used to prepare them. Data in this edition of the *Digest* reflect the middle alternative projection series.

Differences between the reported and projected values are, of course, almost inevitable. An evaluation of past projections revealed that, at the elementary and secondary level, projections of enrollments have been quite accurate: mean absolute percentage differences for enrollment were less than 1 percent for projections from 1 to 5 years in the future, while those for teachers were less than 4 percent. At the higher education level, projections of enrollment have been fairly accurate: mean absolute percentage differences were 5 percent or less for projections from 1 to 5 years into the future.

Further information on *Projections of Education Statistics* may be obtained from:

Public School Kindergarten Teachers' Views on Children's Readiness for School

This sample survey of 1,448 public school kindergarten teachers was conducted as part of a national early childhood assessment system for National Education Goal One: "By the year 2000, all American children will start school ready to learn." The survey obtained data on kindergarten teachers' views of children's readiness and on the teachers' classroom practices.

Further information on *Public School Kindergarten Teachers' Views on Children's Readiness for School* may be obtained from:

 Washington, DC 20006
 Shelley.Burns@ed.gov
www.nces.ed.gov/surveys/frss/

Public School Principal Survey on Safe, Disciplined, and Drug-Free Schools

This sample survey used the NCES Fast Response Survey System (FRSS), which is designed to gather timely information for policymakers. The survey was conducted in 1991 by Westat, Inc. A national sample of 830 public school principals, represented by a response rate of 94 percent, answered questions regarding the extent of discipline problems within their schools. They were also questioned about the nature and effectiveness of their schools' current policies and drug education programs.

This survey categorized principals by instructional level (elementary, secondary), type of school location (city, urban fringe, town, rural), enrollment size (less than 300, 300 to 999, 1,000 or more), region (Northeast, Central, Southeast, and West), and percentage of students receiving free or reduced-price lunches (10 percent or less, 11 to 40 percent, 41 percent or more).

Further information on *Public School Principal Survey on Safe, Disciplined, and Drug-Free Schools* may be obtained from:

Shelley Burns
 Data Development Program (ECICSD)
 National Center for Education Statistics

Survey of Recent College Graduates

Since 1976, NCES has conducted six surveys of baccalaureate and master's degree recipients 1 year after graduation. The Recent College Graduates (RCG) surveys have concentrated on those graduates entering the teaching profession. The surveys link major field of study with outcomes such as whether the respondent entered the labor force or was seeking additional education. Data on labor force includes employment status (unemployed, part-time or full-time employed), occupation, salary, career potential, relation to major field of study, and need for a college degree. To obtain accurate results on teachers, graduates with a major in education

were oversampled. The latest two surveys continued to oversample education majors, but increased the sampling of graduates with majors in other fields.

The survey involved a two-stage sampling procedure. First, the universe of institutions awarding bachelor's and master's degrees was stratified by number or percentage of degrees awarded to education graduates and by control of institution (public or private). A sample of institutions within each stratum was then selected. Second, for each of the selected institutions, a list of their graduates by major field of study was obtained and a sample of graduates was drawn by major field of study. Graduates in certain major fields of study (e.g., education, mathematics, physical sciences) were sampled at higher rates than graduates in other fields. Roughly 1 year after graduation, the sample of graduates was located, contacted by mail or telephone, and asked to respond to the questionnaire.

The locating process was more detailed than in most surveys. Nonresponse rates were directly related to the time, effort, and resources used in locating graduates, rather than to graduates' refusals to participate. Despite the difficulties in locating graduates, response rates for recent studies are comparable to studies without locating problems.

The 1976 survey of 1974–75 college graduates was the first, and smallest of the series. The sample consisted of 211 schools, of which 200 (96 percent) responded. Of the 5,854 graduates in the sample, 4,350 responded, for a response rate of 79 percent.

The 1981 survey was somewhat larger, with a coverage of 297 institutions and 15,852 graduates. Responses were obtained from 283 institutions, for an institutional response rate of 95 percent, and from 9,312 graduates (716 others were determined to be out of scope), for a response rate of 74 percent.

The 1985 survey sampled 404 colleges and 18,738 graduates of whom 17,853 were found to be in scope. Responses were obtained from 13,200 students, for a response rate of 78 percent. The response rate for the colleges was 98 percent. The 1987 survey form was sent to 21,957 graduates. Responses were received from 16,878, for a response rate of 79.7 percent.

RCG:91 involved a sample of 18,135 graduates of 400 bachelor's and master's degree-granting institutions. The 18,135 graduates consisted of 16,172 bachelor's degrees recipients and 1,963 master's degree recipients receiving diplomas between July 1, 1989 and June 30, 1990. Random samples of graduates were selected from lists stratified by field of study. Graduates in education, mathematics, and the physical sciences were sampled at a higher rate, as were minority graduates to provide a sufficient number of these graduates for analysis purposes. The graduates included in the sample were selected in

proportion to the institution's number of graduates. The institutional response rate was 95 percent and the graduate response rate was 83 percent.

Table A5 contains sample sizes for number of graduates, by field, for the 1976, 1981, 1985, 1987, and 1991 surveys.

This survey system has been replaced by a new data collection entitled *Baccalaureate and Beyond Longitudinal Study* (see listing above).

Schools and Staffing Survey

The Schools and Staffing Survey (SASS) is a set of linked questionnaires that covers public school districts, public and private schools, principals, and teachers as its core components. SASS was first conducted for the National Center for Education Statistics by the Bureau of the Census during the 1987–88 school year. SASS subsequently was conducted in 1990–91, 1993–94, and 1999–2000. SASS data are reported through a mail questionnaire with telephone followup. SASS collects data on the nation's public and private elementary and secondary teaching force, characteristics of schools and school principals, demand for teachers, and school/school district policies. The 1990–91, 1993–94, and 1999–2000 SASS also obtained data on Bureau of Indian Affairs (BIA) or tribally run schools. For the first time, SASS, 1999–2000 included the entire universe of charter schools known to be in operation during 1998–99. SASS data are collected through a sample survey of schools, the school districts associated with sampled schools, school principals, school library/media centers, and teachers.

Both the 1993–94 and 1999–2000 SASS estimates are based upon a sample consisting of approximately 9,900 public schools, 3,600 private schools, and 5,500 public school districts associated with the public schools in the sample. From these schools, about 56,000 public school teachers and 10,700 private school teachers were selected for the 1993–94 and 1999–2000 SASS teacher surveys. The 1999–2000 SASS included 1,100 charter schools, and a sample of 4,400 charter school teachers.

The public school sample for the 1999–2000 SASS was based on the 1997–98 school year Common Core of Data (CCD), the compilation of all the nation's public school districts and public schools. CCD

is collected annually from state education agencies. The frame includes regular public schools, Department of Defense-operated military base schools in the United States, and other schools, such as special education, vocational, and alternative schools. SASS is designed to provide national estimates for public and private school characteristics and state estimates for school districts, public schools, principals, and teachers. The teacher survey is designed as well to allow comparisons between new and experienced teachers, and between bilingual/ESL teachers and other teachers.

The private school sample for 1993–94 SASS was selected from the 1991–92 Private School Universe Survey (PSS) (1997–98 PSS for the 1999–2000 SASS), supplemented with list updates from states and some associations available in time for sample selection. PSS collects basic data on all of the nation's private schools from two sources: the list frame and the area search frame. The list frame was compiled from a set of private school associations that provide NCES with their membership lists and states that gather lists of private schools. The area search frame consisted of schools not included on the list frame that were compiled from local sources in a sample of counties around the United States. Private school estimates are available at the national level and by type of private school.

The 1993–94 Teacher Demand and Shortage (TDS) and School Principal Questionnaires were mailed out first in October 1993, along with School Library/Media Center and Library Media Specialist/Librarian Questionnaires. The weighted response rate for the Teacher Demand and Shortage Questionnaire was 93.9 percent. Weighted response rates for the Public School Principal Questionnaire and the Private School Questionnaire were 96.6 percent and 87.6 percent, respectively.

In December 1993, public, private, and BIA school questionnaires were mailed out as part of the 1993–94 SASS. The public, private, and BIA teacher questionnaires were sent out in several batches, between mid-December 1993 and early February 1994. Weighted response rates for the Public School Questionnaire and the Private School Questionnaire were 92.3 percent and 83.2 percent, respectively. Five percent of public schools and 9 percent of private schools did not provide a list of teachers in their schools and were thus ineligible for sampling. Weighted response rates were 88.2 percent for public school teachers and 80.2 percent for private school teachers.

Item response rates were varied, but generally high, ranging from 67 to 100 percent for the 1993–94 TDS, 65 to 100 percent for public school principal questions, 55 to 100 percent for private school principal items, 83 to 100 percent for public school items,

61 to 100 percent for private school survey items, 71 to 100 percent for public school teacher items, and 69 to 100 percent for private school teacher items.

For SASS, 1999–2000, the School District and School Principal Questionnaires were mailed out first in October 1999, along with School Library/Media Center Questionnaires. The unweighted response rate for the School District Questionnaire was 90.6 percent. Unweighted response rates for the Public School Principal Questionnaire, the Private School Principal Questionnaire, and the Charter School Principal Questionnaire were 92.8 percent, 88.6 percent, and 94.6 percent, respectively.

In December 1999, public, private, charter, and BIA school questionnaires were mailed out as part of the 1999–2000 SASS. The public, private, charter, and BIA teacher questionnaires were sent out in several batches, between mid-December 1999 and February 2000. Unweighted response rates for the Public School Questionnaire, the Private School Questionnaire, and the Charter School Questionnaire were 90.0 percent, 79.8 percent, and 86.1 percent, respectively. Seven percent of public schools, 13 percent of private schools, and 9 percent of charter schools did not provide a list of teachers in their schools and were thus ineligible for sampling. Weighted response rates were 83.0 percent for public school teachers, 77.0 percent for private school teachers, and 78.3 percent for charter school teachers.

Public-use data files will be available on CD-ROM (2002 forthcoming). Restricted-use data files are also available to approved, licensed users. Summary data from the 1999–2000 SASS can be found in the forthcoming *Schools and Staffing Survey, 1999–2000: Overview of the Data* (NCES 2002–313). Further information about the sample design may be obtained from the *1999–2000 Schools and Staffing Survey: Sample Design and Estimation* (forthcoming). There also is a methodology report on SASS, *A Quality Profile for SASS, Rounds 1–3: 1987 to 1995* (NCES 2000–308). The SASS homepage at the address below contains updates on the latest publications.

Private School Universe Survey

The purposes of Private School Survey (PSS) data collection activities are: to build an accurate and

complete list of private schools to serve as a sampling frame for NCES sample surveys of private schools; and to report data on the total number of private schools, teachers, and students in the survey universe. The PSS is conducted every 2 years with collections in 1989–90, 1991–92, 1993–94, 1995–96, 1997–98, and 1999–2000 school years. The next survey will be in the 2001–02 school year.

The PSS produces data similar to that of the CCD for the public schools, and can be used for public-private comparisons. The data are useful for a variety of policy and research-relevant issues, such as the growth of religiously affiliated schools, the number of private high school graduates, the length of the school year for various private schools, and the number of private school graduates, the length of the school year for various private schools, and the number of private school students and teachers.

The target population for the universe survey consists of all private schools in the United States that meet NCES criteria of a school (e.g., private school is an institution which provides instruction for any of grades K through 12, has one or more teachers to give instruction, is not administered by a public agency, and is not operated in a private home). The survey universe is composed of schools identified from a variety of sources. The main source is a list frame, initially developed for the 1989–90 PSS. The list is updated regularly matching it with lists provided by nationwide private school associations, state departments of education, and other national guides and sources which list private schools. The other source is an area frame search in approximately 120 geographic areas, conducted by the Bureau of the Census.

The Third International Mathematics and Science Study

The Third International Mathematics and Science Study (TIMSS) is the largest, most comprehensive, and most rigorous international comparison of education ever undertaken. During the 1995 school year, the study tested the mathematics and science knowledge of half a million students from 42 nations at three different grade levels. At the same time, the students, their teachers, and the principals of their schools were asked to respond to questionnaires

about their backgrounds and their attitudes, experiences, and practices in the teaching and learning of mathematics and science. In 1999, the Third International Mathematics and Science Study—Repeat (TIMSS–R) compared the mathematics and science achievement of 8th-graders in 38 countries.

TIMSS is a collaborative research project sponsored by the International Association for the Evaluation of Educational Achievement (IEA). The TIMSS International Study Center is housed in the Center for the Study of Testing, Evaluation, and Educational Policy (CSTEPP) at Boston College. The TIMSS International Study Director, Albert E. Beaton, directs the international activities of the study, together with his staff at the International Study Center.

Other Department of Education Agencies

Office for Civil Rights

Elementary and Secondary Civil Rights Compliance Report (Survey)

The Office for Civil Rights (OCR), U.S. Department of Education, conducts biennial surveys of public school districts and of schools within those districts. Data are obtained on the characteristics of pupils enrolled in public schools throughout the nation. Such information is required under Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and Section 504 of the Rehabilitation Act of 1973 to enable OCR to carry out its compliance responsibilities. The 1990 survey included the 100 largest public school districts, those of special interest (i.e., court order, compliance review), and a stratified random sample of approximately 3,500 districts representing approximately 40,000 schools. School, district, and national data are currently available.

The Office of Special Education and Rehabilitative Services

Annual Report to Congress on the Implementation of the Education of the Handicapped Act

The Individuals with Disabilities Education Act (IDEA), formerly the Education of the Handicapped Act (EHA), requires the Secretary of Education to transmit to Congress annually, a report describing the progress in serving the nation's disabled children. The annual report contains information on children served by the public schools under the provisions of Part B of the IDEA and for children served in state-operated programs (SOP) for the handicapped under Chapter I of the Elementary and Secondary Education Act (ESEA). Statistics on children receiving special education and related services in various settings and school personnel providing such services are reported in an annual submission of data to the Office of Special Education and Rehabilitative Services (OSERS), by the 50 states, the District of Columbia, and the outlying areas. The child count information is based on the number of disabled children receiving special education and related services on December 1st of each year.

Since each participant in programs for the disabled is reported to OSERS, the data are not subject to sampling error. However, nonsampling error can occur from a variety of sources. Some states follow a noncategorical approach to the delivery of special education services, but produce counts by disabling condition because EHA-B requires it. In those states that do categorize their disabled students, definitions and labeling practices vary.

National Longitudinal Transition Study of Special Education Students

As part of the 1983 amendments to the Education of the Handicapped Act (EHA), Congress requested that the U.S. Department of Education conduct a national longitudinal study of the transition of secondary special education students to determine how they fare in terms of education, employment, and independent living. A 5-year study was mandated, which was to include youth from ages 13 to 21 who were in special education at the time they were selected and who represented all 11 federal disability cat-

egories. Data were drawn from extensive telephone interviews with parents, from school records, and from a survey of educators in secondary schools attended by youth in the study.

The study was conducted by SRI International and began in April, 1987. The National Transition Study involves a nationally representative sample of more than 8,000 secondary-age youth with disabilities. A sample of 450 school districts was randomly selected from the universe of approximately 14,000 school districts serving secondary special education students. An additional replacement sample of 176 additional districts was selected due to a low rate of agreement to participate from the initial group of districts. Participation in the study was invited from the approximately 80 special schools serving secondary-age deaf, blind, and deaf-blind schools. A total of approximately 300 school districts and 25 special schools agreed to have youth selected for the study.

Other Governmental Agencies

Bureau of the Census

Current Population Survey

Current estimates of school enrollment rates, as well as social and economic characteristics of students, are based on data collected in the Census Bureau's monthly household survey of about 50,000 dwelling units. The monthly Current Population Survey (CPS) sample consists of 754 areas comprising 2,007 geographic areas, independent cities, and minor civil divisions throughout the 50 states and the District of Columbia. The samples are initially selected based on the decennial census files and are periodically updated to reflect new housing construction.

The monthly CPS deals primarily with labor force data for the civilian noninstitutional population (i.e., excluding military personnel and their families living on post and inmates of institutions). In addition, in October of each year, supplemental questions are asked about highest grade completed, level and grade of current enrollment, attendance status, number and type of courses, degree or certificate objective, and type of organization offering instruction for each member of the household. In March of each year, supplemental questions on income are asked.

The responses to these questions are combined with answers to two questions on educational attainment: highest grade of school ever attended, and whether that grade was completed.

The estimation procedure employed for monthly CPS data involves inflating weighted sample results to independent estimates of characteristics of the civilian noninstitutional population in the United States by age, sex, and race. These independent estimates are based on statistics from decennial censuses; statistics on births, deaths, immigration, and emigration; and statistics on the population in the armed services. Generalized standard error tables are provided in the *Current Population Reports*. The data are subject to both nonsampling and sampling errors.

Further information on CPS may be obtained from:

Education and Social Stratification Branch
Population Division
Bureau of the Census
U.S. Department of Commerce
Washington, DC 20233
<http://www.bls.census.gov/cps/cpsmain.htm>

Educational Attainment Data on years of school completed are derived from two questions on the Current Population Survey (CPS) instrument. Formal reports documenting educational attainment are produced by the Bureau of the Census using March CPS results. The latest report is *Educational Attainment in the United States, March 2000, Series P20-536*, which is available from the Government Printing Office.

In addition to the general constraints of CPS, some data indicate that the respondents have a tendency to overestimate the educational level of members of their household. Some inaccuracy is due to a lack of the respondent's knowledge of the exact educational attainment of each household member and the hesitancy to acknowledge anything less than a high school education. Another cause of nonsampling variability is the change in the numbers in the armed services over the years.

Caution should also be used when comparing newer data, which reflect 1990 census-based population controls, with data from March 1993 and earlier years, which reflect 1980 or earlier census-based population controls. This change in population controls had relatively little impact on summary measures such as means, medians, and percentage distributions. It did have a significant impact on levels. For example, use of 1990 based population controls results in about a 1 percent increase in the civilian noninstitutional population and in the number of families and households. Thus, estimates of levels for data collected in 1994 and later years will differ from those for earlier years by more than what could be attributed to actual changes in the population. These

differences could be disproportionately greater for certain subpopulation groups than for the total population.

Examples of the sampling variability in the estimates of educational attainment are given in table A7. For the March 2000 basic CPS, the nonresponse rate was 7.0 percent and for the supplement the nonresponse rate was an additional 8.0 percent for a total supplement nonresponse rate of 14.4 percent.

The figures shown in the table hold for total or white population estimates only. The variability in estimates for subgroups (region, household relationships, etc.) can be estimated using the tables presented in *Current Population Reports*. Further information on the Current Population Survey may be obtained from the CPS Web Site at: <http://www.bls.census.gov/cps/cpsmain.htm>

Education and Social Stratification Branch
Bureau of the Census
U.S. Department of Commerce
Washington, DC 20233
<http://www.census.gov/population/www/socdemo/educ-attn.html>

School Enrollment Each October, the Current Population Survey (CPS) includes supplemental questions on the enrollment status of the population 3 years old and over, in addition to the monthly basic survey on labor force participation. The main sources of nonsampling variability in the responses to the supplement are those inherent in the survey instrument. The question of current enrollment may not be answered accurately for various reasons. Some respondents may not know current grade information for every student in the household, a problem especially prevalent for households with members in college or in nursery school. Confusion over college credits or hours taken by a student may make it difficult to determine the year in which the student is enrolled. Problems may occur with the definition of nursery school (a group or class organized to provide educational experiences for children), where respondents' interpretations of "educational experiences" vary.

The 2000 CPS sample was selected from the 1990 Decennial Census files with coverage in all 50 states and the District of Columbia. The sample is continually updated to account for new residential construction. The United States was divided into 2,007 geographic areas. In most states, a geographic area consisted of a county or several contiguous counties. In some areas of New England and Hawaii, minor civil divisions are used instead of counties. A total of 754 geographic areas were selected for sample. About 50,000 occupied households are eligible for

interview every month. Interviewers are unable to obtain interviews at about 3,200 of these units. This occurs when the occupants are not found at home after repeated calls or are unavailable for some other reason. For the October 2000 basic CPS, the non-response rate was 6.8 percent, and for the school enrollment supplement the nonresponse rate was an additional 3.1 percent for a total supplement non-response rate of 9.7 percent. Examples of sampling variability in the estimates of school enrollment rates are given in table A6.

Further information on CPS methodology may be obtained from:

<http://www.bls.census.gov/cps/cpsmain.htm>

Further information on CPS "School Enrollment" may be obtained from:

Education and Social Stratification Branch
Bureau of the Census

Washington, DC 20233

<http://www.census.gov/population/www/socdemo/school.html>

Dropouts Each October, the Current Population Survey (CPS) includes supplemental questions on the enrollment status of the population 3 years old and over as part of the monthly basic survey on labor force participation. In addition to gathering the information on school enrollment, with the limitations as noted under "School Enrollment," the survey data permit calculations of dropout rates. Both status and event dropout rates are tabulated from the CPS Survey. The *Digest* provides information using the status rate calculation. Event rates describe the proportion of students who leave school each year without completing a high school program. Status rates provide cumulative data on dropouts among all young adults within a specified age range. Status rates are higher than event rates because they include all dropouts ages 16 through 24, regardless of when they last attended school.

In addition to other survey limitations, dropout rates may be affected by survey coverage and exclusion of the institutionalized population. The incarcerated population has grown more rapidly than the general population, and they have a higher dropout rate than the general population. Dropout rates for the total population might be higher than those for the noninstitutionalized population if the prison and jail populations were included in the dropout rate calculations. On the other hand, the inclusion of military personnel, who tend to be high school graduates, might offset some or all of the impact from the inclusion of the jail and prison population.

Another area of concern with tabulations involving young people in household surveys is the relatively

low coverage ratio compared to older age groups. CPS undercoverage results from missed housing units and missed persons within sample households. Overall CPS undercoverage is estimated to be about 8 percent. CPS undercoverage varies with age, sex, and race. Generally, undercoverage is larger for males than for females and larger for blacks and other races combined than for whites. For example, the undercoverage ratio for black 20- to 29-year-olds males is 34 percent. Ratio estimation to independent age-sex-race-Hispanic population controls partially corrects for the bias due to undercoverage. However, biases exist in the estimates to the extent that missed persons in missed households or missed persons in interviewed households have different characteristics from those of interviewed persons in the same age-sex-race-origin-state group. Further information on CPS methodology may be obtained from:

<http://www.bls.census.gov/cps/cpsmain.htm>

Further information on calculation of dropouts and dropout rates may be obtained from the NCES *Dropout Rates in the United States: 2000* at:

Government Finances

The Census Bureau conducts an annual survey of *Government Finances* as authorized by law under Title 13, United States Code, Section 182. This survey covers the entire range of government finance activities: revenue, expenditure, debt, and assets. Revenues and expenditures comprise actual receipts and payments of a government and its agencies, including government-operated enterprises, utilities, and public trust funds. The expenditure reporting categories comprise all amounts of money paid out by a government and its agencies with the exception of amounts for debt retirement and for loan, investment, agency, and private trust transactions.

Most of the federal government statistics are based on figures that appear in *The Budget of the United States Government*. Since the classification used by the Census Bureau for reporting state and local government finance statistics differs in a number of important respects from the classification used in the United States Budget, it was necessary to adjust the federal data. For this report, federal budget expenditures include interest accrued, but not paid,

during the fiscal year; Census data on interest are on a disbursement basis.

The state government finances are based primarily on the annual Census Bureau survey of state finances. Census staff compiled figures from official records and reports of the various states for most of the state financial data.

The sample of local governments is drawn from the periodic Census of Governments and consists of certain local governments taken with certainty plus a sample below the certainty level.

The statistics in *Government Finances* that are based wholly or partly on data from the sample are subject to sampling error. State government finance data are not subject to sampling error. Estimates of major United States totals for local governments are subject to a computed sampling variability of less than one-half of 1 percent. The estimates are also subject to the inaccuracies in classification, response, and processing which would occur if a complete census had been conducted under the same conditions as the sample.

Further information on *Government Finances* may be obtained from:

Governments Division
Bureau of the Census
U.S. Department of Commerce
Washington, DC 20233
<http://www.census.gov/govs/www/index.html>

1990 Census of Population—Education in the United States

This report is based on a part of the decennial census which consists of questions asked of a one-in-six sample of persons and housing units in the United States. This sample was asked more detailed questions about income, occupation, and housing costs in addition to general demographic information.

School Enrollment Persons classified as enrolled in school reported attending a “regular” public or private school or college at any time between February 1, 1990, and the time listed. Questions asked were whether the institution attended was public or private, and level of school in which the student was enrolled.

Educational Attainment Data for educational attainment were tabulated for persons 15 years and over, and classified according to the highest grade completed or the highest degree received. Instructions were also given to include the level of the previous grade attended or the highest degree received for persons currently enrolled in school.

Poverty status To determine poverty status, answers to income questions were used and compared to the appropriate poverty threshold. All persons except institutionalized persons, persons in military

group quarters and in college dormitories, and unrelated persons under 15 years old were considered. If total income of each family or unrelated individual in the sample was less than the corresponding cutoff, that family or individual was classified as “below the poverty level.”

Population Division
Bureau of the Census
U.S. Department of Commerce
Washington, DC 20233
<http://www.census.gov/prod/www/abs/decennial.html>

Bureau of Labor Statistics

Unemployment Surveys

Statistics on the employment status of the population and related data are compiled by the Bureau of Labor Statistics (BLS) using data from the Current Population Survey (CPS). This monthly survey of households is conducted for BLS by the Bureau of the Census through a scientifically selected sample designed to represent the civilian noninstitutional population. Respondents are interviewed to obtain information about the employment status of each member of the household 16 years of age and over. Each month about 50,000 occupied units are eligible for interview. Some 3,200 of these households are contacted, but interviews are not obtained because the occupants are not at home after repeated calls or are unavailable for other reasons. This represents a noninterview rate for the survey that ranges between 6 and 7 percent. In addition to the 50,000 occupied units, there are 9,000 sample units in an average month which are visited, but found to be vacant or otherwise not eligible for enumeration.

The current sample design, introduced in January 1996, includes about 59,000 households from 754 sample areas and maintains a 1.9 percent coefficient of variation (cv) on national monthly estimates of unemployment level. This translates into a change of 0.2 percentage points in the unemployment rate being significant at a 90 percent confidence level. For each of the 50 states and for the District of Columbia, the design maintains a cv of 8 percent on the annual average estimate of unemployment level, assuming a 6 percent unemployment rate.

Further information on unemployment surveys may be obtained from:

Mary Bowler
Bureau of Labor Statistics
U.S. Department of Commerce
2 Massachusetts Avenue NE
Washington, DC 20212
<http://www.bls.gov/eag/eag.us.htm>

Consumer Price Indexes

The Consumer Price Index (CPI) represents changes in prices of all goods and services purchased for consumption by urban households. Indexes are available for two population groups: a CPI for All Urban Consumers (CPI-U) and a CPI for Urban Wage Earners and Clerical Workers (CPI-W). Price Indexes are available for the United States, the four Census regions, size of city, cross-classifications of regions and size-classes, and for 26 local areas. The major uses of the CPI include the CPI as an economic indicator, as a deflator of other economic series, and as a means of adjusting income payments.

Further information on consumer price indexes may be obtained from:

Consumer Price Indexes
Bureau of Labor Statistics
U.S. Department of Commerce
2 Massachusetts Avenue NE
Washington, DC 20212

National Institute on Drug Abuse

The National Institute on Drug Abuse of the U.S. Department of Health and Human Services is the primary supporter of the long-term study entitled "Monitoring the Future: A Continuing Study of the Lifestyles and Values of Youth," conducted at the University of Michigan, Institute for Social Research. One component of the study deals with student drug abuse. Results of a national sample survey have been published annually since 1975. With the exception of 1975, when about 9,400 students participated in the survey, the annual senior samples are comprised of roughly 16,000 students in 133 schools. They complete self-administered questionnaires given to them in their classrooms by University of Michigan personnel. Beginning in 1991, similar surveys of nationally representative samples of 8th- and 10th-grade students have been conducted annually. The 10th-grade samples involve about 17,000 students in 140 schools each year, while the 8th-grade samples have approximately 18,000 students in 150 schools. In all, approximately 50,000 students from 420 public and private secondary schools are surveyed annually. Over the years, the response rate has varied from 77 to 84 percent. Table A8 provides examples of the survey's sampling error.

Understandably, there will be some reluctance to admit illegal activities. Also, students who were out of school on the day of the survey were nonrespondents. The survey did not include high school dropouts. The inclusion of these two groups would tend to increase the proportion of individuals who had

used drugs. A 1983 study found that the inclusion of the absentees could increase some of the drug usage estimates by as much as 2.7 percentage points. (Details on that study and its methodology were published in *Drug Use Among American High School Students, College Students, and Other Young Adults*, by Lloyd D. Johnston, Patrick M. O'Malley, and Jerald G. Bachman, available from the National Clearinghouse on Drug Abuse Information, 5600 Fishers Lane, Rockville, MD 20857.)

National Science Foundation

Survey of Earned Doctorates Awarded in the United States

The Survey of Earned Doctorates Awarded in the United States has collected basic statistics from the universe of doctoral recipients in the United States each year since 1958. It has been supported by five federal agencies: the National Science Foundation, in conjunction with the U.S. Department of Education; the National Endowment for the Humanities; the U.S. Department of Agriculture; and the National Institutes of Health.

A survey form is distributed with the assistance of graduate deans, to each person completing the requirements for a doctorate. Of the 41,140 new research doctorates granted in 1999, the response rate was 92 percent. The questionnaire obtains information on sex, race/ethnicity, marital status, citizenship, handicaps, dependents, specialty field of doctorate, educational institutions attended, time spent in completion of doctorate, financial support, educational debt, postgraduation plans, and educational attainment of parents. The data are collected, edited, and published by the National Academy of Sciences.

Further information on the Survey of Earned Doctorates Awarded in the United States may be obtained from:

Science and Engineering Education and Human Resources Program

Federal Obligations to Universities, Colleges, and Nonprofit Institutions

Each year, the National Science Foundation collects data on obligations to colleges and universities from federal agencies. Obligations differ from expenditures, in that funds obligated during one fiscal year may be spent by the recipient in later years. Obligation amounts include direct federal support, so that amounts subcontracted to other institutions are included. Those funds received through subcontracts from prime contractors are excluded. Also excluded from the data are certain types of financial assistance, such as the U.S. Department of Education's Guaranteed Student Loan Program and obligations to the U.S. service academies. For purposes of tabulations in this publication, university-administered federally funded research and development centers (FFRDCs) have been included in appropriate state totals.

The universe of academic institutions for this survey is based on the Integrated Postsecondary Education Data System conducted by the National Center for Education Statistics (see above). Institutions without federal support were excluded and some systems were combined into single reporting units.

Further information on *Federal Support to Universities, Colleges, and Nonprofit Institutions* may be obtained from:

<http://www.nsf.gov/sbe/srs/fedsuppt/>

Survey of Scientific and Engineering Expenditures at Universities and Colleges

The National Science Foundation's annual academic survey collects data on research and development expenditures in the sciences and engineering from a sample of 573 institutions in the United States and outlying areas. Those institutions were selected from the universe of 595 schools that grant a graduate science or engineering degree and/or perform activities for which at least \$50,000 has been funded from separately budgeted R&D expenditures. In addition, the survey includes 19 university-affiliated, federally funded research and development centers (FFRDCs).

The 573 institutions sampled for FY 1998 include all doctorate-granting institutions, all historically black colleges and universities with any R&D expenditures, and a random sample of all other institutions. The response rate was 97 percent. Data presented are as-

sembled from the most recently completed survey and represent the latest totals available.

Further information on *Academic Science/Engineering, R&D Funds* may be obtained from:

Science and Engineering Activities Program

Other Organization Sources

American College Testing Program

The American College Testing (ACT) Assessment is designed to measure educational development in the areas of English, mathematics, social studies, and natural sciences. The ACT Assessment is taken by college-bound high school students and the test results are used to predict how well students might perform in college.

Prior to the 1984–85 school year, national norms were based on a 10 percent sample of the students taking the test. Since then, national norms are based on the test scores of all students taking the test. Moreover, beginning with 1984–85, these norms have been based on the most recent ACT scores available from students scheduled to graduate in the spring of the year. Duplicate test records are no longer used to produce national figures.

Separate ACT standard scores are computed for English, mathematics, social studies, science reasoning, and, as of October 1989, reading. ACT standard scores are reported for each subject area on a scale from 1 to 36. The four ACT standard scores have a mean (average) of about 19 and a standard deviation of about 6 for college-bound students nationally. A composite score is obtained by taking the simple average of the four standard scores and is an indication of a student's overall academic development across these subject areas. Beginning with the October 1989 test date, a new version of the ACT was introduced.

It should be noted that college-bound students who take the ACT Assessment are not representative of college-bound students nationally. First, students who live in the Midwest, Rocky Mountains and Plains, and the South are overrepresented among ACT-tested students as compared with college-bound students nationally. Second, ACT-tested students tend to enroll in public colleges and universities more frequently than do college-bound students nationally.

Further information on the ACT may be obtained from:

The American College Testing Program
2201 North Dodge Street
P.O. Box 168
Iowa City, IA 52243

American Federation of Teachers

The American Federation of Teachers (AFT) has reported national and state average salaries and earnings for teachers, other school employees, government workers, and professional employees over the past 25 years. The AFT's survey of state departments of education obtains information on minimum salaries, experienced teachers reentering the classroom, and teacher age and experience. Most data from the survey are reported as received, although some data are confirmed by telephone. These data are available in the AFT's annual report *Survey and Analysis of Salary Trends*. While this serves as the primary vehicle for reporting the results of the AFT's annual survey of state departments of education, several other data sources are also used in the report.

Further information on *Survey and Analysis of Salary Trends* may be obtained from:

American Federation of Teachers
555 New Jersey Avenue NW
Washington, DC 20001
<http://www.aft.org/research/survey/index.html>

College Entrance Examination Board

The Admissions Testing Program of the College Board comprises a number of college admissions tests, including the Preliminary Scholastic Assessment Test (PSAT) and the Scholastic Assessment Test (SAT). High school students participate in the testing program as sophomores, juniors, or seniors—some more than once during these 3 years. If they have taken the tests more than once, only the most recent scores are tabulated. The PSAT and SAT report subscores in the areas of mathematics and verbal ability.

The SAT results are not representative of high school students or college-bound students nationally since the sample is self-selected. Generally, tests are taken by students who need the results to attend a particular college or university. The state totals are greatly affected by the requirements of its state colleges. Public colleges in a number of states require ACT scores rather than SAT scores. Thus, the proportion of students taking the SAT in these states is very low and is inappropriate for any comparison. In

recent years, more than 1 million high school students have taken the examination annually.

Further information on the SAT can be obtained from:

College Entrance Examination Board
Educational Testing Service
Princeton, NJ 08541
<http://www.collegeboard.org/>

Graduate Record Examinations Board

The Graduate Record Examinations (GRE) tests are taken by individuals applying to graduate or professional school. GRE offers three types of tests, the General Test, Subject Tests and the new Writing Assessment. The General Test, which is mainly offered on computer, measures verbal, quantitative, and analytical reasoning skills. These skills are not necessarily related to any particular field of study. In contrast, the Subject Tests measure achievement in 14 subject areas. Subject areas include Biochemistry, Cell and Molecular Biology, Biology, Chemistry, Computer Science, Economics, Engineering, Geology, History, Literature in English, Mathematics, Music, Physics, Psychology, and Sociology. Finally, the Writing Assessment, introduced in October 1999, consists of two analytical writing tasks. Each graduate institution or division of the institution determines which GRE tests are required for admission.

Individuals may take GRE tests more than once. Score reports only reflect scores earned within the past 5-year period.

Further information on the GRE may be obtained from:

Graduate Record Examinations Board
Educational Testing Service
Princeton, NJ 08541
<http://www.gre.org>

Council for Aid to Education

The Council for Aid to Education, Inc., (CFAE) is a not-for-profit corporation funded by contributions from businesses. CFAE largely provides consulting and research services on voluntary support to corporations and information services to education institutions. Each year CFAE conducts a survey of colleges and universities and private elementary and secondary schools to obtain information on the amounts, sources, and purposes of private gifts, grants, and bequests received during the academic year.

In the 1999–2000 study, approximately 2,973 colleges and universities were invited to participate and 1,040 responded. The response rates were much higher for the 4-year colleges than for the 2-year col-

leges. For example, 79 percent of the doctoral-level institutions, but only 7 percent of the 2-year colleges responded. CFAE estimates that about 85 percent of all voluntary support is reported in the survey because of the high participation of institutions receiving large amounts of funding.

Survey forms are reviewed by CFAE for internal consistency before preparing a computerized database. Institutional reports of voluntary support data from the CFAE Survey of Voluntary Support of Education are more comprehensive and detailed than the related data in the Integrated Postsecondary Education Data System, Finance Survey conducted by NCES. The results from the Survey of Voluntary Support of Education are published in the annual *Voluntary Support of Education*, which may be purchased from CFAE.

National Catholic Educational Association

The National Catholic Educational Association (NCEA) is an organization devoted to providing leadership and service to Catholic education since 1904. NCEA began to publish *The United States Catholic Elementary and Secondary Schools: Annual Statistical Report on Schools, Enrollment and Staffing* in 1970 because of the lack of educational data on the private sector. The report is based on data gathered by each of the 175 archdiocesan and diocesan offices of education in the United States. These data enable NCEA to present information on school enrollment and staffing patterns for grades PK–12. The first part of the report presents data concerning the context of American education, while the following segment focuses on statistical data of Catholic schools. Statistics include enrollment by grade level, ethnicity, and religious affiliation.

Further information on *The United States Catholic Elementary and Secondary Schools: Annual Statistical Report on Schools, Enrollment, and Staffing* may be obtained from:

Sister Dale McDonald
National Catholic Educational Association
1077 30th Street NW, Suite 100
Washington, DC 20007–6232

Council of Chief State School Officers

The Council of Chief State School Officers (CCSSO) is a nonprofit organization of the 57 public officials who head departments of public education in every state, the outlying areas, the District of Columbia, and the U.S. Department of Defense Dependents Schools. In 1985, the CCSSO founded the State Education Assessment Center to provide a locus of leadership by the states to improve the monitoring and assessment of education. *State Education Indicators*, is the principal report of the Assessment Center's program of indicators on education. Most of the data are obtained from a member questionnaire, and the remainder of the data are from federal government agencies.

Further information on CCSSO publications may be obtained from:

Rolf Blank
State Education Assessment Center
Council of Chief State School Officers

Council of State Directors of Programs for the Gifted

The Council of State Directors of Programs for the Gifted is composed of the director or individual in the leadership position for gifted education in each of the 50 states, the District of Columbia, and the outlying areas. The Council has conducted many surveys in the past and most recently conducted two comprehensive state surveys in order to produce a profile of gifted education throughout the nation. These data are reported in the 1985, 1987, 1990, and 1994 *State of the States Gifted and Talented Education* reports. This edition of the *Digest* uses data from the 1995–96 school year.

Further information on *State of the States Gifted and Talented Education* reports is available from:

Michael Hall, Executive Director
Council of State Directors of Programs for the Gifted
c/o Office of Public Instruction
P.O. Box 202501
Helena, MT 59620–2501

Education Commission of the States

The Education Commission of the States (ECS) Clearinghouse collects information on laws and standards in the field of education and reports them periodically in *Clearinghouse Notes*. The Commission collects information about administrators, principals, and teachers. It also examines policy areas, such as assessment and testing, collective bargaining, early

childhood issues, quality education, and school schedules. The information is collected by reading state newsletters, tracking state legislation, and surveying state education agencies. Data are verified by the individual states when necessary. Even though ECS monitors state activity on a continuous basis, it updates the reports only when there is significant change in state activity.

Further information on *Clearinghouse Notes* is available from:

Kathy Christie
Education Commission of the States
707 17th Street, Suite 2700
Denver, CO 80202-3427
<http://www.ecs.org/ecs/ecsweb.nsf>

Gallup Poll

Phi Delta Kappa Survey

Each year the Gallup Poll conducts the "Public Attitudes Toward the Public Schools" survey, funded by Phi Delta Kappa. The survey includes interviews with adults representing the civilian noninstitutional population 18 years old and over.

The sample used in the 33rd annual survey was made up of a total of 1,108 respondents and is described as a modified probability sample of the nation. Personal, in-home interviewing was conducted in representative communities. Gallup uses an unclustered, directory-assisted, random-digit telephone sample, based on a proportionate stratified sampling design. In 1999, the final sample was weighted so that the distribution corresponded with the U.S. Census Bureau's Current Population Survey (CPS) estimates for adult population living in telephone households in the continental U.S.

The survey is a sample survey and is subject to sampling error. The size of error depends largely on the number of respondents providing data. Table A9 shows the approximate sampling errors associated with different percentages and sample sizes for the survey. Table A10 provides approximate sampling errors for comparisons of two sample percentages.

For example, an estimated percentage of about 10 percent based on the responses of 1,000 sample members maintains an approximate sampling error of 2 percent at the 95 percent confidence level. The sampling error for the difference in 2 percentages (50 percent versus 41 percent) based on 2 samples of 750 members and 400 members, respectively, is about 8 percent at the 95 percent confidence level.

Bloomington, IN 47402-0789
<http://www.pdkintl.org/kappan/k0109gal.htm>

Independent Sector Survey

In 1988, The Independent Sector commissioned the Gallup Poll to conduct a national survey on the giving and volunteering behavior of Americans. This survey is part of a series of surveys taking place every 2 years. The 1999 information was obtained from in-home personal interviews conducted from May, June, and July 1999, with a representative national sample of 2,553 adult Americans 18 or more years old. Weighting procedures were used to ensure that the sample makeup corresponds with that of the adult population of the United States. The sampling procedure did not include those with incomes above \$200,000 because they constitute such a small percentage of the population. The sampling area for this survey was plus or minus 3 percent.

The results from this survey are published in *Giving and Volunteering in the United States* and may be purchased from:

Independent Sector
1828 L Street NW
Washington, DC 20036

International Association for the Evaluation of Educational Achievement (IEA)

The International Association for the Evaluation of Educational Achievement, known as the IEA, is comprised of research centers and scholars from around the world whose aim is to investigate education problems common among countries. In 1988, the IEA General Assembly, composed of the research institutes participating in IEA projects, decided to undertake a study of reading literacy. The study held its first National Research Coordinator (NRC) meeting in November 1988. The construction and pilot testing of instruments was conducted in the period from November 1988 to July 1990. The main testing took place in the period from October 1990 to April 1991 depending on the school year in each country. Thirty-two school systems were involved in the IEA Reading Literacy Study. Data were collected from 210,059

students, 10,518 teachers, and 9,073 schools. All students took reading tests for 2 sessions totaling 75 minutes at the 9-year-old level and 2 sessions totaling 85 minutes at the 14-year-old population. All students responded to a background questionnaire about their reading at home and at school. Teachers and school principals responded to questionnaires about themselves, their teaching and the school organization. Each national center (NCES was the center for the United States) completed a National Case Study Questionnaire.

Further information on the IEA reading literacy study may be obtained from:

Marilyn Binkley, NRC USA
National Center for Education Statistics

Washington, DC 20006
<http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=98053>

Institute of International Education

Each year the Institute of International Education (IIE) conducts a survey of the number of foreign students studying in American colleges and universities and reports these data in *Open Doors*. All of the regionally accredited institutions in the *Education Directory, Colleges, and Universities* published by NCES are surveyed by IIE. The data presented in the *Digest* are drawn from the IIE survey which requests the total enrollment of foreign students in an institution and information on student characteristics, such as country of origin. For the 1999–2000 survey, 2,696 (over 92 percent) institutions reported data for the survey.

Additional information can be obtained from the publication *Open Doors* or by contacting:

National Association of College and University Business Officers

The National Association of College and University Business Officers (NACUBO) is a nonprofit professional organization representing chief administrative and financial officers at more than 2,100 colleges and universities across the country. Over two-thirds of all institutions of higher learning in the United States are members of NACUBO. Each year TIAA–CREF Trust Company, the premier pension system for educators and a manager of college endowments through its subsidiary, the Trust Company conducts an in-depth study of college and university endow-

ments for NACUBO. Endowment asset ranges for 2000 NACUBO Endowment Study participants are for the fiscal year ending June 30, 2000.

Endowments include stocks, bonds, cash, and real estate that colleges and universities receive as gifts. Colleges or universities receiving endowments may not spend the endowment principal, only investment income derived from the principal. Quasi-endowments—year-end surplus assets that institutions choose to treat as permanent capital—may also be included in an investment pool's endowment composition. Also, because donors frequently stipulate that their gifts support specific programs at colleges and universities, the overall size of the endowment can be misleading in terms of available income to support the education of undergraduate students. For example, the income from an endowment gift to a medical school or law school may only be spent on those schools. In such cases, the income would not be available to support undergraduate education. Thus, at some research universities with extensive graduate and professional schools, as little as one-third of the institution's endowment may actually be available to generate income to support undergraduate programs and students.

Of the 569 responding higher education institutions, 192 were public institutions and 377 were independent colleges and universities. The survey was mailed to over 720 colleges and universities, including both NACUBO member and non-member institutions. Only a limited number of not-for-profit higher education institutions in the United States have endowments.

National Association of State Student Grant and Aid Programs

The National Association of State Student Grant and Aid Programs (NASSGAP) is an association of states with general programs of scholarship or grant assistance for undergraduate study. Executive officers responsible for grant program administration represent each state in the Association. The *30th Annual Survey Report: 1998–99 Academic Year* is produced by the New York State Higher Education Services Corporation, and data are reported for all 50 states, the District of Columbia, and Puerto Rico.

Further information on the *30th Annual Survey Report: 1998–99 Academic Year* may be obtained from:

Charles Treadwell
New York State Higher Education Services
Corporation
99 Washington Avenue, Room 1438
Albany, NY 12255
Attention: NASSGAP
<http://www.nassgap.org/researchsurveys>

National Education Association

The National Education Association (NEA) reports enrollment, expenditure, revenue, graduate, teacher, and instructional staff salary data in its annual publication, *Estimates of School Statistics*. Each year NEA prepares regression-based estimates of financial and other education statistics and submits them to the states for verification. Generally, about 30 states adjust these estimates based on their own data. These preliminary data are published by NEA along with revised data from previous years. States are asked to revise previously submitted data as final figures become available. The most recent publication contains all changes reported to the NEA.

Status of the American Public School Teacher

The *Status of the American Public School Teacher* survey is conducted every 5 years by the National Education Association (NEA). The survey was designed by the NEA Research Division and initially administered in 1956. The intent of the survey is to solicit information covering various aspects of public school teachers' professional, family, and civic lives.

Participants for the survey are selected using a two-stage sample design, with the first-stage stratum determined by the number of students enrolled in the districts. Selection probabilities are determined so that the resulting sample is self-weighting. In 1990–91, questionnaires were sent to a sample of 1,981 of the nation's approximately 2.4 million public school teachers. With an initial and four followup mailings, 1,499 questionnaires were returned, of which 145 were not usable. The sample was adjusted to 1,836 to reflect the 145 unusable responses. The response rate was 73.7 percent. In the 1995–96 survey, 1,325 public school teachers responded. The results based on this survey have a margin of error of plus or minus 2.3 percent at the 90 percent confidence level.

Possible sources of nonsampling errors are non-responses, misinterpretation, and—when comparing data over years—changes in the sampling method and instrument. Misinterpretation of the survey items should be minimal, as the sample responding is not from the general population, but one knowledgeable about the area of concern. Also, the sampling proce-

dures changed after 1956 and some wording of items has changed over the different administrations.

Since sampling is used, sampling variability is inherent in the data. An approximation to the maximum standard error for estimating the population percentages is 1.4 percent. Approximations for significance for other comparisons appear on table A11. To estimate the 95 percent confidence interval for population percentages, the maximum standard error of 1.4 percent is multiplied by 2 (1.4 x 2). The resulting percentage (2.8) is added and subtracted from the population estimate to establish upper and lower bounds for the confidence interval. For example, if a sample percentage is 60 percent, there is a 95 percent chance that the population percentage lies between 57.2 percent and 62.8 percent (60 percent ± 2.8 percent).

Further information on *Status of the American Public School Teacher* may be obtained from:

Organization for Economic Cooperation and Development

The Organization for Economic Cooperation and Development (OECD) publishes analyses of national policies in education, training, and economics in about 30 countries. The countries surveyed are: Australia, Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Japan, Korea, Luxembourg, Mexico, Netherlands, New Zealand, Norway, Poland, Portugal, Spain, Sweden, Switzerland, Turkey, United Kingdom, and the United States. In addition to these OECD countries, a number of other countries are participating in the related World Education Indicators (WEI) project including: Argentina, Brazil, Chile, China, Indonesia, Jordan, Malaysia, Paraguay, Philippines, Russian Federation, Thailand, and Uruguay.

In the past several years, OECD has revised its data collection procedures to highlight current education issues and improve data comparability. The Centre for Educational Research and Innovation (CERI) has developed an Indicators of Education Systems (INES) project involving representatives of the OECD countries and the OECD Secretariat to improve international education statistics. Large improvements in data quality and comparability among OECD countries have resulted from the country to country interaction sponsored through the INES and WEI projects. The most recent publication in this se-

ries is *Education at a Glance, OECD Indicators, 2001*.

Research Associates

Research Associates annually compiles the Higher Education Price Index (HEPI) which measures average changes in prices of goods and services purchased by colleges and universities through educational and general expenditures. Sponsored research and auxiliary enterprises are not priced by HEPI.

HEPI is based on the prices (or salaries) of faculty and of administrators and other professional service personnel; clerical, technical, service, and other non-professional personnel; and contracted services, such as data processing, communication, transportation, supplies and materials, equipment, books and periodicals, and utilities. These represent the items purchased for current operations by colleges and universities. Prices for these items are obtained from salary surveys conducted by various national higher education associations, the American Association of University Professors, the Bureau of Labor Statistics, and the National Center for Education Statistics; and from components of the Consumer Price Index (CPI) and the Producer Price Index (PPI) published by the U.S. Department of Labor, Bureau of Labor Statistics.

The quantities of these goods and services have been kept constant based on the 1971–72 buying pattern of colleges and universities. The weights assigned the various items priced, which represent their relative importance in the current-fund educational and general budget, are estimated national averages. Variance in spending patterns of individual institutions from these national averages reduces only slightly the applicability of the HEPI to any given institutional situation. Modest differences in the weights attached to expenditure categories have little effect on overall index values. This is because the HEPI is dominated by the trend in faculty salaries and similar salary trends for other personnel hired by institutions, which absorbs or diminishes the effects of price changes in other items purchased in small quantities.

Further information on HEPI may be obtained from:

United Nations Educational, Scientific, and Cultural Organization

The United Nations Educational, Scientific, and Cultural Organization (UNESCO) conducts annual surveys of education statistics of its member countries. Besides official surveys, data are supplemented by information obtained by UNESCO through other publications and sources. Each year more than 200 countries reply to the UNESCO surveys. In some cases, estimates are made by UNESCO for particular items such as world and continent totals. While great efforts are made to make them as comparable as possible, the data still reflect the vast differences among the countries of the world in the structure of education. While there is some agreement about the reporting of first- and second-level data, the third-level data (postsecondary education) presents numerous substantial problems. Some countries report only university enrollment while other countries report all postsecondary, including vocational and technical schools and correspondence programs. A very high proportion of some countries' third-level students attend institutions in other countries. While definition problems are many in this sort of study, other survey problems should not be overlooked. The member countries that provide data to UNESCO are responsible for their validity. Thus, data for particular countries are subject to nonsampling error and perhaps sampling error as well. Some countries may furnish only rough estimates, while data from other countries may be very accurate. Other difficulties are caused by the varying periodicity of data collection among the countries of the world. In spite of such problems, many researchers use UNESCO data because they are the best available for such a large group of countries. Users should examine footnotes carefully to recognize some of the data limitations.

¹The SES index is a composite of five equally weighted measures: father's education, mother's education, family income, father's occupation, and presence of certain items in the respondent's household.

²Includes attendance at a vocational, trade, or business school, or 2-year college; or attendance at a 4-year college resulting in less than a bachelor's degree.

³Includes those with a bachelor's or higher level degree.

⁴Postsecondary education status was determined by students' enrollment in academic or vocational study during the four semesters—fall 1982, spring 1983, fall 1983, and spring 1984—following their scheduled high school graduation. Students who enrolled in full-time study in each of the four semesters were classified as full time. Students who were enrolled in part-time study in any of the four semesters and those who were enrolled in full-time study in fewer than four semesters were classified as part time. Stu-

dents who had neither enrolled on a full-time nor part-time basis in each of the four semesters were classified as never enrolled.

⁵Responses to questions concerning participation in each of 15 different extracurricular activity areas (i.e., varsity sports, debate, band, subject-matter clubs, etc.) were used to classify students' overall level of participation in extracurricular activities. The difference between the sum of the three category respondent counts and the total sample size is due to missing data.

NOTE: Data from students who dropped out of school between the 10th and 12th grades were not used in analyses of sophomore samples.

Definitions

Academic support This category of college expenditures includes expenditures for support services that are an integral part of the institution's primary missions of instruction, research, or public service. Includes expenditures for libraries, galleries, audio/visual services, academic computing support, ancillary support, academic administration, personnel development, and course and curriculum development.

Achievement test An examination that measures the extent to which a person has acquired certain information or mastered certain skills, usually as a result of specific instruction.

Administrative support staff Includes personnel dealing with salary, benefits, supplies, and contractual fees for the office of the principal, full-time department chairpersons, and graduation expenses.

Agriculture Courses designed to improve competencies in agricultural occupations. Included is the study of agricultural production, supplies, mechanization and products, agricultural science, forestry, and related services.

American College Testing Program (ACT) The ACT assessment program measures educational development and readiness to pursue college-level coursework in English, mathematics, natural science, and social studies. Student performance on the tests does not reflect innate ability and is influenced by a student's educational preparedness.

Appropriation (federal funds) Budget authority provided through the congressional appropriation process that permits federal agencies to incur obligations and to make payments.

Appropriation (institutional revenues) An amount (other than a grant or contract) received from or made available to an institution through an act of a legislative body.

Associate degree A degree granted for the successful completion of a sub-baccalaureate program of studies, usually requiring at least 2 years (or equivalent) of full-time college-level study. This includes degrees granted in a cooperative or work-study program.

Auxiliary enterprises This category includes those essentially self-supporting operations which exist to

furnish a service to students, faculty, or staff, and which charge a fee that is directly related to, although not necessarily equal to, the cost of the service. Examples are residence halls, food services, college stores, and intercollegiate athletics.

Average daily attendance (ADA) The aggregate attendance of a school during a reporting period (normally a school year) divided by the number of days school is in session during this period. Only days on which the pupils are under the guidance and direction of teachers should be considered days in session.

Average daily membership (ADM) The aggregate membership of a school during a reporting period (normally a school year) divided by the number of days school is in session during this period. Only days on which the pupils are under the guidance and direction of teachers should be considered as days in session. The average daily membership for groups of schools having varying lengths of terms is the average of the average daily memberships obtained for the individual schools.

Bachelor's degree A degree granted for the successful completion of a baccalaureate program of studies, usually requiring at least 4 years (or equivalent) of full-time college-level study. This includes degrees granted in a cooperative or work-study program.

Books Non-periodical printed publications bound in hard or soft covers, or in loose-leaf format, of at least 49 pages, exclusive of the cover pages; juvenile non-periodical publications of any length found in hard or soft covers.

Budget authority (BA) Authority provided by law to enter into obligations that will result in immediate or future outlays. It may be classified by the period of availability (1-year, multiple-year, no-year), by the timing of congressional action (current or permanent), or by the manner of determining the amount available (definite or indefinite).

Business Program of instruction that prepares individuals for a variety of activities in planning, organizing, directing, and controlling business office systems and procedures.

Capital outlay Funds for the acquisition of land and buildings; building construction, remodeling, and additions; the initial installation or extension of service systems and other built-in equipment; and site improvement. The category also encompasses architectural and engineering services including the development of blueprints.

Carnegie unit A standard of measurement that represents one credit for the completion of a 1-year course.

Catholic school A private school over which a Roman Catholic church group exercises some control or provides some form of subsidy. Catholic schools for the most part include those operated or supported by: a parish, a group of parishes, a diocese, or a Catholic religious order.

Central cities The largest cities, with 50,000 or more inhabitants, in a Metropolitan Statistical Area (MSA). A smaller city within a MSA may also qualify if it has at least 25,000 inhabitants or has a population of one-third or more of that of the largest city and a minimum population of 25,000. An exception occurs where two cities have contiguous boundaries and constitute, for economic and social purposes, a single community of at least 50,000, the smaller of which must have a population of at least 15,000.

Class size The membership of a class at a given date.

Classroom teacher A staff member assigned the professional activities of instructing pupils in self-contained classes or courses, or in classroom situations. Usually expressed in full-time equivalents.

Cohort A group of individuals that have a statistical factor in common, for example, year of birth.

College A postsecondary school which offers general or liberal arts education, usually leading to an associate, bachelor's, master's, doctor's, or first-professional degree. Junior colleges and community colleges are included under this terminology.

Combined elementary and secondary school A school which encompasses instruction at both the elementary and the secondary levels. Includes schools starting with grade 6 or below and ending with grade 9 or above.

Computer science A group of instructional programs that describes computer and information sciences, including computer programming, data processing, and information systems.

Constant dollars Dollar amounts that have been adjusted by means of price and cost indexes to elimi-

nate inflationary factors and allow direct comparison across years.

Consumer, personal, and miscellaneous services

A group of instructional programs that describes the fundamental skills a person is normally thought to need in order to function productively in society. Some examples are child development, consumer education, and family relations.

Consumer Price Index (CPI) This price index measures the average change in the cost of a fixed market basket of goods and services purchased by consumers.

Consumption That portion of income which is spent on the purchase of goods and services rather than being saved.

Control of institutions A classification of institutions of elementary/secondary or higher education by whether the institution is operated by publicly elected or appointed officials (public control) or by privately elected or appointed officials and derives its major source of funds from private sources (private control).

Credit The unit of value, awarded for the successful completion of certain courses, intended to indicate the quantity of course instruction in relation to the total requirements for a diploma, certificate, or degree. Credits are frequently expressed in terms such as "Carnegie units," "semester credit hours," and "quarter credit hours."

Current dollars Dollar amounts that have not been adjusted to compensate for inflation.

Current expenditures (elementary/secondary)

The expenditures for operating local public schools, excluding capital outlay and interest on school debt. These expenditures include such items as salaries for school personnel, fixed charges, student transportation, school books and materials, and energy costs. Beginning in 1980-81, expenditures for state administration are excluded.

Current expenditures per pupil in average daily attendance

Current expenditures for the regular school term divided by the average daily attendance of full-time pupils (or full-time equivalency of pupils) during the term. See also Current expenditures and Average daily attendance.

Current-fund expenditures (higher education)

Money spent to meet current operating costs, including salaries, wages, utilities, student services, public services, research libraries, scholarships and fellowships, auxiliary enterprises, hospitals, and inde-

pendent operations. Excludes loans, capital expenditures, and investments.

Current-fund revenues (higher education) Money received during the current fiscal year from revenue which can be used to pay obligations currently due, and surpluses reappropriated for the current fiscal year.

Current Population Survey See Guide to Sources.

Degree-granting institutions Postsecondary institutions that are eligible for Title IV federal financial-aid programs and grant an associate's or higher degree. For an institution to be eligible to participate in Title IV financial-aid programs it must offer a program of at least 300 clock hours in length, have accreditation recognized by the U.S. Department of Education, have been in business for at least 2 years, and have signed a participation agreement with the Department.

Disposable personal income Current income received by persons less their contributions for social insurance, personal tax, and nontax payments. It is the income available to persons for spending and saving. Nontax payments include passport fees, fines and penalties, donations, and tuitions and fees paid to schools and hospitals operated mainly by the government. See also Personal income.

Doctor's degree An earned degree carrying the title of Doctor. The Doctor of Philosophy degree (Ph.D.) is the highest academic degree and requires mastery within a field of knowledge and demonstrated ability to perform scholarly research. Other doctorates are awarded for fulfilling specialized requirements in professional fields, such as education (Ed.D.), musical arts (D.M.A.), business administration (D.B.A.), and engineering (D.Eng. or D.E.S.). Many doctor's degrees in academic and professional fields require an earned master's degree as a prerequisite. First-professional degrees, such as M.D. and D.D.S., are not included under this heading.

Educational and general expenditures The sum of current funds expenditures on instruction, research, public service, academic support, student services, institutional support, operation and maintenance of plant, and awards from restricted and unrestricted funds.

Educational attainment The highest grade of regular school attended and completed.

Elementary education/programs Learning experiences concerned with the knowledge, skills, appreciations, attitudes, and behavioral characteristics which are considered to be needed by all pupils in

terms of their awareness of life within our culture and the world of work, and which normally may be achieved during the elementary school years (usually kindergarten through grade 8 or kindergarten through grade 6), as defined by applicable state laws and regulations.

Elementary school A school classified as elementary by state and local practice and composed of any span of grades not above grade 8. A preschool or kindergarten school is included under this heading only if it is an integral part of an elementary school or a regularly established school system.

Elementary/secondary school As reported in this publication, includes only regular schools (i.e., schools that are part of state and local school systems, and also most not-for-profit private elementary/secondary schools, both religiously affiliated and nonsectarian). Schools not reported include subcollegiate departments of institutions of higher education, residential schools for exceptional children, federal schools for American Indians, and federal schools on military posts and other federal installations.

Employment Includes civilian, noninstitutional persons who: (1) worked during any part of the survey week as paid employees; worked in their own business, profession, or farm; or worked 15 hours or more as unpaid workers in a family-owned enterprise; or (2) were not working but had jobs or businesses from which they were temporarily absent due to illness, bad weather, vacation, labor-management dispute, or personal reasons whether or not they were seeking another job.

Endowment A trust fund set aside to provide a perpetual source of revenue from the proceeds of the endowment investments. Endowment funds are often created by donations from benefactors of an institution, who may designate the use of the endowment revenue. Normally, institutions or their representatives manage the investments, but they are not permitted to spend the endowment fund itself, only the proceeds from the investments. Typical uses of endowments would be an endowed chair for a particular department or for a scholarship fund. Endowment totals tabulated in this book also include funds functioning as endowments, such as funds left over from the previous year and placed with the endowment investments by the institution. These funds may be withdrawn by the institution and spent as current funds at any time. Endowments are evaluated by two different measures, book value and market value. Book value is the purchase price of the endowment investment. Market value is the current worth of the endowment investment. Thus, the book value of a stock held in an endowment fund would be the pur-

chase price of the stock. The market value of the stock would be its selling price as of a given day.

Engineering Instructional programs that describe the mathematical and natural science knowledge gained by study, experience, and practice and applied with judgment to develop ways to utilize the materials and forces of nature economically for the benefit of mankind. Include programs that prepare individuals to support and assist engineers and similar professionals.

English A group of instructional programs that describes the English language arts, including composition, creative writing, and the study of literature.

Enrollment The total number of students registered in a given school unit at a given time, generally in the fall of a year.

Expenditures Charges incurred, whether paid or unpaid, which are presumed to benefit the current fiscal year. For elementary/secondary schools, these include all charges for current outlays plus capital outlays and interest on school debt. For institutions of higher education, these include current outlays plus capital outlays. For government, these include charges net of recoveries and other correcting transactions other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Government expenditures include only external transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments.

Expenditures per pupil Charges incurred for a particular period of time divided by a student unit of measure, such as average daily attendance or average daily membership.

Extracurricular activities Activities that are not part of the required curriculum and that take place outside of the regular course of study. As used here, they include both school-sponsored (e.g., varsity athletics, drama, and debate clubs) and community-sponsored (e.g., hobby clubs and youth organizations like the Junior Chamber of Commerce or Boy Scouts) activities.

Family A group of two persons or more (one of whom is the householder) related by birth, marriage, or adoption and residing together. All such persons (including related subfamily members) are considered as members of one family.

Federal funds Amounts collected and used by the federal government for the general purposes of the government. There are four types of federal fund ac-

counts: the general fund, special funds, public enterprise funds, and intragovernmental funds. The major federal fund is the general fund, which is derived from general taxes and borrowing. Federal funds also include certain earmarked collections, such as those generated by and used to finance a continuing cycle of business-type operations.

Federal sources Includes federal appropriations, grants, and contracts, and federally-funded research and development centers (FFRDCs). Federally subsidized student loans and Pell Grants are not included.

First-professional degree A degree that signifies both completion of the academic requirements for beginning practice in a given profession and a level of professional skill beyond that normally required for a bachelor's degree. This degree usually is based on a program requiring at least 2 academic years of work prior to entrance and a total of at least 6 academic years of work to complete the degree program, including both prior-required college work and the professional program itself. By NCES definition, first-professional degrees are awarded in the fields of dentistry (D.D.S. or D.M.D.), medicine (M.D.), optometry (O.D.), osteopathic medicine (D.O.), pharmacy (D.Pharm.), podiatric medicine (D.P.M.), veterinary medicine (D.V.M.), chiropractic (D.C. or D.C.M.), law (J.D.), and theological professions (M.Div. or M.H.L.).

First-professional enrollment The number of students enrolled in a professional school or program which requires at least 2 years of academic college work for entrance and a total of at least 6 years for a degree. By NCES definition, first-professional enrollment includes only students in certain programs. (See First-professional degree for a list of programs.)

Fiscal year The yearly accounting period for the federal government, which begins on October 1 and ends on the following September 30. The fiscal year is designated by the calendar year in which it ends; e.g., fiscal year 1988 begins on October 1, 1987, and ends on September 30, 1988. (From fiscal year 1844 to fiscal year 1976, the fiscal year began on July 1 and ended on the following June 30.)

Foreign languages A group of instructional programs that describes the structure and use of language that is common or indigenous to people of the same community or nation, the same geographical area, or the same cultural traditions. Programs cover such features as sound, literature, syntax, phonology, semantics, sentences, prose, and verse, as well as the development of skills and attitudes used in communicating and evaluating thoughts and feelings through oral and written language.

Full-time enrollment The number of students enrolled in higher education courses with total credit load equal to at least 75 percent of the normal full-time course load.

Full-time-equivalent (FTE) enrollment For institutions of higher education, enrollment of full-time students, plus the full-time equivalent of part-time students. The full-time equivalent of the part-time students is estimated using different factors depending on the type and control of institution and level of student.

Full-time instructional faculty Those members of the instruction/research staff who are employed full time as defined by the institution, including faculty with released time for research and faculty on sabbatical leave. Full time counts exclude faculty who are employed to teach less than two semesters, three quarters, two trimesters, or two 4-month sessions; replacements for faculty on sabbatical leave or those on leave without pay; faculty for preclinical and clinical medicine; faculty who are donating their services; faculty who are members of military organizations and paid on a different pay scale from civilian employees; academic officers, whose primary duties are administrative; and graduate students who assist in the instruction of courses.

Full-time worker In educational institutions, an employee whose position requires being on the job on school days throughout the school year at least the number of hours the schools are in session. For higher education, a member of an educational institution's staff who is employed full time.

General administration support services Includes salary, benefits, supplies, and contractual fees for boards of education staff and executive administration. Excludes state administration.

General Educational Development (GED) program Academic instruction to prepare persons to take the high school equivalency examination. See GED recipient.

GED recipient A person who has obtained certification of high school equivalency by meeting state requirements and passing an approved exam, which is intended to provide an appraisal of the person's achievement or performance in the broad subject matter areas usually required for high school graduation.

General program A program of studies designed to prepare students for the common activities of a cit-

izen, family member, and worker. A general program of studies may include instruction in both academic and vocational areas.

Geographic region (1) One of four regions used by the Bureau of Economic Analysis of the U.S. Department of Commerce, the National Assessment of Educational Progress, and the National Education Association, as follows: (The National Education Association designated the Central region as Middle region in its classification.)

Northeast

Connecticut
Delaware
District of Columbia
Maine
Maryland
Massachusetts
New Hampshire
New Jersey
New York
Pennsylvania
Rhode Island
Vermont

Central (Middle)

Illinois
Indiana
Iowa
Kansas
Michigan
Minnesota
Missouri
Nebraska

Texas

Government appropriation An amount (other than a grant or contract) received from or made available to an institution through an act of a legislative body.

Government grant or contract Revenues from a government agency for a specific research project or other program.

Graduate An individual who has received formal recognition for the successful completion of a prescribed program of studies.

Graduate enrollment The number of students who hold the bachelor's or first-professional degree, or the equivalent, and who are working towards a master's or doctor's degree. First-professional students are counted separately. These enrollment data measure those students who are registered at a particular time during the fall. At some institutions, graduate enrollment also includes students who are in postbaccalaureate classes, but not in degree programs. In specified tables, graduate enrollment includes all students in regular graduate programs and all students in postbaccalaureate classes, but not in degree programs (unclassified postbaccalaureate students).

Graduate Record Examination (GRE) Multiple-choice examinations administered by the Educational Testing Service and taken by college students who are intending to attend certain graduate schools. The tests are offered in a variety of subject areas. Ordinarily, a student will take only the exam that applies to the intended field of study.

Graduation Formal recognition given an individual for the successful completion of a prescribed program of studies.

Gross domestic product (GDP) The total national output of goods and services valued at market prices. GDP can be viewed in terms of expenditure categories which include purchases of goods and services by consumers and government, gross private domestic investment, and net exports of goods and services. The goods and services included are largely those bought for final use (excluding illegal transactions) in the market economy. A number of inclusions, however, represent imputed values, the most important of which is rental value of owner-occupied housing. GDP, in this broad context, measures the output attributable to the factors of production—labor and property—supplied by U.S. residents.

Handicapped Those children evaluated as having any of the following impairments, who because of these impairments need special education and related services. (These definitions apply specifically to data from the U.S. Office of Special Education and Rehabilitative Services presented in this publication.)

Deaf Having a hearing impairment which is so severe that the student is impaired in processing linguistic information through hearing (with or without amplification) and which adversely affects educational performance.

Deaf-blind Having concomitant hearing and visual impairments which cause such severe communication and other developmental and educational problems that the student cannot be accommodated in special education programs solely for deaf or blind students.

Hard of hearing Having a hearing impairment, whether permanent or fluctuating, which adversely affects the student's educational performance, but which is not included under the definition of "deaf" in this section.

Mentally retarded Having significantly subaverage general intellectual functioning, existing concurrently with defects in adaptive behavior and manifested during the developmental period, which adversely affects the child's educational performance.

Multihandicapped Having concomitant impairments (such as mentally retarded-blind, mentally

retarded-orthopedically impaired, etc.), the combination of which causes such severe educational problems that the student cannot be accommodated in special education programs solely for one of the impairments. Term does not include deaf-blind students, but does include those students who are severely or profoundly mentally retarded.

Orthopedically impaired Having a severe orthopedic impairment which adversely affects a student's educational performance. The term includes impairment resulting from congenital anomaly, disease, or other causes.

Other health impaired Having limited strength, vitality, or alertness due to chronic or acute health problems, such as a heart condition, tuberculosis, rheumatic fever, nephritis, asthma, sickle cell anemia, hemophilia, epilepsy, lead poisoning, leukemia, or diabetes which adversely affects the student's educational performance.

Seriously emotionally disturbed Exhibiting one or more of the following characteristics over a long period of time, to a marked degree, and adversely affecting educational performance: an inability to learn which cannot be explained by intellectual, sensory, or health factors; an inability to build or maintain satisfactory interpersonal relationships with peers and teachers; inappropriate types of behavior or feelings under normal circumstances; a general pervasive mood of unhappiness or depression; or a tendency to develop physical symptoms or fears associated with personal or school problems. This term does not include children who are socially maladjusted, unless they also display one or more of the listed characteristics.

Specific learning disabled Having a disorder in one or more of the basic psychological processes involved in understanding or in using spoken or written language, which may manifest itself in an imperfect ability to listen, think, speak, read, write, spell, or do mathematical calculations. The term includes such conditions as perceptual handicaps, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia. The term does not include children who have learning problems which are primarily the result of visual, hearing, or environmental, cultural, or economic disadvantage.

Speech impaired Having a communication disorder, such as stuttering, impaired articulation, language impairment, or voice impairment, which adversely affects the student's educational performance.

Visually handicapped Having a visual impairment which, even with correction, adversely affects

the student's educational performance. The term includes partially seeing and blind children.

Higher education Study beyond secondary school at an institution that offers programs terminating in an associate, baccalaureate, or higher degree.

Higher education institutions (alternative classification)

Doctoral-granting Characterized by a significant level and breadth of activity in commitment to doctoral-level education as measured by the number of doctorate recipients and the diversity in doctoral-level program offerings.

Comprehensive Characterized by diverse post-baccalaureate programs (including first-professional), but not engaged in significant doctoral-level education.

General baccalaureate Characterized by primary emphasis on general undergraduate, baccalaureate-level education. Not significantly engaged in postbaccalaureate education.

Specialized Baccalaureate or postbaccalaureate institution emphasizing one area (plus closely related specialties), such as business or engineering. The programmatic emphasis is measured by the percentage of degrees granted in the program area.

2-year Conferring at least 75 percent of its degrees and awards for work below the bachelor's level.

New These institutions, though not necessarily newly organized, are new additions to the Integrated Postsecondary Education Data survey universe. When degree and award data become available, they will be reclassified.

Nondegree-granting Offering undergraduate or graduate study, but not conferring degrees or awards. In this volume, these institutions are included under Specialized.

Higher education institutions (traditional classification)

4-year institution An institution legally authorized to offer and offering at least a 4-year program of college-level studies wholly or principally creditable toward a baccalaureate degree. In some tables, a further division between universities and other 4-year institutions is made. A "university" is a postsecondary institution which typically comprises one or more graduate professional schools (also see University). For purposes of trend com-

parisons in this volume, the selection of universities has been held constant for all tabulations after 1982. "Other 4-year institutions" would include the rest of the nonuniversity 4-year institutions.

2-year institution An institution legally authorized to offer and offering at least a 2-year program of college-level studies which terminates in an associate degree or is principally creditable toward a baccalaureate degree. Also includes some institutions that have a less than 2-year program, but were designated as institutions of higher education in the Higher Education General Information Survey.

Higher Education Price Index A price index which measures average changes in the prices of goods and services purchased by colleges and universities through current-fund education and general expenditures (excluding expenditures for sponsored research and auxiliary enterprises).

High school A secondary school offering the final years of high school work necessary for graduation, usually includes grades 10, 11, 12 (in a 6-3-3 plan) or grades 9, 10, 11, and 12 (in a 6-2-4 plan).

High school program A program of studies designed to prepare students for their postsecondary education and occupation. Three types of programs are usually distinguished—academic, vocational, and general. An academic program is designed to prepare students for continued study at a college or university. A vocational program is designed to prepare students for employment in one or more semiskilled, skilled, or technical occupations. A general program is designed to provide students with the understanding and competence to function effectively in a free society and usually represents a mixture of academic and vocational components.

Historically black colleges and universities Accredited institutions of higher education established prior to 1964 with the principal mission of educating black Americans. Federal regulations (20 USC 1061 (2)) allow for certain exceptions of the founding date.

Household All the persons who occupy a housing unit. A house, apartment, or other group of rooms, or a single room, is regarded as a housing unit when it is occupied or intended for occupancy as separate living quarters, that is, when the occupants do not live and eat with any other persons in the structure, and there is direct access from the outside or through a common hall.

Housing unit A house, an apartment, a mobile home, a group of rooms, or a single room that is occupied as separate living quarters.

Imaginative writing This type of writing can take a variety of forms, such as stories, poems, plays, or lyrics. It represents a special approach to sharing experiences and understanding the world and ourselves. In this form of writing, special attention is given to rhythm and tone; the use of anecdote; the presence of metaphor and simile; shifts in plots; and the unexpected use of words, phrases, or punctuation.

Income tax Taxes levied on net income, that is, on gross income less certain deductions permitted by law. These taxes can be levied on individuals or on corporations or unincorporated businesses where the income is taxed distinctly from individual income.

Independent operations A group of self-supporting activities under control of a college or university. For purposes of financial surveys conducted by the National Center for Education Statistics, this category is composed principally of federally funded research and development centers (FFRDC).

Informative writing This type of writing is used to share information and to convey messages, directions, and ideas. It often involves reporting or retelling events or experiences that have already occurred.

Institutional support The category of higher education expenditures that includes day-to-day operational support for colleges, excluding expenditures for physical plant operations. Examples of institutional support include general administrative services, executive direction and planning, legal and fiscal operations, and community relations.

Instruction That category including expenditures of the colleges, schools, departments, and other instructional divisions of higher education institutions and expenditures for departmental research and public service which are not separately budgeted. Includes expenditures for both credit and noncredit activities. Excludes expenditures for academic administration where the primary function is administration (e.g., academic deans).

Instruction (elementary and secondary) Instruction encompasses all activities dealing directly with the interaction between teachers and students. Teaching may be provided for students in a school classroom, in another location such as a home or hospital, and in other learning situations such as those involving co-curricular activities. Instruction may be provided through some other approved medium, such as television, radio, telephone, and correspondence. Instruction expenditures include: salaries, employee benefits, purchased services, supplies, and tuition to private schools.

Instructional staff Full-time-equivalent number of positions, not the number of different individuals occupying the positions during the school year. In local schools, includes all public elementary and secondary (junior and senior high) day-school positions that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes administrative staff, attendance personnel, clerical personnel, and junior college staff.

Instructional support services Includes salary, benefits, supplies, and contractual fees for staff providing instructional improvement, educational media (library and audiovisual), and other instructional support services.

Junior high school A separately organized and administered secondary school intermediate between the elementary and senior high schools, usually includes grades 7, 8, and 9 (in a 6-3-3 plan) or grades 7 and 8 (in a 6-2-4 plan).

Labor force Persons employed as civilians, unemployed (but looking for work), or in the armed services during the survey week. The "civilian labor force" comprises all civilians classified as employed or unemployed.

Land-grant colleges The First Morrill Act of 1862 facilitated the establishment of colleges through grants of land or funds in lieu of land. The Second Morrill Act in 1890 provided for money grants and for the establishment of black land-grant colleges and universities in those states with dual systems of higher education.

Local education agency See School district.

Mandatory transfer A transfer of current funds that must be made in order to fulfill a binding legal obligation of the institution. Included under mandatory transfers are debt service provisions relating to academic and administrative buildings, including (1) amounts set aside for debt retirement and interest and (2) required provisions for renewal and replacement of buildings to the extent these are not financed from other funds.

Master's degree A degree awarded for successful completion of a program generally requiring 1 or 2 years of full-time college-level study beyond the bachelor's degree. One type of master's degree, including the Master of Arts degree, or M.A., and the Master of Science degree, or M.S., is awarded in the liberal arts and sciences for advanced scholarship in

a subject field or discipline and demonstrated ability to perform scholarly research. A second type of master's degree is awarded for the completion of a professionally oriented program, for example, an M.Ed. in education, an M.B.A. in business administration, an M.F.A. in fine arts, an M.M. in music, an M.S.W. in social work, and an M.P.A. in public administration. A third type of master's degree is awarded in professional fields for study beyond the first-professional degree, for example, the Master of Laws (L.L.M.) and Master of Science in various medical specializations.

Mathematics A group of instructional programs that describes the science of numbers and their operations, interrelations, combinations, generalizations, and abstractions and of space configurations and their structure, measurement, transformations, and generalizations.

Mean test score The score obtained by dividing the sum of the scores of all individuals in a group by the number of individuals in that group.

Metropolitan population The population residing in Metropolitan Statistical Areas (MSAs). See Metropolitan Statistical Area.

Metropolitan Statistical Area (MSA) A large population nucleus and the nearby communities which have a high degree of economic and social integration with that nucleus. Each MSA consists of one or more entire counties (or county equivalents) that meet specified standards pertaining to population, commuting ties, and metropolitan character. In New England, towns and cities, rather than counties, are the basic units. MSAs are designated by the Office of Management and Budget. An MSA includes a city and, generally, its entire urban area and the remainder of the county or counties in which the urban area is located. An MSA also includes such additional outlying counties which meet specified criteria relating to metropolitan character and level of commuting of workers into the central city or counties. Specified criteria governing the definition of MSAs recognized before 1980 are published in *Standard Metropolitan Statistical Areas: 1975*, issued by the Office of Management and Budget. New MSAs were designated when 1980 counts showed that they met one or both of the following criteria:

1. Included a city with a population of at least 50,000 within their corporate limits, or
2. Included a Census Bureau-defined urbanized area (which must have a population of at least 50,000) and a total MSA population of at least 100,000 (or, in New England, 75,000).

Migration Geographic mobility involving a change of usual residence between clearly defined geo-

graphic units, that is, between counties, states, or regions.

Minimum-competency testing Measuring the acquisition of competence or skills to or beyond a certain specified standard.

National Assessment of Educational Progress (NAEP) See Guide to Sources.

Newly qualified teacher Persons who: (1) first became eligible for a teaching license during the period of the study referenced or who were teaching at the time of survey, but were not certified or eligible for a teaching license; and (2) had never held full-time, regular teaching positions (as opposed to substitute) prior to completing the requirements for the degree which brought them into the survey.

Nonmetropolitan residence group The population residing outside Metropolitan Statistical Areas. See Metropolitan Statistical Area.

Nonprofit institution A private institution in which the individual(s) or agency in control receives compensation other than wages, rent, or other expenses for the assumption of risk. Nonprofit institutions may be either independent nonprofit (i.e., having no religious affiliation) or religiously affiliated.

Nonresident alien A person who is not a citizen of the United States and who is in this country on a temporary basis and does not have the right to remain indefinitely.

Nonsupervisory instructional staff Persons such as curriculum specialists, counselors, librarians, remedial specialists, and others possessing education certification, but not responsible for day-to-day teaching of the same group of pupils.

Normal school A normal school was an institution which was engaged primarily in the preparation of teachers for positions in elementary and secondary schools. Prior to 1900, normal schools were often secondary schools with teacher training programs. During the early 20th century, normal schools gradually developed into higher education institutions.

Obligations Amounts of orders placed, contracts awarded, services received, or similar legally binding commitments made by federal agencies during a given period that will require outlays during the same or some future period.

Occupational home economics Courses of instruction emphasizing the acquisition of competencies needed for getting and holding a job or preparing for advancement in an occupational area using home economics knowledge and skills.

Occupied housing unit Separate living quarters with occupants currently inhabiting the unit.

Off-budget federal entities Organizational entities, federally owned in whole or in part, whose transactions belong in the budget under current budget accounting concepts, but that have been excluded from the budget totals under provisions of law.

Operation and maintenance services Includes salary, benefits, supplies, and contractual fees for supervision of operations and maintenance, operating buildings (heating, lighting, ventilating, repair, and replacement), care and upkeep of grounds and equipment, vehicle operations and maintenance (other than student transportation), security, and other operations and maintenance services.

Other foreign languages and literatures Any instructional program in foreign languages and literatures not described in table 253, including language groups and individual languages, such as the non-Semitic African languages, Native American languages, the Celtic languages, Pacific language groups, the Ural-Altai languages, Basque, and others.

Other support services Includes salary, benefits, supplies, and contractual fees for business support services, central support services, and other support services not otherwise classified.

Other support services staff All staff not reported in other categories. This group includes media personnel, social workers, bus drivers, security, cafeteria workers, and other staff.

Outlays The value of checks issued, interest accrued on the public debt, or other payments made, net of refunds and reimbursements.

Part-time enrollment The number of students enrolled in higher education courses with a total credit load less than 75 percent of the normal full-time credit load.

Per capita income The mean income computed for every man, woman, and child in a particular group. It is derived by dividing the total income of a particular group by the total population in that group.

Personal income Current income received by persons from all sources, minus their personal contributions for social insurance. Classified as "persons" are individuals (including owners of unincorporated firms), nonprofit institutions serving individuals, private trust funds, and private noninsured welfare funds. Personal income includes transfers (payments not resulting from current production) from govern-

ment and business such as social security benefits and military pensions, but excludes transfers among persons.

Persuasive writing This type of writing attempts to bring about some action or change. Its primary purpose is to influence others. It is concerned with the positions, beliefs, and attitudes of the readers.

Physical plant assets Includes the values of land, buildings, and equipment owned, rented, or utilized by colleges. Does not include those plant values which are a part of endowment or other capital fund investments in real estate. Excludes construction in progress.

Postbaccalaureate enrollment The number of graduate and first-professional students working towards advanced degrees and of students enrolled in graduate-level classes, but not enrolled in degree programs. See also Graduate enrollment and First-professional enrollment.

Postsecondary education The provision of formal instructional programs with a curriculum designed primarily for students who have completed the requirements for a high school diploma or equivalent. This includes programs of an academic, vocational, and continuing professional education purpose, and excludes avocational and adult basic education programs.

Private school or institution A school or institution which is controlled by an individual or agency other than a state, a subdivision of a state, or the federal government, which is usually supported primarily by other than public funds, and the operation of whose program rests with other than publicly elected or appointed officials. Private schools and institutions include both nonprofit and proprietary institutions.

Property tax The sum of money collected from a tax levied against the value of property.

Proprietary (for profit) institution A private institution in which the individual(s) or agency in control receives compensation other than wages, rent, or other expenses for the assumption of risk.

Public school or institution A school or institution controlled and operated by publicly elected or appointed officials and deriving its primary support from public funds.

Pupil-teacher ratio The enrollment of pupils at a given period of time, divided by the full-time-equivalent number of classroom teachers serving these pupils during the same period.

Racial/ethnic group Classification indicating general racial or ethnic heritage based on self-identification, as in data collected by the U.S. Bureau of the Census or on observer identification, as in data collected by the Office for Civil Rights. These categories are in accordance with the Office of Management and Budget standard classification scheme presented below:

White A person having origins in any of the original peoples of Europe, North Africa, or the Middle East. Normally excludes persons of Hispanic origin except for tabulations produced by the U.S. Bureau of the Census, which are noted accordingly in this volume.

Black A person having origins in any of the black racial groups in Africa. Normally excludes persons of Hispanic origin except for tabulations produced by the U.S. Bureau of the Census, which are noted accordingly in this volume.

Hispanic A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

Asian or Pacific Islander A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

American Indian or Alaskan Native A person having origins in any of the original peoples of North America and maintaining cultural identification through tribal affiliation or community recognition.

Remedial education Instruction for a student lacking those reading, writing, or math skills necessary to perform college-level work at the level required by the attended institution.

Resident population Includes civilian population and armed forces personnel residing within the United States. Excludes armed forces personnel residing overseas.

Revenue All funds received from external sources, net of refunds, and correcting transactions. Noncash transactions, such as receipt of services, commodities, or other receipts in kind are excluded, as are funds received from the issuance of debt, liquidation of investments, and nonroutine sale of property.

Salary The total amount regularly paid or stipulated to be paid to an individual, before deductions, for personal services rendered while on the payroll of a business or organization.

Sales and services Revenues derived from the sales of goods or services that are incidental to the conduct of instruction, research, or public service. Examples include film rentals, scientific and literary publications, testing services, university presses, and dairy products.

Sales tax Tax imposed upon the sale and consumption of goods and services. It can be imposed either as a general tax on the retail price of all goods and services sold or as a tax on the sale of selected goods and services.

Scholarships and fellowships This category of college expenditures applies only to money given in the form of outright grants and trainee stipends to individuals enrolled in formal coursework, either for credit or not. Aid to students in the form of tuition or fee remissions is included. College work-study funds are excluded and are reported under the program in which the student is working. In the tabulations in this volume, Pell Grants are not included in this expenditure category.

Scholastic Assessment Test (SAT) An examination administered by the Educational Testing Service and used to predict the facility with which an individual will progress in learning college-level academic subjects.

School A division of the school system consisting of students in one or more grades or other identifiable groups and organized to give instruction of a defined type. One school may share a building with another school or one school may be housed in several buildings.

School administration support services Includes salary, benefits, supplies, and contractual fees for the office of the principal, full-time department chairpersons, and graduation expenses.

School climate The social system and culture of the school, including the organizational structure of the school and values and expectations within it.

School district An education agency at the local level that exists primarily to operate public schools or to contract for public school services. Synonyms are "local basic administrative unit" and "local education agency."

Science The body of related courses concerned with knowledge of the physical and biological world and with the processes of discovering and validating this knowledge.

Secondary instructional level The general level of instruction provided for pupils in secondary schools

(generally covering grades 7 through 12 or 9 through 12) and any instruction of a comparable nature and difficulty provided for adults and youth beyond the age of compulsory school attendance.

Secondary school A school comprising any span of grades beginning with the next grade following an elementary or middle school (usually 7, 8, or 9) and ending with or below grade 12. Both junior high schools and senior high schools are included.

Secondary enrollment The total number of students registered in a school beginning with the next grade following an elementary or middle school (usually 7, 8, or 9) and ending with or below grade 12 at a given time.

Senior high school A secondary school offering the final years of high school work necessary for graduation.

Serial volumes Publications issued in successive parts, usually at regular intervals, and as a rule, intended to be continued indefinitely. Serials include periodicals, newspapers, annuals, memoirs, proceedings, and transactions of societies.

Social studies A group of instructional programs that describes the substantive portions of behavior, past and present activities, interactions, and organizations of people associated together for religious, benevolent, cultural, scientific, political, patriotic, or other purposes.

Socioeconomic status (SES) For the High School and Beyond study and the National Longitudinal Study of the High School Class of 1972, the SES index is a composite of five equally weighted, standardized components: father's education, mother's education, family income, father's occupation, and household items. The terms high, middle, and low SES refer to the upper, middle two, and lower quartiles of the weighted SES composite index distribution.

Special education Direct instructional activities or special learning experiences designed primarily for students identified as having exceptionalities in one or more aspects of the cognitive process or as being underachievers in relation to general level or model of their overall abilities. Such services usually are directed at students with the following conditions: (1) physically handicapped; (2) emotionally handicapped; (3) culturally different, including compensatory education; (4) mentally retarded; and (5) students with learning disabilities. Programs for the mentally gifted and talented are also included in some special education programs. See also Handicapped.

Standardized test A test composed of a systematic sampling of behavior, administered and scored according to specific instructions, capable of being interpreted in terms of adequate norms, and for which there are data on reliability and validity.

Standardized test performance The weighted distributions of composite scores from standardized tests used to group students according to performance.

Standard Metropolitan Statistical Area (SMSA) See Metropolitan Statistical Area (MSA).

Student An individual for whom instruction is provided in an educational program under the jurisdiction of a school, school system, or other education institution. No distinction is made between the terms "student" and "pupil," though "student" may refer to one receiving instruction at any level while "pupil" refers only to one attending school at the elementary or secondary level. A student may receive instruction in a school facility or in another location, such as at home or in a hospital. Instruction may be provided by direct student-teacher interaction or by some other approved medium such as television, radio, telephone, and correspondence.

Student support services Includes salary, benefits, supplies, and contractual fees for staff providing attendance and social work, guidance, health, psychological services, speech pathology, audiology, and other support to students.

Subject-matter club Organizations that are formed around a shared interest in a particular area of study and whose primary activities promote that interest. Examples of such organizations are math, science, business, and history clubs.

Supervisory staff Principals, assistant principals, and supervisors of instruction. Does not include superintendents or assistant superintendents.

Tax base The collective value of objects, assets, and income components against which a tax is levied.

Tax expenditures Losses of tax revenue attributable to provisions of the federal income tax laws that allow a special exclusion, exemption, or deduction from gross income or provide a special credit, preferential rate of tax, or a deferral of tax liability affecting individual or corporate income tax liabilities.

Technical education A program of vocational instruction that ordinarily includes the study of the sciences and mathematics underlying a technology, as well as the methods, skills, and materials com-

monly used and the services performed in the technology. Technical education prepares individuals for positions—such as draftsman or lab technician—in the occupational area between the skilled craftsman and the professional person.

Total expenditure per pupil in average daily attendance Includes all expenditures allocable to per pupil costs divided by average daily attendance. These allocable expenditures include current expenditures for regular school programs, interest on school debt, and capital outlay. Beginning in 1980–81, expenditures for state administration are excluded and expenditures for other programs (summer schools, community colleges, and private schools) are included.

Trade and industrial occupations The branch of vocational education which is concerned with preparing persons for initial employment or with updating or retraining workers in a wide range of trade and industrial occupations. Such occupations are skilled or semiskilled and are concerned with layout designing, producing, processing, assembling, testing, maintaining, servicing, or repairing any product or commodity.

Transcript An official list of all courses taken by a student at a school or college showing the final grade received for each course, with definitions of the various grades given at the institution.

Trust funds Amounts collected and used by the federal government for carrying out specific purposes and programs according to terms of a trust agreement or statute, such as the social security and unemployment trust funds. Trust fund receipts that are not anticipated to be used in the immediate future are generally invested in interest-bearing government securities and earn interest for the trust fund.

Tuition and fees A payment or charge for instruction or compensation for services, privileges, or the use of equipment, books, or other goods.

Unclassified students Students who are not candidates for a degree or other formal award, although they are taking higher education courses for credit in regular classes with other students.

Unadjusted dollars See *current dollars*.

Undergraduate students Students registered at an institution of higher education who are working in a program leading to a baccalaureate degree or other formal award below the baccalaureate, such as an associate degree.

Unemployed Civilians who had no employment but were available for work and: (1) had engaged in any

specific job seeking activity within the past 4 weeks; (2) were waiting to be called back to a job from which they had been laid off; or (3) were waiting to report to a new wage or salary job within 30 days.

U.S. Service Schools These institutions of higher education are controlled by the U.S. Department of Defense and the U.S. Department of Transportation. The 10 institutions counted in the NCES surveys of higher education institutions include: the Air Force Institute of Technology, Community College of the Air Force, Naval Postgraduate School, Uniformed Services University of the Health Sciences, U.S. Air Force Academy, U.S. Army Command and General Staff College, U.S. Coast Guard Academy, U.S. Merchant Marine Academy, U.S. Military Academy, and the U.S. Naval Academy.

University An institution of higher education consisting of a liberal arts college, a diverse graduate program, and usually two or more professional schools or faculties and empowered to confer de-

grees in various fields of study. For purposes of maintaining trend data in this publication, the selection of university institutions has not been revised since 1982.

Visual and performing arts A group of instructional programs that generally describes the historic development, aesthetic qualities, and creative processes of the visual and performing arts.

Vocational education Organized educational programs, services, and activities which are directly related to the preparation of individuals for paid or unpaid employment, or for additional preparation for a career, requiring other than a baccalaureate or advanced degree.

Vocational home economics Vocational courses of instruction emphasizing the acquisition of competencies needed for getting and holding a job or preparing for advancement in an occupational area using home economics knowledge or skills.
