

Filing and Storage Products

STORAGE
OPTIONS

An Inspired Collection Of Filing and Storage Product

The Opus Group is a comprehensive collection of storage options for the information age. They're strong... hardworking... and built with the superior quality and special features to stand up to years of service life. But they're priced to give you outstanding value.

The Opus Group products adapt easily to the growing demands of multiple media. They offer patented security features to safeguard contents. And they're easily reconfigured, re-keyed or retrofitted for evolving requirements.

The Opus Group. Flexible storage solutions for the contemporary workplace.

Lateral Files

Storage Cabinets

Pedestal Files

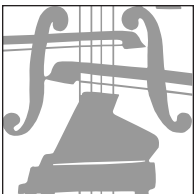

Optional Fronts

Vertical Files

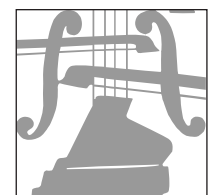

Bookcases

LATERAL
FILES

The Opus Group lateral files work with the broad vocabulary of systems products. Designed to fully integrate into both systems and freestanding furniture environments, they offer a level of compatibility beyond finish-matching. Even the pre-configured options meet most of today's demands.

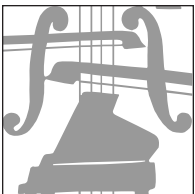

STORAGE
CABINETS

Functional and versatile, **The Opus Group** storage cabinets can be configured for shelf, wardrobe or media requirements. Lateral files can be integrated into the cabinets to combine filing and storage functions. Custom applications or future retrofitting can be accommodated by specifying lateral file components.

Provide maximum storage space. Use stackable storage components which rest securely on top of primary filing or storage units.

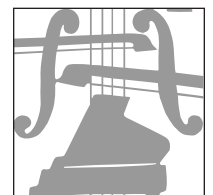

PEDESTAL
FILES

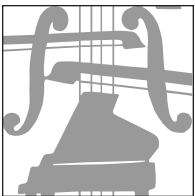

The multiple drawer options of **The Opus Group** pedestal files meet varying personal storage needs. Freestanding and mobile pedestals bridge the gap from conventional to systems furniture. Together with hanging pedestal files, they round out the comprehensive functional needs of your workspace.

In today's teaming environments, you'll especially enjoy **The Opus Group** mobile pedestal. You can add a cushioned pedestal top to transform your filing pedestal to a front-row seat! (Shown in the Classic XXI System Brochure.)

OPTIONAL
FRONTS

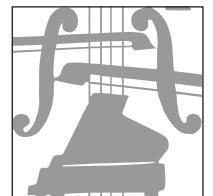

From transitional to contemporary, **The Opus Group** gives a stylish new look to the practical steel cabinet. You can select drawer-face and drawer-pull options to marry the aesthetics of the open-office landscape or the private-office suite, without sacrificing structural integrity. **The Opus Group** is more than just a pretty face!

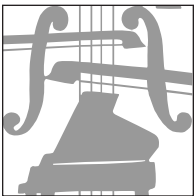

VERTICAL
FILES

In **The Opus Group**, the vertical files have the standard space-saving dimensions and maximum filing capacity you'd expect. But they deliver an important difference. They afford high-end features at a competitive price. They're complete with adjustable leveling glides, safety interlocks and a removable core lock for keying compatibility.

BOOKCASES

The complete design solution is possible with **The Opus Group**. Meet open-storage needs with multi-dimensional steel bookcases. Available in two depths—12" for books, and 15" for binders—they come in several widths and heights to meet end-user needs. Their reinforced adjustable shelves go the extra mile in supporting volume loads.

Offered in both standard and accent finishes, **The Opus Group** bookcases work with countless office product lines in today's marketplace.

THE OPUS GROUP

Locks are standard & feature removable plugs with high-security, single bit keys.

Double wall doors resist warpage.

Doors operate on durable pin hinges. Door stops prevent over-travel.

All units meet or exceed ANSI/BIFMA standards.

Uprights are punched on 1 1/2" intervals to optimize internal component placement.

A full range of interior options "snap fit" into cabinet uprights.

Posting shelf pulls out for an additional worksurface area.

Extra-deep, full-width finger pull provides easy access from any position.

Nylon button glides eliminate metal-to-metal contact when operating heavily loaded drawers.

Drawer bodies notched for legal, letter and A4 metric hanging folders.

Patented safety interlock ensures that only one drawer will extend at a time. Automatic restage feature eliminates the possibility of damage.

Corner glides are adjustable from both inside and outside the cabinet.

Drawer body is offset to prevent sagging.

Heavy-gauge top reinforcement strengthens lock mechanism and cabinet top.

All surfaces are chemically etched to ensure permanent bonding of the two stage powder paint. The baked-on finish is scratch- and stain-resistant.

Constructed of 18 and 20 ga. cold-rolled steel, formed in key areas to increase strength.

Integral door pull provides clean appearance and no exposed edges.

Patented, direct-drive lock mechanism provides positive operation and enhances tamper resistance.

Rigid tie bar further enhances shell strength.

Heavy-gauge steel folder bars are offset to resist warpage and deflation.

All components "snap-fit" into uprights for ease of reconfiguration.

Heavy-duty, three-stage ball bearing suspension allow drawers to extend beyond the cabinet.

Bumpers cushion inward and outward movement and retain drawers, to prevent "bounce back" after closing.

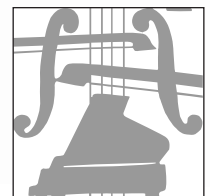

Lock bars and tamper-resistant lock hooks located at each side of the cabinet maximize security.

Front uprights and top and bottom reinforcements are welded to form a rigid box frame construction.

Full-width front and back bottom reinforcements minimize damage when moving the cabinet.

The benefits of **The Opus Group** storage and filing cabinets have been combined into a single, next-generation system that offers the best of all worlds. The integral all-in-one system delivers convenience, strength and security for an unmatched storage value.

LATERAL FILES

Extendible posting shelves are available on all lateral files. Perfect when you need a space to rest a notepad, the shelf fits into a 1 1/2" opening on the lateral file.

Users can configure the 6" drawers to hold diskettes, microfiche, stationery or other miscellaneous items.

Heavy-gauge drawers accept legal, letter and metric-size hanging folders. Lock bars and tamper-resistant lock hooks ensure security.

Security for multiple users is provided with an individual core-removable lock that can be interchanged with any lock in **The Opus Group** system.

STORAGE CABINETS

Interior components are easily installed and reconfigured with the 1 1/2" design, allowing cabinets to be adapted as storage requirements change.

A durable inner and outer skin on the cabinet doors enhances strength and prevents warping.

Reliable pin hinge safety mechanisms work in unison with the retainer to prevent cabinet doors from swinging outward against adjacent cabinets.

Door pulls are recessed the full height of the cabinet to increase safety and enhance the appearance of the cabinet.

PEDESTAL FILES

An installer-friendly design allows hanging pedestals to be easily attached by a single installer.

Soften the look of the linear office with the rounded vertical edges of the radius pedestal.

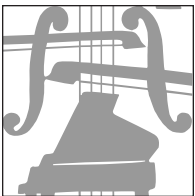

Credenza files are height-compatible with work-surface-supporting pedestals. Units are offered in file/file or box/box/file drawer combinations.

Cabinet drawers operate smoothly on ball bearing suspensions. Screw mounts allow drawer fronts to be changed in the event of damage.

The Opus Group products meet or exceed ANSI/BIFMA standards.

OPTIONAL
FRONTS

Handsome painted center pulls accent custom laminate or wood cabinet fronts.

A full-width pull augments the design of laminate fronts. Pulls may be contrasting or color-matched.

Cabinets are offered without fronts to allow custom facings to be attached on-site.

VERTICAL
FILES

Ball bearing side-arm suspension ensures drawers glide smoothly. Full-drawer extension offers unrestricted access to contents.

Patented interlocks safeguard users by preventing more than one drawer from opening at a time.

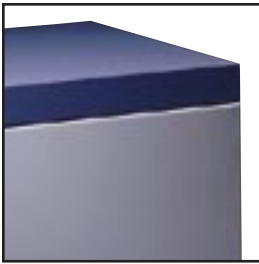

Integral strength throughout the cabinet is achieved with heavy top and bottom bracing.

Cabinets are quickly and easily leveled with adjustable glides.

BOOKCASES

Laminate tops create design continuity with existing office furnishings.

A seamless back allows the bookcase to be used as a room divider.

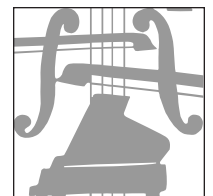

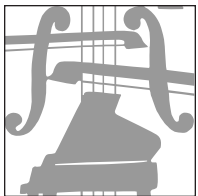

Easy-to-install glides adjust from the inside of the cabinet and minimize the possibility of accidental tipping.

Shelves adjust easily into position in 1" increments. Binders can be accommodated in all shelf openings.

The Opus Group products meet or exceed ANSI/BIFMA standards.
