

***Facility Manager
Canaveral National Seashore***

Vince DiDio

I started my career with the National Park Service in 1985 and transferred to Canaveral National Seashore in 1992 as the Facility Manager. This has truly been a rewarding experience and one in which I take great pride. My job is to develop and manage a program of work which will effectively maintain and repair the Seashore's infrastructure of buildings, roads, grounds, trails and utility systems. I am fortunate to work with a staff who also shares the pride of maintaining one of our Nation's great treasures, Canaveral National Seashore.

Primary Division Responsibilities

- Administration of Routine Maintenance Programs (daily operations).
- Conduct regular facility inspections on all park assets.
- Procurement of funding through various programs for the construction, maintenance and repair of park assets.
- Development of long and short range plans for facility management.
- Hazardous Waste Management.
- Recycling activities.
