

Building an Industry Leading Green Supply Chain

BE Green...BUY Green

M. Bridget Reidy
Senior Vice President
Chief Supply Officer

The Exelon 2020 Goal and Plan Overview

Exelon 2020 Goal

Reduce, offset or displace more than 15 million metric tons of greenhouse gas emissions per year by 2020

Exelon 2020 Plan

1. Reduce or Offset Exelon's Carbon Footprint

2. Help Our Customers Reduce Their Greenhouse Gas Emissions

3. Offer More Low-Carbon Electricity in the Marketplace

Building an Industry Leading Green Supply Chain...

Our Vision

Build an industry leading green supply chain that optimizes the environmental performance of our operations, the operations of our suppliers and the materials and services provided to Exelon while also creating business value

BE Green...BUY Green

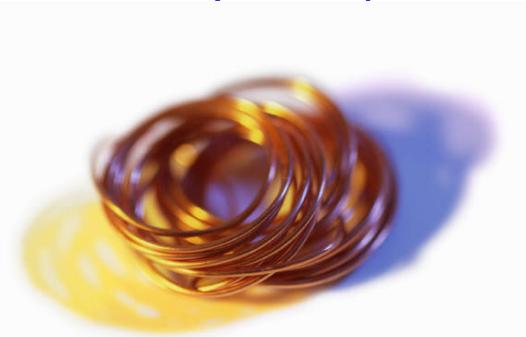

BE Green...Optimizing Our Operations

Buildings

Logistics

BUY Green...Supplier Operations

CDP Supply Chain Survey

- ◆ First U.S. based utility to join the Carbon Disclosure Project's Supply Chain Leadership Collaboration
- ◆ Begin dialogue with suppliers about environmental performance
- ◆ Baseline supplier performance
- ◆ Top 100 suppliers asked to participate
- ◆ Supplier support is critical

BUY Green...Supplier Operations

Supplier Criteria & Metrics

- ◆ We will not ask of our suppliers anything we are not committed to ourselves
- ◆ Implement supplier criteria immediately as part of sourcing process
- ◆ Communicate all metrics but phase in over time
- ◆ Help suppliers with resources, tools and support

BUY Green...Materials and Services Purchased

Electric Utility Supply Chain Alliance

- ◆ Value of collaboration - peers, suppliers and industry stakeholders
- ◆ 11 founding members with significant industry spend
- ◆ Develop supply chain and supplier criteria and metrics
- ◆ Use value stream mapping approach to identify highest impact commodity-specific opportunities
 - Poles and Transformers
- ◆ Develop a uniform supplier survey tool
