Washington, DC 20503

Dear Office of Information and Regulatory Affairs Hunt:

- The "OMB Draft Guidelines for the Conduct of Regulatory Analysis and the Format of Accounting Statements" determines that saving the life of an elderly person is worth less than saving the life of a younger person..
- If analysis is fully applied, regulations for air pollution, toxic waste cleanup, food labeling and other quality of life issues could be weakened or not even implemented at all—and our senior citizens will feel the brunt of it since their health is the most vulnerable to dirty air and unhealthy food.

Is my life less valuable because I am 70? The OMB's conclusion that my life is less valuable raises serious ethical, scientific and moral questions for this country.

Sincerely,

Rev. Miriam E. Chamberlain
