

unstable.
2) Under OSR 2.0 or 2.1, it works perfectly.
3) We still have no update pass on CSR issue.

Our questions are
1) How do you handle this kind of issue in US?
2) Can you negotiate with this kind of update issue with MS HQ? MSKK
has
negative reaction about this handling locally.

Regards,
Tetsu

David,

Thanks. Yes I need to be a part of these discussions. My team has
taken
over the responsibility of working the Microsoft relationship with all
the
Product Divisions from Steve Flannigan's Corporate Development team.
Specifically we need to be in sync with aftermarket revenue plans of
Kurt
Losert for the Consumer Division and as MS has been adding On-Line
Services
and ISP's into Win 95 this concept now cuts across many of the Product
Divisions.

Thanks,
Steve

Steve - Per Mark Wozniak's request, I wanted to give you a heads up on
my discussions with Microsoft and the possibility of a revenue sharing
relationship in relation to their Internet Service Provider referral
server. My contact at Microsoft has been Joe Williams.

My marketing requirement for 2H97 is to deliver one step ISP access on
a
worldwide basis (minimum Tier 1 countries). Through Microsoft's
referral
server, Compaq will be able to deliver on that goal. The issue has been
would Microsoft be willing to share revenue from the ISP's with Compaq.
Last week, Joe confirmed that Microsoft had agreed in principal to the
concept of sharing revenue from the ISP's with Compaq.

We are currently waiting for a formal proposal that should arrive by middle of next week (1/22). Joe is getting approval through the various groups.

Please respond on how you would like the process to move forward once the proposal is received. Also be advised that Mike Heil has asked Kurt Losert to be involved in these discussions.

Look forward to speaking with you next week.

thanks

david

Tom,

Thanks. Personally I think that without the pricing or knowing how restrictive MS will be relative to policing the channels (key issues from before), not sure how much real progress was made! I'll try to get in the loop here.

Steve
