Internet Options

General Security Content Connection Programs Advanced

You can specify different security settings for different zones of Web content.

Zone: **Internet zone** [Reset]

Internet zone

This zone contains all Web sites you haven't placed in other zones.

Set the security level for this zone:

High (most secure)
Exclude content that could damage your computer.

Medium (more secure)
Warn before running potentially damaging content.

Low
Do not warn before running potentially damaging content.

Custom (for expert users)
Base security on settings you choose.
