

Prototype Removal Program Instructions

The prototype removal program is meant to be run on a machine with only Windows 98 installed, before any other software is installed.

To run the prototype removal program, first insert the "IEREM" CD into the CD-ROM drive. Double-click on My Computer. Then double-click on the CD-ROM drive. Finally, double-click the "ierem" icon to launch the program.

When the program is finished, it will prompt the user to restart the machine. Restart the machine.

Prototype Reinstallation Program Instructions

The prototype reinstallation program is meant to be run on a machine on which the prototype removal program has been run.

To run the prototype reinstallation program, first insert the "IESETUP" CD into the CD-ROM drive. Double-click on My Computer. Then double-click on the CD-ROM drive. Finally, double-click the "setup" icon to launch the program.

When the program is finished, it will prompt the user to restart the machine. Restart the machine.
