To: Brad Silverberg; Russell Stockdale; Brad Chase
Subject: RE: WW ISP List and IE Status

I'm going to add a few things to this spreadsheet:

- 1.) track whose website is hosted on NTS and what they support for comm'l web hosting (Unix, NTS)
- 2.) IE logo on website?
- 3.) exploit IE extensions?
- 4.) Support Front Page extensions
- 5.) monthly/qtrly IE shipments as we get this data (which is starting now)

Comments, others ideas?

WW ISP List & Status

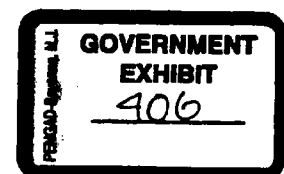

From: Cameron Myhrvold
Sent: Monday, June 17, 1996 10:23 AM
To: Brad Silverberg
Subject: WW ISP List and IE Status

Here is a draft of my attempt to put together a single list and view for tracking the top ISPs WW and also our success and status in getting them to embrace IE. Check it out and please give me feedback. It is not done and something I want to develop into being our overall scorecard.

A couple things I know I want to do is to break out AOL and CIS numbers by country. I'd also like to add MSN for comparison (and remind folks that there are other partners we have to be working with).
