Mane Andreasson Family
M: G. Olson VP. m. l. h.
Jim Berchdale CEO
Ravi Sharma Dir. of Strategic & DBM Sales

Berchdale - who gets to move here & how much
- how much is left for partners - if profitable

Yonah - what are viewers
M: G. Olson - what are blocked viewers format
~~Berchdale - what are viewers~~

Berchdale - deal of Adobe about publishing -
Olson - how is availability of BB tools

M: G. Olson - N. Party alpha, set out mid July
M: G. Olson - how fast? - 1/11/98?

M: G. Olson - what are copyright APPLs
M: G. Olson - why should we do copyright APPLs
when we have already done the work
M: G. Olson - why isn't user separate on the Internet

Things went well - interested.

Berchdale - can get to user content without
being on MS & provide
M: G. Olson - there will be clear & APPL content to
avail to all browsers & some that is not.

(2)

Christie - if we had package contracts

Barberale - not such business for our all branches.

Corp. buyer might be interested in cross platform - see, 4.2.1

Kenner knewly a platform co, had used
blends this - it is central in budget
where we wanted to be a platform (not
not provider)

Kenner your ownership of platform
connected to MSN precludes us from
connecting

MetLife site not cheap deal -

May - willing to put on table a way in which
you can integrate w/ MSN

more it - Kenner key is not a front end software to MSN

A. Delhaert revenue model

note - You will prefer that content provider
be hosted on MSN.

Barberale MetLife right could be legally hosted
on MSN - billing

MSN bus model of cross subsidizing
one part of food chain w/ another

6 pm Alaska 423

9:52

Trans @ 11:45 come home

9:30 am

Michelle - need more info on platform

Bob - if you invite us to participate we will answer quickly - tell us exactly what you want us to do.

Bob - we want to build a product that your product is essential too - we are being slowed down

- if we had the doctoral relationship would this have happened - (7/8)

Meredith - if you had staff as part of platform

spend most of our time deciding what/low level stuff that we don't want to deal with

Michelle - just tell us what is going to be there

Bob - how critical is NE APP - who writes code (us + others)

Michelle - to extent that we know about what is happening

Don Ravi - Steve felt that Web will be planned & NT is preferred server

(all ~~agreed~~ agreed & said yes)

Michelle - what if we introduce communication server as G.I. Cello -

Meredith - great - we could stop dealing with these things

(4)

Mike

Mike - would you want to buy our common server

Debra - from line between common product

Mike - could accelerate adoption of NS services

will optimize for particular platform to extent it makes sense

could integrate new forms w/ Proclivity

- like letter into notes

Debra - what would it mean to be part of MSN
MSN to business customers

Mike - would internet & could incorporate
from expansion

Debra - that could go back to using it

Debra - they need terms soon

Mike - still prototype plans for client &
server platform

Debra - how do you want to put out of platform

Debra - come back to us with the lines

Mike - clear picture of Aug would be
a great start

Debra - send us a list of some of the
chase you would like to do in line
- what services you would like in network

Berkeley lab - what do you think we bring to the party.

it. cbs
cross appl. lab
learning team

→ Proposal for Berkeley -
conference
increase

Maria A - are you training grad students
cross platform discussion.

Daron H - XCL

6-22-85

comb on xl - ~~point~~ + function
Berkeley - is external reference -
automatic means to create a kernel
within on top of a cell(s)
- select cell(s), next hypothesis
create kernel obj.

work is on Daron's schedule
