

8. Network Usage and Growth

To monitor use of the public switched telephone network, the National Exchange Carrier Association (NECA) provides quarterly reports to the Commission on the monthly volume of switched interstate access minutes of use (MOU). To supplement this information, local telephone companies that settle on a cost basis (hereinafter referred to as cost companies) also provide, on an annual basis, their dial equipment minutes (DEM) and factors. The Joint Board recognizes that much of this information is not otherwise collected by any single entity and that reports can be received and consolidated by NECA. The data reported in this section include new data for 1997 and revisions of the data that were contained in our previous reports.¹ The minutes reported here are those minutes that pass through the incumbent local exchange carriers' switches.

This report includes monthly data, as of May 1999, on switched interstate telephone traffic as reflected in the NECA calculations of carrier common line (CCL) access minutes of use from January 1996 through March 1999.² Table 8.1 shows the latest available figures on minutes of use for interstate traffic for the total industry as reported by NECA, derived from the Common Line earned revenues. Tables 8.2 and 8.3 show the figures for large (Tier 1) and small (non-Tier 1) companies, respectively.³ These figures do not include the minutes from the closed end of WATS or 800/888/877 calls. Similar monthly data, extending back to mid-1985, are contained in earlier editions of this report. These are summarized in Table 8.4 on a quarterly basis.

Table 8.5 summarizes annual data for the total industry for 1980 through 1997 on local, state, interstate, and total DEM minutes. It also shows annual percentage growth rates and the distribution between categories of usage. Table 8.6 summarizes industry total loops from Table 3.12. Table 8.7 shows the average daily line usage. It is calculated from the values in Tables 8.5 and 8.6.

The NECA compilation of data provided at the study area level appears in Tables 8.8 through 8.20. These tables provide annual data for the years 1992 through 1997; similar data (for cost companies) going back to 1984 appear in the May 1993 Monitoring Report, and data going back to 1980 appear in the January 1992 Monitoring Report. In order to be responsive to state concerns, the study areas are sorted by state, and state totals or averages (where applicable) are provided. Within each state's listing, the study areas are arranged in numerical order by their

-
- 1 Presubscribed line data by study area for the years 1991 through 1996 were provided in the May 1997 Monitoring Report, but these data are no longer collected by NECA.
 - 2 New quarterly submissions will be placed on our **FCC-State Link** internet site (<http://www.fcc.gov/ccb/stats>) web page in the NECA data section.
 - 3 A Tier 1 carrier is a local exchange carrier that had \$112 million or more annually in revenue from regulated telecommunications in 1997. The non-Tier 1 companies include both Tier 2 cost companies and average schedule companies.

NECA study area code.⁴ The second column identifies whether a study area is part of a Tier 1 cost company, a Tier 2 cost company, or an average schedule company (designated by a 1, 2, or A, respectively). The data in these tables are revised and supersede the usage data in previous reports.⁵

Tables 8.8 through 8.14 provide data on interstate access minutes of use, including data for the study areas of average schedule companies. Table 8.8 presents data on originating premium minutes. Table 8.9 presents data on terminating premium minutes. Table 8.10 presents data on total premium minutes. Table 8.11 shows originating non-premium minutes. Table 8.12 shows terminating non-premium minutes. Table 8.13 shows total non-premium minutes. Table 8.14 has data on total interstate access minutes, calculated as the sum of the values in Tables 8.10 and 8.13.

Tables 8.15 through 8.18 provide data on dial equipment minutes. Table 8.15 has local minutes, Table 8.16 has state minutes, Table 8.17 has interstate minutes, and Table 8.18 has total minutes.

Tables 8.19 through 8.20 present data on interstate separations factors. Table 8.19 presents DEM factors for the years 1992 through 1997. These are the ratio of interstate DEM to total DEM. Table 8.20 presents weighted (or transitional) DEM factors. The transitional subscriber plant factors (SPF) for the years 1991 through 1996 appeared in Table 8.21 of the December 1998 Monitoring Report. Similar historical data for all cost company study areas appear in the May 1995 Monitoring Report. The transition has been completed and all SPF should be .25; therefore the table showing transitional SPF has been eliminated.

Table 8.21 provides a cross reference table of the NECA state codes that are part of their study area codes.

The following descriptions of the minutes of use measures are based on information provided by NECA:

Access MOU (both premium and non-premium) are "earned MOU" which are derived by dividing the premium or non-premium earned revenues by the corresponding rate. This definition of access minutes is in agreement with the tariff review plan and ARMIS reports. Access minutes of use generating revenues have been discounted, which can produce distortions in revenue amounts. Further, revenues are normalized to include changes in terminating/originating

4 A study area is usually an operating company's operations in one state. The first two digits of the NECA study area code identify the state, and the remaining four digits identify the study area. The numerical code for each state is shown in Table 8.21.

5 In cases where study areas have merged, the historical data have been restated to reflect the merger.

and percent interstate use factors, billing adjustments, and the imputations of access charges (where applicable). Revenues are also calendarized, which will change derived minutes.

Premium CCL access MOU consist of feature groups A, B and D traffic originating from or terminating at offices converted to equal access, and feature group C for non equal access end office(s) and interstate intraLATA MOU. Non-premium CCL access MOU consist of feature groups A and B traffic originating from or terminating at offices not converted to equal access, and feature group C for minutes associated with Other Common Carrier Interim NXX and 800/888/877 service.

Originating and terminating access MOU both include the domestic portions of international calls; i.e., outgoing international calls are counted only in the originating minutes and incoming international calls are counted only in the terminating minutes. Similarly, WATS and 800/888/877 calls are counted only in the terminating minutes, because the access charges are billed at the terminating rate.⁶ Finally, originating minutes include time for incomplete calls and setup time, which are not included in terminating minutes.

Total Dial Equipment Minutes represent all switched holding time minutes in a local dial office. DEM is defined in the FCC rules, Part 36, paragraph 125(b). It is composed of all originating and terminating exchange, MTS, 800/888/877, and out-WATS MOU. DEM represents exchange, LEC intraLATA and corridor toll, and feature group A, B, C, and D MOU. (Please note that due to its unique switching arrangements, feature group A in DEM includes both serving office and end office MOU.) DEM does not include MOU in directly terminated toll stations or similar facilities, because they do not use local dial office facilities. The interstate DEM include the domestic portions of international calls.

The state and interstate DEM include both intraLATA and interLATA minutes combined. The DEM differ from access MOU in that they include both ends of WATS and 800/888/877 calls, whereas access MOU include only one end of those calls because only one end is subject to access charges.

6 However, although WATS calls generate access minutes only at the terminating end of the call and 800/888/877 calls generate access minutes only at the originating end of the call, both types of minutes are counted in the terminating minutes.
