

Manufactures

This section presents summary data for manufacturing as a whole and more detailed information for major industry groups and selected products. The types of measures shown at the different levels include data for establishments; employment and wages; raw materials, fuels, and electricity consumed; plant and equipment expenditures; value and quantity of production and shipments; value added by manufacture; inventories; and various indicators of financial status.

The principal sources of these data are Bureau of the Census reports of the censuses of manufactures conducted every 5 years; the *Annual Survey of Manufactures*; and the *Current Industrial Reports* series, which presents monthly, quarterly, or annual data on production, shipments, and stocks for particular commodities. Indexes of industrial production are presented monthly in the Federal Reserve Board's *Federal Reserve Bulletin*. Reports on current activities of industries, or current movements of individual commodities, are compiled by such government agencies as the Bureau of Labor Statistics; the Economic Research Service of the Department of Agriculture; the International Trade Administration; and by private research or trade associations such as The Conference Board, Inc., New York, NY and the American Iron and Steel Institute, Washington, DC.

Data on financial aspects of manufacturing industries are collected by the Bureau of Economic Analysis (BEA) and the Bureau of the Census. Industry aggregates in the form of balance sheets, profit and loss statements, analyses of sales and expenses, lists of subsidiaries, and types and amounts of security issues are published for leading manufacturing corporations registered with the Securities and Exchange Commission. The BEA issues data on capital in manufacturing industries and capacity utilization rates in manufacturing. See also section 17, Business Enterprise.

Censuses and annual surveys.—The first census of manufactures covered the year 1809. Between 1809 and 1963, a census was conducted at periodic intervals. Since 1967 it has been taken every

In Brief

Personal computer shipments topped 14.8 million units in 1993.

1-megabit DRAM chips:

	1993
Revenue (millions)	\$2,031
Shipments (mil. units)	601

5 years (for years ending in "2" and "7"). Census data, either direct reports or estimates from administrative records, are obtained for every manufacturing plant with one paid employee or more.

The *Annual Survey of Manufactures* (ASM), conducted for the first time in 1949, collects data for the years between censuses for the more general measures of manufacturing activity covered in detail by the censuses. The annual survey data are estimates derived from a scientifically selected sample of establishments. The 1991 annual survey is based on a sample of about 55,000 establishments of an approximate total of 200,000. These establishments represent all manufacturing establishments of multiunit companies and all single-establishment manufacturing companies mailed schedules in the 1987 Census of Manufactures. The 1989 through 1993 ASM sample is similar to the previous sample. For the current panel, all establishments of companies with 1987 shipments in manufacturing in excess of \$500 million were included in the survey with certainty. For the remaining portion of the mail survey, the establishment was defined as the sampling unit. For this portion, all establishments with 250 employees or more and establishments with a very large value of shipments also were included. Therefore, of the 55,000 establishments included in the ASM panel, approximately 28,000 are selected with certainty. These establishments account for approximately 80 percent of total value of shipments in the 1987 census. Smaller establishments in the

remaining portion of the mail survey were selected by sample.

The basic statistical measures of manufacturing activity, such as employment, payrolls, value added, etc., are defined in essentially the same way for both the annual surveys and the census of manufactures. However, the bases for computing average employment vary for different years. For example, beginning with 1949, average employment was calculated from the figures reported for the pay periods ending nearest the 15th of March, May, August, and November; whereas, for 1947 such averages were based on 12 monthly employment figures. In 1967, the average employment calculation was revised to the pay periods which include the 12th of March, May, August, and November to provide data more comparable with other statistical series.

Establishments and classification.—

The censuses of manufactures for 1947 through 1987 cover operating manufacturing establishments as defined in the *Standard Industrial Classification Manual (SIC)*, issued by the U.S. Office of Management and Budget (see text, section 13). The *Manual* is also used for classifying establishments in the annual surveys. The comparability of manufactures data over time is affected by changes in the official definitions of industries as presented in the *Manual*. It is important to note, therefore, that the 1987 edition of the *Manual* was used for the 1987 census; and the 1972 edition of the *Manual* and the 1977 *Supplement* were used for the 1972 through 1982 censuses. For the censuses from 1947 to 1963, reports were required from all establishments employing one or more persons at any time during the census year. Beginning with the 1967 census, an effort was made to relieve the very small establishments from the necessity of filing a census report. Approximately 150,000 small single-unit manufacturing firms identified as having less than 20 employees (cutoff varied by industry) benefited from this procedure. Data for these single-unit companies were estimated on the basis of government administrative records and industry averages. Each of the establishments tabulated was classified in one of the approximately 459

manufacturing industries as defined by the *SIC Manual* in 1987. The *Manual* defines an industry as a number of establishments producing a single product or a closely related group of products. In the main, an establishment is classified in a particular industry if its production of a product or product group exceeds in value added its production of any other product group. While some establishments produce only the products of the industry in which they are classified, few within an industry specialize to that extent. The statistics on employment, payrolls, value added, inventories, and expenditures, therefore, reflect both the primary and secondary activities of the establishments in that industry. For this reason, care should be exercised in relating such statistics to the total shipments figures of products primary to the industry.

The censuses for 1947 through 1987 were conducted on an establishment basis. The term "establishment" signifies a single physical plant site or factory. It is not necessarily identical to the business unit or company, which may consist of one or more establishments. A company operating establishments at more than one location is required to submit a separate report for each location. An establishment engaged in distinctly different lines of activity and maintaining separate payroll and inventory records is also required to submit separate reports.

Durable goods.—Items with a normal life expectancy of 3 years or more. Automobiles, furniture, household appliances, and mobile homes are common examples.

Non-durable goods.—Items which generally last for only a short time (3 years or less). Food, beverages, clothing, shoes, and gasoline are common examples.

Statistical reliability.—For a discussion of statistical collection and estimation, sampling procedures and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1970*. See Appendix IV.

Gross Domestic Product

- Represents zero. NA Not available. X Not applicable. ¹ Represents the average of production workers plus all other employees for the payroll period ended nearest the 15th of March. ² Includes other industries not shown separately. ³ Manufacturing concerns often reported separately for central offices or auxiliaries which serve the manufacturing establishment of a company, rather than the general public. Separate reports were obtained from such units if at a different location or if they serviced more than one establishment.

¹ Includes central administrative offices and auxiliary units. ² Includes employment and payroll at administrative offices and auxiliary units. All employees represents the average of production workers plus all other employees for the payroll period ended nearest the 12th of March. Production workers represents the average of the employment for the payroll periods ended nearest the 12th of March, May, August, and November. ³ Includes extensive and unmeasurable duplication from shipments between establishments in the same industry classification. ⁴ Adjusted value added; takes into account (a) value added by merchandising operations (that is, difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) net change in finished goods and work-in-process inventories between beginning and end of year.

No. 1252. Index of Manufacturing Capacity: 1950 to 1994

[1987 output=100.] Annual figures are averages of quarterly data. Capacity represents estimated quantity of output relative to output in 1967 which the current stock of plant and equipment in manufacturing industries was capable of producing. Primary processing industries comprise textiles, lumber, paper and pulp, petroleum, rubber, stone, clay, glass, primary metals, fabricated metals, and a portion of chemicals. Advanced processing industries comprise chemical products, food, beverages, tobacco, apparel, furniture, printing and publishing, leather, machinery, transportation equipment, instruments, ordnance, and miscellaneous industry groups]

YEAR	Index of capacity	RELATION OF OUTPUT TO CAPACITY (percent)			YEAR	Index of capacity	RELATION OF OUTPUT TO CAPACITY (percent)		
		All manufacturing	Primary processing	Advanced processing			All manufacturing	Primary processing	Advanced processing
1950	29	83	88	80	1985	115	80	80	79
1955	36	87	92	84	1986	119	79	81	78
1960	44	80	80	80	1987	123	82	85	80
1965	54	90	91	89	1988	125	84	87	82

Export-Related Shipments

761

No. 1257. Employment Related to Manufactured Exports, by Industry: 1985 to 1991

[Total employment related to manufactured exports is the sum of employment directly calculated for the plants shipping the exported product, the supplying industries and service organizations, and the central offices and auxiliaries. For manufacturing industries, employment is limited to paid employees in manufacturing plants, while for nonmanufacturing it includes an estimate for working proprietors and partners]

No. 1258. Manufacturing Establishments—Export-Related Shipments and Employment, 1977 to 1990, and by Industry, 1991

[The export-related employment data do not include the jobs involved in the export of nonmanufactured goods and various services sold to foreign buyers. Thus, jobs in the manufacturing sector that relate to the export of nonmanufactured goods are excluded from the estimates. In addition, all of the indirect exports being reported are domestically produced; that is, they exclude imports. See source for further details on methodology]

X Not applicable. ¹ Standard Industrial Classification; see text, section 13. ² Includes total domestic and export shipments for all manufacturing establishments. ³ Includes only the value of manufactured products exported by the producing plants.

⁴ Employment is limited to paid employees in manufacturing plants producing the export product. The number of employees related to export shipments was calculated for each establishment, aggregated by industry and by States, and inflated to a level comparable to the plant value of exports reported in the official foreign trade statistics at port value.

Source of tables 1257 and 1258: U.S. Bureau of the Census, 1987 and 1992 Census of Manufactures and Annual Survey of Manufactures.

**No. 1259. Export-Related Shipments and Employment of Manufacturing Establishments,
by State: 1991**

(Export-related figures exclude jobs in the manufacturing sector that are involved in the export of nonmanufactured goods and various services sold to foreign buyers. In addition, all of the indirect exports being reported are domestically produced, that is they exclude imports. Includes central administration and auxiliary office employees)

NA Not available. ¹ Production represents total amount removed from fermenters, including distilling material, and includes increase after fermentation (by amelioration, sweetening, and addition of wine spirits). ² Barrels of 31 wine gallons. ³ Source: U.S. Bureau of the Census, *Census of Manufactures*, and *Annual Survey of Manufactures*. ⁴ Excludes alcohol produced for industrial use. ⁵ For spirits of 100 proof or over, a tax gallon is equivalent to the proof gallon; for spirits of less than 100 proof, the tax gallon is equivalent to the wine gallon. A proof gallon is the alcoholic equivalent of a U.S. gallon at 60 degrees F, containing 50 percent of ethyl alcohol by volume. ⁶ Includes ethyl alcohol. ⁷ A wine gallon is the U.S. gallon equivalent to the volume of 231 cubic inches. ⁸ Includes special natural wines. ⁹ Excludes distilling materials. ¹⁰ Includes champagne, other effervescent wines, and artificially carbonated wines.

Noils, and fiber ⁴	Mil. lbs.	24	24	20	21	21	23	19
Other fibers	Mil. lbs.	573	584	659	664	754	829	858
Knit fabric production	Mil. lbs.	1,662	1,935	1,901	1,963	2,179	2,185	(NA)
Rugs, carpet and carpeting	Mil. dol.	8,417	8,431	8,527	7,980	8,749	9,318	(NA)
Sheets	1,000 doz	15,505	15,663	15,408	14,001	15,198	16,734	(NA)
Pillow cases	1,000 doz	12,564	13,089	12,665	11,301	12,523	11,928	(NA)
Terry towels	1,000 doz	47,179	62,741	42,376	43,158	48,789	48,517	(NA)

NA Not available. ¹ Includes man-made fiber top converted from tow without combing. A number of companies were added for 1990 based on information in the 1987 Census of Manufactures. Data were received from these companies for 1990; therefore, the information shown for years prior to 1990 may not be directly comparable. ² These changes represent approximately 20 percent of the total fibers consumed on the woolen system and worsted combing. ³ Data are shown on a scoured basis for greasy wool.

⁴ Shorn and pulled wool of sheep excludes raw wool consumed in cotton system spinning to avoid disclosing figures for individual companies. ⁴ Includes reprocessed and reused wool, mohair, alpaca, vicuna, and other specialty fibers as well as tops and noils consumed in woolen spinning and mohair consumed in worsted combing. Does not include wool tops consumed in cotton system spinning.

No. 1285. Fluid Power Products—Shipments: 1988 to 1993

[In millions of dollars. Includes aerospace]

PRODUCT	Product code	1988	1989	1990	1991	1992	1993
Fluid power products, incl. aerospace		6,785	6,915	7,207	6,475	6,330	6,490
Hydraulic valves, nonaerospace type	34921	615	629	663	606	583	649
Pneumatic valves, nonaerospace type	34922	445	463	458	434	458	503
Aerospace type hydraulic & pneumatic valves	34923	400	451	498	527	443	357
Fittings for metal and plastic tubing	34924	460	505	500	471	516	557
Hydraulic and pneumatic fittings and couplings for hose (nonaerospace)	34925	649	625	620	552	630	663
Hydraulic and pneumatic hose or tube end fitting and assemblies (aerospace)	34926	327	336	394	386	354	302
Parts for hydraulic & pneumatic valves	34927	219	206	209	161	151	125
Filters for hydraulic and pneumatic fluid power systems	35692	310	352	385	409	395	434
Hydraulic and pneumatic cylinders etc.:							
Nonaerospace	35931	907	909	941	800	864	975
Aerospace	35932	636	646	636	510	479	457
Parts for hydraulic and pneumatic cylinders	35933	291	281	264	269	171	168
Hydraulic fluid power pumps and motors	35941	1,178	1,180	1,240	997	974	1,014
Parts for pumps and motors	35942	348	333	399	354	312	285

¹ Used in fluid and power transfer systems (nonaerospace). ² Includes parts for actuators, accumulators, cushions, and nonvehicular shock absorbers.

No. 1286. Selected Instruments and Related Products—Shipments: 1987 to 1993

[In millions of dollars]

PRODUCT	Product code	1987	1988	1989	1990	1991	1992	1993
Automatic regulating and control valves	34918	1,221	1,262	1,331	1,418	1,537	1,579	1,586
Solenoid-operated valves (except nuclear and fluid power transfer)	34919	327	338	374	346	360	405	408
Aeronautical, nautical, and navigational instruments	38121	2,270	2,365	2,521	2,518	2,672	2,519	2,146
Search & detection, navigation & guidance systems and equipment	38122	30,911	31,145	30,840	32,420	31,774	31,311	28,678
Laboratory apparatus and laboratory furniture	38210	1,549	1,565	1,698	1,675	1,612	1,715	1,587
Controls for monitoring residential and commercial environments and appliance	38220	2,093	2,207	2,224	1,982	1,982	2,197	2,270
Process control instruments	38230	4,084	4,348	4,743	5,224	5,230	5,731	5,918
Integrating and totalizing meters for gas and liquids	38242	589	610	647	725	698	727	739
Counting devices	38243	198	193	206	210	226	273	290
Motor vehicle instruments ²	38244	232	682	637	1,457	1,330	1,576	1,702
Integrating instruments, electrical	38251	401	388	401	396	390	439	461
Test equipment for testing electrical, radio and communication circuits, and motors	38252	6,144	6,248	6,134	6,156	6,525	6,493	6,626
Instruments to measure electricity	38253	647	663	620	586	584	558	526
Analytical, scientific instruments (except optical)	38260	3,046	3,442	4,042	4,412	4,519	4,886	4,999
Sighting, tracking, and fire-control equipment, optical type	38271	726	609	595	581	547	771	731
Optical instruments and lenses ³	38274	1,215	1,270	1,274	1,252	1,292	1,322	1,318
Aircraft engine instruments (except flight)	38291	520	505	508	579	682	590	554
Physical properties and kinematic testing equipment	38292	859	894	946	1,012	1,024	1,149	1,171
Nuclear radiation detection and monitoring instruments	38294	637	654	606	567	570	533	520
Commercial, geophysical, meteorological, and general purpose instruments	38295	358	1,072	1,035	1,140	1,335	1,361	1,215
Surveying and drafting instruments	38296	247	270	270	274	235	255	304

¹ Beginning 1987, includes laboratory furniture. Prior to 1987, laboratory furniture was included in product class 38296.² Beginning 1990, includes some data previously classified in product class 37149, "Other motor vehicle parts and accessories, new, n.e.c."³ Beginning 1992, product classes 38272, "Binoculars and astronomical instruments," and 38273, "Other optical instruments and lenses" were combined into product class 38274; prior years have been restated to reflect revision.Source: U.S. Bureau of the Census, *Current Industrial Reports*, MA38B, annual.**No. 1287. Robots—Shipments: 1987 to 1989**

[Based on a survey of all known manufacturers of robots, robot accessories, and components. Shipment value represents the net sales price, f.o.b. plant, to the customer or branch to which the products are shipped, net of discounts, allowances, freight charges and returns. A robot is a reprogrammable multifunctional manipulator designed to move materials, parts, tools, or specialized devices through variable programmed motions for the performance of a variety of tasks]

ROBOTS, ACCESSORIES, AND COMPONENTS	QUANTITY (number)			VALUE (mil. dol.)		
	1987	1988	1989	1987	1988	1989
Robots, robot accessories, and components	(X)	(X)	(X)	284	238	256
Robots, complete	6,037	4,603	2,217	220	164	151
Servo-controlled robots	2,677	2,072	1,840	203	138	136
Point-to-point type:						
Welding, etc.	675	304	273	65	32	29
Foundry, forging, and/or heat treating ¹	28	31	34	3	3	9
Assembly for nonelectronic/elec. prods.	535	296	238	20	8	8
Material handling and/or parts transfer	726	247	162	48	27	26
Continuous-path type:						
Welding, etc.	110	79	31	9	4	2
Spraying, painting, gluing, and/or sealing	297	292	254	41	30	35
Fettling/grinding/polishing, and/or deburring ²	306	823	848	17	33	26
Nonservo-controlled robots	215	336	377	8	17	15
Other robots	3,145	2,195	(³)	9	9	(³)
Robot accessories, subassemblies, etc	(X)	(X)	(X)	65	74	105
Miscellaneous receipts	(X)	(X)	(X)	8	6	3

¹ X Not applicable. ¹ Includes all point-to-point robots, except assembly, material handling, and/or parts transfer.² Includes other continuous-path type, not elsewhere classified. ³ Beginning 1989, data no longer available for other robots which included education hobby, experimental, and nonindustrial robots.Source: U.S. Bureau of the Census, *Current Industrial Reports*, MA35X(89-1).
