Industrial Outlook

This new section presents statistics for major manufacturing groups and selected products. The 199 industries covered were among those featured in the *U.S. Industrial Outlook* published by the Department of Commerce's International Trade Administration (ITA) for many years. The 1994 edition of the *U.S. Industrial Outlook* was the last volume published in that series of publications.

The 92 tables combine industry and product shipments data from the *1992 Census of Manufactures* and estimates for 1993 and 1994 by ITA's analysts. The estimates were prepared in the spring of 1995 prior to the release of *1993 Annual Survey of Manufactures* results. The tables also contain employment, wages, capital expenditures, import and export data.

The value of shipments shown in these tables are expressed both in "current" and "constant" dollars. Current dollars show the value of the goods produced in the particular year referred to. Constant dollars, or sometimes referred to as changes in real dollars, show the value of a year's output in the prices of a base year so you can accurately compare real changes in output levels over time. In these tables the base year was 1987. ITA uses the Producer Price Index (for more information, see text, section 15) from the Bureau of Labor Statistics at the

product level to deflate the current dollar shipments.

The tables distinguish between industry and product shipments. Shipments data are collected separately for individual factories, or establishments, and not at the company level. Most factories make a variety of products. For statistical purposes, each is an establishment classified in the industry identified with its major product. For instance, the total output of a plant may consist of 80 percent tires and 20 percent hose and belting. In this case, the total output of the plant would be credited to the tire industry. The total output of all plants so classified would make up the "industry shipments" of the tire industry in this case. The value of all tires shipped by all establishments is aggregated to derive "product shipments."

Trade data shown in the tables were tabulated following the Bureau of the Census' trade concordance, as adjusted by the ITA's analyst, to approximate the Standard Industrial Classification (SIC) industry grouping. The trade figures reflect final 1993 estimates and preliminary 1994 data. Exports are limited to domestic exports and are valued "free alongside ship" or f.a.s. Imports are restricted to goods imported for consumption and are on a customs value basis.

No. 1431. Recent Trends in Oil and Gas Field Machinery (SIC 3533): 1989 to 1995

ITEM	Unit	1989	1990	1991	1992	1993	1994	1995 ¹
INDUSTRY DATA								
Value of shipments ²	Mil. dol.	3,314	3,635	4,073	3,918	3,740	3,753	4,109
Value of shipments (1992 dollars)	Mil. dol.	3,521	3,763	4,001	3,918	3,762	3,672	3,913
Total employment	1,000.	26.1	27.2	28.7	27.0	24.5	25.4	24.5
Production workers	1,000.	14.7	15.3	16.0	15.4	13.8	14.7	14.5
Average hourly earnings	Dollar	12.99	13.11	13.51	13.62	14.22	15.59	(NA)
Capital expenditures	Mil. dol.	77.1	72.2	99.7	105.0	79.8	77.6	(NA)
PRODUCT DATA								
Value of shipments ³	Mil. dol.	2,829	3,013	3,400	2,981	2,939	2,884	3,157
Value of shipments (1992 dollars)	Mil. dol.	3,007	3,119	3,339	2,981	2,956	2,822	3,007
TRADE DATA								
Value of imports	Mil. dol.	35.5	52.4	64.4	36.2	47.8	67.9	93.4
Value of exports	Mil. dol.	2,409	2,709	3,946	4,000	3,761	3,560	4,180

NA Not available. ¹ Estimate, except exports and imports. ² Value of all products and services sold by establishments in the oil and gas field machinery industry. ³ Value of products classified in the oil and gas field machinery industry produced by all industries.
