## Section 32

# 1997 Economic Census

---

This new section presents a variety of industry based information from the 1997 Economic Census. These statistics utilize the North American Industry Classification System (NAICS pronounced "Nakes").

On April 9, 1997, the Office of Management and Budget (OMB) announced its decision to adopt the North American Industry Classification System as the industry classification system used by the statistical agencies of the United States. NAICS replaced the 1987 Standard Industrial Classification (SIC). NAICS is based on a consistent, economic concept. Establishments that use the same or similar processes to produce goods or services are grouped together. The SIC, developed in the 1930s and revised periodically over the past 50 years, was not based on a consistent economic concept. Some industries are demand based while others are production based.

NAICS recognizes the changing and growing services-based economy of the United States and its North American neighbors. NAICS includes 1,170 industries of which 565 are service-based industries. The SIC had 1,004 industries of which 416 were service-related industries. NAICS recognizes 358 new industries, 250 of which are services producing industries. There are 20 sectors in NAICS of which 16 are services related. The SIC had 10 divisions of which 5 were service related.

NAICS provides for comparable statistics among the North American countries. In addition, it provides for more comparable information with the Internal Standard Industrial Classification of all economic activities (ISIC). The SIC did not. NAICS is a six-digit system that provides for comparability among the three countries at the five-digit level, albeit with a few exceptions. The SIC was a four-digit system that was not linked in any way to the systems of Canada and Mexico. A six-digit system was adopted for NAICS to provide for increased flexibility in the system. NAICS allows each country to recognize activities that are important in the respective countries but may not be large enough or important enough to recognize in all three countries. The sixth digit is reserved for this purpose. The nomenclature of the groupings within the system is different in NAICS. NAICS calls the highest level of aggregation in the system a sector; the SIC referred to this grouping as a division.

For more information on NAICS, users should consult the official 1997 U.S. NAICS Manual, *North American Industry Classification System—United States, 1997*, which includes definitions for each industry, tables showing correspondence between 1997 NAICS and 1987 SICs, and a comprehensive index. Also, the Census Bureau maintains a series of Web pages devoted to NAICS at <<http://www.census.gov/epcd/www/naics.html>>.
