

Business Enterprise

This section relates to the place and behavior of the business firm and to business initiative in the American economy. It includes data on the number, type, and size of businesses; financial data of domestic and multinational U.S. corporations; business investment, expenditures, and profits; sales and inventories; and business failures. Additional business data may be found in other sections, particularly 27 and 28.

The principal sources of these data are the *Survey of Current Business*, published by the Bureau of Economic Analysis (BEA), the *Federal Reserve Bulletin*, issued by the Board of Governors of the Federal Reserve System, the annual *Statistics of Income* reports of the Internal Revenue Service (IRS), *The Business Failure Record* and the *Business Starts Record* issued by The Dun & Bradstreet Corporation, Murray Hill, NJ, and *Fortune* and *The Fortune Directory*, issued by Time, Inc., New York.

Business firms—A **firm** is generally defined as a business organization under a single management and may include one or more establishments. The terms **firm**, **business**, **company**, and **enterprise** are used interchangeably throughout this section. A firm doing business in more than one industry is classified by industry according to the major activity of the firm as a whole. The industrial classification is based on the *Standard Industrial Classification (SIC) Manual* (see text, Section 13). The IRS concept of a business firm relates primarily to the legal entity used for tax reporting purposes. The IRS *Statistics of Income* reports present data, based on a sample of tax returns before audit, separately for sole proprietorships, partnerships, and corporations. Data presented are for active enterprises only. A **sole proprietorship** is an unincorporated business owned by one person including large enterprises with many employees and hired managers and part-time operations in which the owner is the only person involved. A **partnership** is an unincorporated business owned by two or more persons, each of whom has a financial interest in the business. The "persons" could be individuals, estates, trusts, other partnerships, or corporations. A **corporation** is a business that is

In Brief

Patents issued in 1996:	121,700
Percent issued to foreign country residents:	43%
Bankruptcies filed in 1997:	1,316,999
Business:	4.1%
Nonbusiness:	95.9%
Change from 1996	26.4%

legally incorporated under state laws. The IRS recognizes many types of businesses as corporations, including joint-stock companies, insurance companies, and unincorporated associations such as business trusts, etc. While many corporations file consolidated tax returns, most corporate tax returns represent individual corporations, some of which are affiliated through common ownership or control with other corporations filing separate returns.

Assets and liabilities—In its annual report, *Statistics of Income, Corporation Income Tax Returns*, the IRS presents balance sheet and income estimates for all active U.S. corporations. The Bureau of the Census issues the *Quarterly Financial Report for Manufacturing, Mining, and Trade Corporations* (QFR), which presents quarterly income account and balance sheet data for manufacturing, mining, and trade industries.

One of the most comprehensive measures of the investment position of the business sector (and the only measure adjusted to current replacement cost) is the BEA capital stock series. See *Survey of Current Business*, May 1997.

Income, profits, dividends, and taxes—Several agencies, among them IRS and BEA, compile corporate income account data. These data, however, are not comparable because of differing definitions and methods of compilation. A reconciliation of the two can be found in Table 8.23 of *Survey of Current Business*, published by BEA. The IRS publishes financial data for all business enterprises. These data appear in *Statistics of Income, Corporation Income Tax Returns*, and the *Statistics of Income Bulletin* (partnerships and sole proprietorships). Data on international income and taxes reported by U.S. corporations are also included in the *Statistics of*

Income Bulletin and in the periodic *Compendium of Studies of International Income and Taxes*. BEA's estimates of international investment income include receipts of income of U.S. direct investment abroad, payments of income on foreign direct investment in the United States, other private investment income receipts and payments (interest and dividends not included in direct investment), and U.S. Government interest receipts and payments. (See Section 28, Foreign Commerce and Aid.)

Corporate data issued by BEA are a part of its national income and product accounts (see text, Section 14). The primary sources for BEA estimates of profits, taxes, dividends, and undistributed profits are from the SOI tabulations. Various adjustments of IRS data are required by the national income treatment—particularly with respect to profits which would be disclosed if all tax returns were audited: depletion, capital gain or loss, treatment of bad debts, measurement of income received from abroad, and intercorporate dividends—to make the figures comparable with other entries in the national income accounts. For a discussion of two types of adjustments (inventory valuation and capital consumption), see text, Section 14. The BEA's corporate profits data also include net earnings of Federal Reserve banks, credit unions, private noninsured pension funds, and several quasi-government credit agencies not included in IRS data.

Changes in industry presentation—The country detail in this presentation is identical to that in the 1989 benchmark survey and in the intervening annual surveys. However, three changes have affected the industry detail. First, beginning with the publication of the preliminary 1994 benchmark survey results, the data for nonbank U.S. parents and foreign affiliates exclude savings institutions and credit unions. The change in coverage reflects the reclassification of savings institutions and credit unions from the "finance, except banking" industry (which is covered by the non-bank data) to the industry "depository institutions" (which will replace the industry "banking" in the publication of the final 1994 benchmark results). This change will not materially affect the comparisons of the data for 1993 with the data for 1994, because in 1993, only one U.S. parent and no foreign affiliates were classified as a savings institution or a credit union.

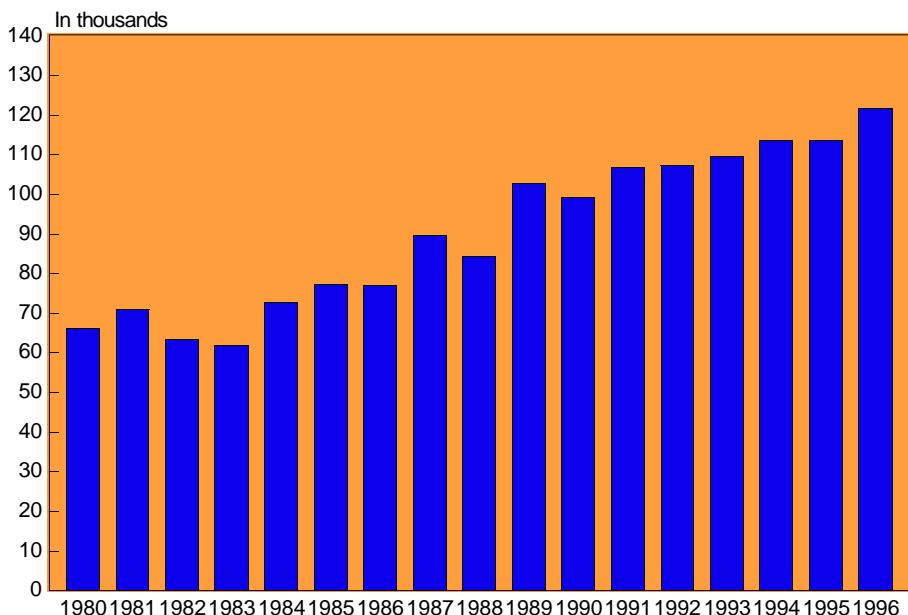

Second, beginning with the preliminary 1994 benchmark survey results, the "communication and public utilities" group was disaggregated, and the "metal mining" and "nonmetallic minerals mining" groups were aggregated, in the industry table stub. Third, beginning with the revised 1993 annual estimates, the names of two industry groups were changed; the group "machinery, except electrical" is now called "industrial machinery and equipment," and the group "electric and electronic equipment" is now called "electronic and other electric equipment."

Sources and uses of corporate funds—These data show capital requirements of corporations and the manner in which they are financed. Sources of funds should be equal to their uses.

Fortune 500—**Sales** include service and rental revenues but exclude dividends, interest, and other nonoperating revenues. **Assets** are those shown at the company's yearend. **Net income** is shown after taxes and after extraordinary credits or charges when any are shown on the income statement. **Stockholder's equity** is the sum of capital stock, surplus, and retained earnings at the company's yearend. **Total returns to investors** include both price appreciation and dividend yield. For further discussion, see Time, Inc., New York, NY, *The Fortune Directories*.

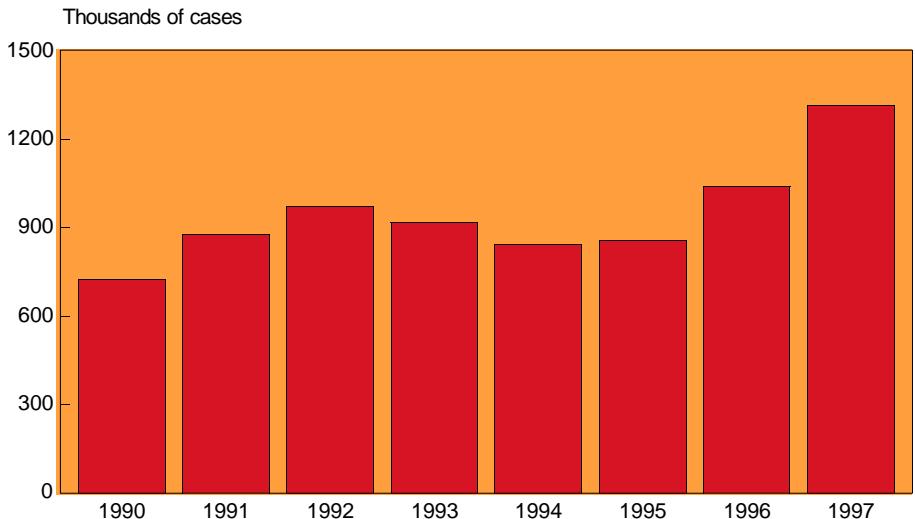

Economic censuses—The economic censuses constitute comprehensive and periodic canvasses of the Nation's industrial and business activities. The first economic census of the United States was conducted as part of the 1810 decennial census, when inquiries on manufacturing were included with the census of population. Minerals data were collected in 1840. The first censuses of construction and business were taken for 1929. An integrated economic census program was begun for 1954. In that year, the censuses covered the retail and wholesale trades, selected service industries, manufactures, and mineral industries. In 1992, coverage was expanded to 95 percent of the private U.S. economy. The economic censuses are taken at 5-year intervals covering years ending in "2" and "7." Special surveys are conducted every 5 years as part of the economic censuses to determine the extent of business ownership by specific minority groups and women.

NA Not available. ¹ Excludes investment income except for partnerships and corporations in finance, insurance, and real estate. Starting 1990, investment income no longer included for S corporations. S corporations are certain small companies with 35 shareholders (15 in 1980), mostly individuals, electing to be taxed through shareholders. ² Includes firms with no receipts.

³ Number of businesses for 1980. Number of nonfarm sole proprietorship returns is not available by size prior to 1981. However, the number of returns and the number of businesses are very closely related. The ratio of number of returns to the number of businesses is approximately 1 to 1.3.

No. 884. Mergers and Acquisitions—Summary: 1985 to 1996

[Covers transactions valued at \$5 million or more. Values based on transactions for which price data revealed. All activity includes mergers, acquisitions, acquisitions of partial interest that involve a 40% stake in the target or an investment of at least \$100 million, divestitures, and leveraged transactions that result in a change in ownership. Divestiture: sale of a business, division, or subsidiary by corporate owner to another party. Leveraged buyout: acquisition of a business in which buyers use mostly borrowed money to finance purchase price and incorporate debt into capital structure of business after change in ownership]

No. 891. Fixed Nonresidential Private Capital: 1980 to 1996

[In billions of dollars.] End-of-year stocks; depreciation over entire calendar year. Data refer to privately owned assets and are based on the fixed capital formation components of the gross domestic product. Excludes residential capital and government enterprises; includes nonprofit institutions. Net stock and depreciation estimates are usually based on geometric depreciation rates

**No. 895. Business Cycle Expansions and Contractions—Months of Duration:
1919 to 1996**

[A trough is the low point of a business cycle; a peak is the high point. Contraction, or recession, is the period from peak to subsequent trough; expansion is the period from trough to subsequent peak. Business cycle reference dates are determined by the National Bureau of Economic Research, Inc.]

BUSINESS CYCLE REFERENCE DATE		Contraction (trough from previous peak)	Expansion (trough to peak)	LENGTH OF CYCLE	
Trough	Peak			Trough from previous trough	Peak from previous peak
March 1919	January 1920	17	10	251	147
July 1921	May 1923	18 22		28	40
July 1924	October 1926	14 27		36	41
November 1927	August 1929	13 21		40	34
March 1933	May 1937	43 50		64	93
June 1938	February 1945	13 80		63	93
October 1945	November 1948	8 37		88	45
October 1949	July 1953	11 45		48	56
May 1954	August 1957	10 39		55	49
April 1958	April 1960	8 24		47	32
February 1961	December 1969	10 106		34	116
November 1970	November 1973	11 36		117	47
March 1975	January 1980	16 58		52	74
July 1980	July 1981	6 12		64	18
November 1982	July 1990	16 92		28	108

No. 907. U.S. Multinational Companies—Gross Product: 1994 and 1995

[In millions of dollars. Gross product measures valued added by a firm. Consists of nonbank U.S. parent companies and their nonbank foreign affiliates. A U.S. parent comprises the domestic operations of a multinational and is a U.S. person that owns or controls 10 percent or more of the voting securities, or the equivalent, of a foreign business enterprise. A U.S. person can be an incorporated business enterprise. A majority-owned foreign affiliate is a foreign business enterprise in which a U.S. parent company owns or controls 50 percent or more of the voting securities]

No. 908. U.S. Multinational Companies—Selected Characteristics: 1995

[Preliminary. In billions of dollars, except as indicated. Consists of nonbank U.S. parent companies and their nonbank foreign affiliates. U.S. parent is a U.S. person that owns or controls directly or indirectly, 10 percent or more of the voting securities of an incorporated foreign business enterprise, or an equivalent interest in an unincorporated foreign business enterprise. A U.S. person can be an incorporated business enterprise. A foreign affiliate is a foreign business enterprise owned or controlled by a U.S. parent company]
